

# How to install Everfilter image editing application on iPhone / iPad

Everfilter is a unique photo editing application in anime style, bringing unique artworks to users. With Android device, we will install apk file of Everfilter to use. As for iPhone / iPad device, how to use it?

Becoming a new trend, the Everfilter photo editing application has brought a completely different style when choosing the theme of anime animation as the main theme, just like Prisma when only editing photos in the style of Picasso art.

However, in order to be able to install and use the Everfilter application on Android devices, users need to download the APK file as the Network Administrator instructed readers in the article How to edit the anime style image using Everfilter Android. So what if you want to use the Everfilter application on an iOS device? As with Android, users also need to use it via a separate installation link. In this article, Network Administrator will show you how to install and use the Everfilter application on iPhone / iPad without jailbreaking.

## How to use Everfilter on iPhone / iPad does not jailbreak

First of all to be able to use Everfilter on iPhone / iPad users need to install .ipa file of Everfilter and Cydia Impactor application.

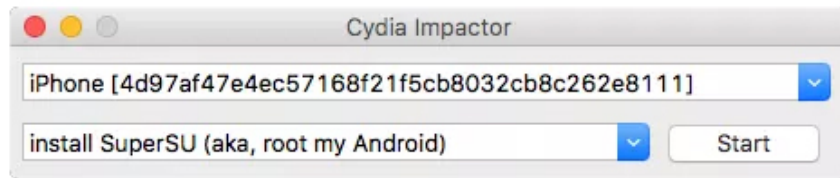

1. Download file .ipa iOS application Everfilter
2. Download the Cydia Impactor app

Next we install iTunes on the computer following the link below:

1. Download the free Windows iTunes application
2. Download the iTunes app for Mac

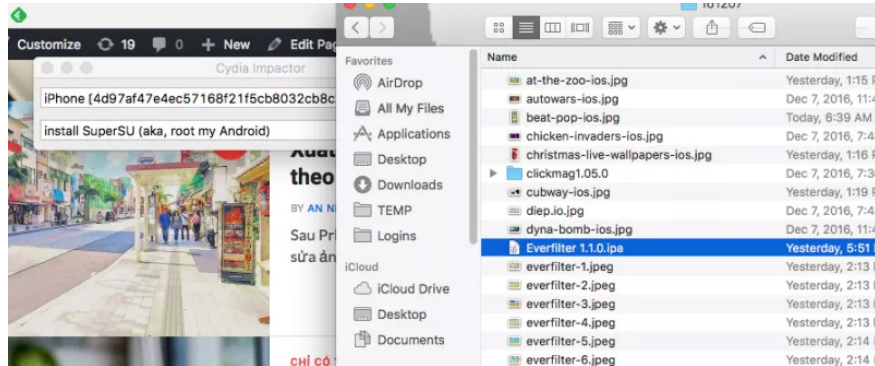

### Step 1:

First, connect your iPhone / iPad to your computer. After downloading Cydia Impactor, we proceed to run the application on the computer. You will then see the interface of Cydia Impactor as shown below:

## Step 2:

Next, open **Explorer on Windows** or **Finder on Mac** and **drag the .ipa Everfilter file into Cydia Impactor software** .

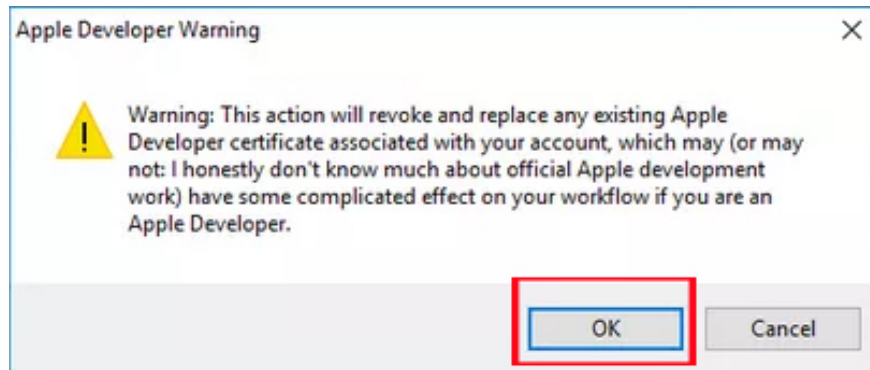

## Step 3:

Pop-up appears as shown below. We **enter the Apple ID and personal password** . Users can register for a new Apple account to use.

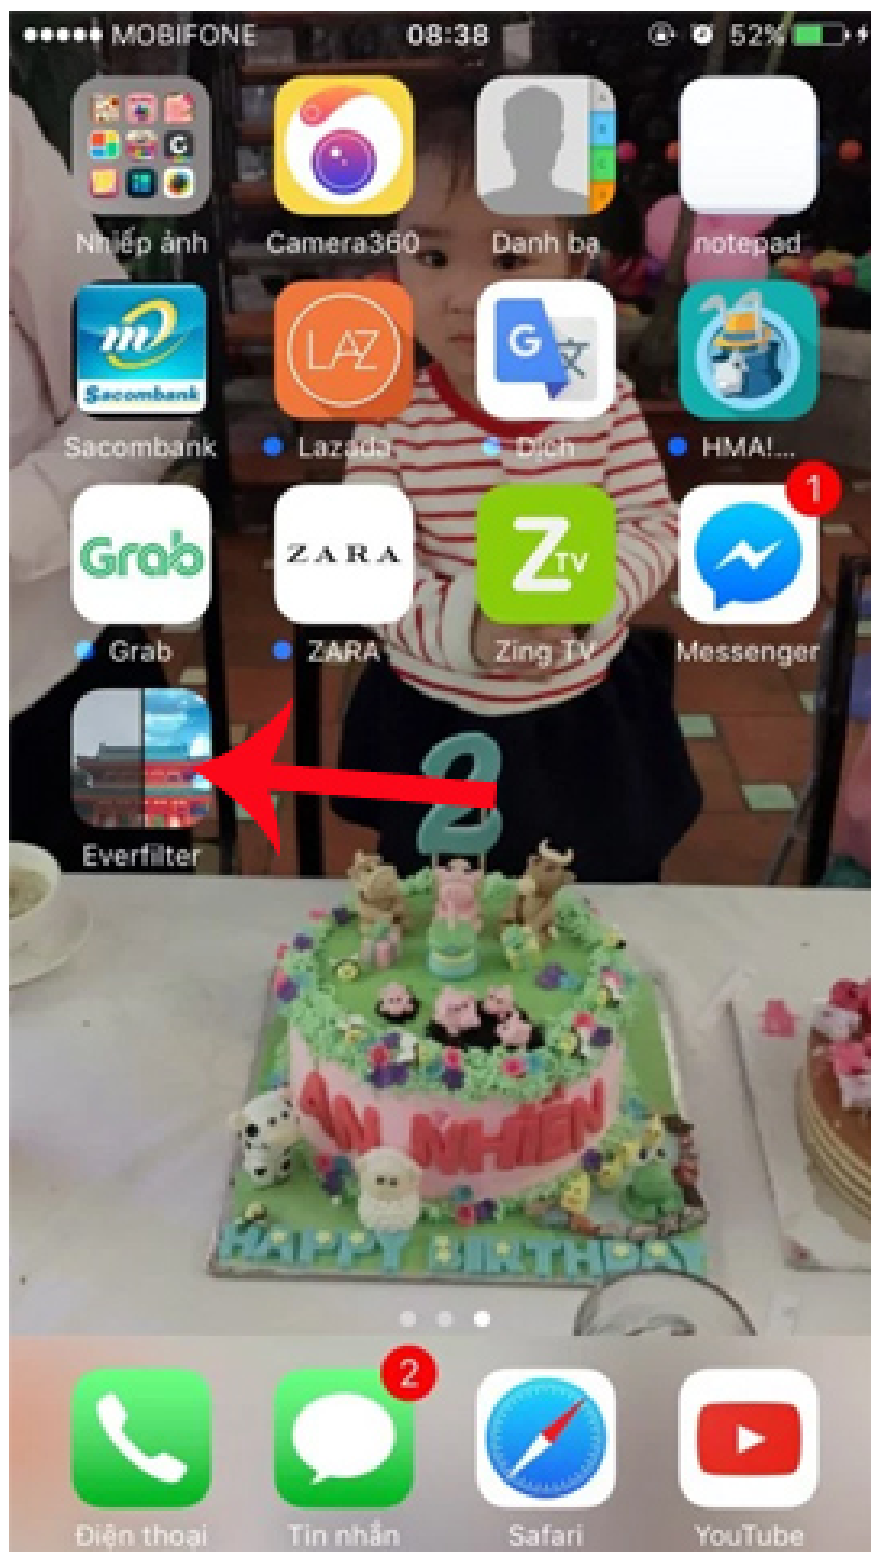

## Step 4:

When registering a valid account, we will receive the message as shown below. **Click OK** to install the Everfilter application to your iPhone / iPad device.

### Step 5:

Next you will see **the Everfilter application icon** on the device's interface. Please connect WiFi or 3G on the device. Next, go to **Settings> General settings> Device management** . Users will see the personal Apple ID account, **click on the account** and will receive the verification request of the Everfilter application. Click **Verify**

### Step 6:

After verifying for the Everfilter application on iPhone / iPad, appear interface Identified application as shown below, and you can immediately use Everfilter application on the device already.
