Live fish wallpapers - Apple's swimming fish wallpaper has been loved by many iPhone fans. If you want to install Apple fish wallpaper on iPhone running iOS 11 but can't find it in the wallpaper section, follow these steps to bring this wallpaper to your phone.

To install Apple's fish wallpaper for iPhone, you need to use 2 third-party applications.

1. The Documents by Readdle application to download the wallpaper
2. InLive application to convert it into Live photo.

Please download these 2 applications and install them on the device before starting.

Download wallpaper fish Live fish wallpapers on iPhone

First of all, you need to download this wallpaper and save it to Camera Roll.

Step 1 . Check out the 6 options below (.m4v video file) and pick out your favorite wallpaper then download them.

1. The fish is blue / yellow on a black background
2. Blue / white fish on a black background
3. Blue / red fish on a black background
4. Orange fish on a white background
5. Light blue fish on a white background
6. Blue / orange fish on a white background

You can see the short video below to figure out how the fish will appear on the screen

Just touch the wallpaper link you want to use ? tap and hold the link to copy.

1:24 PM

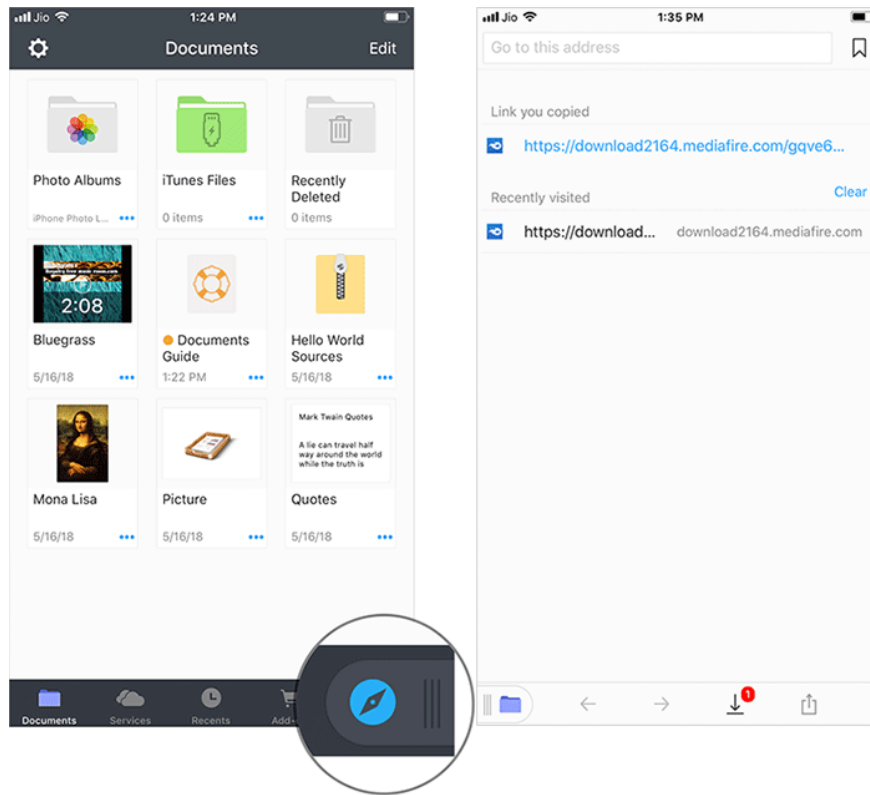

download2164.mea

Copy

Paste as

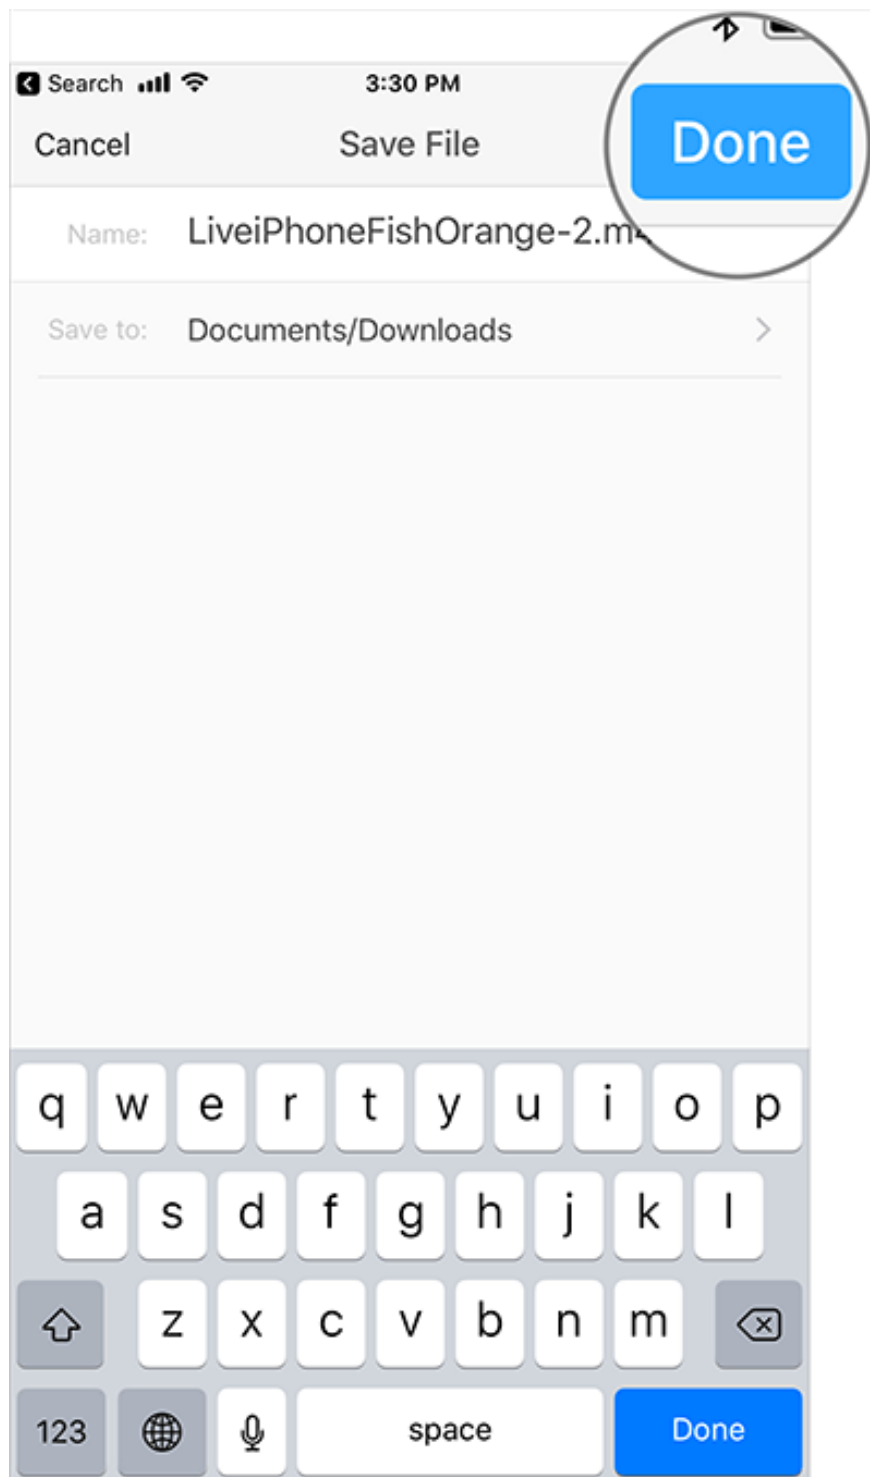

Step 2. Now, open the **Documents** app ? touch the web browser button at the bottom right. The link will be automatically pasted into the browser bar.

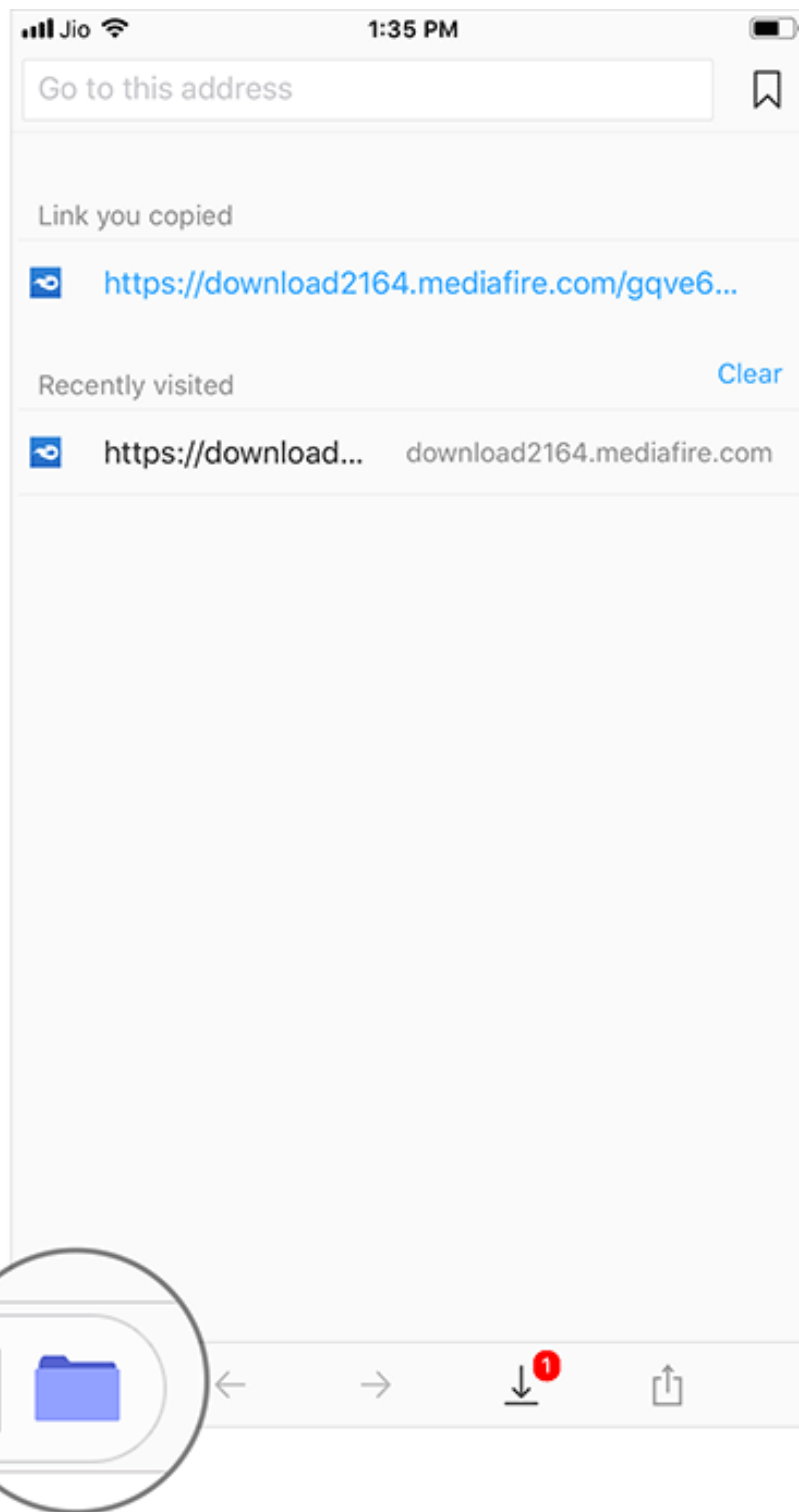

(Or, you will have to manually paste the link link into the address field.)

Step 3. You can change the name of the file (but do not change the file extension) and then click **Done** to save the file.

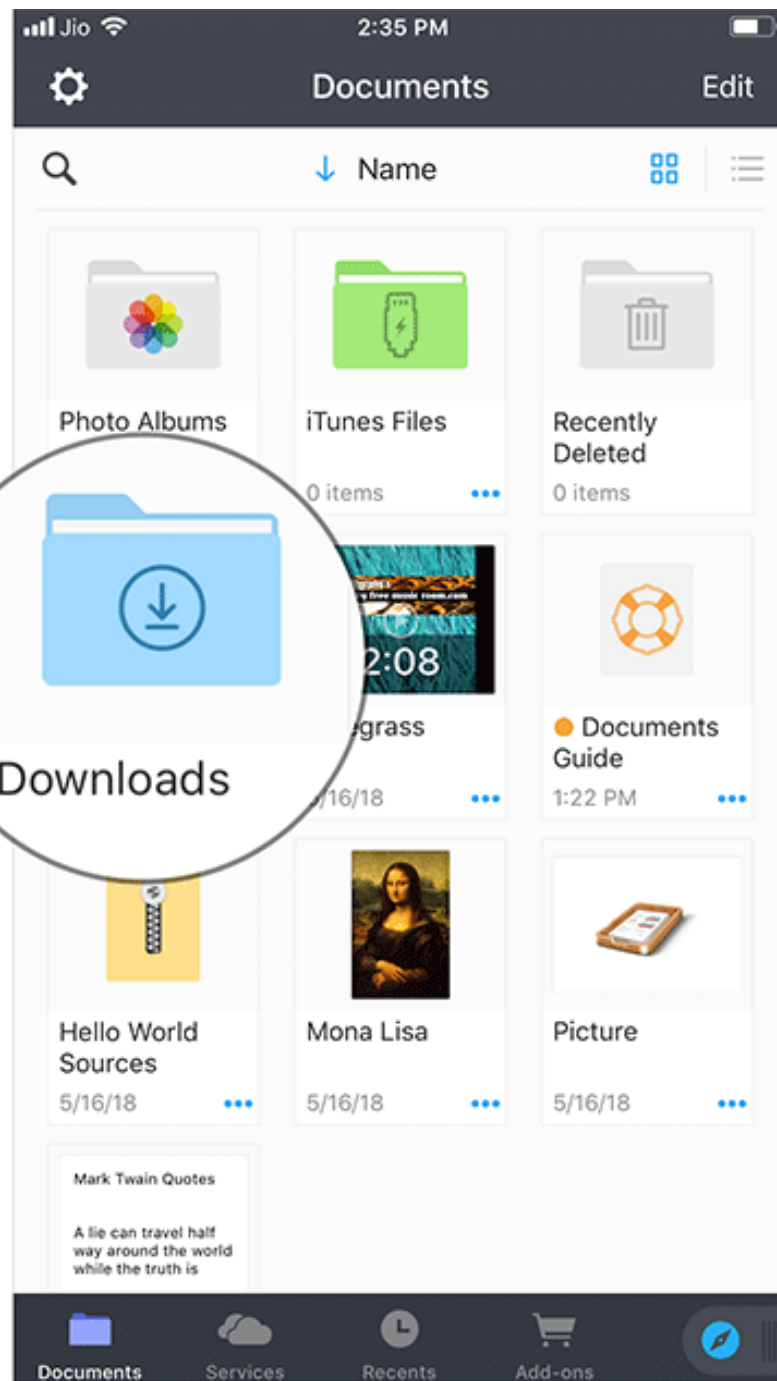

Transfer fish videos to Live Photos

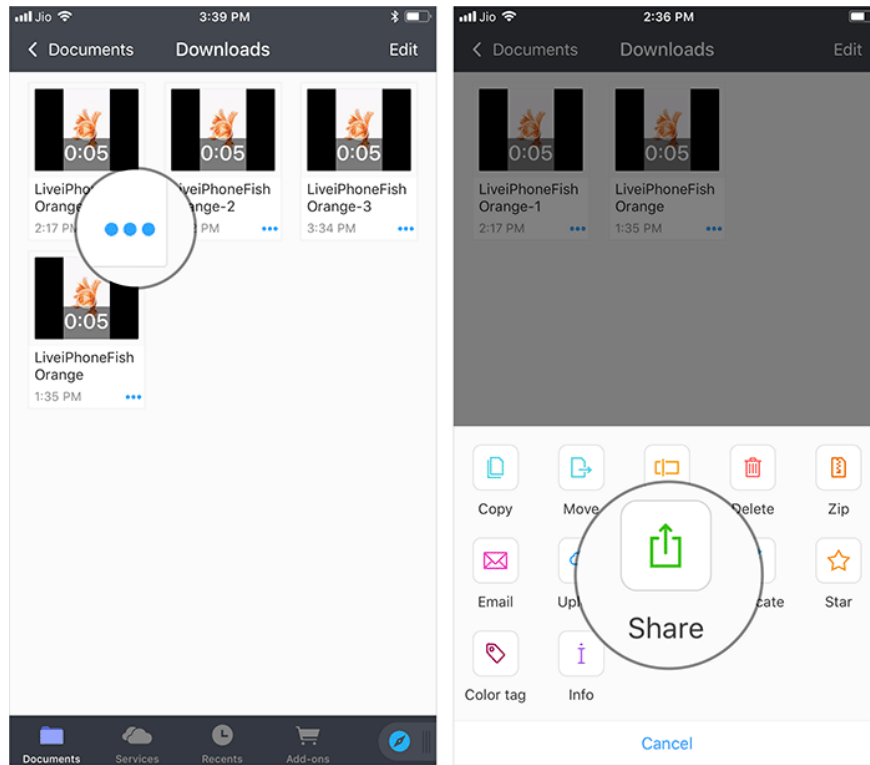

Step 1. When downloading the video, click the **Documents** tab at the bottom left.

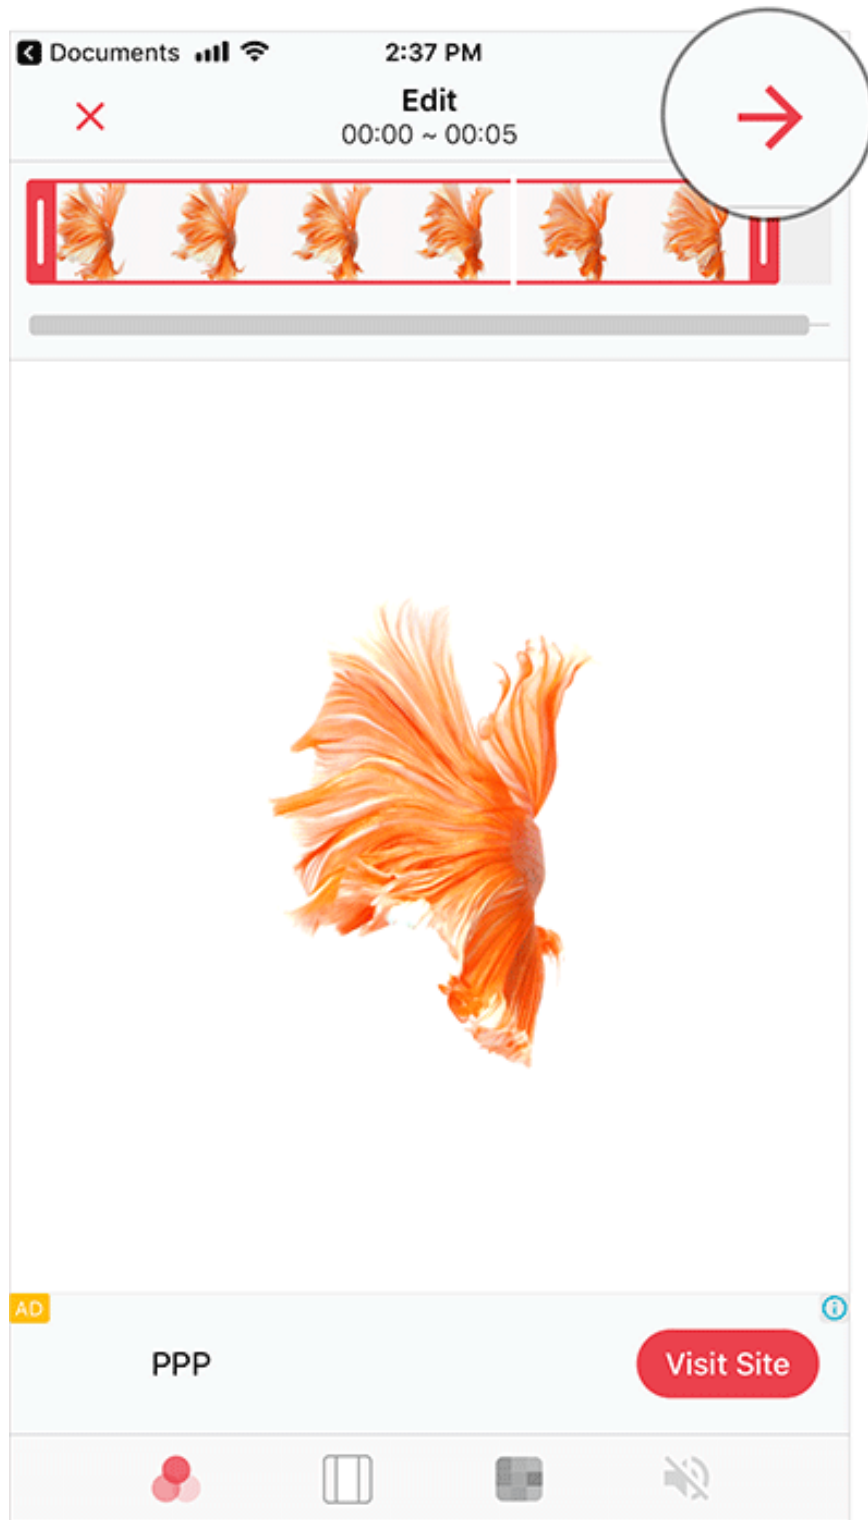

Step 2. Now, select the **Downloads** folder.

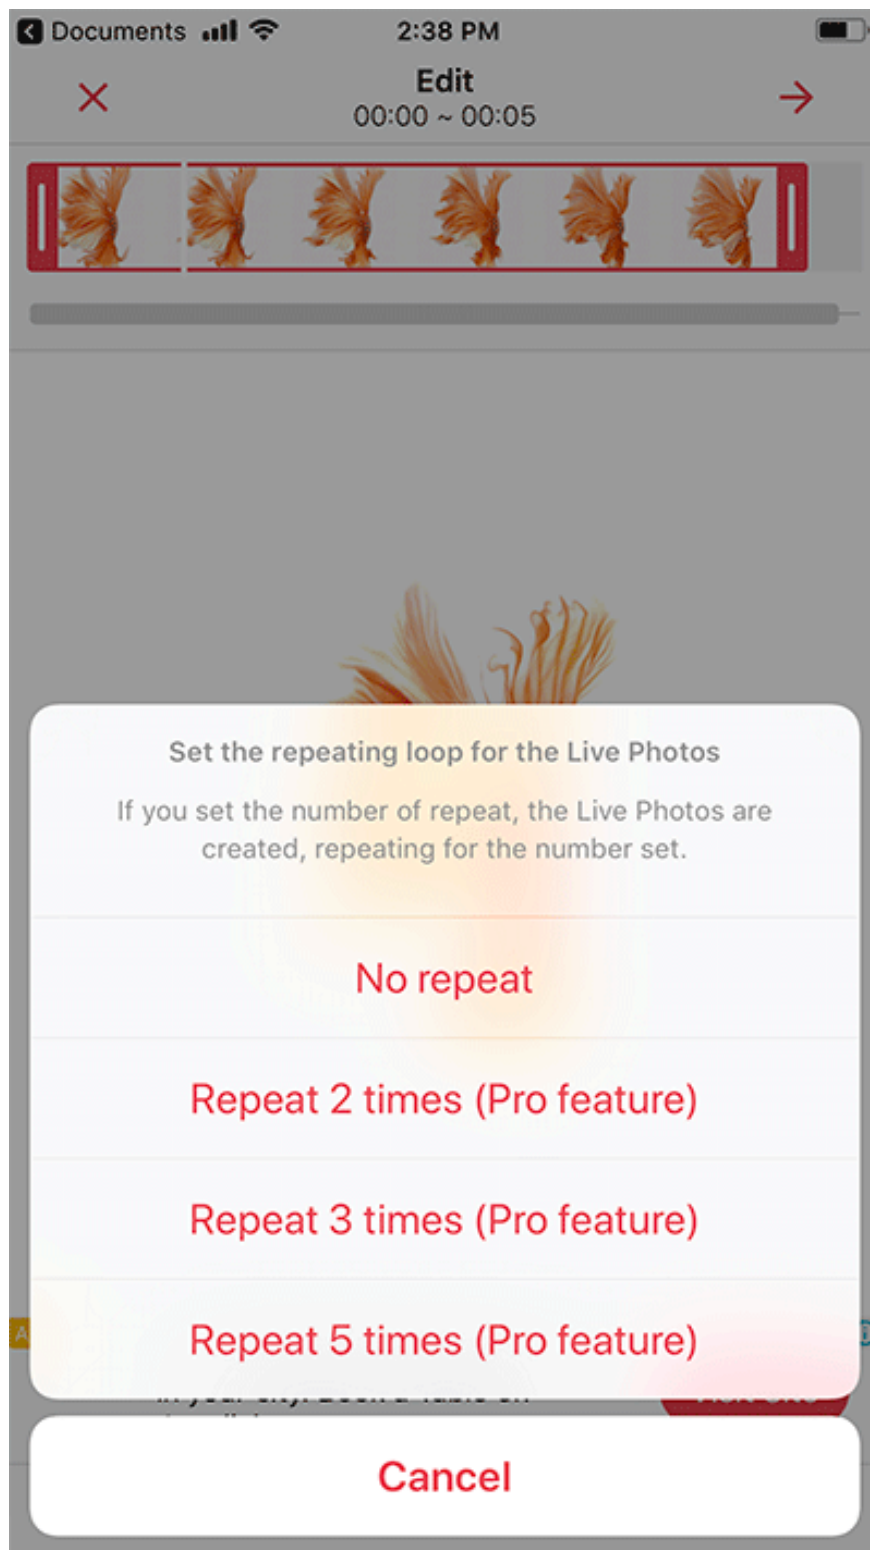

Step 3. Touch the dot and select **Share** .

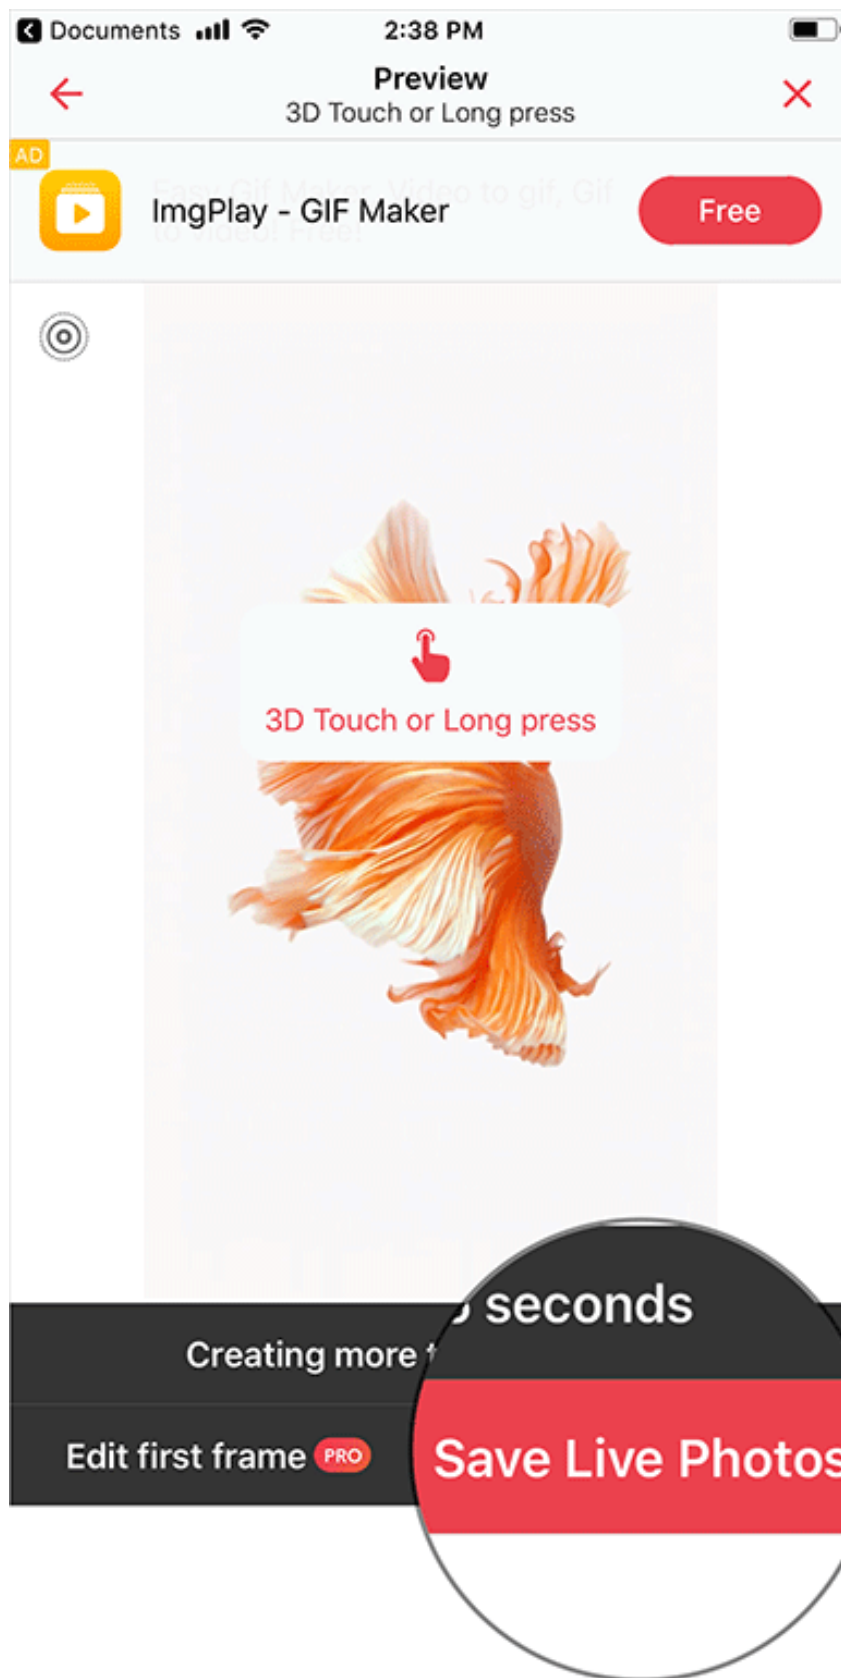

Step 4. In the sharing panel, select **Copy to intoLive** .

Step 6. Select an option if you want the image to be repeated. (Note: You have to pay \$ 2.99 to use the Pro version and can repeat the animation.) Do you choose to repeat the animation 2, 3 or 5 times.

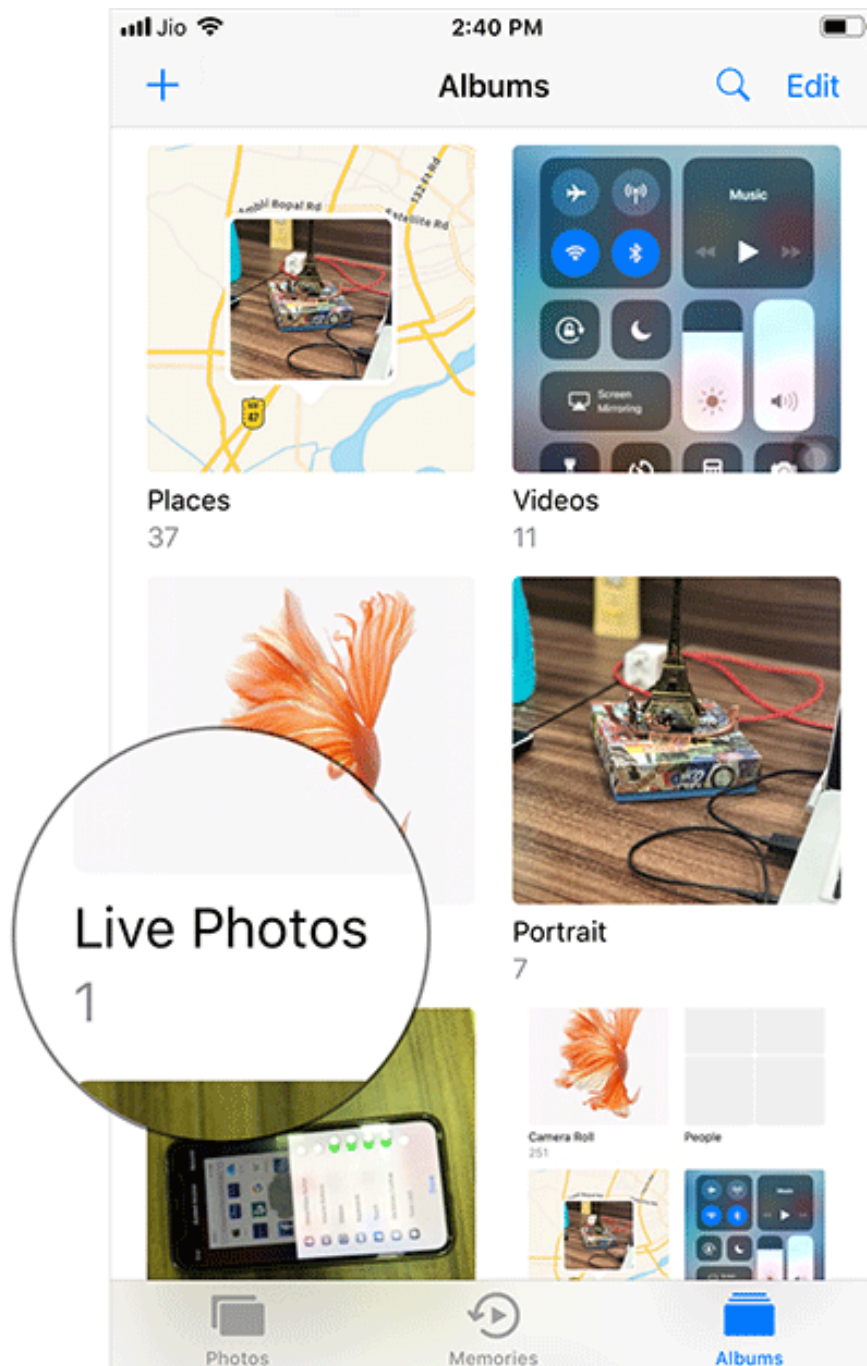

Step 7 . Finally, click **Save Live Photos** at the bottom to save the wallpaper to the gallery.

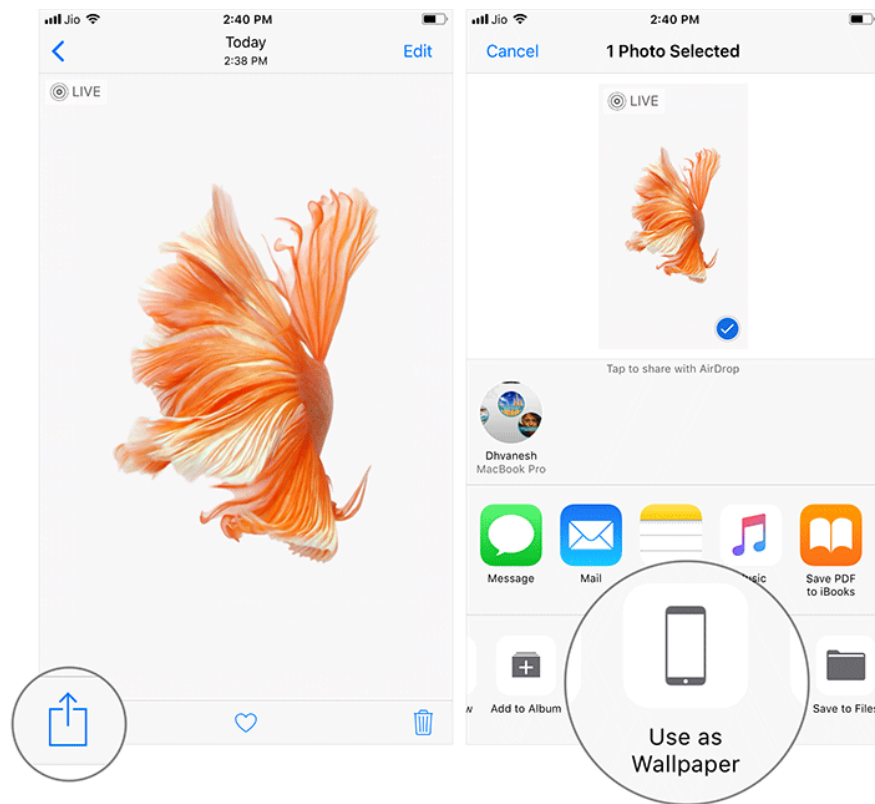

Set Live Photos wallpapers

Next, you can set iPhone wallpaper from Settings and Photos applications. For example, install from Photos application.

Step 1 . Select the **Album** tab in Photos app ? go to the Live / Live Photos folder.

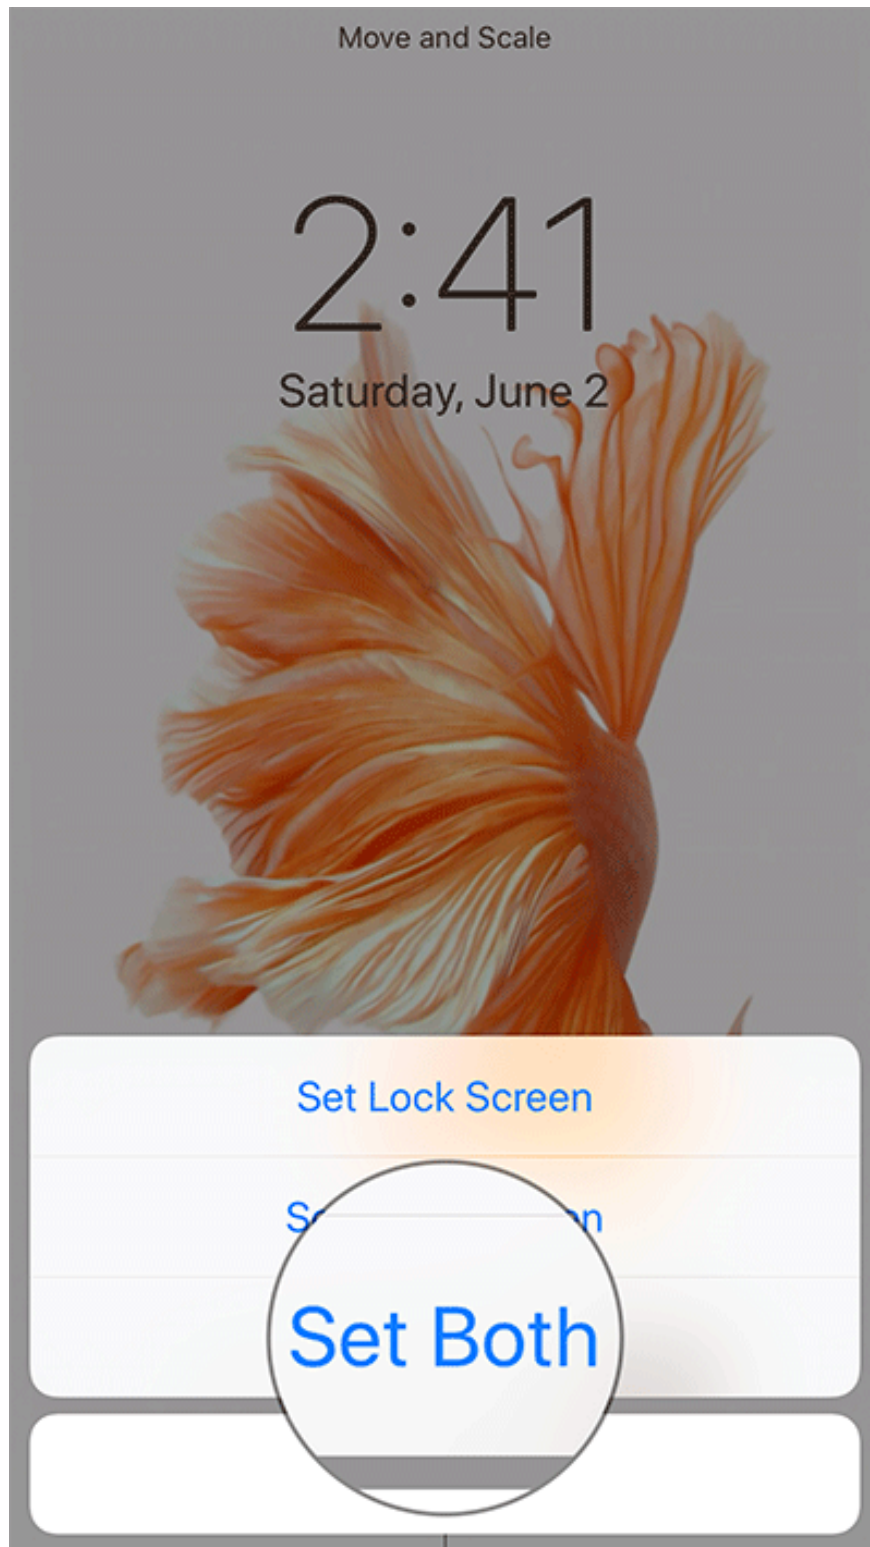

Step 2. Select the wallpaper you just saved ? touch the Share button and select **Use as Wallpaper**.

Step 3. Select **Live Photo** , then select **Set** .

Step 4. You can set it as lock screen, home screen or both.

With just a few steps above, you already have a vivid fish wallpaper on your iPhone.
