

# How to install Internet Download Manager on Microsoft Edge

Finally Internet Download Manager software can also be installed on Microsoft Edge, via the Windows Store.

**Internet Download Manager** is the most popular video download software, and now you can install Internet Download Manager on **Microsoft Edge** browser.

Before the introduction of video download software, or online video download services, Internet Download Manager (IDM) became the first choice for users to download videos on the web such as **downloading YouTube videos** or **downloading Facebook videos** . The software will automatically catch the download link of the videos and then download the computer with high speed, support many formats including EXE, MP4, ZIP, RAR, MSI .

And after years of waiting, IDM can finally install on Microsoft Edge browser as an extension. Users will need to access the Windows Store to get the download link of IMD installed on Edge browser. The following article will guide you how to download IDM for Microsoft Edge browser.

## How to download IDM for Microsoft Edge browser

Download Internet Download Manager utility

<https://www.microsoft.com/en-aq/p/idm-integration-module/9p5qlkvjh982>

### Step 1:

Visit the link above to open the IDM installation interface for Edge. In the interface, first click **the Get the app button** .

### Step 2:

Next, click **the Get button** to continue the installation.

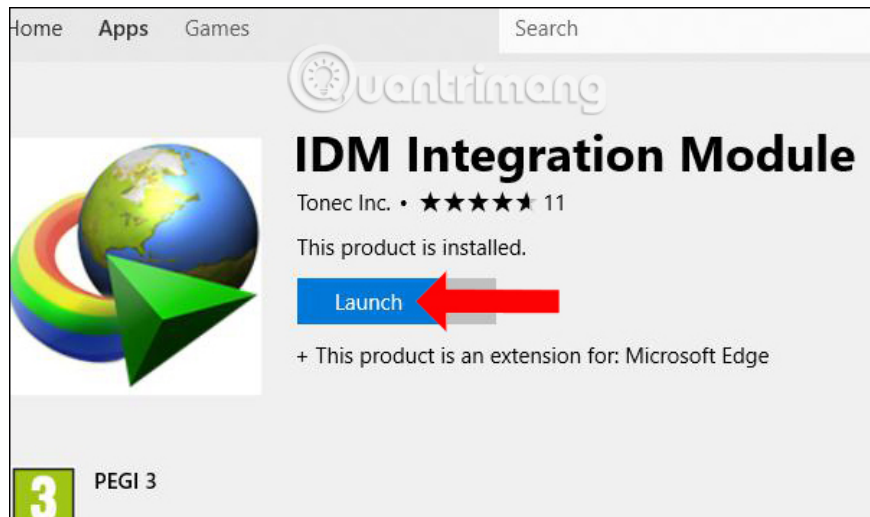

You then wait for the Edge browser IDM download process to complete.

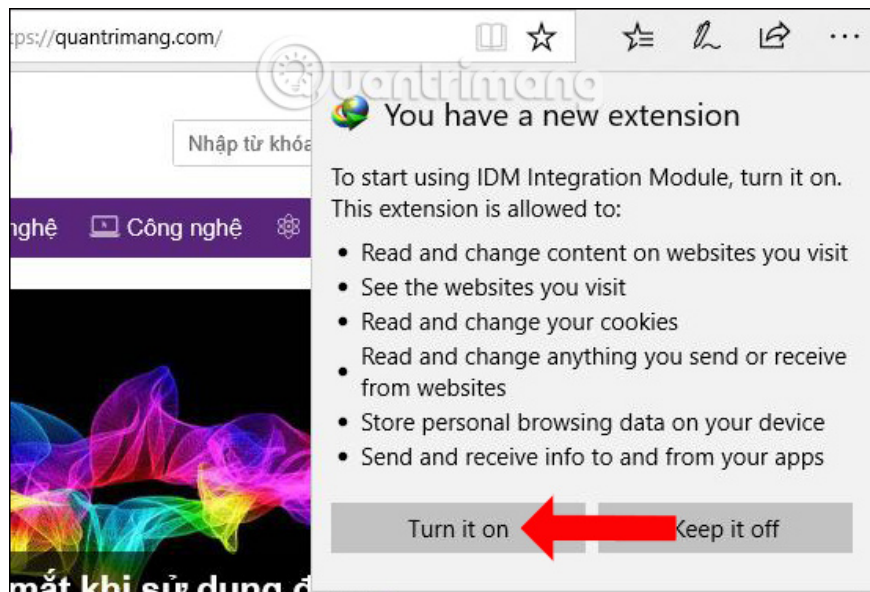

### Step 3:

When the Internet Download Manager download process is finished, click **the Launch button** to proceed with the installation and launch in the browser.

**Step 4:**

Open Microsoft Edge browser. We will see the interface asking for permission to enable IDM Integration Module on the browser, click **Turn it on** to agree.

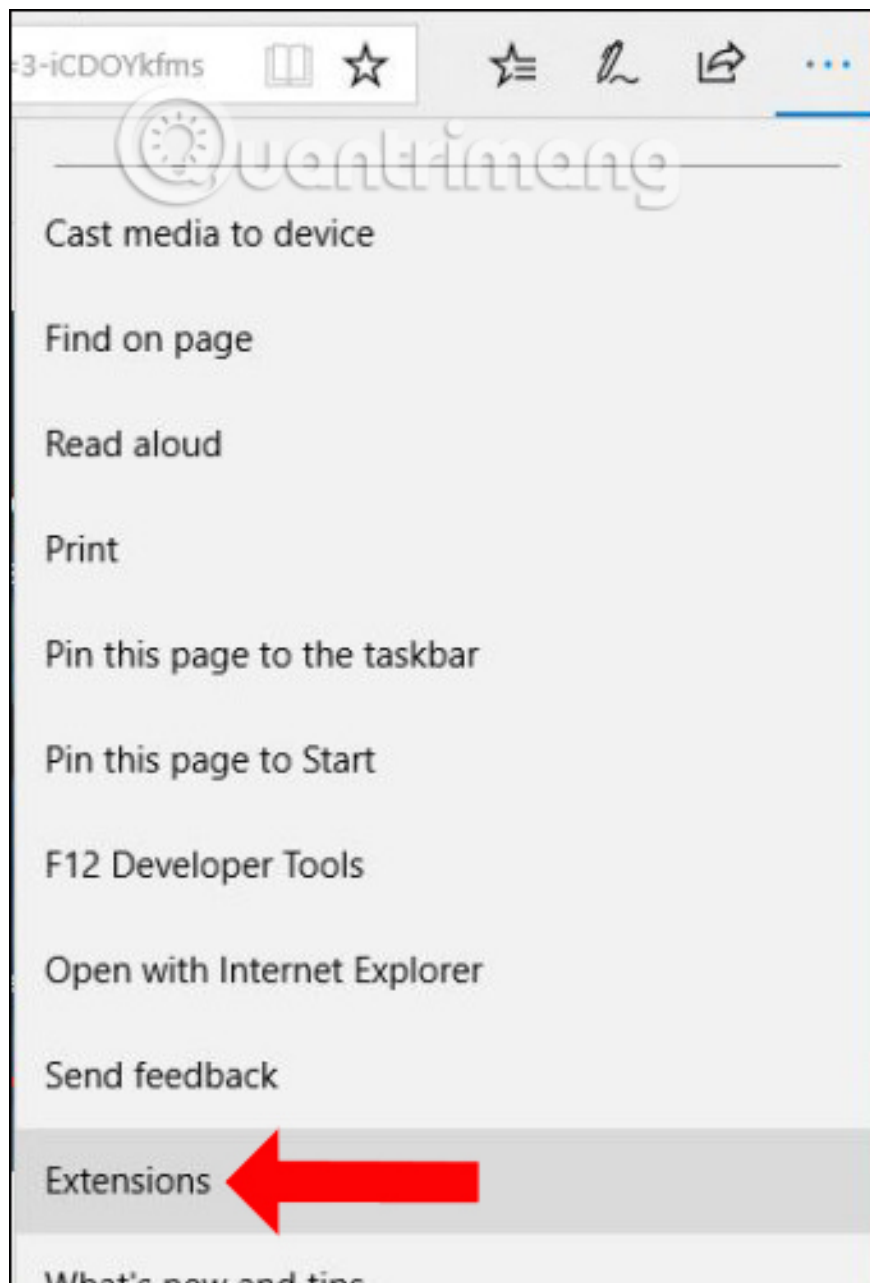

**Step 5:**

As such, the IDM Integration Module utility is enabled in the Edge browser. You will be taken to IDM's announcement page.

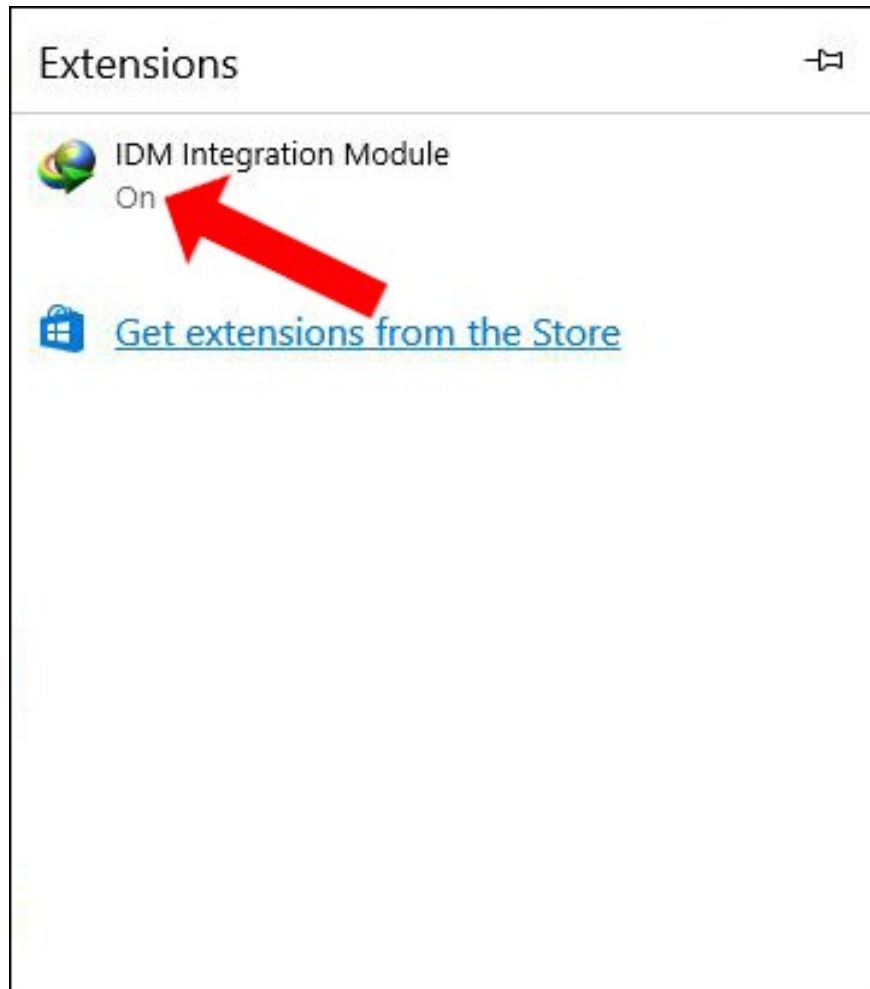

### Step 6:

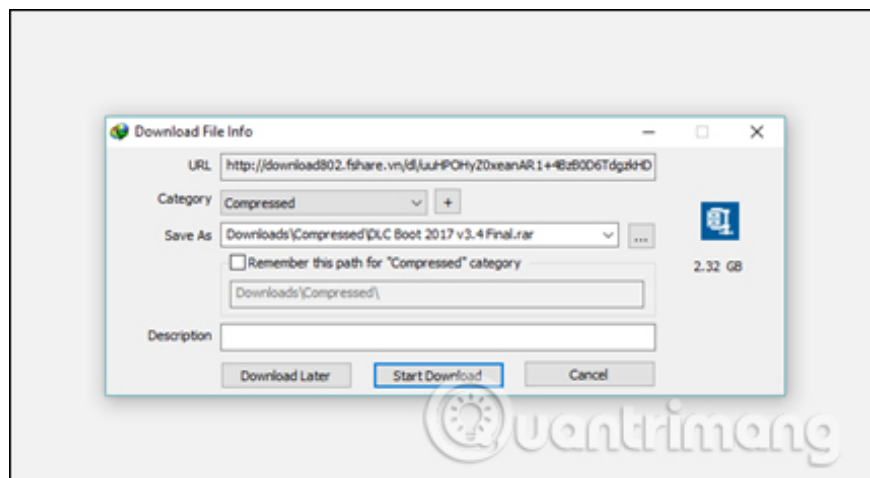

Now try opening a video website like Youtube, then click on **the 3 dots icon** on the browser interface, then select **Extensions** .

We will see the default IDM utility enabled in **On mode** .

Finally, you just need to wait for the software to automatically catch the link to download the video and download the video to your computer.

Thus, allowing the installation of IDM on Microsoft Edge browser allows users to easily download videos, or any type of file in the browser without any other support software. Microsoft Edge does not have many utilities to support downloading videos like on Chrome browser. Therefore, Internet Download Manager installation for Edge becomes a powerful video downloading tool for users.
