## ***How to install IObit Uninstaller***

*Information about IObit Uninstaller software*

- **Operating System:** Windows XP/Vista/7/8/10
- **License:** Free
- **Size:** 12.3 MB
- **Version:** 7.2.0.11
- **Publisher:** IObit

*Step 1:* Download IObit Uninstaller to your computer using the following link: Download **IObit Uninstaller**

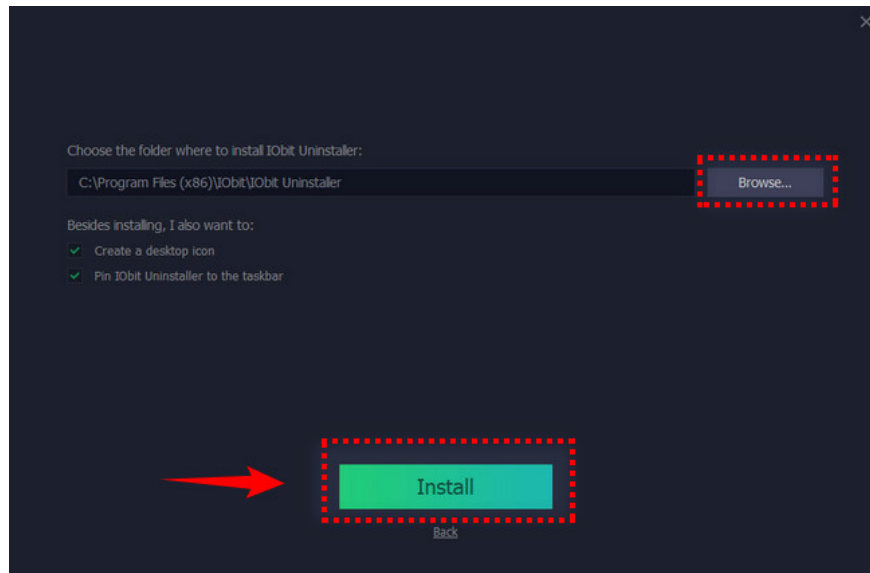

*Step 2 :* After downloading IObit Uninstaller to your computer, you will get a file named **iobit-uninstaller\_72011.exe** . Launch this file to begin the IObit Uninstaller installation process.

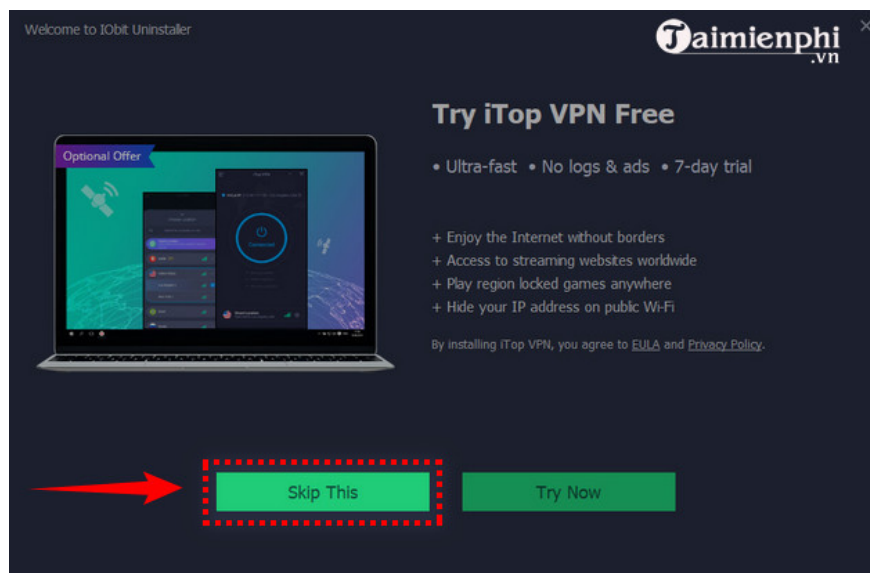

*Step 3:* Click on **Custom Install** to adjust the settings before installation. If you want to install using the default settings, you can click **Install directly**.

*Step 4:* You can change the installation location of IObit Uninstaller from the default **Program Files** location by clicking **Browse**. You can also choose whether or not to set a shortcut icon for the software on your desktop by unchecking **Create a desktop icon**. Finally, click **Install** to continue.

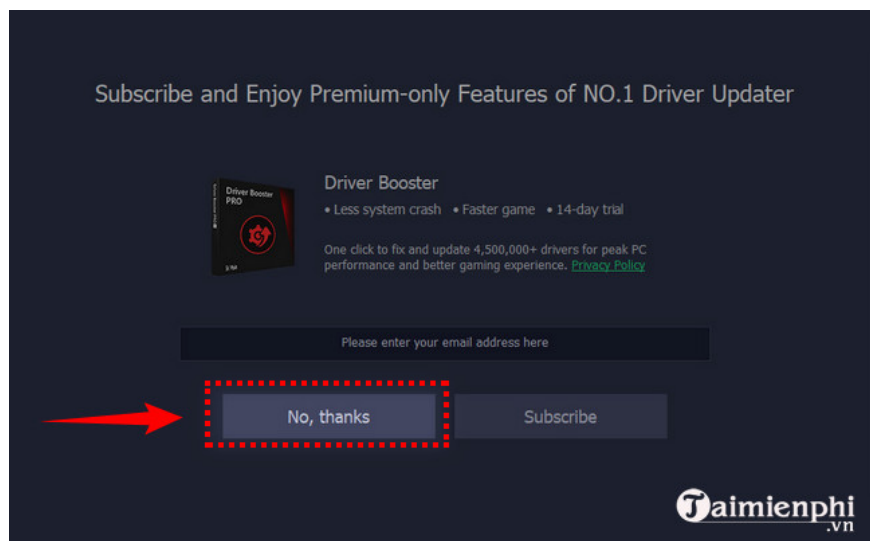

*Step 5:* Here you will be invited to use another software called **Dashlane**, which functions as a personal password manager. If you agree to install it, select "**Yes, I agree to install Dashlane and accept its EULA and Privacy Policy**"; if you disagree, select "**No, thanks**". In this case, TipsMake will select "**No, thanks**". Click **Next** to continue.

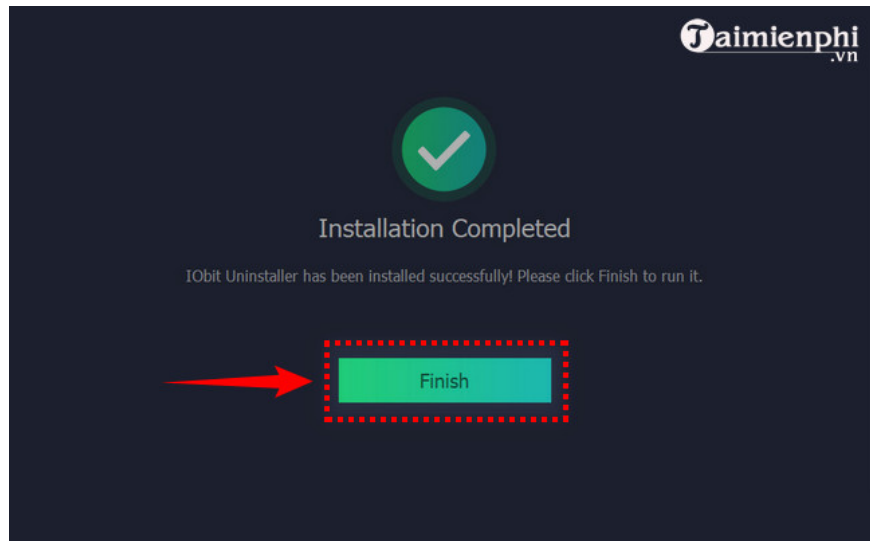

*Step 6:* Immediately after clicking **Next**, IObit Uninstaller will be installed on your computer. Please wait a few moments for the software to complete the installation.

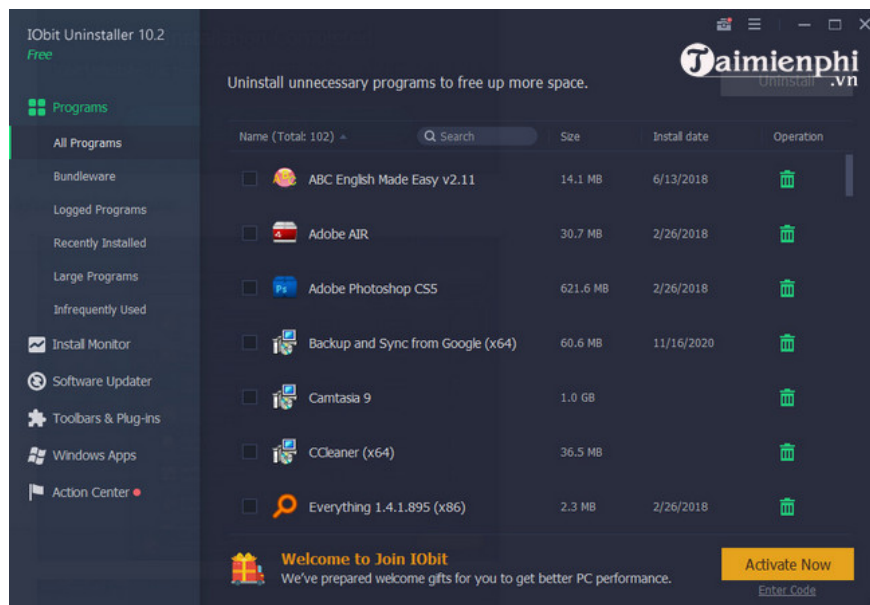

*Step 7:* Finally, you can skip subscribing and receiving software updates from IObit by clicking "**No, thanks**".

*Step 8:* The installation is now complete. You can wait a few seconds for the system to automatically start, or click **Finish** directly to have the software launch immediately.
