

# How to Install iOS 16 Beta, iPadOS Beta, watchOS Beta, and macOS Ventura Beta

TipsMake.com would like to guide you on how to install the hot iOS 16 Beta 1 that has just been released.

Shortly after the official launch of iOS 16, Apple released the first beta of this mobile operating system to developers. Because it is for developers, iOS 16 Beta 1 will not be perfect, there are some potential bugs. Therefore, users should not download it for daily use.

Compatible iPhone models with iOS 16 include iPhone 8, 8 Plus, iPhone X, iPhone XR, iPhone XS, iPhone XS Max, iPhone 11, iPhone 11 Pro, iPhone 11 Pro Max, iPhone SE (2020), iPhone 12, iPhone 12 Mini, iPhone 12 Pro, iPhone 12 Pro Max, iPhone 13 Mini, iPhone 13, iPhone 13 Pro, iPhone 13 Pro Max.

Older iPhone models (which used to support multiple versions of iOS) like the iPhone 6s, 6s Plus, iPhone 7, iPhone 7 Plus, and iPhone SE (2016) have been removed from the iOS 16 support list.

**NOTE 1 :** YOU NEED TO BACK UP DATA BEFORE INSTALLING IOS 16 BETA.

**NOTE 2 :** DUE TO THE PROFILE DOWNLOAD PAGE BETAPROFILES.COM HAS BEEN FORCED TO CLOSED BY APPLE, YOU CAN NOW ONLY INSTALL THE PUBLIC BETA VERSION.

## How to install iOS 16 Beta

**Step 1 :** Go to Apple's beta program website and register with your Apple ID.

**B2 :** Access the Beta Software Program.

**B3 :** Click enroll your iOS device. If you have registered for the beta version before, you need to remove the old profile and register for the new profile.

**B4 :** Access <https://beta.apple.com/profile> on the device that needs to install iOS 16 public beta.

**B5 :** Download and install the profile configuration. You need to access Settings to activate the profile. The profile is located in General > VPN and Device Management.

**B6 :** After completing the profile installation, go to General > Software Update to check and install the iOS beta version.

## How to Update iPadOS 16 Beta

Along with the new iOS comes a bunch of other new software from Apple, including iPadOS. If you own an iPad compatible with iPadOS 16, you can experience it early by installing the Beta version. As always, TipsMake.com recommends that you consider before installing because beta versions often have many potential problems.

Just like on iPhone, you'll need to use the Safari browser on your iPad to access Apple's Beta Program page.

The process of installing Profile and updating, installing iPadOS Beta is exactly the same as installing iOS Beta.

## How to Install watchOS 9 Beta

To update your Apple Watch to the watchOS 9 Beta, you need to visit Apple's Beta Program page in Safari on your iPhone. Next, find the section to sign up for the watchOS 9 beta. Follow the steps as instructed in the Install iOS Beta section to install the profile.

After installing the Profile, you need to open the Apple Watch app on your iPhone, tap **My Watch > General > Software Update** > select **Download and Install** to start the update.

## How to Update macOS Ventura Beta (macOS 13)

On Macs that support macOS 13, you go to Apple's Beta Program page and then join the macOS 13 Beta testing program. Next, you go to the system section to check and download macOS 13 Ventura.

**Note** : It is important to mention twice that iOS 16 Beta, iPadOS 16 Beta, watchOS 9 Beta and macOS 13 Beta are experimental versions and will definitely have many potential problems. If your device has many applications and serves important work, do not risk installing them. What you get will not be worth the inconvenience you will face.

Also, back up your device before installing beta software so you can restore your data if something goes wrong during the process.

Good luck!
