

# How to install Lineage 2 Revolution: Vietnam on the computer

Lineage 2 Revolution Vietnam has officially launched. And you can install the game right on your computer.

Lineage 2 Revolution has been officially launched in Vietnam at the end of July. According to reviews from many gamers, the Vietnamese version still possesses a beautiful, quality graphics system. However, not everyone uses the phone with enough configuration to download the game. If so, you can play Lineage 2 Revolution Vietnam right on your computer, via Android emulators.

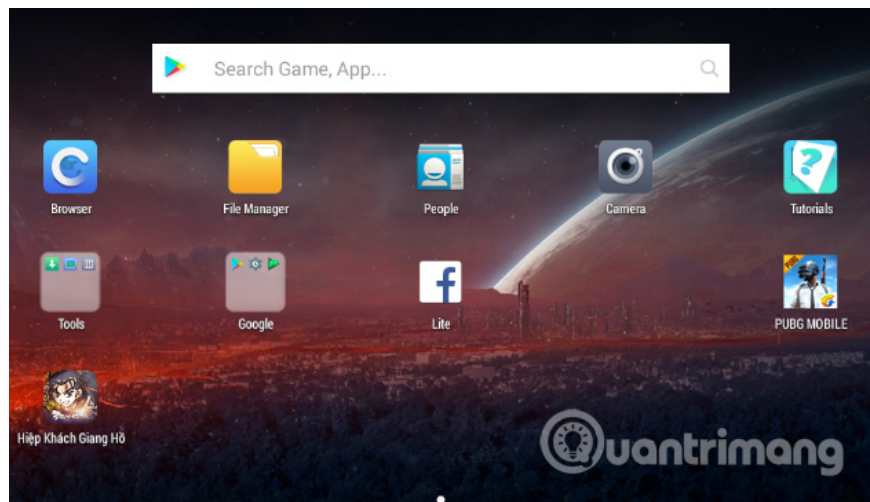

Currently users can search for games on Google Play Store to install on a computer. The following article will guide you how to install Lineage 2 Revolution on your computer. The following article will use the Nox App Player emulator. The other emulator users do the same.

## Instructions for installing Lineage 2 Revolution on PC

### Step 1:

You open the Nox App Player emulator on your computer and then click on the **search for Lineage 2 Revolution on the Google Play Store** .

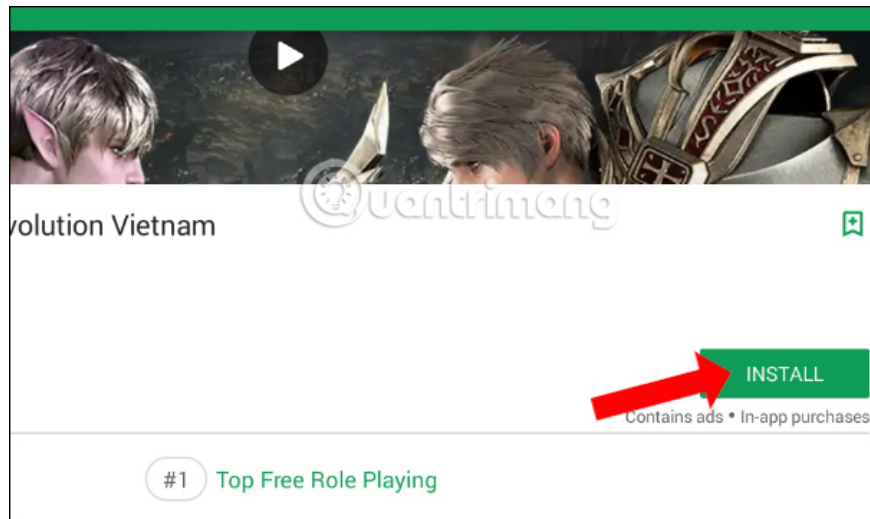

Or you can immediately click Lineage 2 Revolution game in the emulator's interface, because currently the game is the first in the role-playing game.

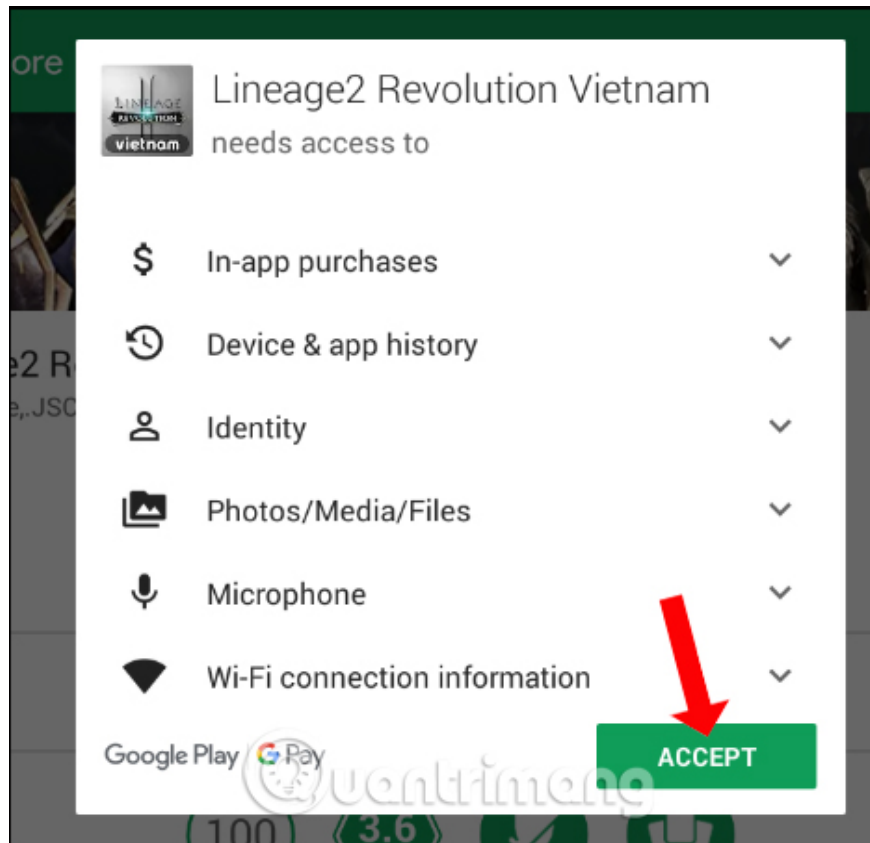

**Step 2:**

Click the game and then click **the Install button** to proceed with the installation.

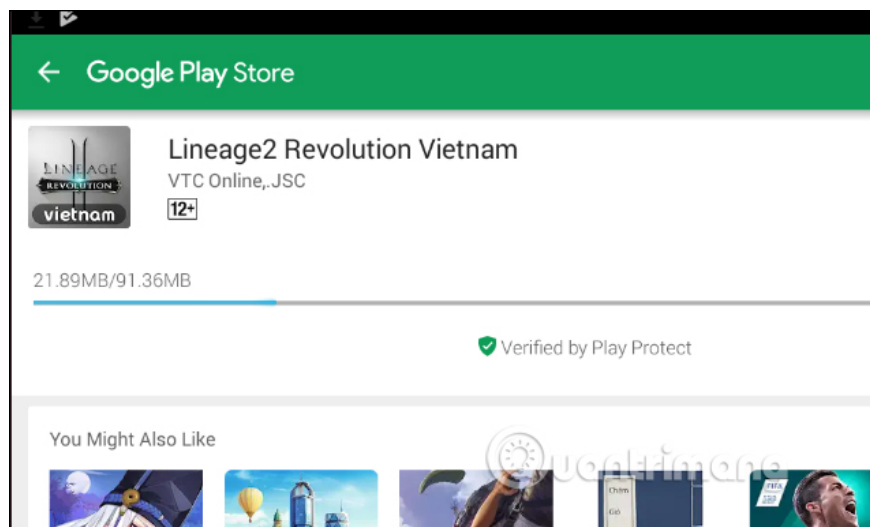

**Step 3:**

Click **Accept** to agree to the terms of installation on the game.

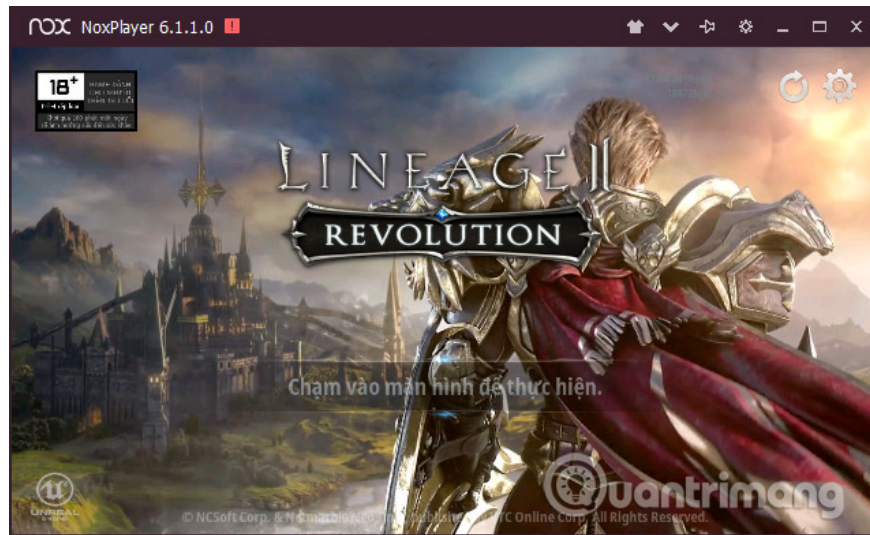

Then the player waits for the game installation process to be completed on the computer. When done, **click Open** to open Lineage 2 Revolution on the computer.

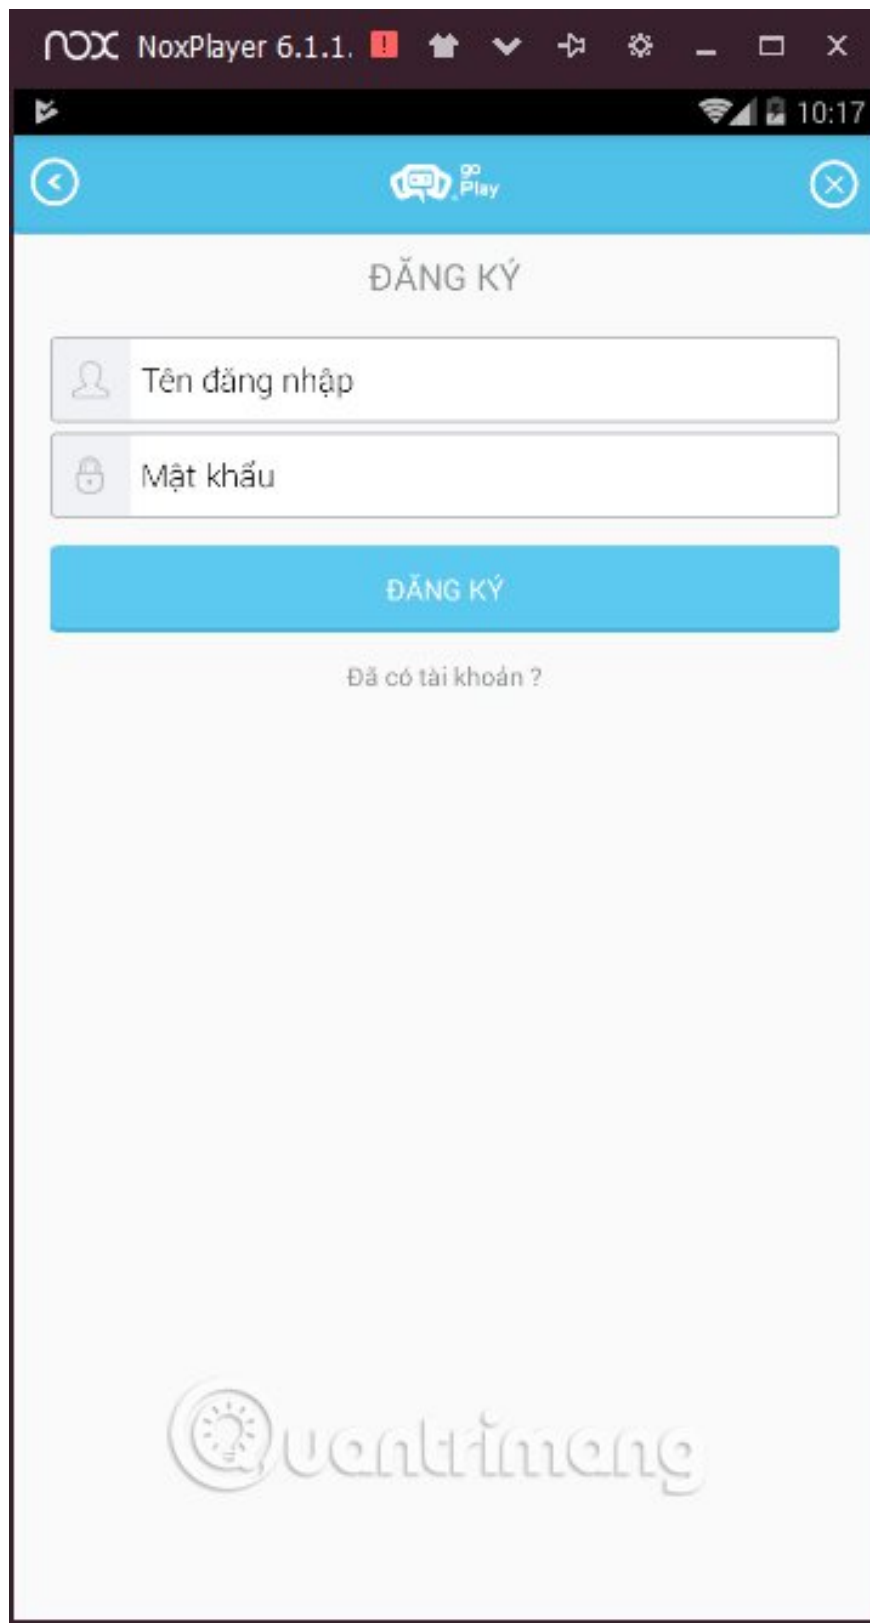

#### Step 4:

This will be the first interface of Lineage 2 Revolution in Vietnam version installed on PC, via the Nox App Player emulator.

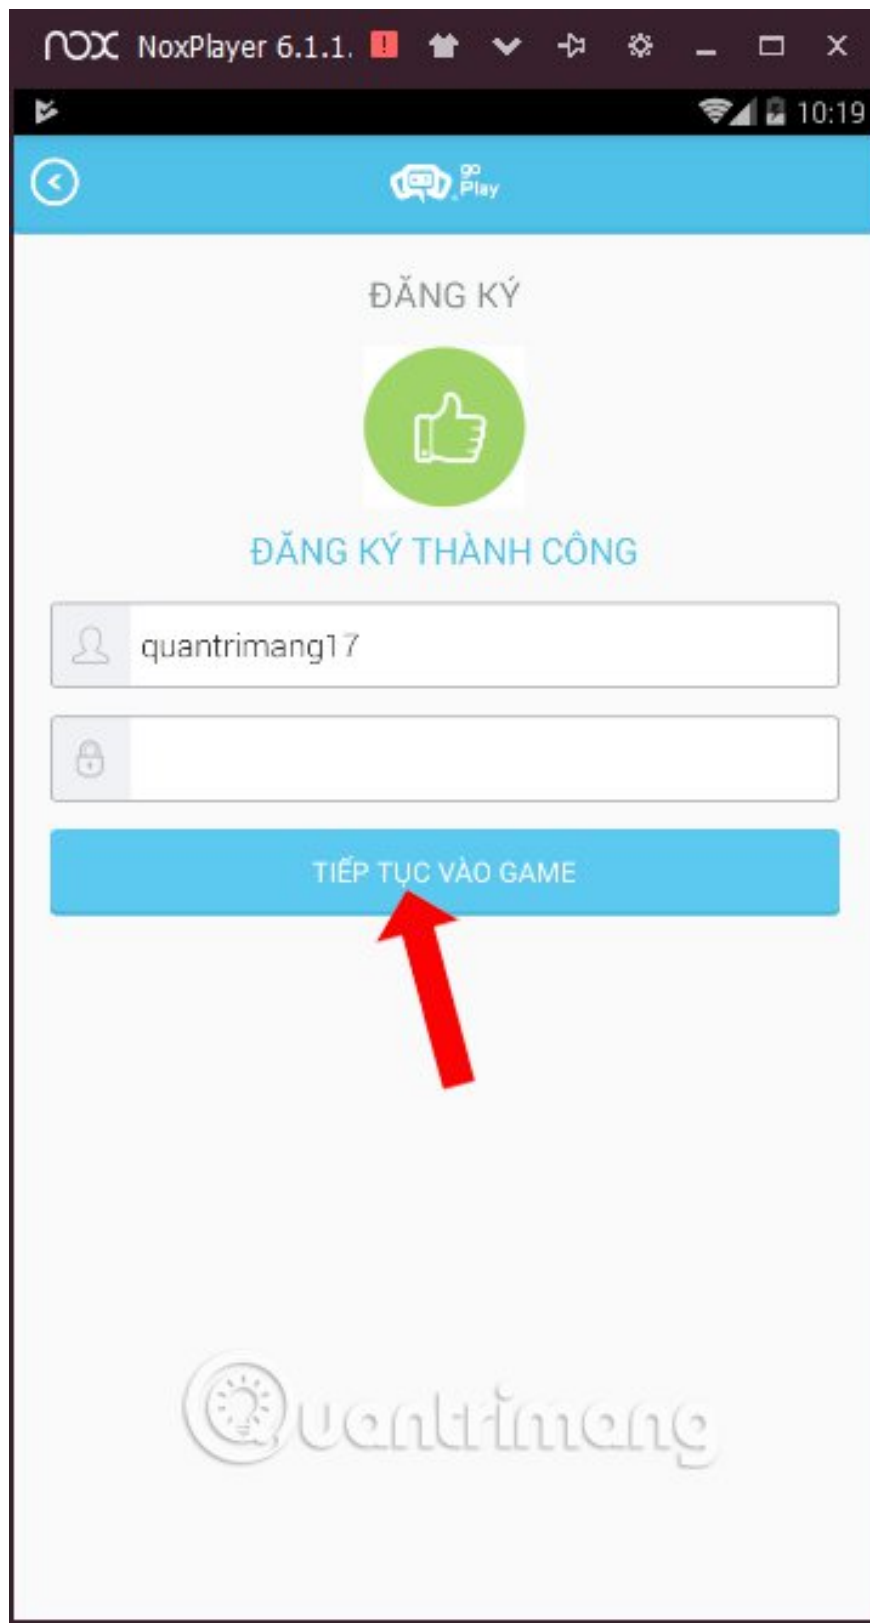

### Step 5:

Clicking on the screen will launch the game login interface. There will be login via Facebook, Google or create a username. In case you do not have an account, **click Register** . Players enter a name and password to register an account. Note that the password will only be allowed between 6 and 16 characters.

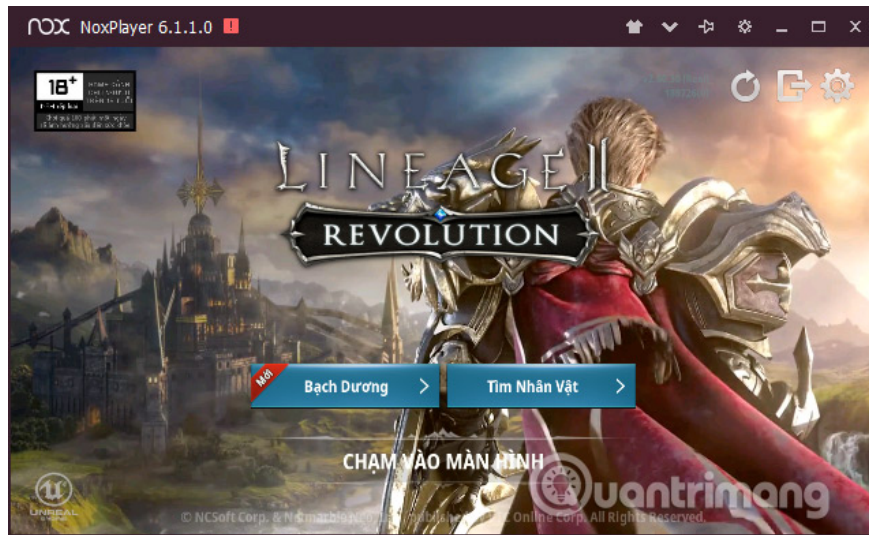

**Step 6:**

When registering successfully, you will see account information, click **Continue to game** .

**Step 7:**

Next we will perform the process of creating characters to play in the game.

Select the game server you want to play in the list and click OK to continue.

### Step 8:

The process of accessing the server will be relatively long. The player will then perform the character creation process with the character selected for the character, press **Next** .

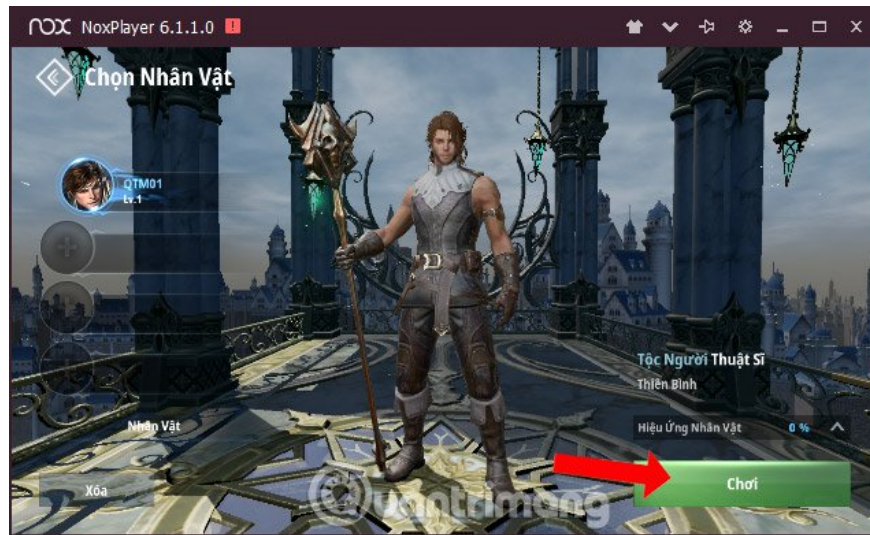

### Step 9:

Select the hairstyle, choose a trade, enter a nickname for the character in the game and then click **Create character** .

### Step 10:

First you will enter level 1 to become familiar with the gameplay and the game content, press **the Play button** below.

### Step 11:

The first will be the content of the automatic task execution. We will have the task to perform, click **Accept Quest**.

The attacks in the mission will be done automatically. The first tasks will be extremely simple and not too complicated. Players will participate in the adventure to different lands to perform tasks by default system.

When you complete the task, the gamers will have their reward.

Lineage 2 Revolution Vietnam version still shows the appeal of the original. The initial work will mostly perform the task to receive the reward only. The later the content will attract more players with more challenging challenges.
