

# How to install Rapid Typing Tutor and practice 10-finger typing.

RapidTyping is an extremely effective ten-finger typing training tool suitable for both adults and children thanks to its lively typing lessons. RapidTyping is very easy to use, and installation is quick with just a few simple steps.

**Rapid Typing Tutor** is a free ten-finger typing practice software that helps you train and develop your ten-finger typing skills. This article provides instructions on how to install and use the software. However, if your computer doesn't meet the software's requirements, you should switch to the online ten-finger typing website <https://typingtop.com> , which makes it easier to practice proper finger typing.

Improve your typing speed with Rapid Typing Tutor software.

## *How to install Rapid Typing Tutor and practice 10-finger typing.*

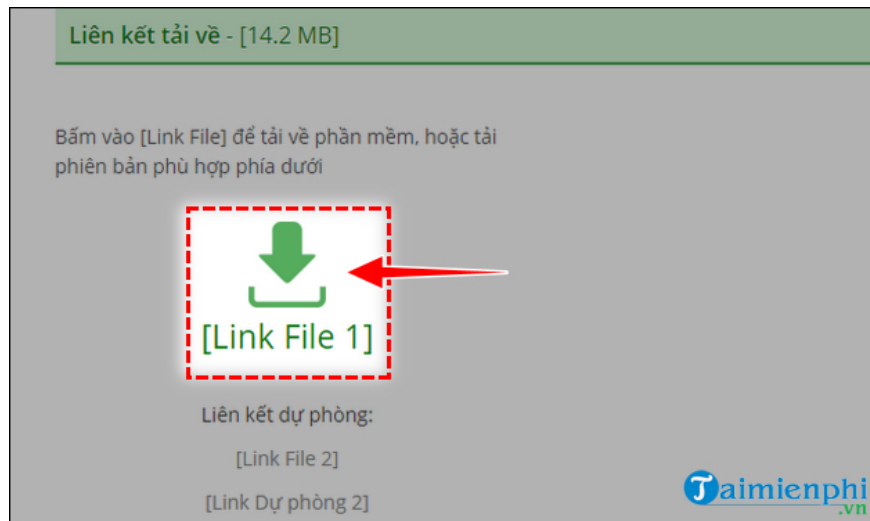

### Article contents:

1. How to download and install
2. Basic usage instructions

**Step 1:** In your browser, click the link below to download the 10-finger typing tool to your computer.

Download RapidTyping for Windows

**Step 2:** On the website you just visited, scroll down and click **the arrow icon** to download the software to your device.

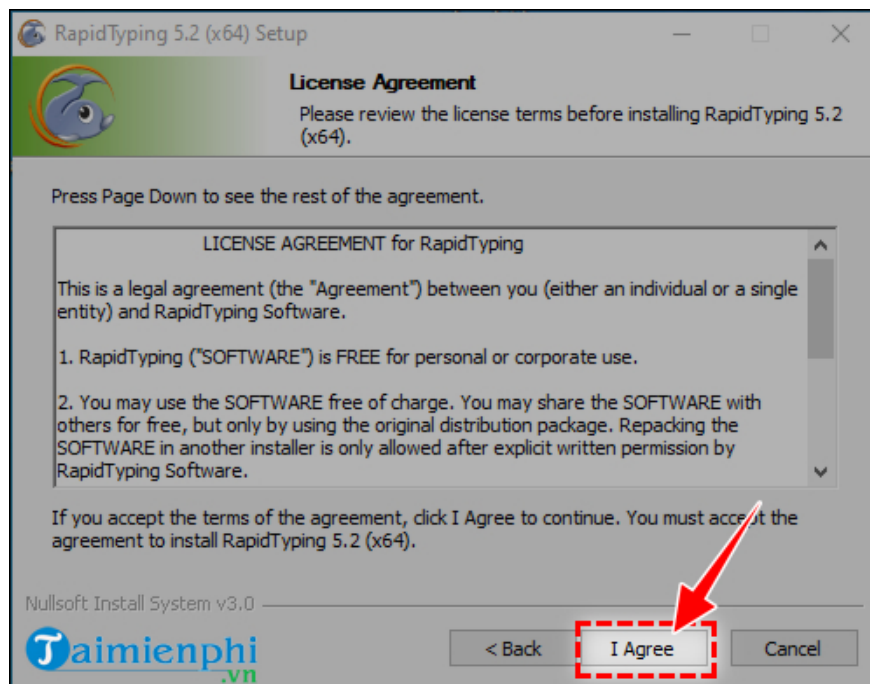

**Step 3:** Once the download is complete, launch the Rapid Typing Tutor software to begin the installation process.

**The installation process is as follows:**

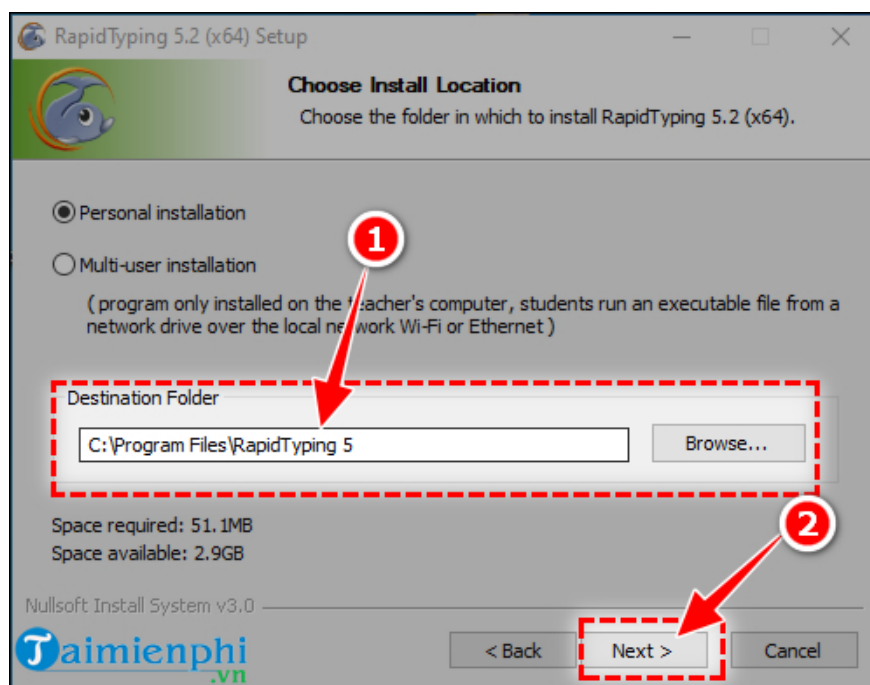

Click **Next** when the software's initial interface appears (Welcome to RapidTyping.).

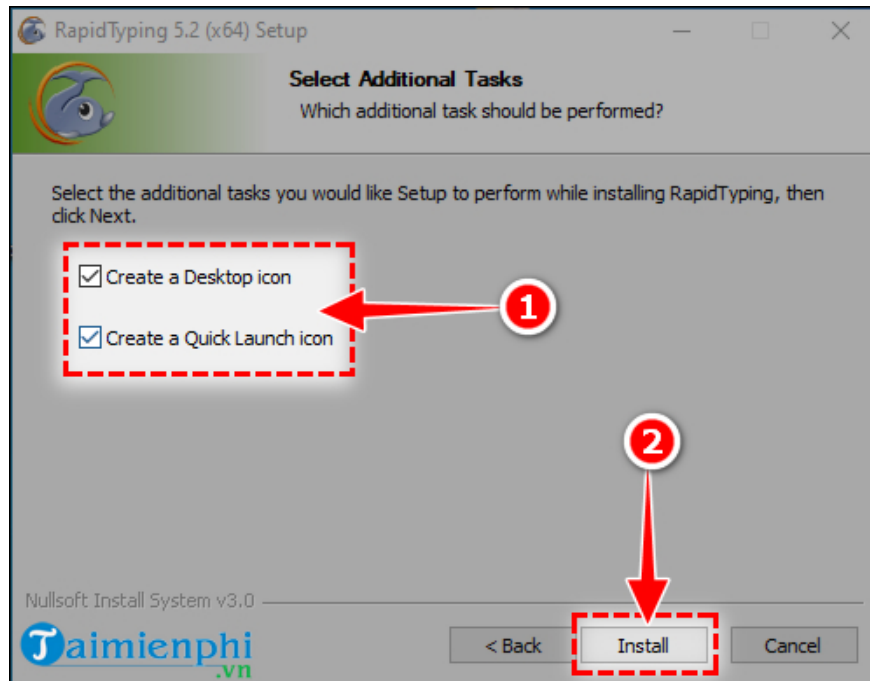

Click on **"I Agree"** to accept the terms and conditions for using the software.

In the **Choose Install Location** window , select **the folder** on your computer where you want to save the Rapid Typing Tutor software files --> Select **Next** to proceed to the next step.

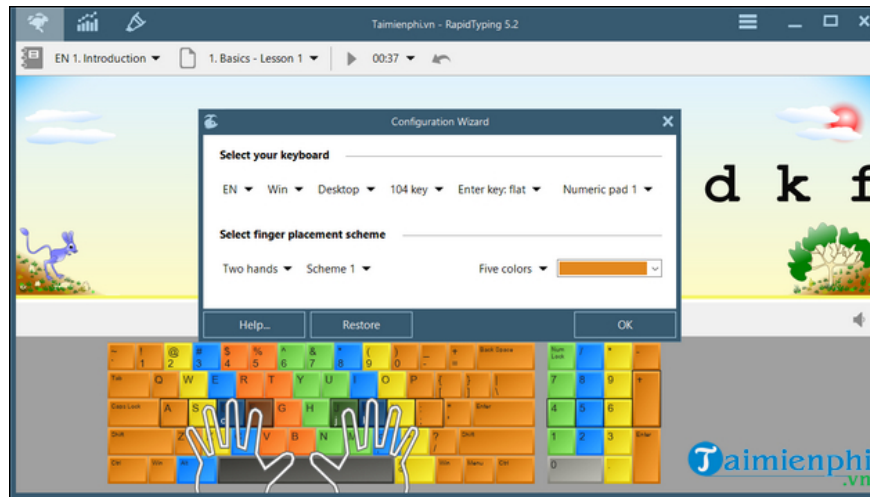

If you want to place the software icon on your home screen for quick access, check the boxes for " **Create a Desktop icon**" and " **Create a Quick Launch icon** " --> Click " **Install**" to begin the installation process.

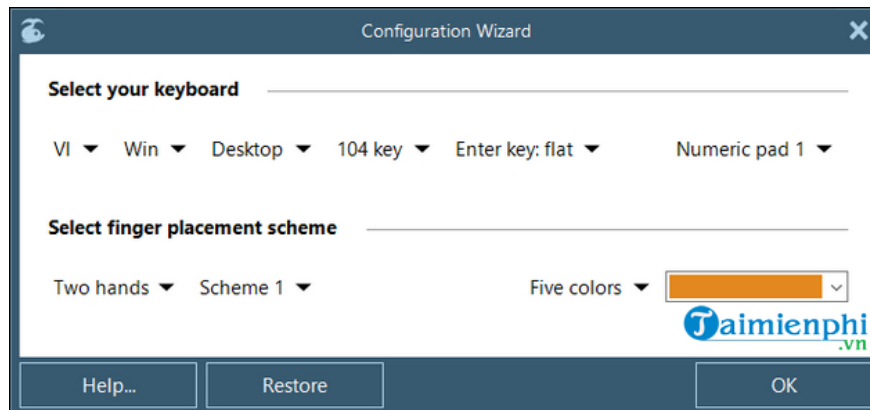

The installation process is complete; click **Finish** to end.

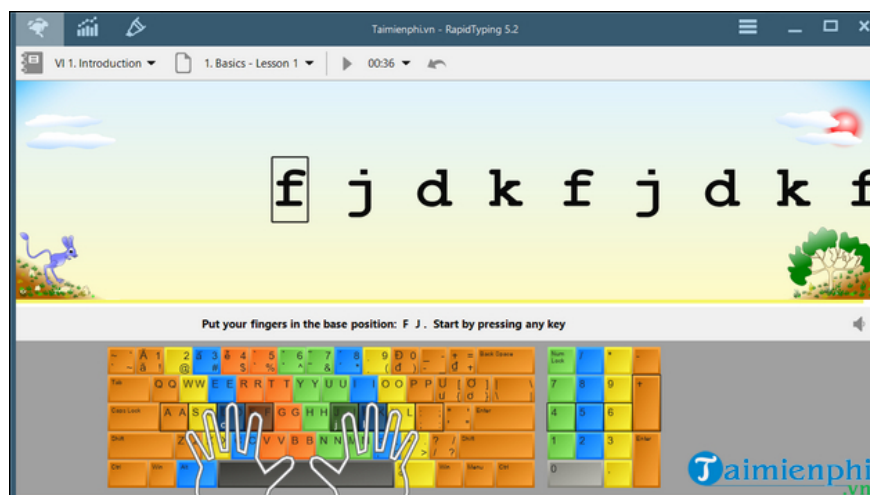

This is the main interface of the Rapid Typing Tutor software when you first access it.

The Configuration Wizard window will allow you to set up the most convenient typing settings, such as: selecting the typing language, choosing the number of characters on the keyboard, choosing whether to type with one hand or two hands. You can set it up according to the standard template that TipsMake has shared below.

This is the first exercise to test your typing ability and speed . Please type the letters that are displayed on the software at that time.

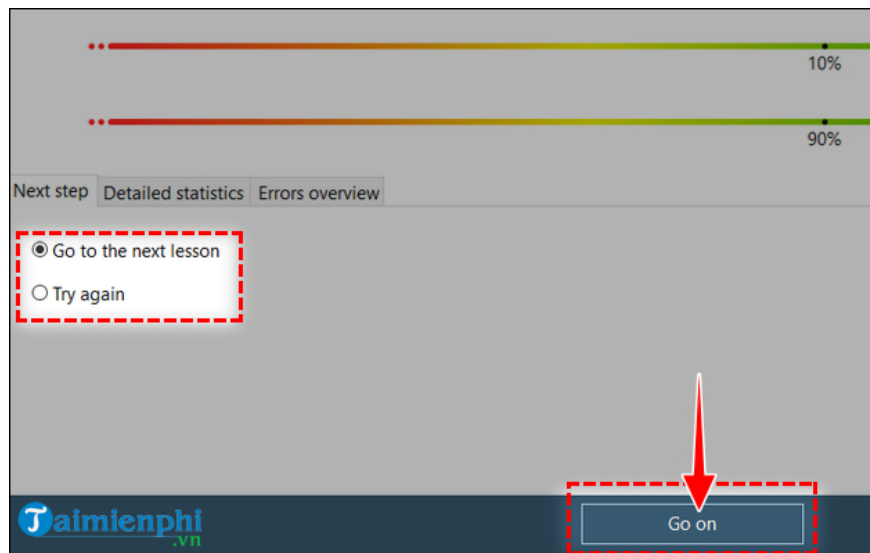

The system will return the results immediately after you complete the first exercise. The Rapid Typing Tutor software's scoring system uses four levels:

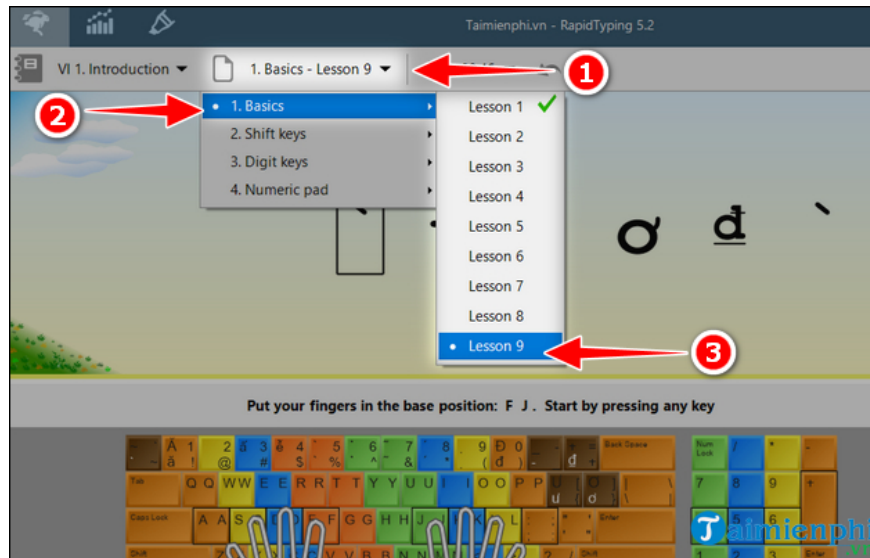

- + **Could be better:** Poor
- + **OK:** Fair
- + **Good:** Good
- + **Excellent:** Outstanding

To move to the next exercise, check the box labeled "**Go to the next lesson**". To repeat the previous exercise, check the box labeled "**Try again**" and press "**Go on**" to proceed with the desired exercises.

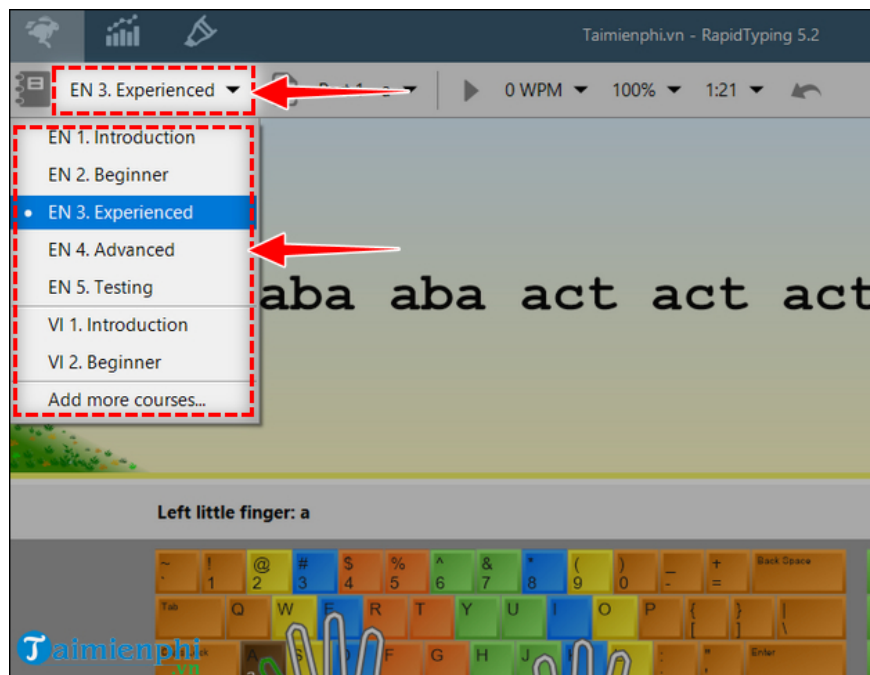

To switch to different typing styles and higher-level exercises, select **the file icon** and find the desired exercises.

Alternatively, click on **the notebook icon** to access typing modes for English and Vietnamese, ranging from easy to difficult, including:

- + **Introduction** ,
- + **Beginner** , +
- Experienced** ,
- + **Testing** .

A very useful, simple, and free software. Use it now to improve your ten-finger typing skills. Hopefully, this guide on installing Rapid Typing Tutor has been helpful. Good luck!
