Instructions to download Savior for Opera

1. Download Savior utility

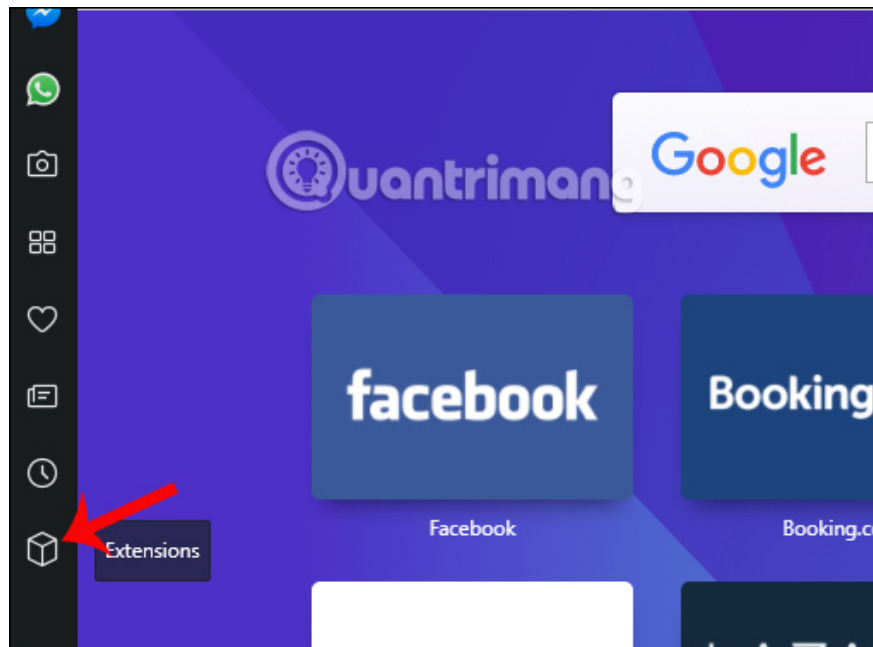

Step 1:

First, download the Savior utility file to your computer according to the link above. Next, use the file extraction software like 7Zip, WinRAR to **solve the file Savior in .zip format** on your computer.

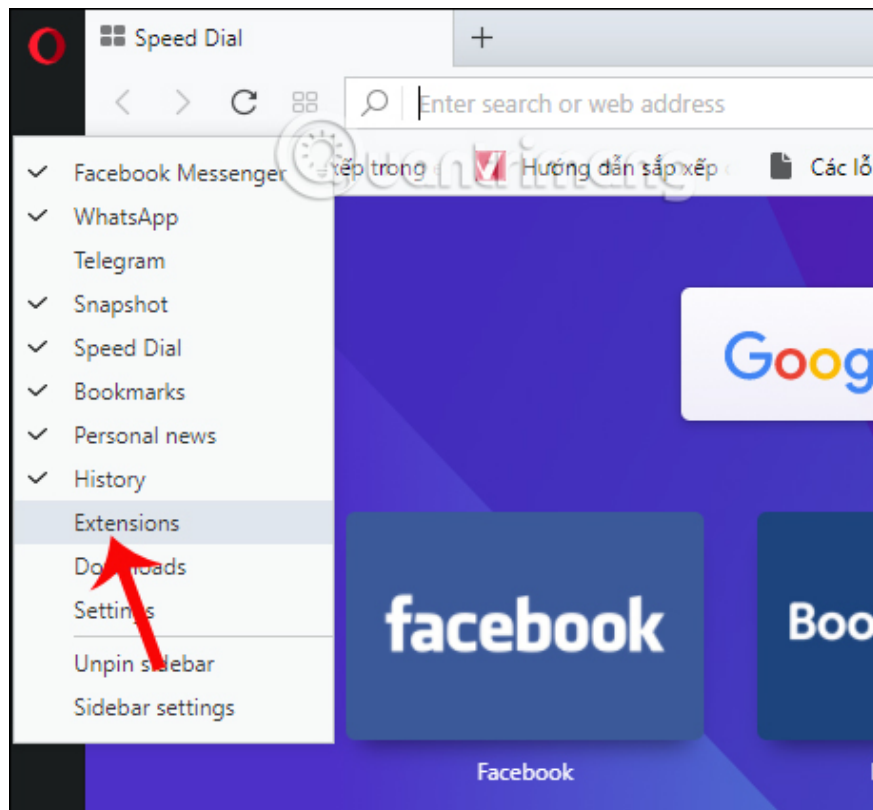

Step 2:

Next, start Opera browser and click on **the Extensions icon** in the leftmost menu bar as shown below.

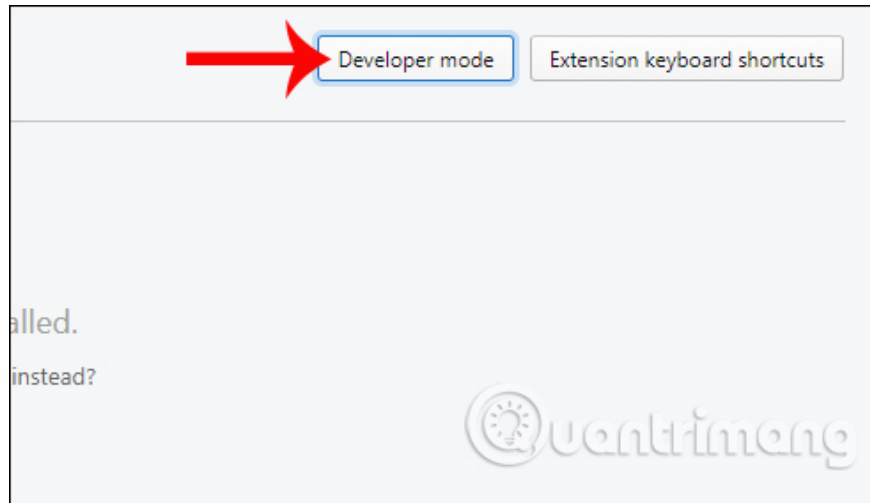

Note to users if you do not see the Extension icon on Opera's menu bar, we right-click the menu and select the Extension to display.

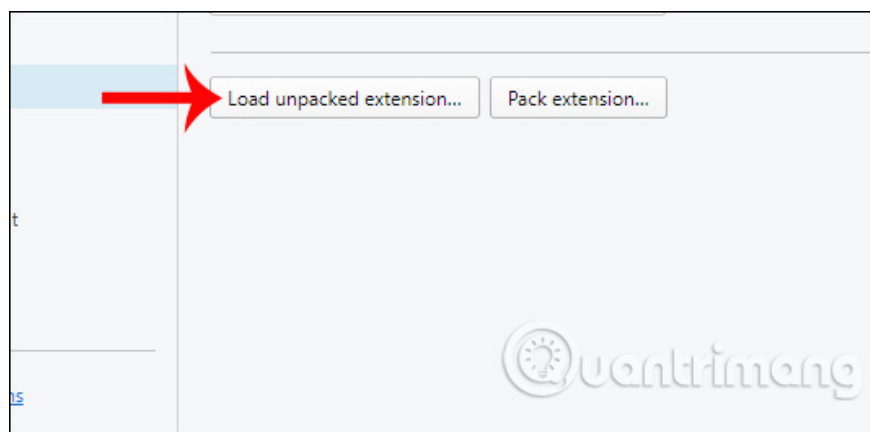

Step 3:

Next in the **Extensions settings** interface on Opera browser, you click on the **Developer mode** button.

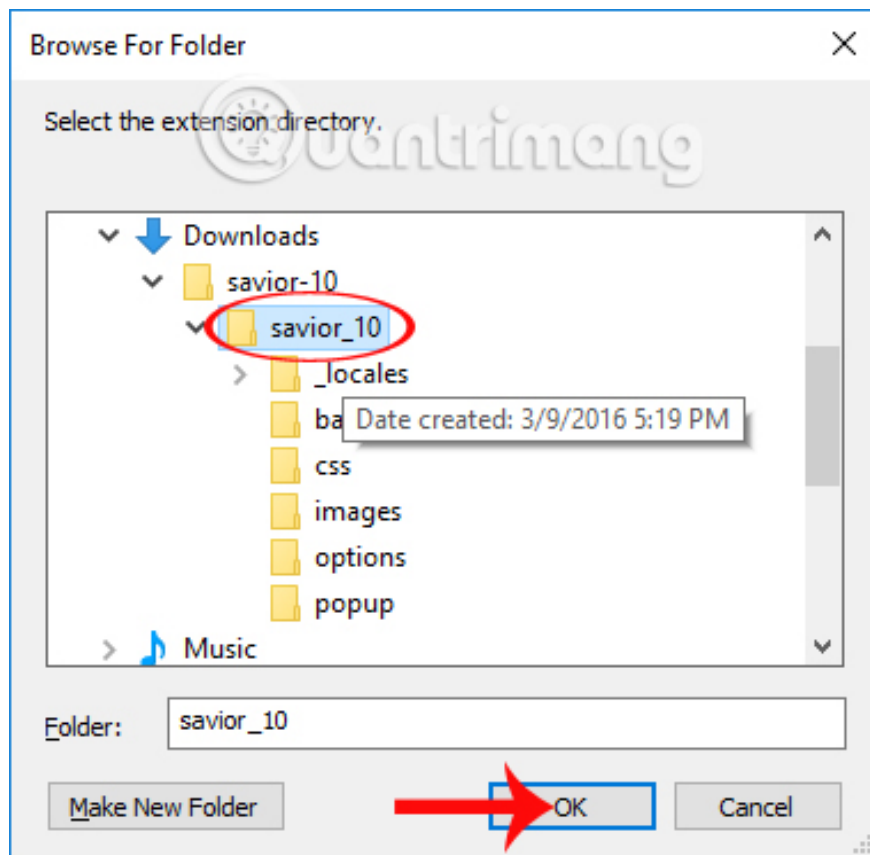

Step 4:

Then the user clicks on the **Load unpacked extensions** button . (Download the extracted utility .) to proceed to download the Savior file to Opera browser.

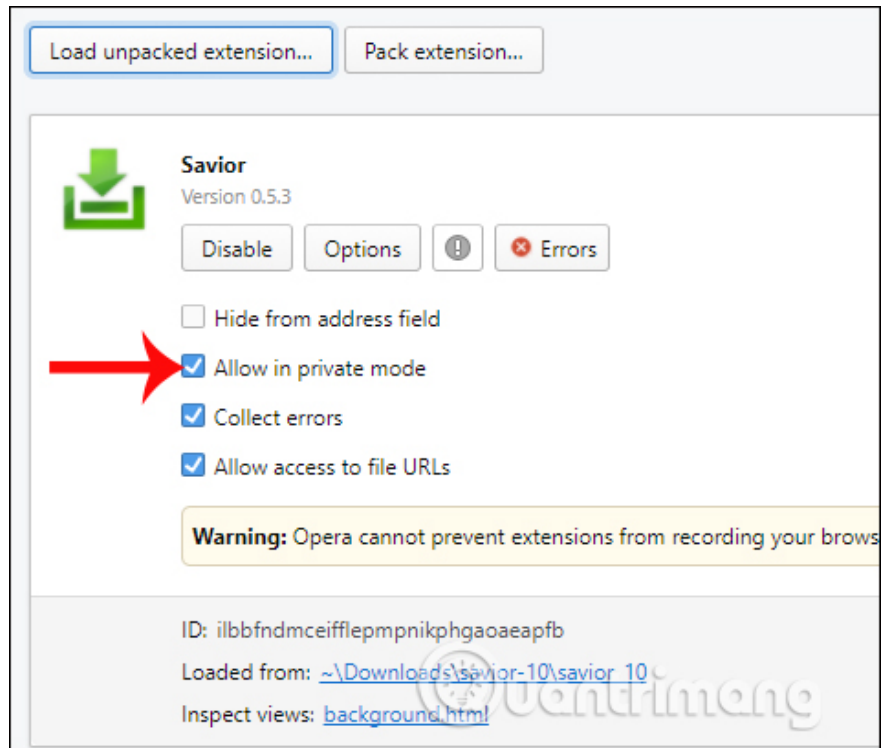

Appeared interface **Browse For Folder** . Here you find the folder containing the utility file Savior on your computer. Click on **the Savior folder** and click **OK** below.

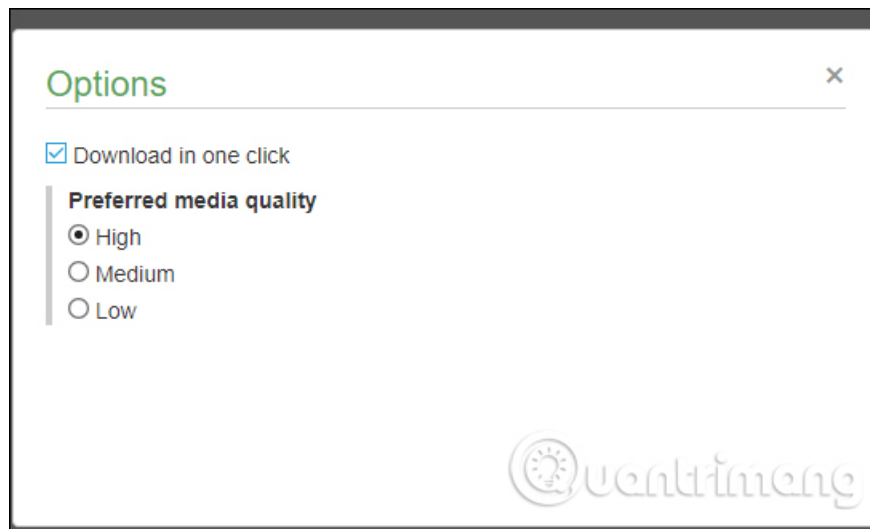

Step 5:

You will immediately see the Savior utility installed on Opera browser with active mode. Here the user will have some options for Savior utility. You can select **Allow in private mode to Savior to work on Opera's incognito mode** .

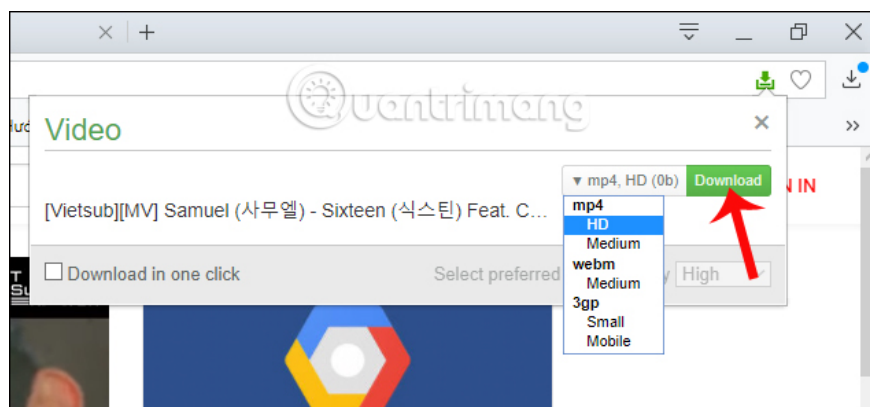

Next, when you click on **the Options button** , the setup interface for the Savior utility appears. Choose the quality of the video download or option to download 1 video with 1 click (Download in one click).

Step 6:

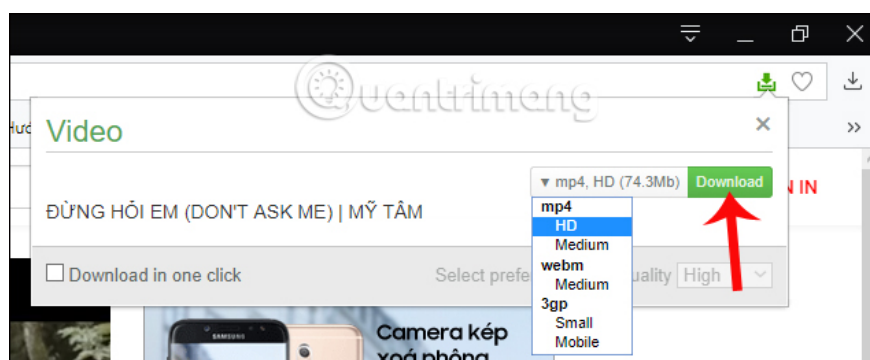

Now try accessing the website to download videos, such as downloading Youtube videos. At the YouTube video playback interface, you will see the Svior utility icon in green. Click on the icon Savior will see the link to download the video the utility captured.

Click on the video format to change the need to download videos. Finally click **the Download button** to download the video.

Step 7:

To **download Youtube videos with Savior on Opera's anonymous browsing mode** , press Ctrl + Shift + N. The Savior utility can work effectively in the anonymous browsing mode Opera. The utility will also catch the video download link quickly and you just need to click **the Download button** to download the video.

Thus, Savior utility supports users to download YouTube videos quickly, works on many Google Chrome, Coc Coc or Opera web browsers like the above article. In particular, Savior can catch quick video download links in both web browsing, normal mode and incognito mode.
