1. How to install TeamViewer on a PC

Installing TeamViewer on a PC isn't too complicated; readers just need to follow the instructions shared by Taimienphi below.

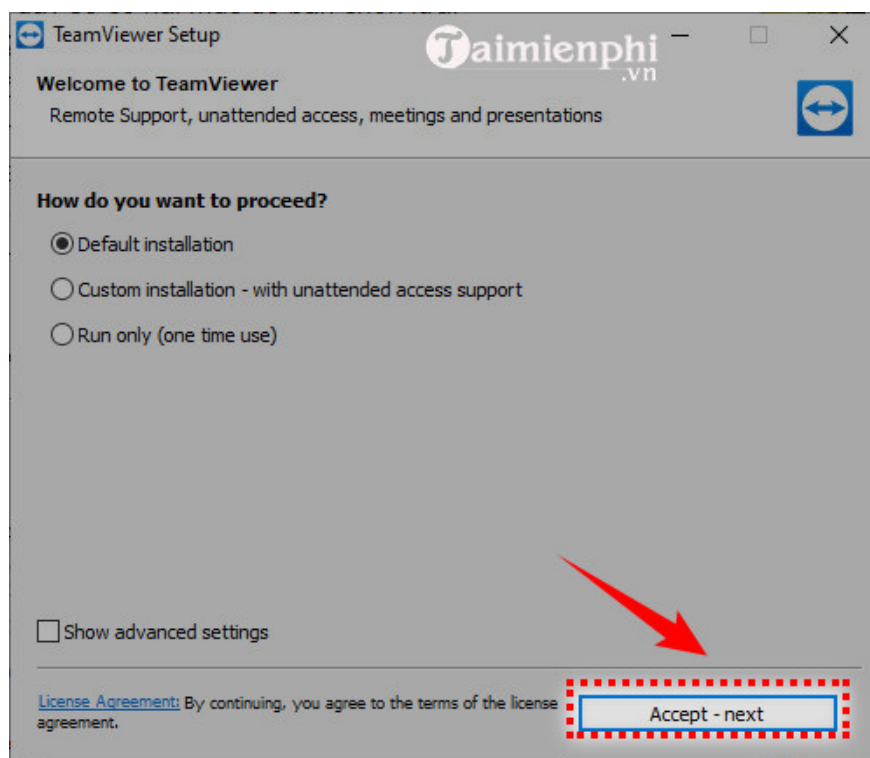

Step 1: Download the latest version of TeamViewer here.

Step 2: Open the folder containing the downloaded file, double-click the installer (or right-click and select **Open**) to begin the installation.

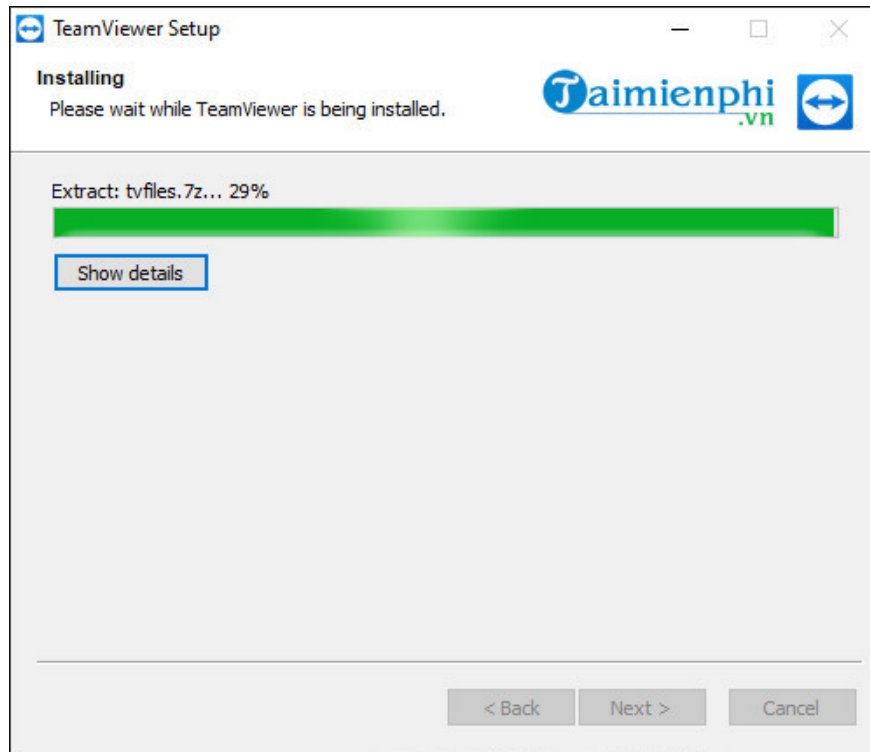

Step 3: A new interface will then appear. Here you have three options to choose from:

- **Default installation** : Install using the default settings.
 - **Custom installation - with unattended access support** : Advanced installation for those who want to learn more about TeamViewer.
 - **Run only (one time use)** : Use directly
- => For example, here we choose the default installation method. Then click **Accept - Finish** to continue.

Step 4: Wait a few minutes for the installation process to complete.

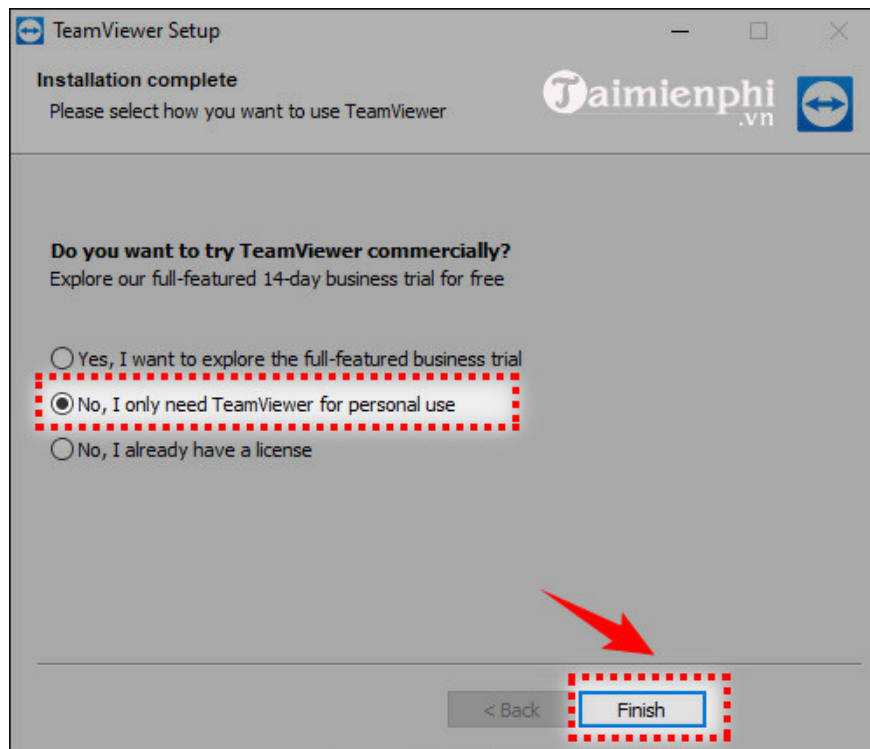

Step 5: After completion, a window will appear asking if you want to try the business version for 14 days.

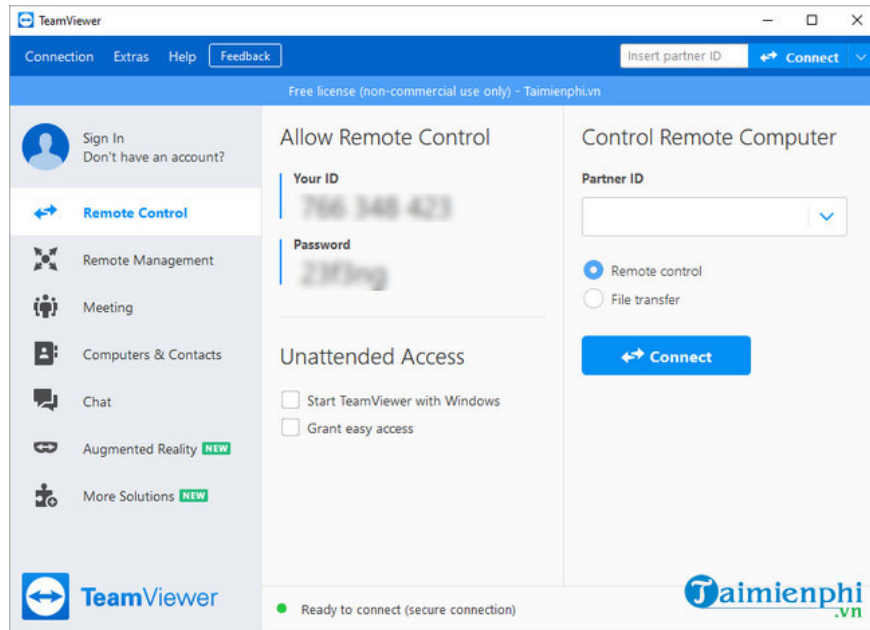

Here you also have 3 options:

- **Yes, I want to explore the full-featured business trial:** Agree to the trial .
- **No, I only need TeamViewer for personal use :** Decline, only use the software for personal work.
- **No, I already have a license:** Check this option if you already have a license for the business version.

=> Then click **Finish** to complete the installation process.

This is the TeamViewer interface after successful installation.

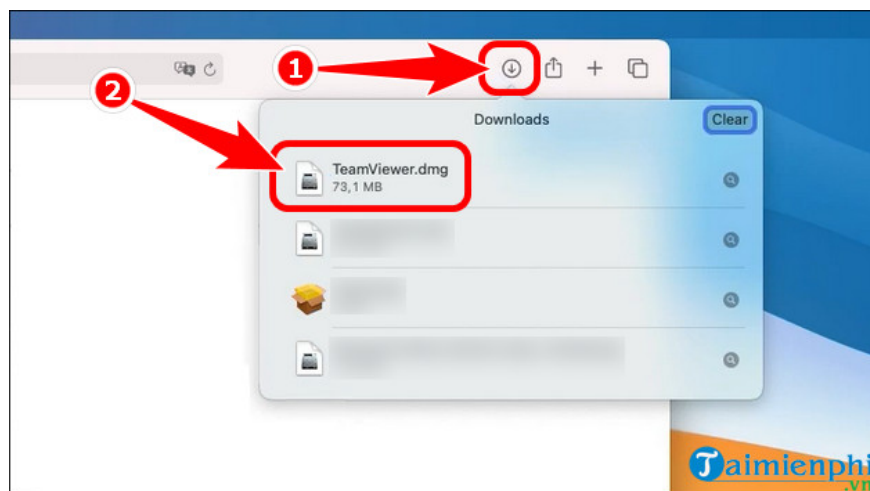

2. Instructions for installing TeamViewer on a Macbook

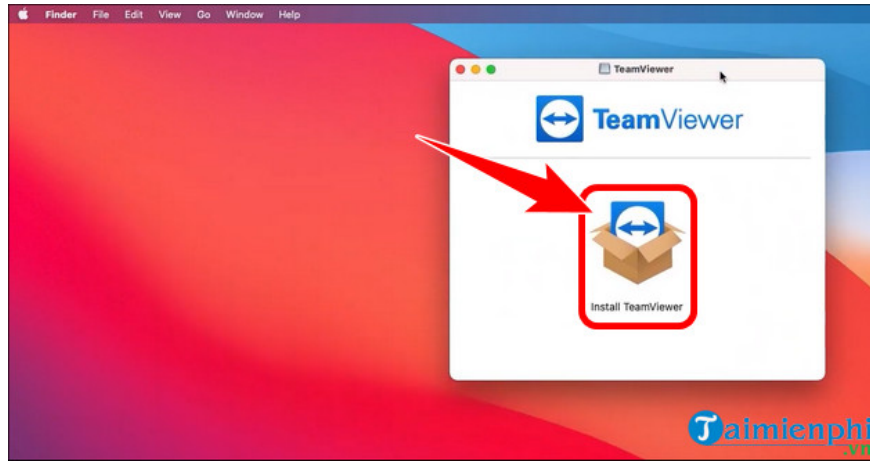

For those who use a Macbook and need to use TeamViewer, you can refer to the following steps to install TeamViewer on your Macbook very easily.

Step 1: Access **the TeamViewer download link for Mac** here.

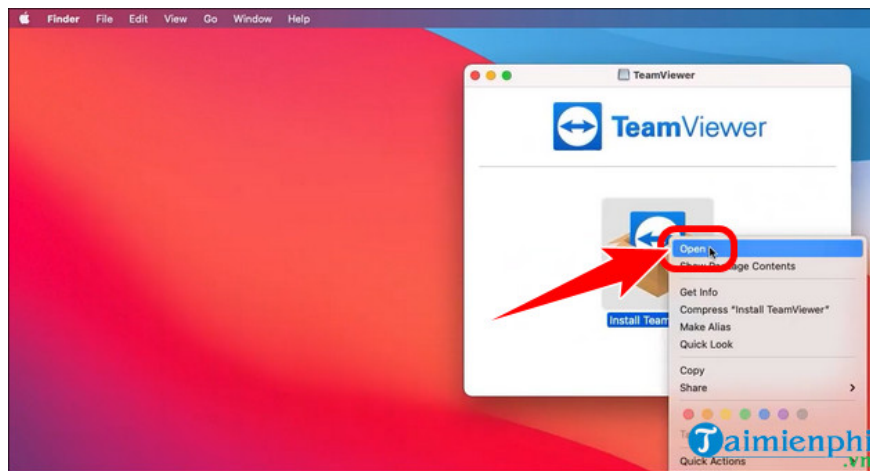

- After completion, open **the Downloads folder** => click **the TeamViewer.dmg file**.

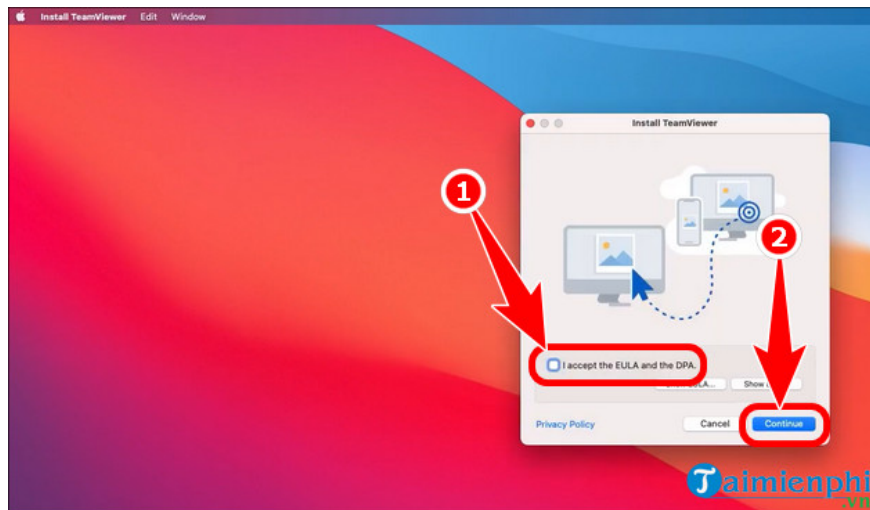

Step 2: Click **Install TeamViewer** .

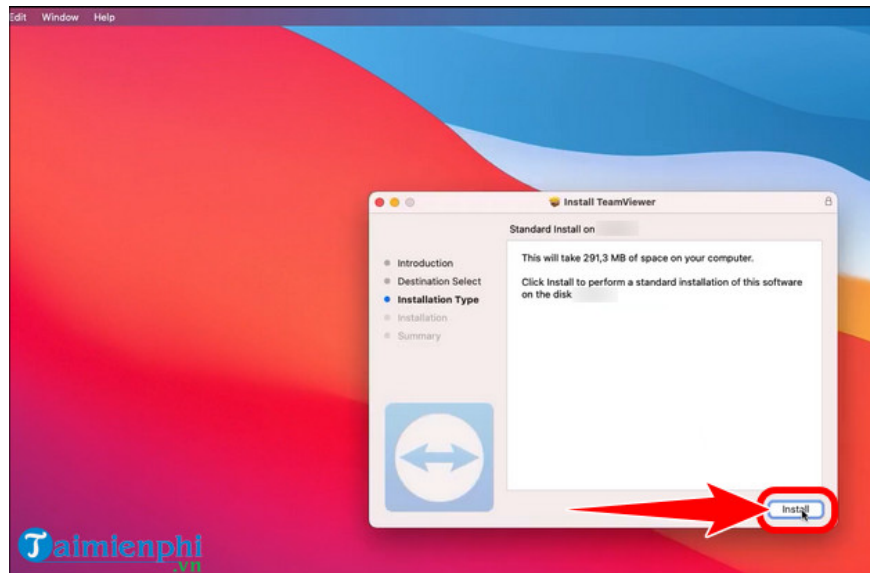

- Click **Open** to begin the software installation process.

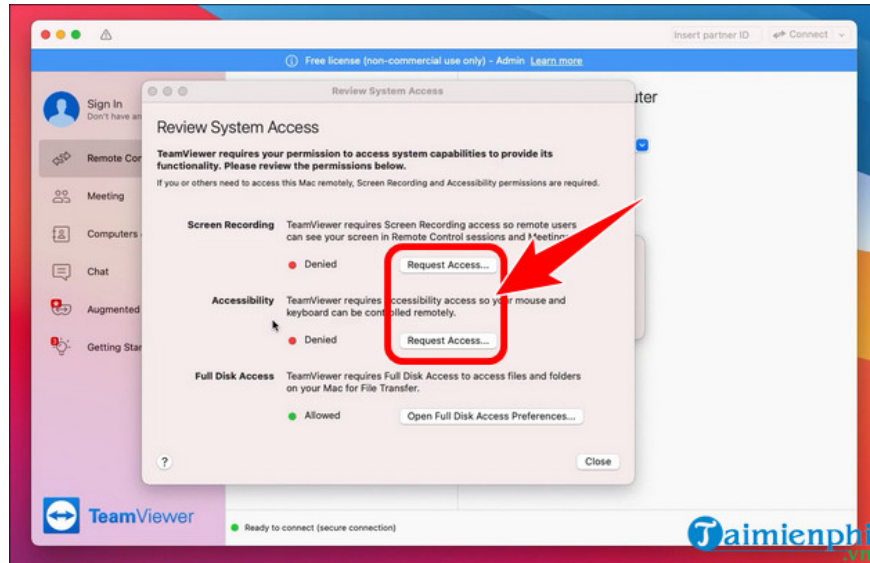

Step 3: Check the box **to agree to the terms and conditions** => **Continue** .

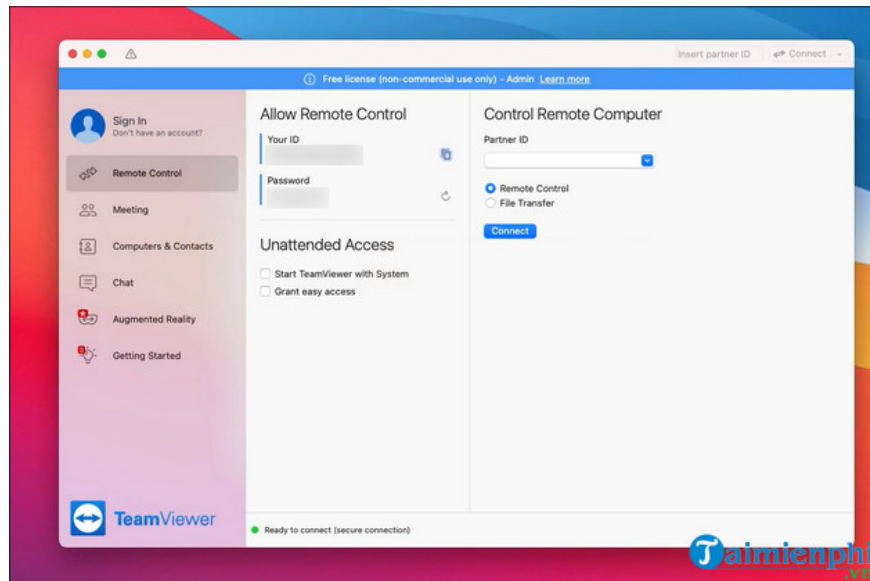

- Continue by pressing **Install** .

Step 4: Allow **TeamViewer** access to your screen , mouse , and keyboard .

- Once complete, the **TeamViewer Macbook** interface will appear as shown below.

3. How to install TeamViewer on Android and iOS

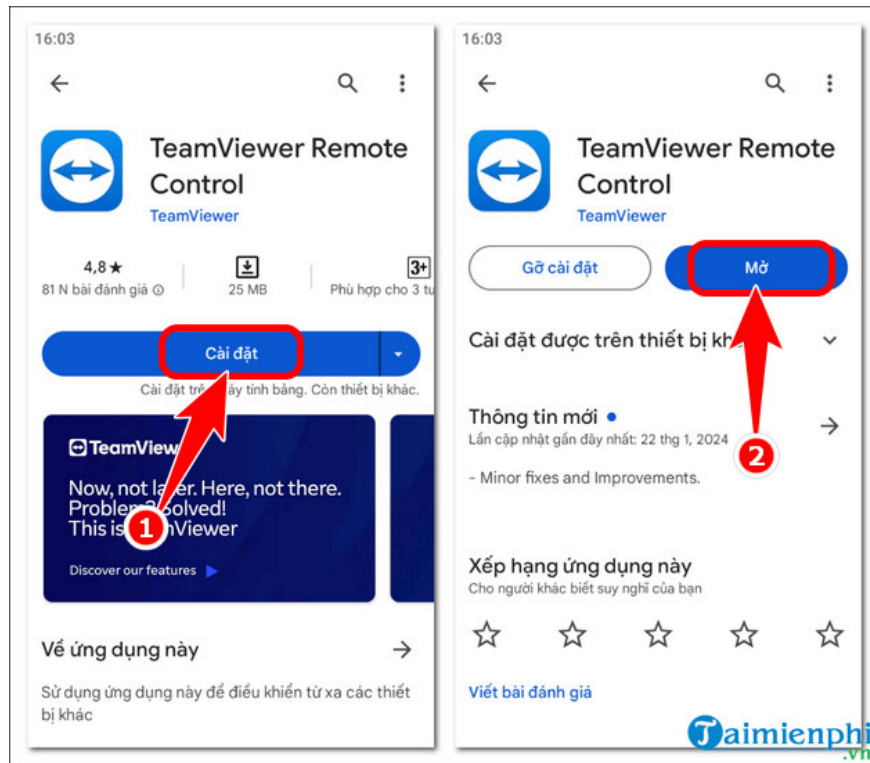

Fortunately, users can also install TeamViewer on their phones and use it to remotely control computers. The operation is relatively similar and easy to follow for both Android and iOS versions.

Step 1: Download **TeamViewer for your phone** using the link below.

=> Download **TeamViewer for Android** here.

=> Download **TeamViewer for iPhone** here.

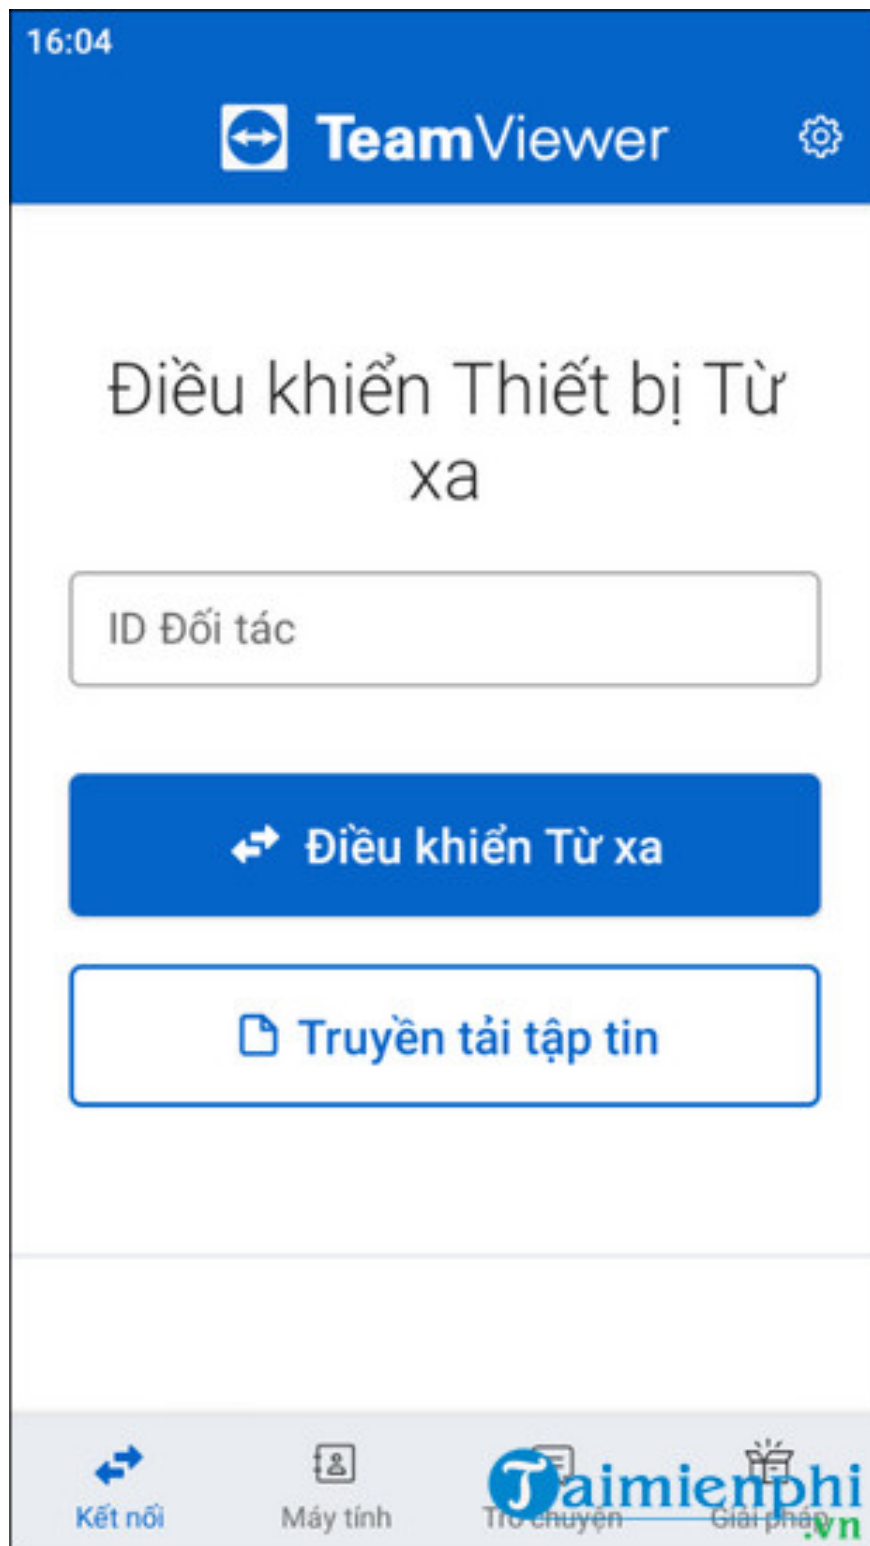

Step 2: Tap **Settings** => tap **Open** .

- Click **Agree and continue** => select **Start** .

Step 3: The main TeamViewer interface **on your phone** will appear as shown below.

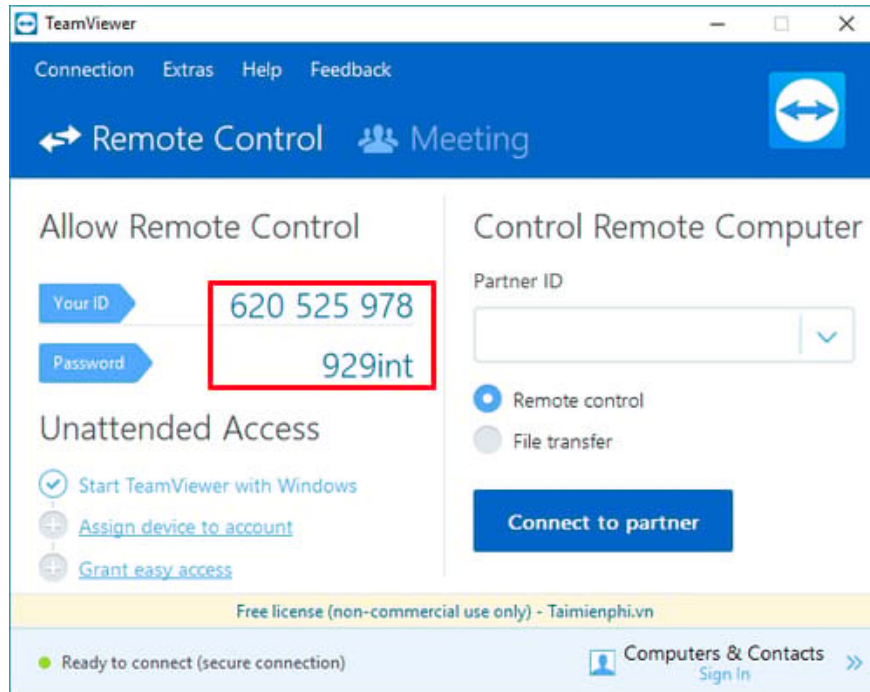

4. Instructions on using TeamViewer to connect to a remote computer.

Although the installation process for TeamViewer on PCs, Macbooks, and phones is quite different, the usage is similar. You only need to know your friends' or colleagues' IDs to easily connect to their computers remotely.

Step 1 : Open **the TeamViewer software** you just installed .

Step 2 : Pay attention to **the two items** on the main interface:

- **Your ID** : TeamViewer assigns a 9-digit ID to each computer, which remains unchanged.
- **Password** : A 4-digit password that changes each time you activate the program.

Step 3: To connect to another computer, first make sure that computer has TeamViewer installed. In the **Partner ID** field , enter the partner's ID, then select **Connect to Partner** . A message box will appear asking you to enter the password to access that computer. After entering the password, select **Connect**.

In summary, we have just guided you on how to install and use Teamviewer software. It's quite simple; with Teamviewer, all you need is an internet connection to quickly and efficiently access and repair, troubleshoot, install, and exchange information with other people's computers.

While using TeamViewer, if you want to save your connection list and unlock supporting features, you can **create a TeamViewer account** and log in. We've provided detailed registration instructions in a previous article; just follow the steps to create a free TeamViewer account.
