

How to install the Chrome utility for Firefox

Chrome has a range of useful and extremely interesting gadgets. However, there are quite a few utilities that can only be installed on Chrome that cannot be installed for other browsers such as Firefox. So how to do it?

To expand more features on the browser, or use more features without having to install software, browser-based utilities grow strongly to support users, especially Chrome. The utilities are completely free and the installation process is quite simple and convenient for users.

However, there are many utilities that can only be installed on Chrome and ignore other browsers, such as Firefox. If you need to use an add-on on Chrome, but you're using Firefox and can't install it, what should you do?

To solve this problem, a dedicated utility can transform the Chrome utility for us to install on Firefox. Find out what the utility is in the tutorial below.

How to install Chrome add-on on Firefox

We will use the **Chrome Store Foxified** utility to **quickly** install Chrome add-ons to Firefox.

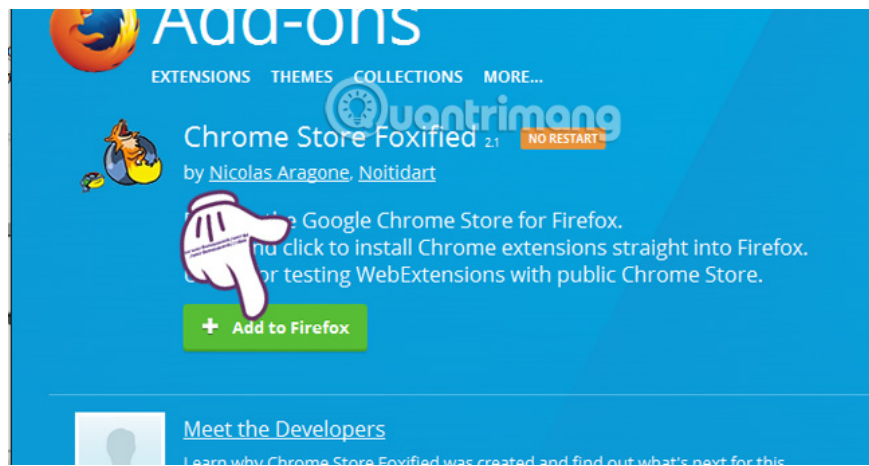

Step 1:

You install the Chrome Store Foxified utility under the link below on Firefox browser.

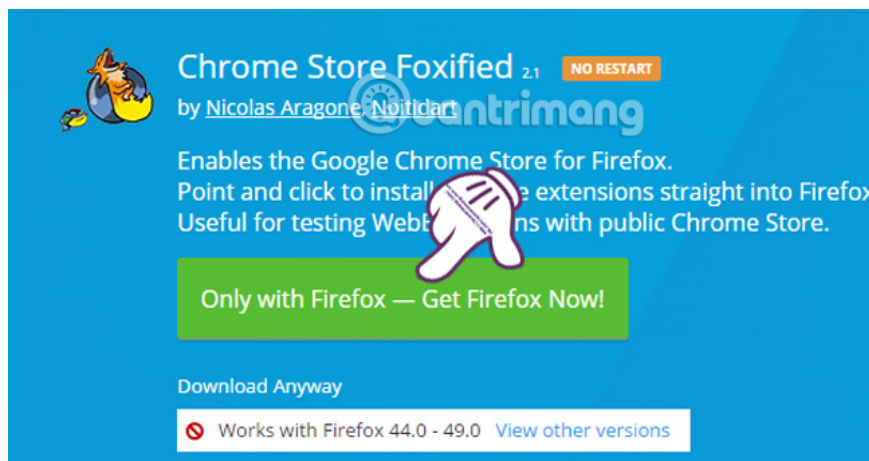

1. <https://addons.mozilla.org/en-US/firefox/addon/chrome-store-foxified/>

Step 2:

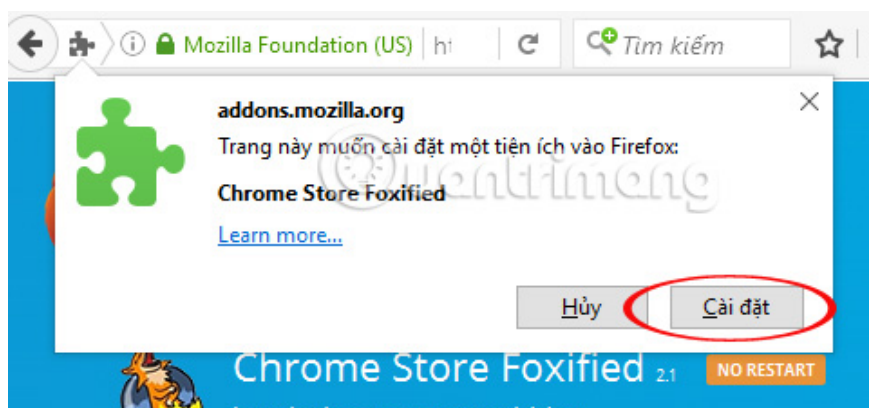

We proceed to install the utility as usual.

Note , if you click on the link above that appears the interface below then we choose **Only with Firefox - Get Firefox Now** to upgrade version.

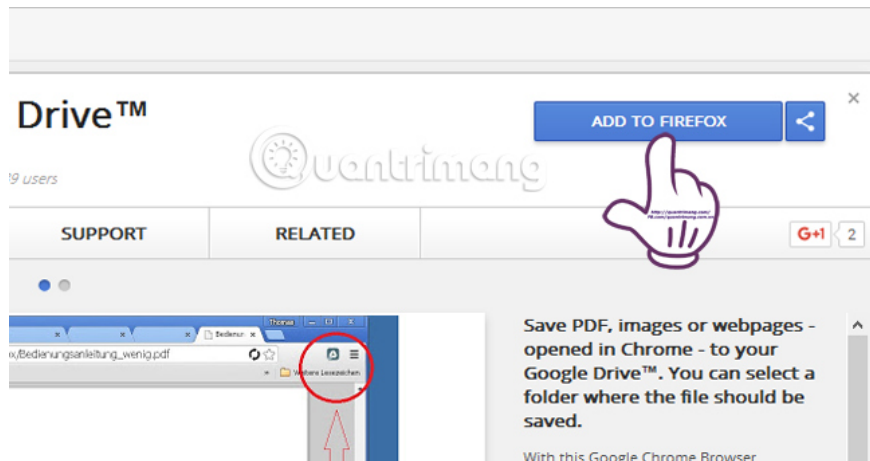

Then also install the utility in the usual way.

Step 3:

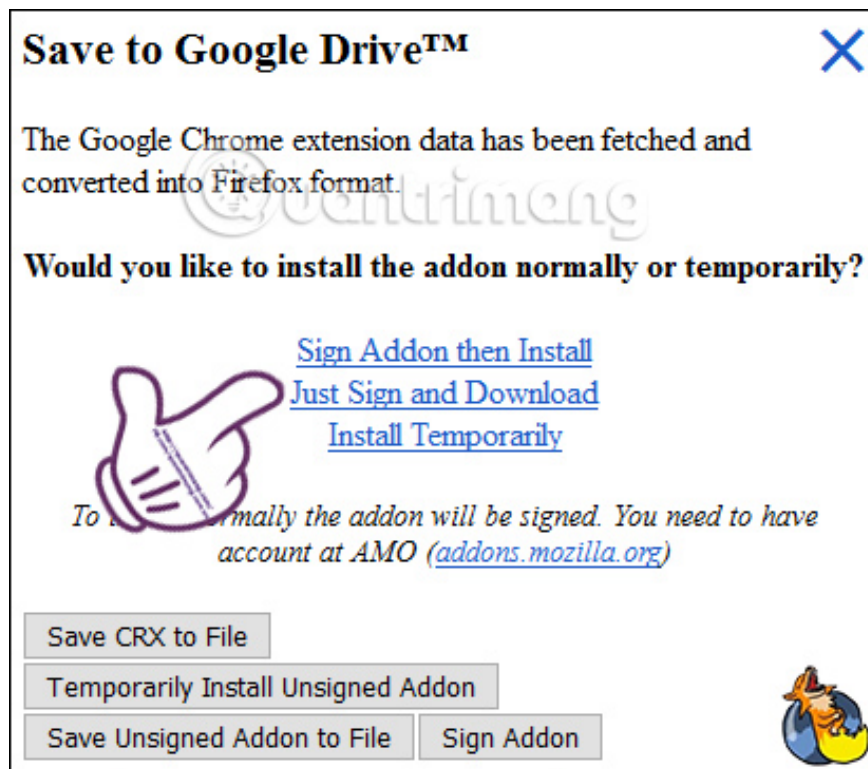

Now, try accessing the utility installed on Chrome but can't install it on Firefox. For example, I will proceed to install the **Save to Google Drive** utility.

After accessing the add-on link, you will see the add-on installation button on Chrome changed to **Add to FireFox** . Click Add to Firefox to download and convert the utility to **the supported xpi format on Firefox** .

Step 4:

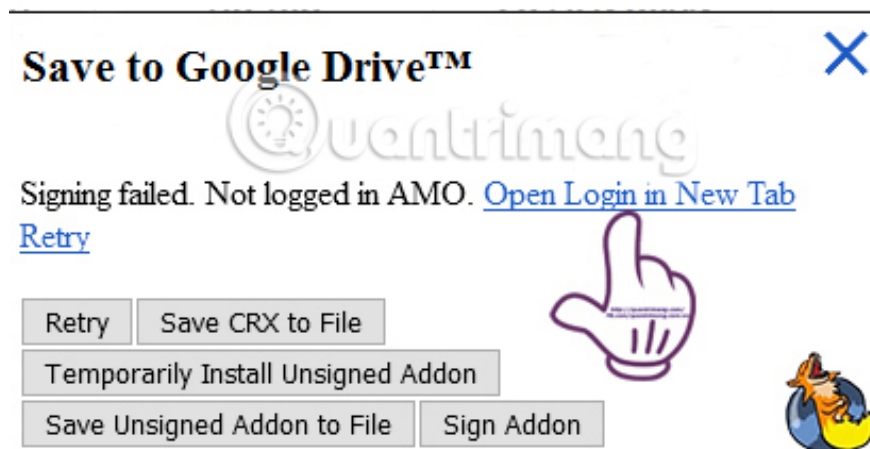

You will see the installation capacity of the utility. Then, Firefox appears **3 options** : **Sign Addon then Install** (Sign up add-on and install), **Just Sign and Download** (Register and download only) and **Install Temporarily** (Temporary installation).

If you want to use a long-term utility in Firefox, it's best to register. At the same time, you must have **a Mozilla account** . If you choose to install temporarily, the utility will disappear when we close Firefox.

Step 5:

If you do not have an account, you will be asked to register an account. Click **Open Log in New Tab Retry** to register an account.

Save to Google Drive™ ✕

Signing failed. Not logged in AMO. [Open Login in New Tab Retry](#)

Retry Save CRX to File

Temporarily Install Unsigned Addon

Save Unsigned Addon to File Sign Addon

The steps to sign up for an account on Firefox are also simple, just fill in the required fields to finish.

to continue to Add-ons

 Show

By proceeding, you agree to the [Terms of Service](#) and [Privacy Notice](#) for Firefox cloud services.

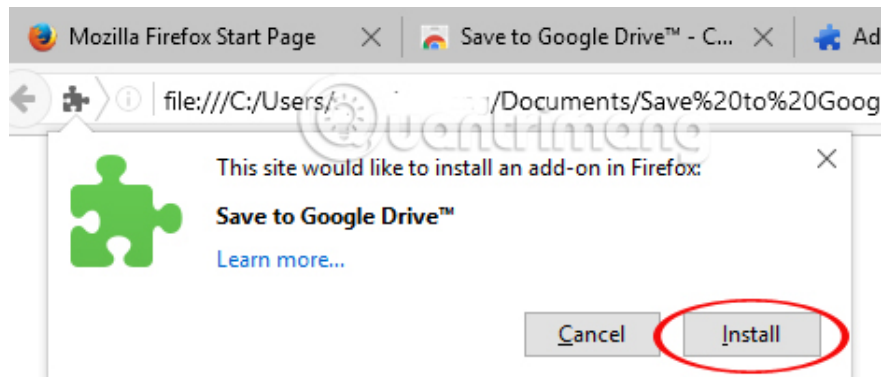

[Have an account? Sign in.](#)

Step 6:

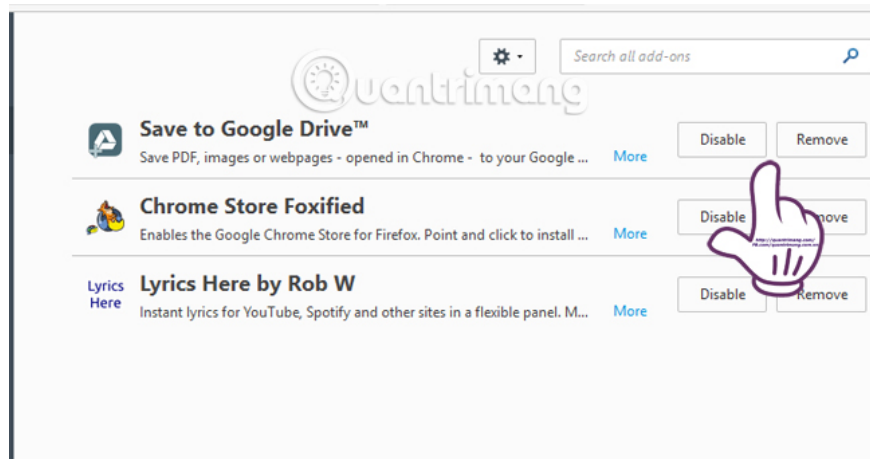

After registering the account, we will register and install the utility. Please login to your Mozilla account and click **Sign Addon** then **Install** button. The notice board appears as shown below. Select **Save Signed Addon to File**.

You proceed to download the xpi extension utility file to Firefox and then open the file to run. We will be transferred to the new link, followed by a notice whether we want to install the utility or not? Click **Install** to install.

Thus, we have successfully installed the Save to Google Driver utility on Firefox browser.

Note, in case the utility cannot be installed, an error message will appear to the user.

As such, we have completed the tutorial on installing Chrome add-ons on Firefox. Although it takes many steps, it is relatively simple to implement. Now, we can experience the Chrome browser right on Firefox.
