

How to install the Dark Mode interface for Chrome iPhone

Tweaking DarkChrome will bring the dark background interface to Chrome on jailbroken iOS devices.

Dark Mode dark background has now been updated for many applications by manufacturers, providing a reduced interface to the user's eyes and also more beautiful when we use it on OLED devices. If the user wants to bring the Dark Mode interface to Chrome on iPhone, DarkChrome can be installed.

This tweak installs on jailbroken iOS 11 devices, along with color options as well as a color reversal mode for the search button when browsing in Chrome's incognito mode. The following article will show you how to install DarkChrome tweaks on iPhone.

2. How to install the Dark Mode interface for all Windows 10 screens
3. How to activate Dark Mode on iPhone
4. How to enable Dark Mode on Youtube

Instructions for installing the dark background interface for Chrome iPhone

Step 1:

Users can download the DarkChrome tweak for free from the BigBoss repository in Cydia, or visit the link below to install it.

1. <http://apt.thebigboss.org/onepackage.php?bundleid=com.nwhit.darkchrome>

Step 2:

After the installation is complete, we will go to Settings and then click on the DarkChrome tweak to change the content. At the user-friendly interface, there is a Color Scheme option to choose the color used, including Dark, Flat Dark, True Black. Incognito Indicator to enable or disable the search button's reverse color mode when searching in incognito mode.

The result after enabling tweaking and reloading the Chrome interface you will see the interface is switched to black as shown below. The browser or search page interface changes to a dark background.
