

How to install the Open Broadcaster screen recording software

Previously, TipsMake.com introduced you to some screen recording software such as VLC Media, Bandi Cam, CyberLink YouCam, Camtasia. Today, we will share one more tool used by many people, especially gamers, to shoot video matches. That's Open Broadcaster. Please take a look.

Previously, TipsMake.com introduced to you some screen recording software such as **VLC Media** , **Bandicam** , **CyberLink YouCam** , **Camtasia** . Today, we will share one more tool used by many people, especially gamers, to shoot video matches. That's **Open Broadcaster** . Please take a look.

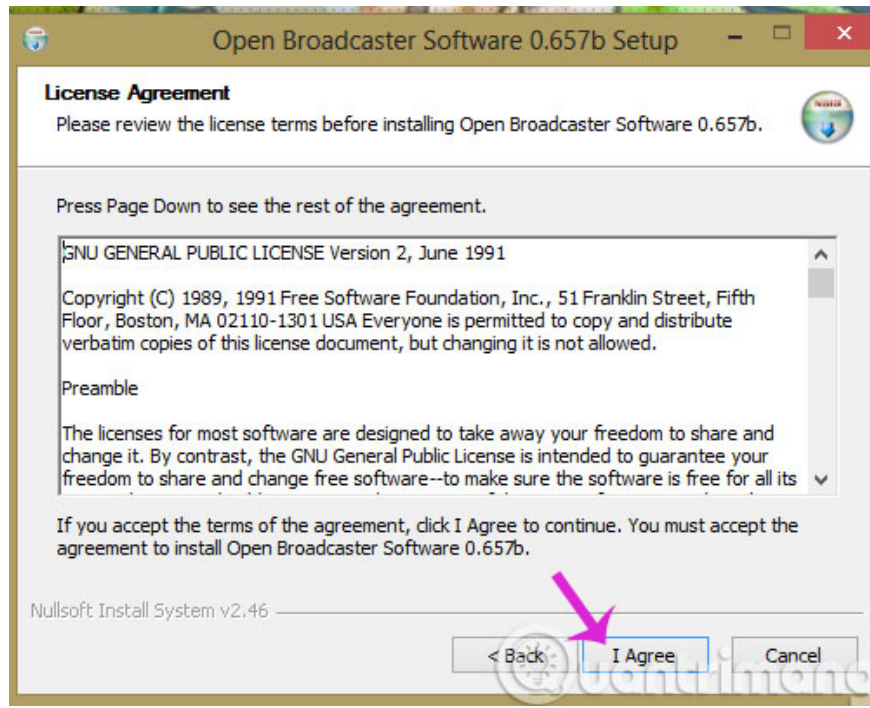

Step 1 :

At the introduction interface, click **Next** to move to the next step

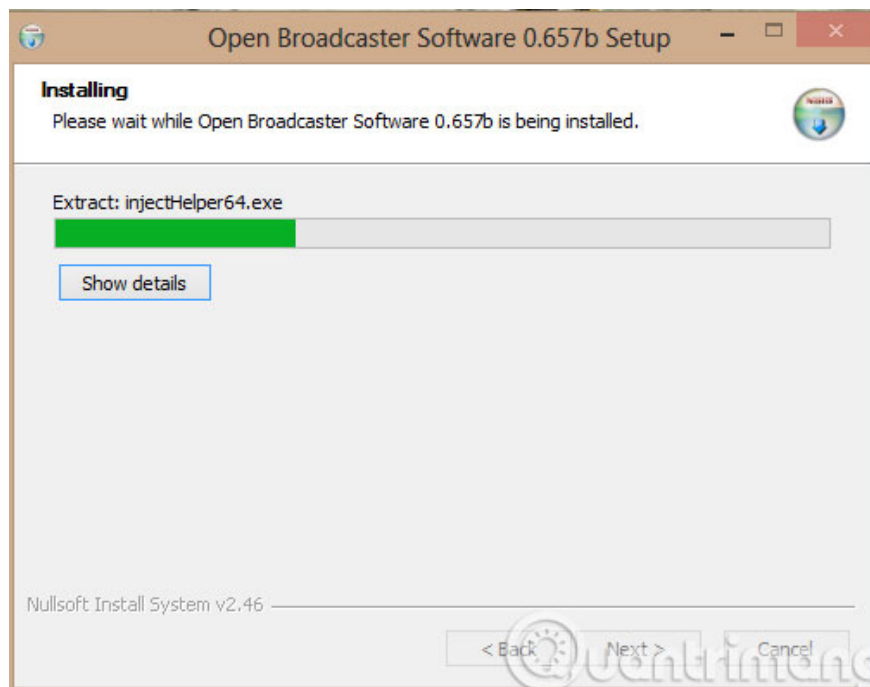

Step 2 :

Please agree to the terms of the software by clicking **I Agree**

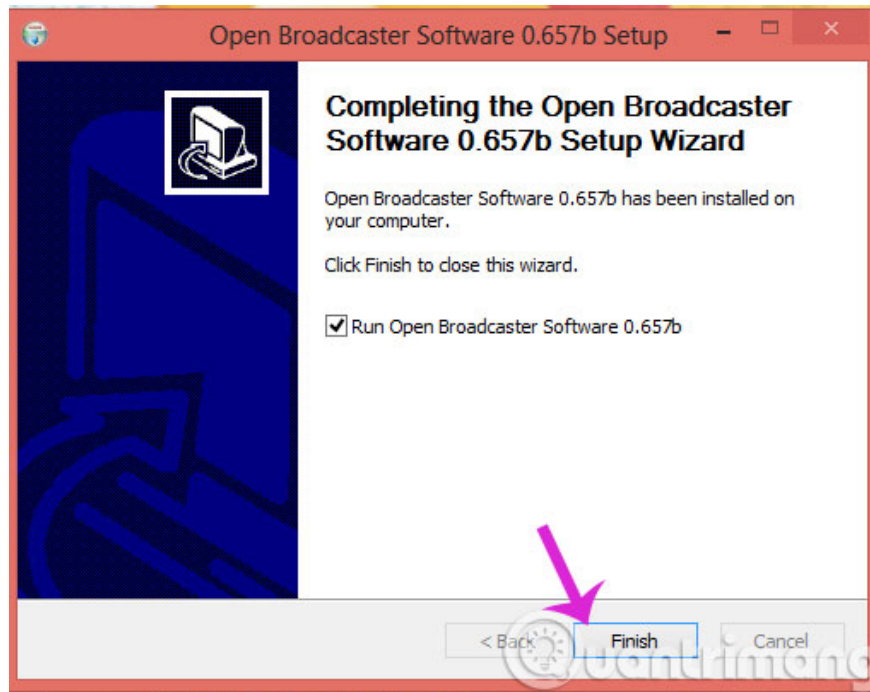

Step 3 :

After that, the installation process will take place

Step 4 :

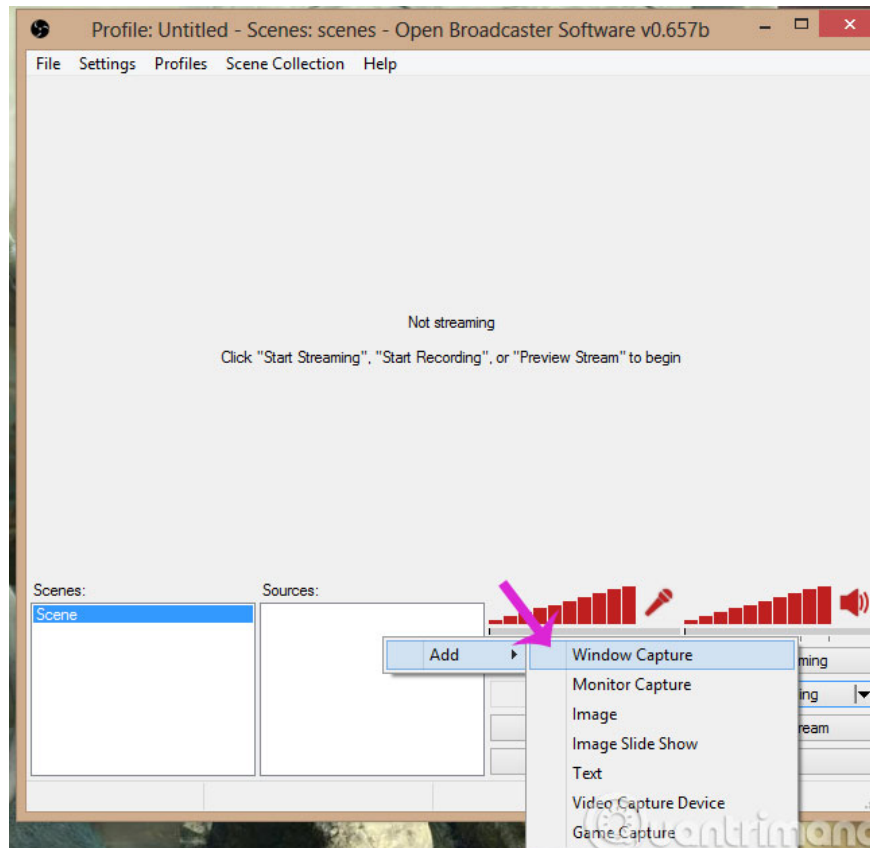

When the installation process finishes, click **Finish** to close the installation dialog box

Instructions on how to film the screen

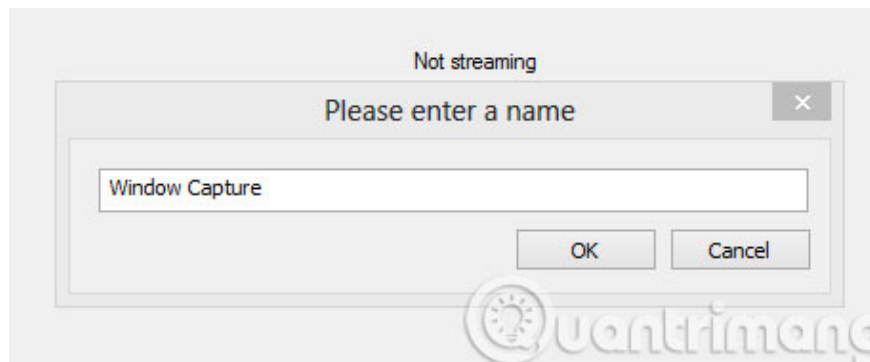

Step 1:

From the main interface of Open Broadcaster, right-click on the Source box and select Add> Window Capture or Monitor Capture (while Window Capture only records activity in one window, Monitor Capture records both Desktop activity).

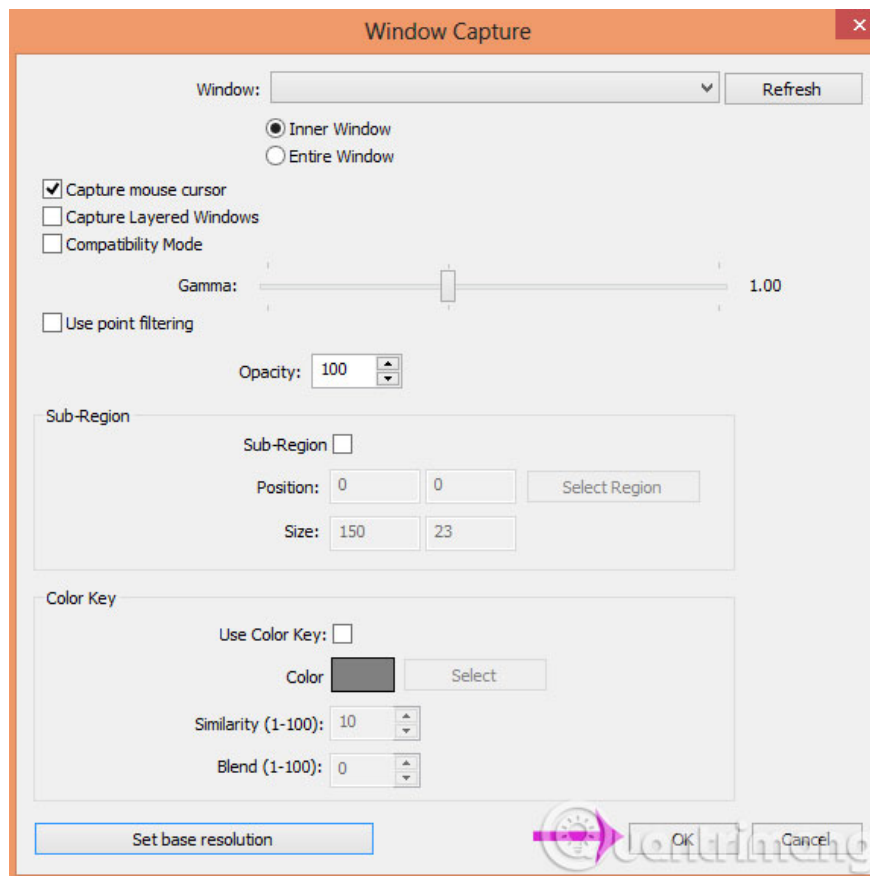

Step 2:

When the new dialog opens, name the source file and click OK

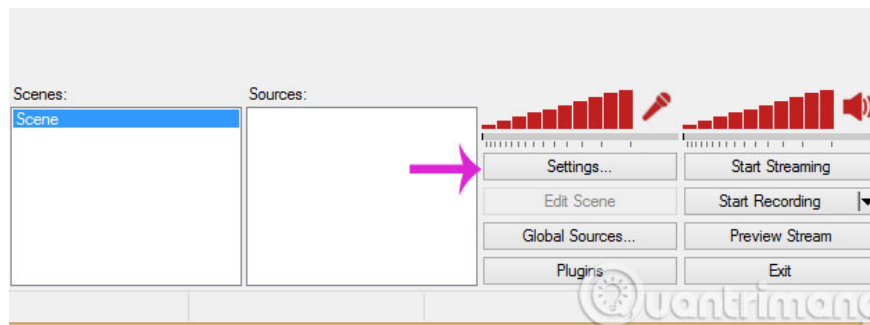

Step 3:

At the next interface, you can change a record setting number. You can leave it unchanged and click OK to move to the next step.

Step 4:

To set the output file, click Settings

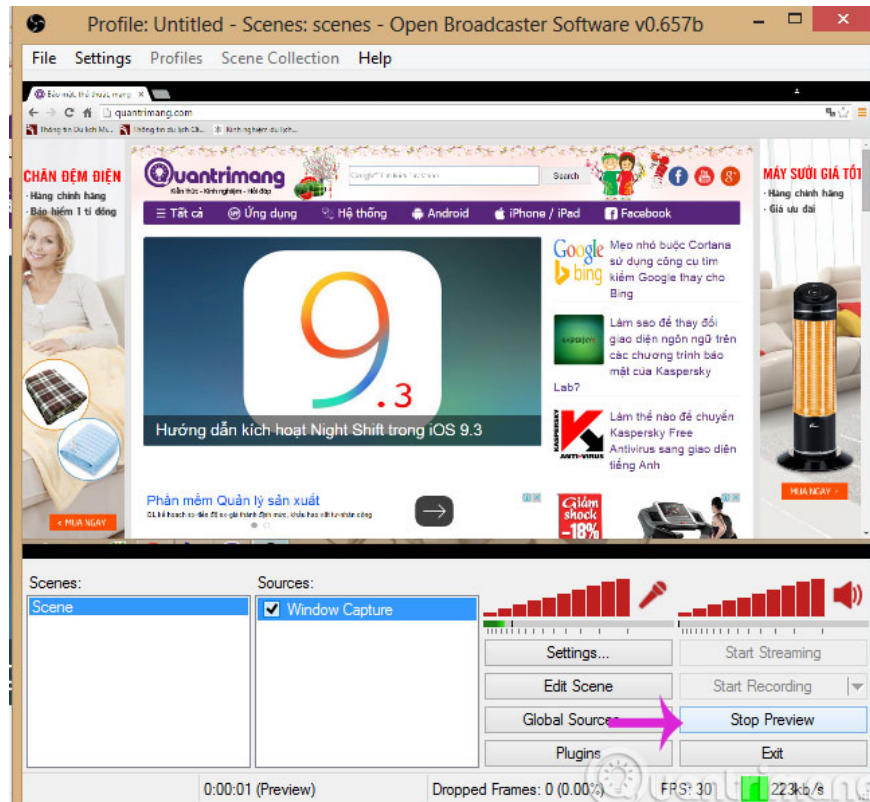

Step 5:

In the Settings interface, click the Broadcast Settings menu in the left column and select File Output only in the Mode section and select the path for the output file. Then, click OK to save.

Step 6:

Click Preview Streaming to start recording. When you need to stop, click Stop Preview

So, you have an additional choice in the screen recording besides the familiar tools mentioned above.

I wish you all success!
