## Instructions to install Opera add-on on Edge Chromium

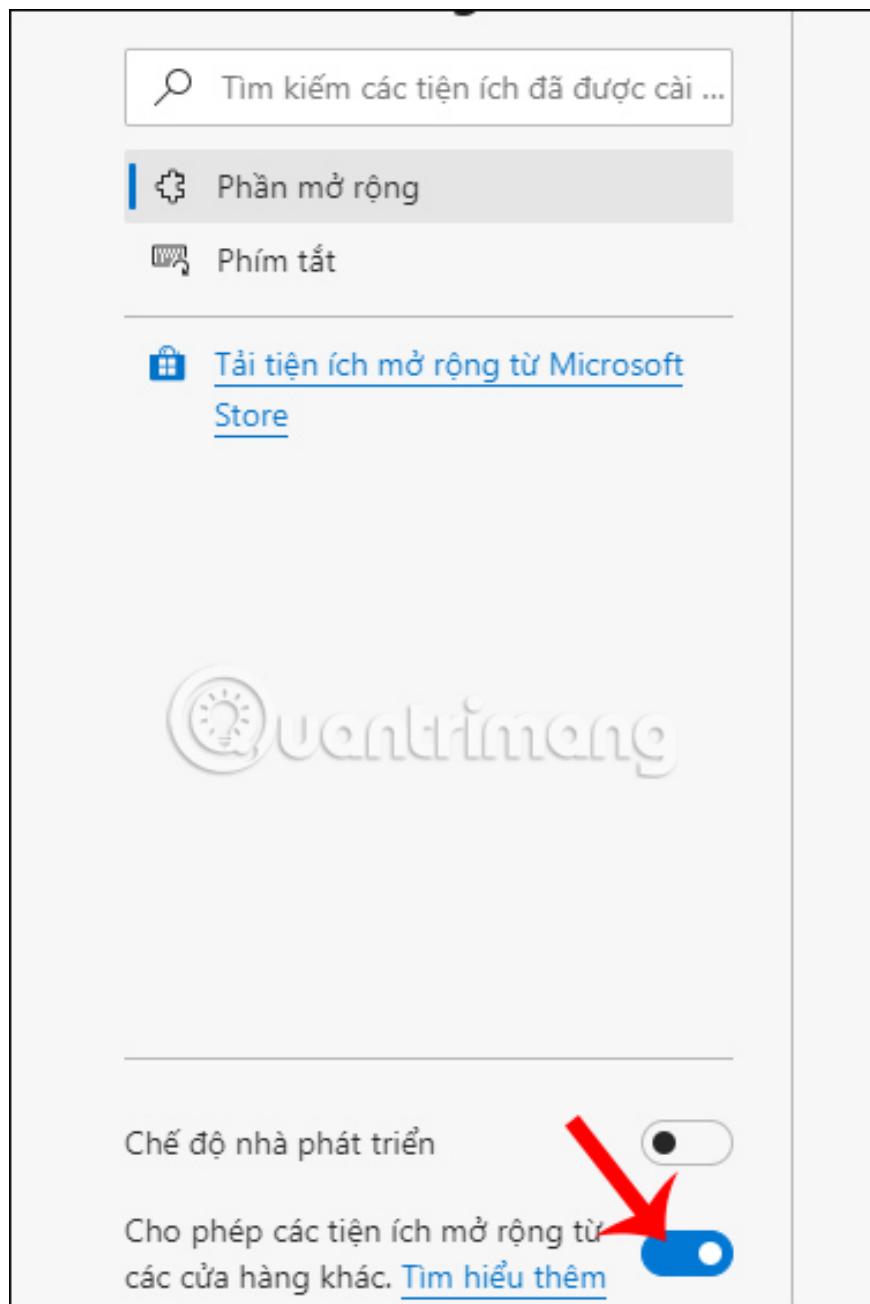

### Step 1:

We will first install the Chameleon extension on the Chrome Web Store on the Edge Chromium by following the link below.

1. Download the Chameleon utility for Chromium Edge

If you do not install this extension, you need to agree to allow Edge Chromium to install Chrome browser extensions. Read the article to enable the How to install the Google Chrome extension on the new Microsoft Edge.

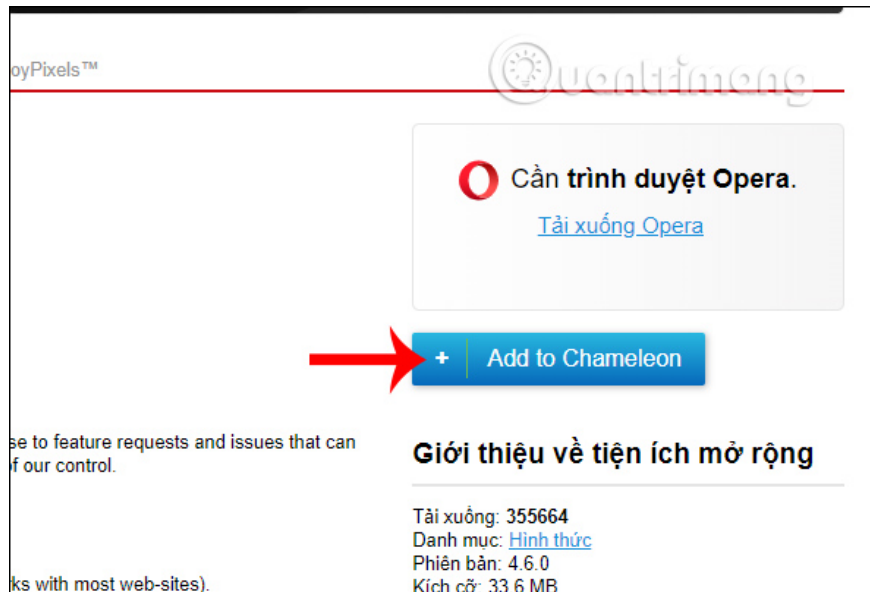

## Step 2:

After installing the utility, users access **the home page of Opera utility** by following the link below and **search for the utility** that they want to install for the Edge Chromium browser.

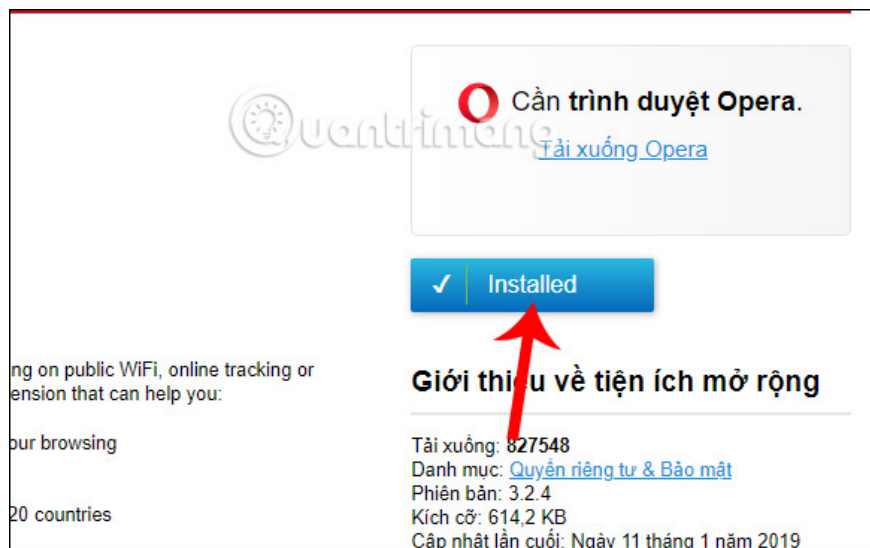

1. Visit the Opera addons homepage

In the utility information interface, click **Add to Chameleon** to install.

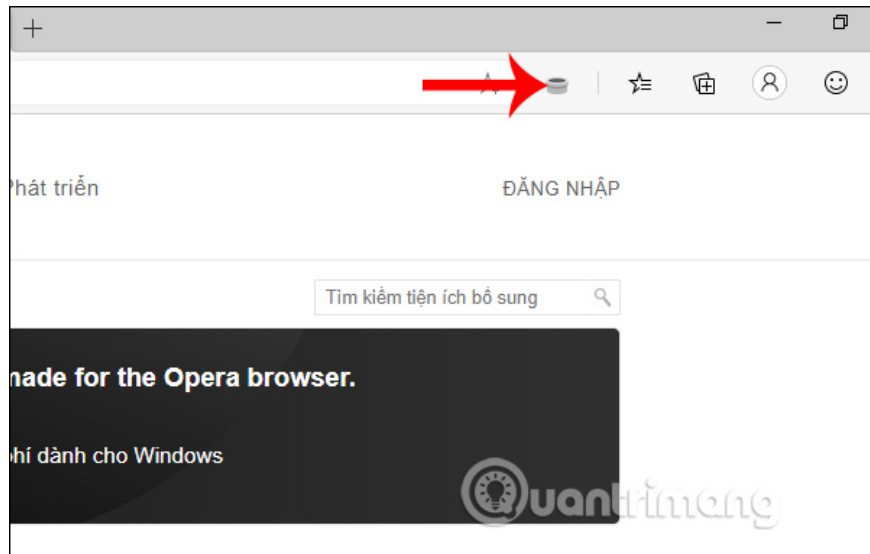

### Step 3:

Wait for the process of installing the add-on on the browser, and when the installation is completed we will see the **Installed** message as shown below.

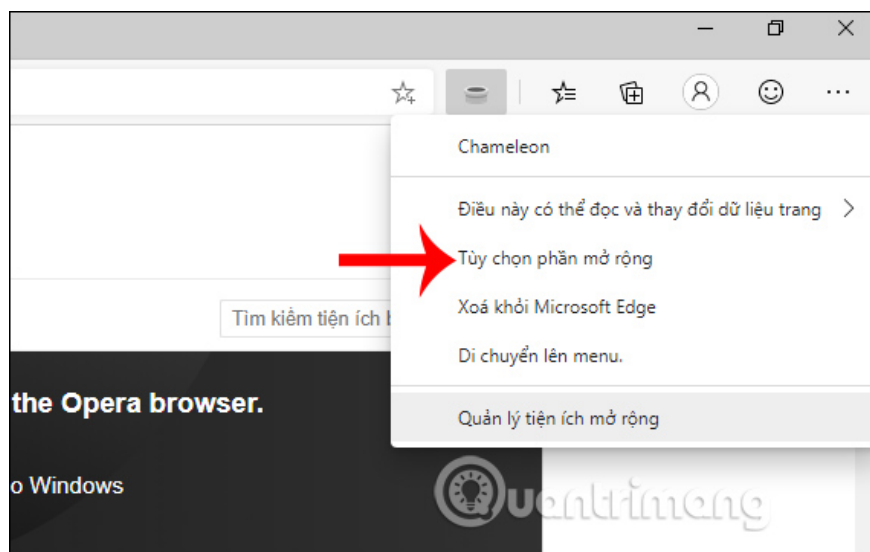

At the same time, the installed utility icon replaces the Chameleon icon at the bottom of the address bar on the Edge Chromium browser.

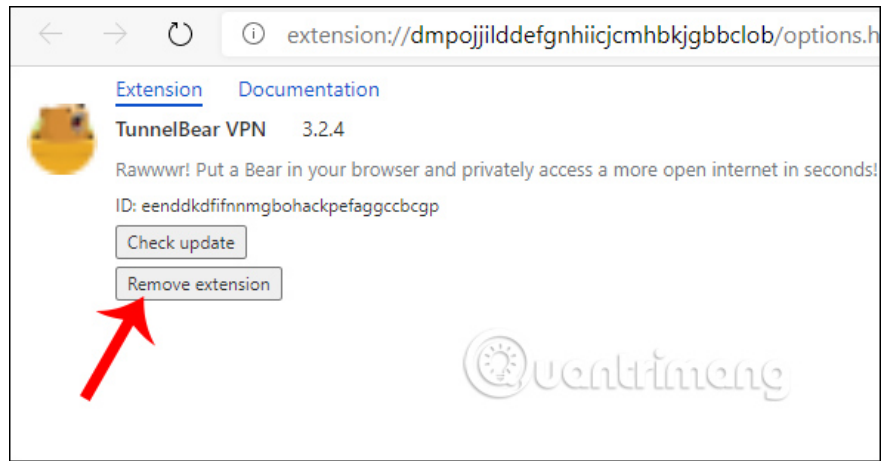

#### Step 4:

If the user wants to **uninstall the utility** , right-click on **the icon** and select **Extensions options** .

Now show the interface for you to check the latest version of the utility at **Check update** and remove the utility at **Remove extension** .

So through Chameleon utility, we can install Opera utility on Edge Chromium browser. However, users should note that during use, there will be errors Chameleon utility does not work, you just need to restart the utility.

I wish you successful implementation!
