

# How to install the Print Server in Windows Server 2012

In today's article, we will see how to install the Print Server, which is very important for administrators and system management.

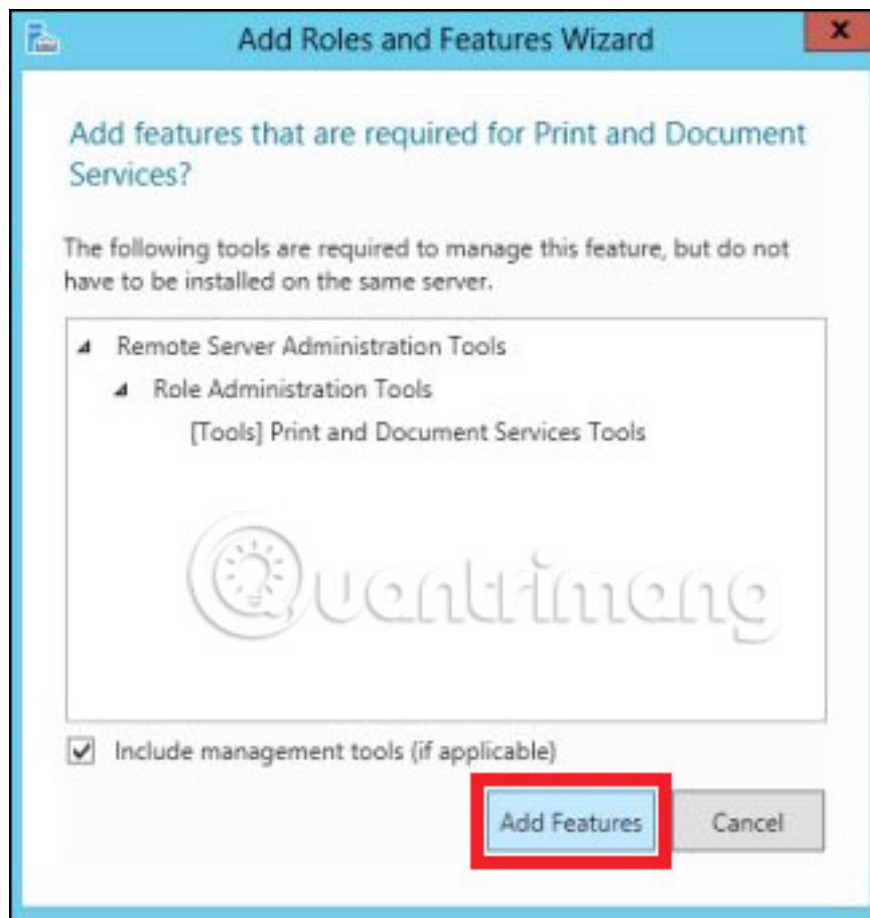

In today's article, we will see how to install the Print Server, which is very important for administrators and system management. To install the Print Server in Windows Server 2012, follow these instructions:

**Step 1** - Go to **Server Manager > Manage > Add Roles and Features > Next > Select Role-based installation or Feature-based installation** , then select **Next Select a server from the server pool** . Finally, click **Next**.

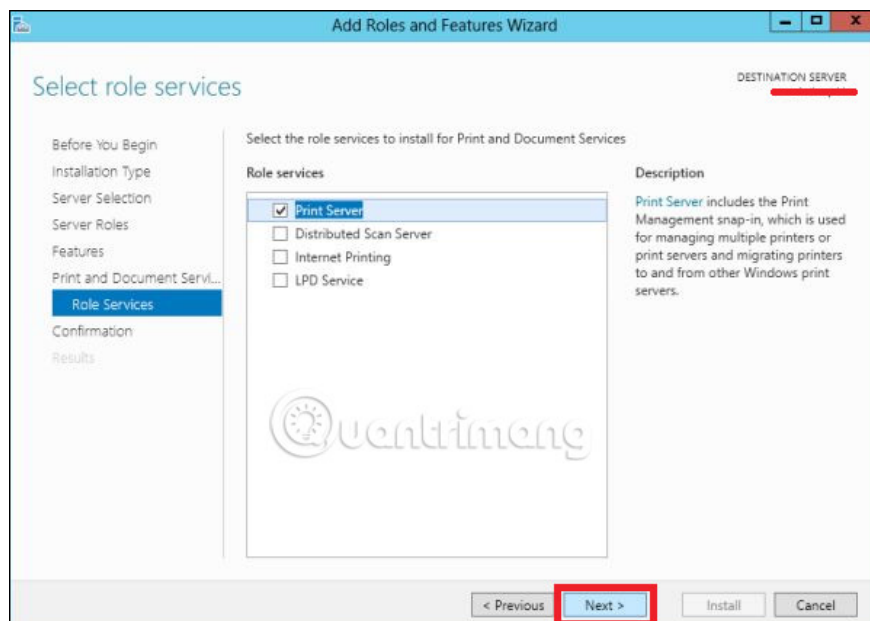

When you have completed the steps above, in the **Roles** list , look for **Print and Document Services** . Then a window will open.

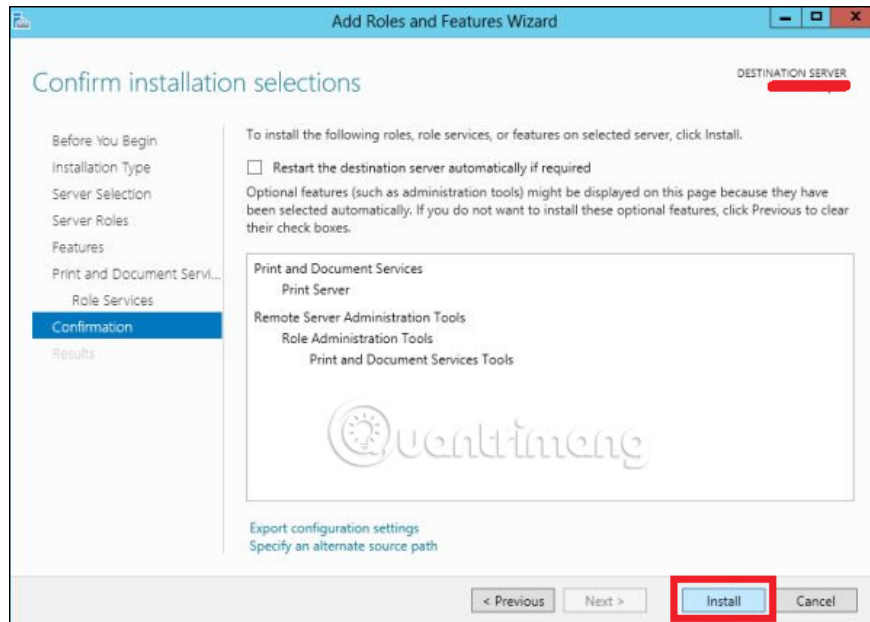

**Step 2** - Click **Add features** and then select **Next** 3 times in a row.

**Step 3 - Select Print Server , then click Next.**

**Step 4 - Click Install.**

Good luck!
