

How to install Unity Web Player to play 3D games

Unity Web Player is a browser plug-in that supports games and runs 3D applications in the browser. Players will feel beautiful 3D design when installing Unity Web Player, more vivid and eye-catching graphics, smooth motion game effect.

Unity Web Player is a browser plug-in that supports games and runs 3D applications in the browser. As soon as we install this tool, we can freely experience ourselves in attractive games and sharp 3D graphics. The visual effect is much more quality, the motion in the game is also impressive and smoother. In particular, the tool ensures stability during game play as well as high security.

In this article, Network Administrator will show you how to install the Unity Web Player tool in your browser, so you can enjoy the fascinating 3D games.

Step 1:

Once you visit the game page, you will see a message asking you to install Unity Web Player to experience the game. Click on **Unity web player install now** .

Or you can install Unity Web Player available on your computer by following the link below:

1. Download Unity Web Player for PC
2. Download Unity Web Player for Mac

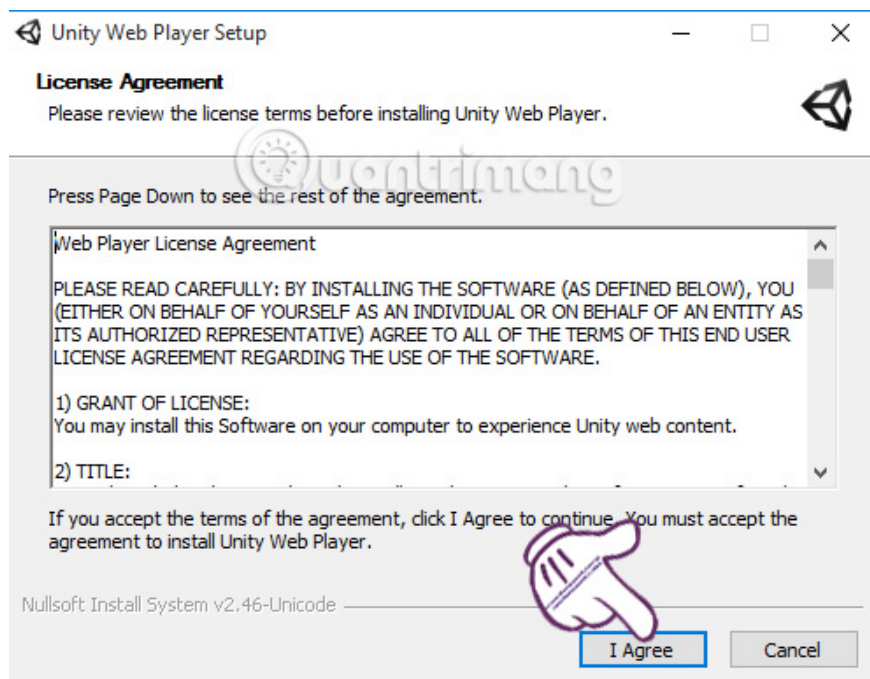

Step 2:

The browser appears a notice board. Click **Save file** to proceed with the installation.

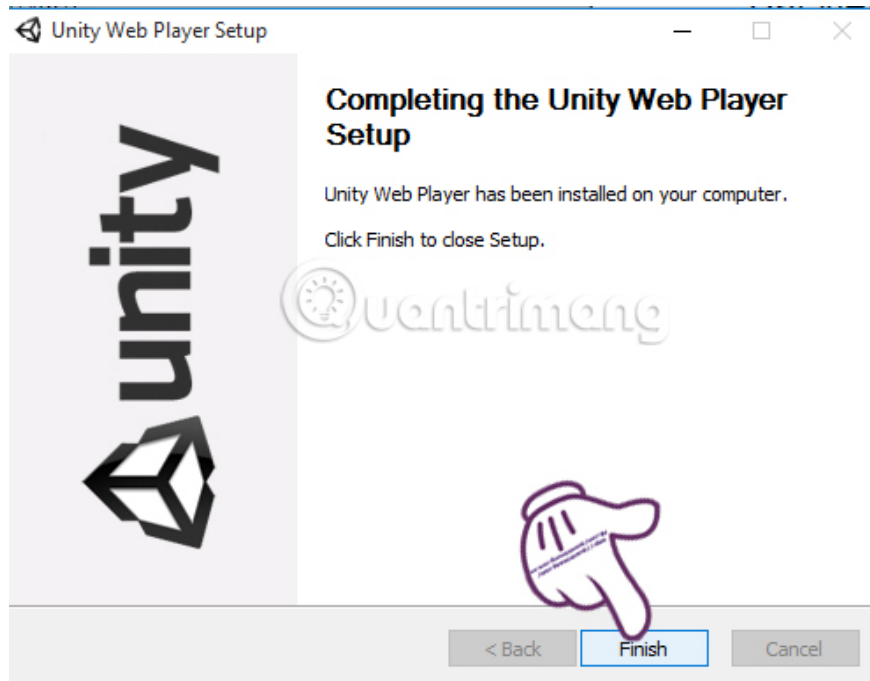

Step 3:

As soon as the tool is installed, the terms of use will appear. You click on **I Agree** to agree and proceed to the next steps.

Step 4:

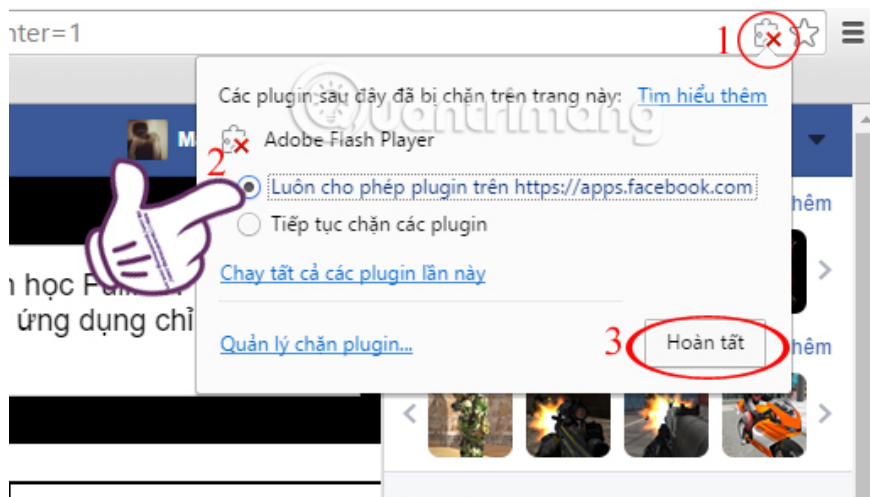

Waiting for the installation process in the computer. New table appears, click **Finish** to end the operation.

Step 5:

After installation is complete, if the browser appears that this Plug-in Unity Web Player message has been blocked on this page, you can allow it to run.

Right at the address bar, click on **the red cross plug-in icon** . Check the **Always allow plug-ins box on** . (Always allow plug-ins on .). Click **Finish** to save the settings.

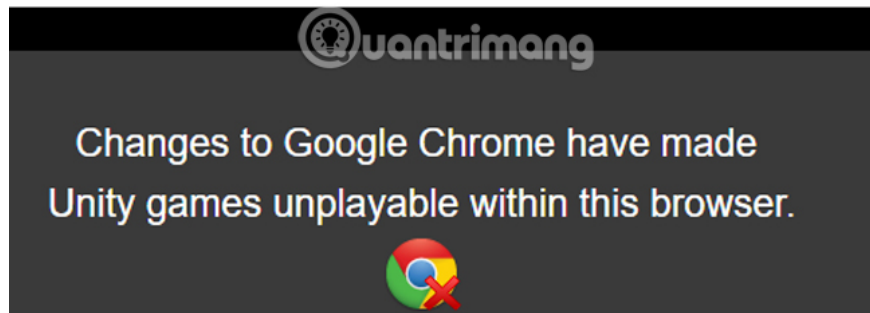

So, you can test yourself with 3D games after installing Unity Web Player.

Note , currently Unity Web Player only integrates with Chrome version 42 and below and does not support new versions. So you cannot install this Plug-in nor can you play 3D games that require Unity Web Player installation.
