Since the release of Windows 7, Microsoft has released hundreds of beautiful themes for Windows. Users can access the Windows personalization gallery home page to view and download available themes for the Windows operating system.

Starting with Windows 10 build 14951, Microsoft provides users with a new solution to download and install the theme for Windows 10 computers. From now on, users can download the theme for Windows 10 through the Windows Store integrated on. Windows personalization gallery page.

**Note:**

You must use Windows 10 14951 version or higher versions to download and install the theme from the Windows Store.

If you use older versions, you must visit the Windows personalization home page gallery to download and install the theme.

Download and install Windows 10 theme from the Windows Store

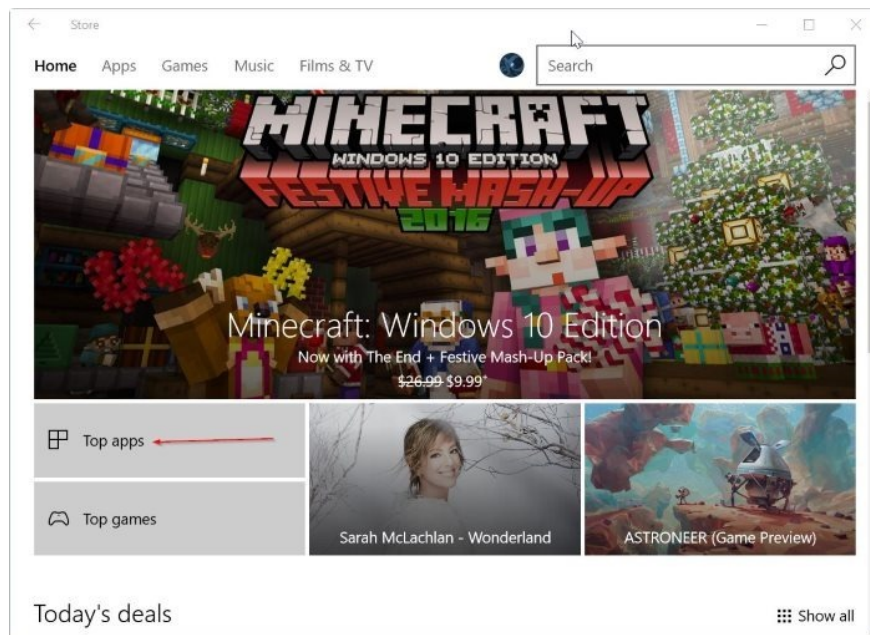

Step 1:

Open the Windows Store application. If you have any problems with the Windows Store, you can reset or reinstall the Windows Store application.

Readers can refer to the steps to reset Windows Store application on Windows 10 here.

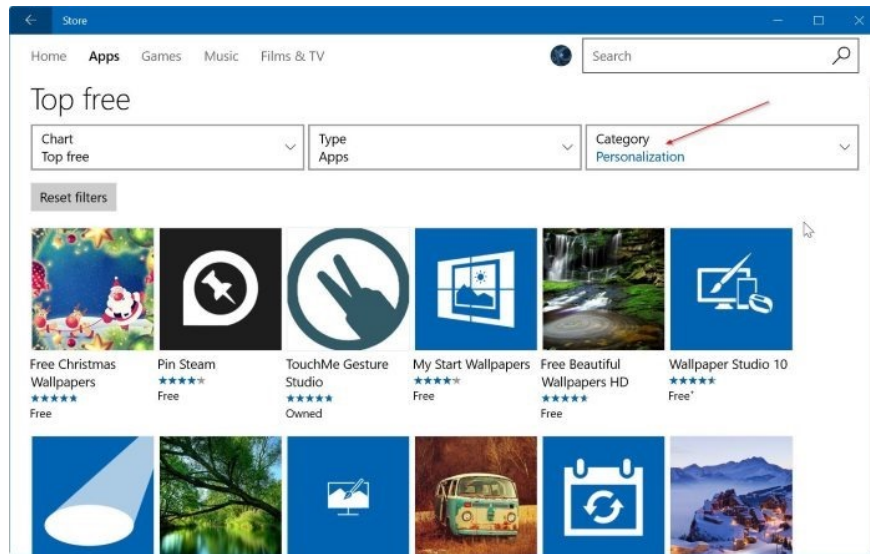

Step 2:

After the Windows Store application has opened, click the **Top apps** button .

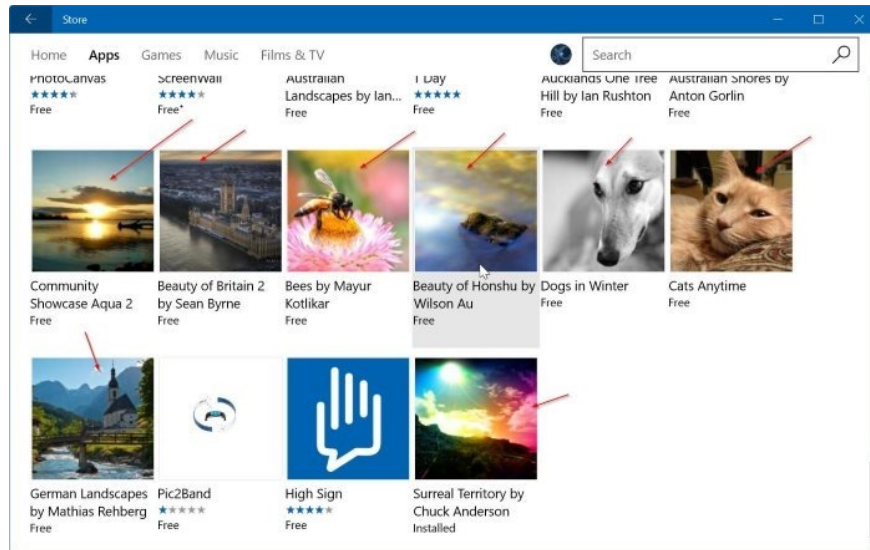

Step 3:

Select **Personalization** from the **Category** dropdown menu. If you do not see the Category item, proceed to enlarge the Store application window.

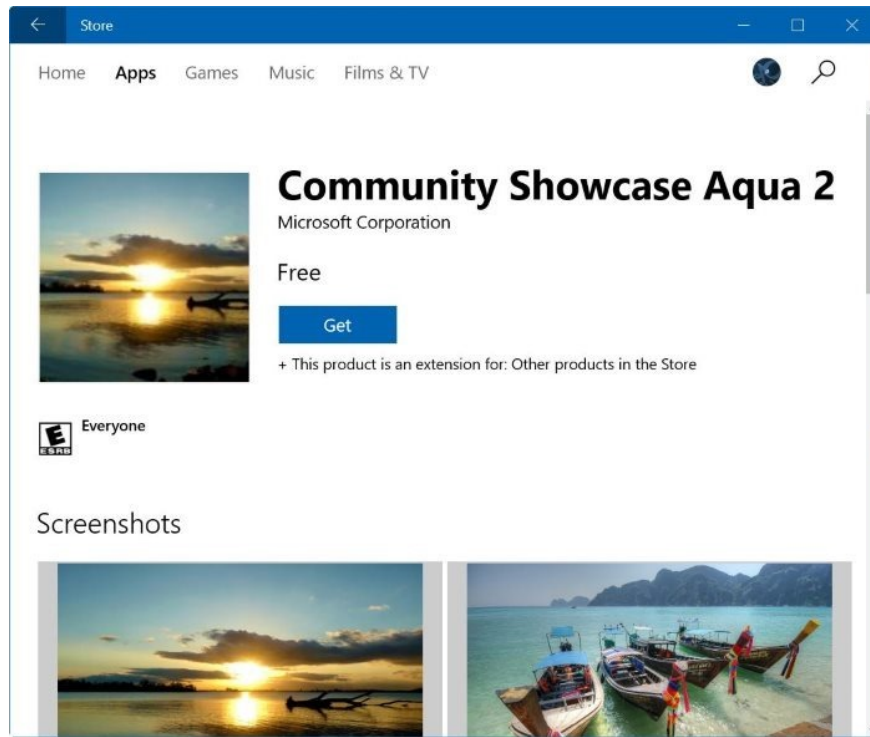

Step 4:

Scroll down the page to see the themes available for Windows 10 computers.

Step 5:

Click on the name of any theme to open that theme window. Then click the **Get** button to download and install the theme.

Step 6:

Since Windows 10 Creators Update, you cannot view installed themes by visiting **Settings => Personalization => Themes** anymore.

To see the installed themes, access the directory under the path '**C: Program FilesWindowsApps**'. Open the WindowsApps folder to see the themes you have installed, double-click the **.themepack** file to apply the theme.
