

How to install Windows with WinToHDD without USB, DVD

Installing with WinToHDD is very simple, no need for USB or DVD containing the installer. You just need to use the ISO file and then WinToHDD will proceed to install the win.

WinToHDD is the new Win installation tool without using USB or DVD to install as before.

Normally to install Win 10 or install Win 7 we will use the USB or DVD containing the installer for that operating system. However, in case the USB has a problem or the drive does not receive the DVD, or if you simply want to shorten the process of installing new Win, WinToHDD is the right choice.

This tool will shorten the new installation process, or install parallel Windows operating systems on the computer. Users only need the ISO file of the operating system that wants to install and then WinToHDD will start the Win installation ISO package right on the hard drive. We can use WinToHDD to install Win 10 or Win 7.

The following article will guide you how to install Win using WinToHDD.**Note to users** , you need to back up the data before proceeding to reinstall Win.

1. Instructions to create USB install Win, USB boot with Windows 7 USB Download Tool
2. 4 tools to create USB boot install Windows 10
3. Install Windows 10 with Refresh Windows Tool from Microsoft

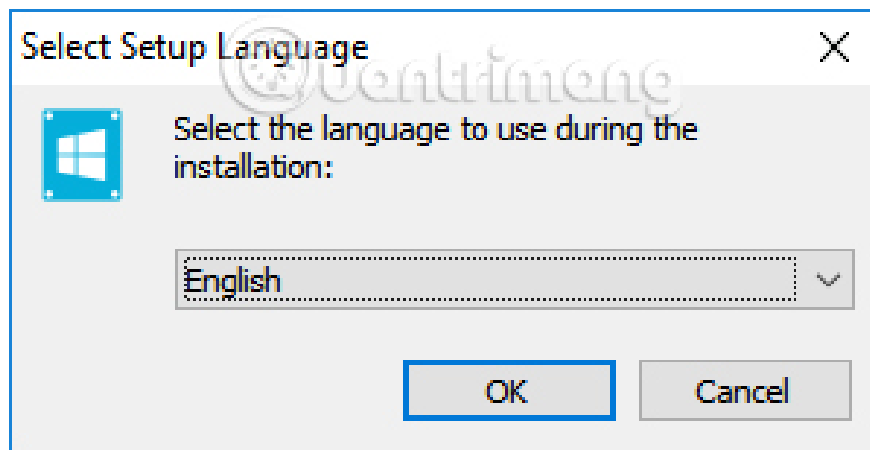

Step 1:

First you need to download the ISO file for the operating system you want to install, then save to drive D or E drive. Next download and install the WinToHDD software according to the link below.

1. Download WinToHDD software

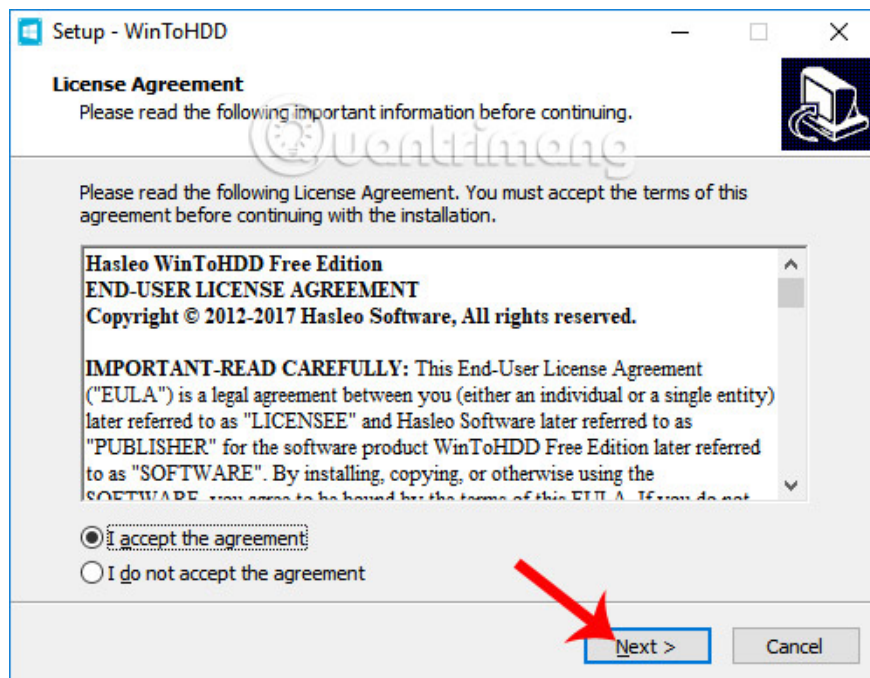

Step 2:

We proceed to install WinToHDD on the computer. In the first interface click **on the software installation language** .

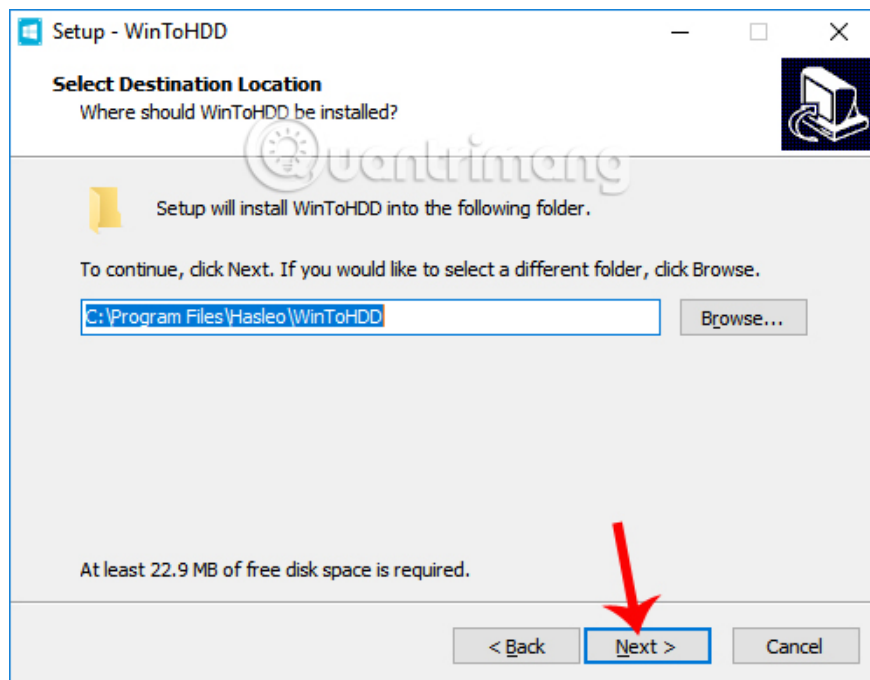

Step 3:

Check the **I accept the agreement** to agree to the WinToHDD installation terms.

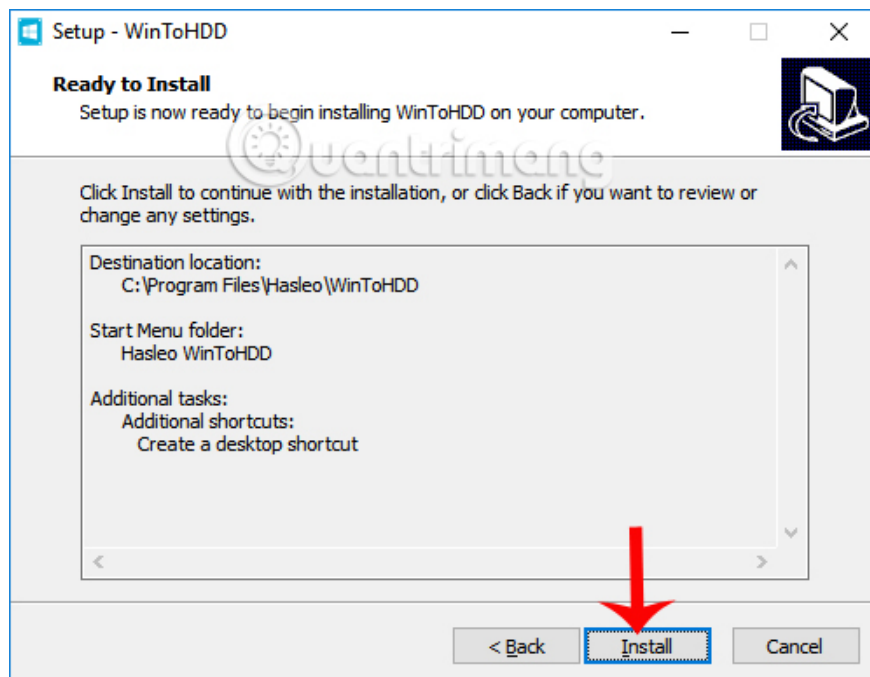

Step 4:

Switch to the new interface, we can change the WinToHDD installation directory by clicking Browse, or can skip and click Next .

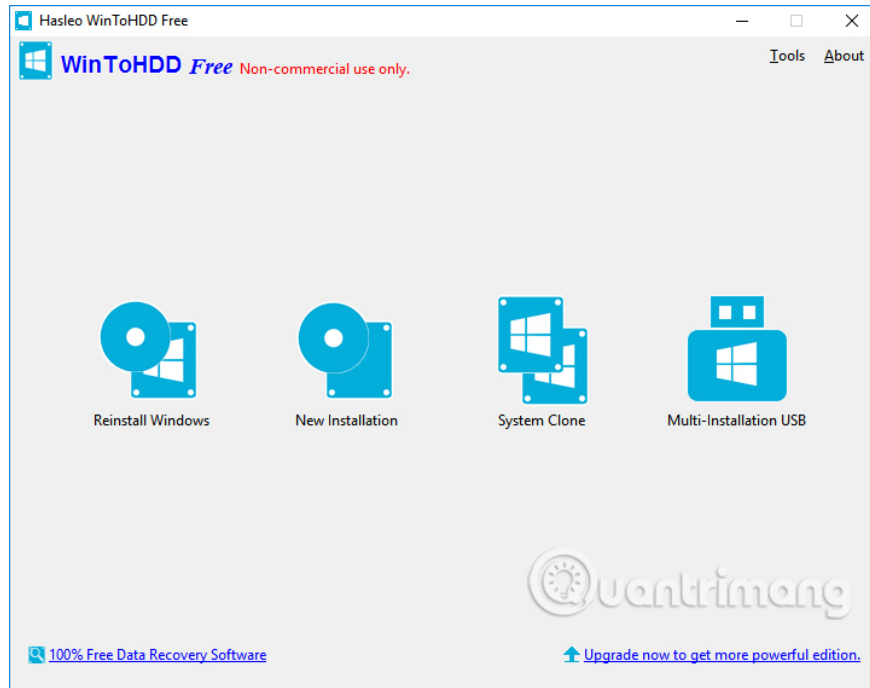

Step 5:

Finally click **Next . Install** to proceed to install WinToHDD tool.

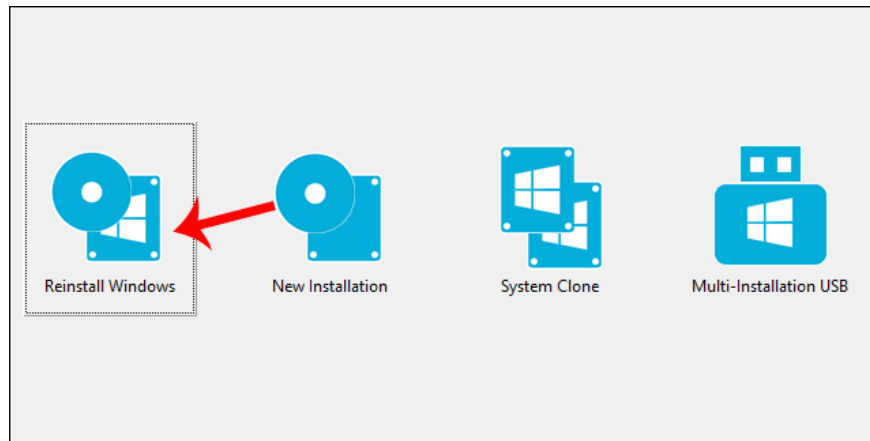

Step 6:

This is the interface of WinToHDD software on the computer. The tool provides users with 4 options. Reinstall Windows to reinstall Windows, New Installation to install Windows only on one partition, System Clone creates a copy of the system partition, use when you want to move the operating system from one hard drive to another, Multi- Installation USB creates USB that installs multiple operating systems.

Step 7:

To reinstall new Win on your computer, click on the **Windows Reinstall** option.

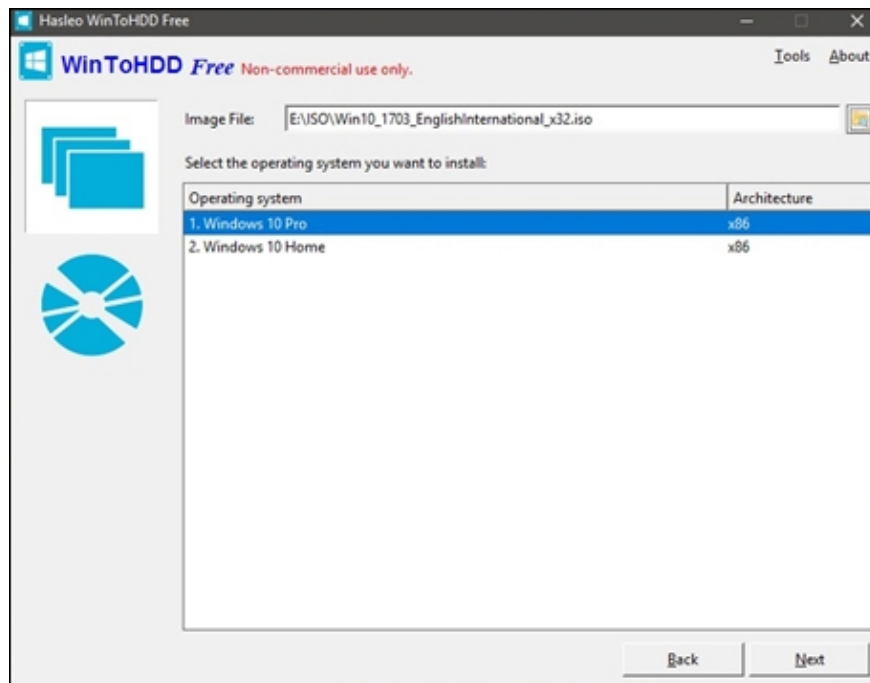

Then, click on **the folder icon** to find the ISO file for Win installation.

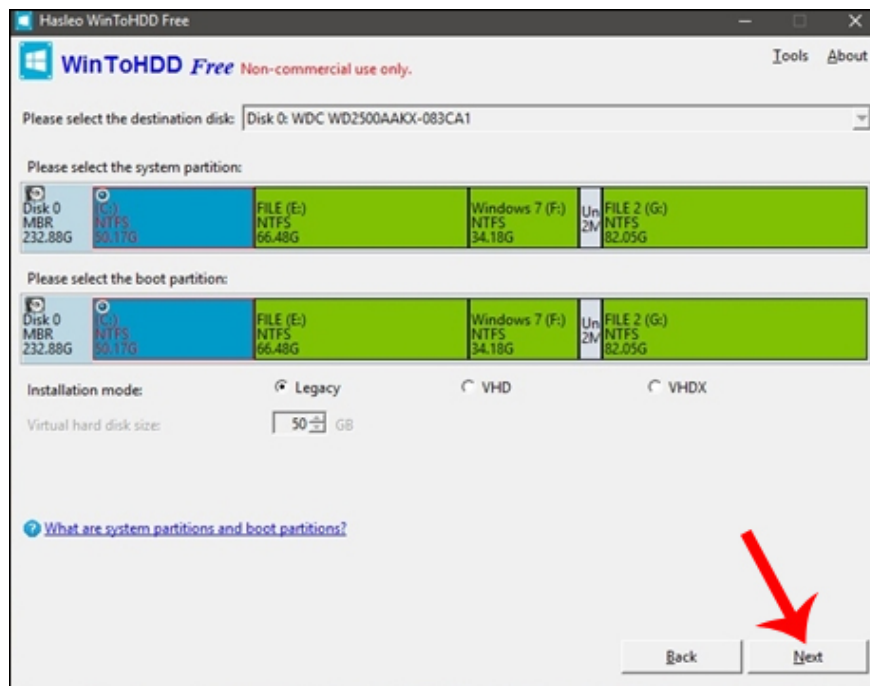

Step 8:

Next, when you import the ISO file into the WinToHDD interface, the software will check and display the Windows version included in the ISO package for you to choose, if any. Then **click Next** at the bottom to continue.

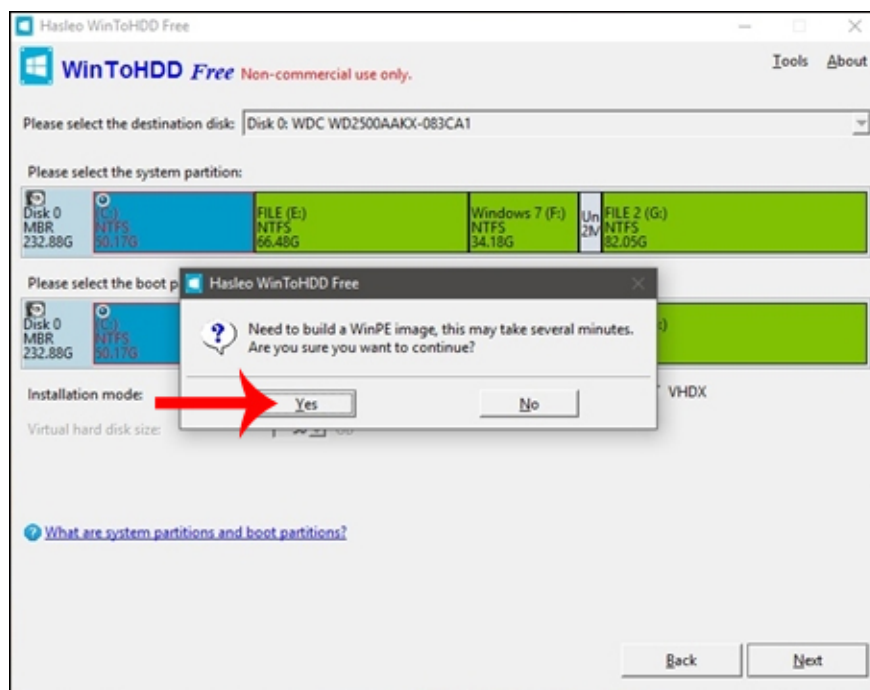

Step 9:

The software will proceed to select the system partition to install, or you can choose yourself. Then click **Next**.

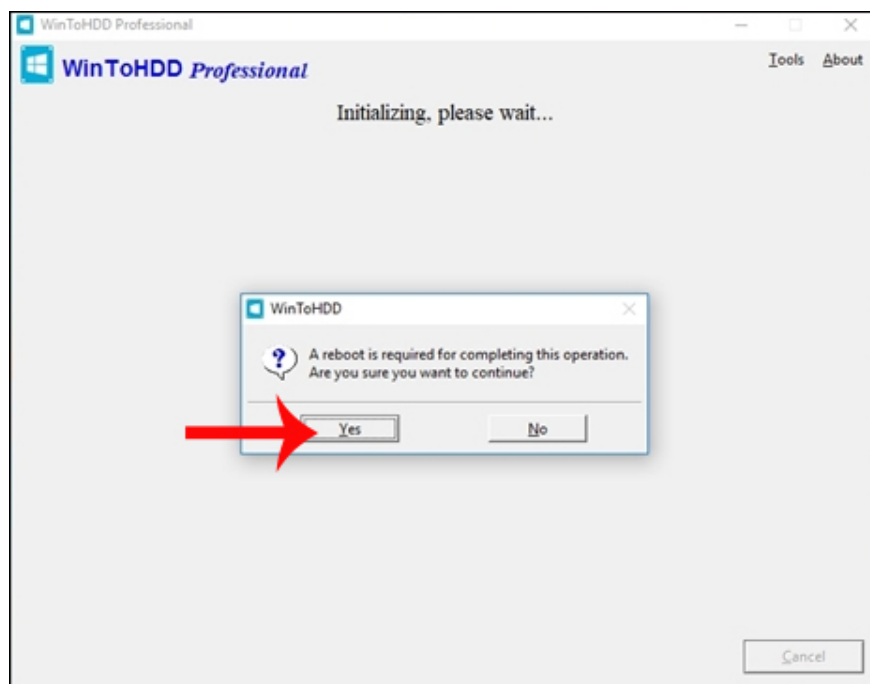

Step 10:

A message will appear to allow the software to **download and install WinPE** , click **Yes** to agree.

Step 11:

Next we will be asked whether to allow WinToHDD to restart the computer and reinstall Win, click **Yes** to finish reinstalling Windows.

Finally when restarting the computer, the software will proceed to extract and run the contents from the installed ISO file. The operations will then be carried out automatically without you doing anything.

WinToHDD proceeds to install Win in a fast time, as well as shrink Win installation. We just need to install WinToHDD software, along with the ISO file and the software will automatically install Win on the computer.

I wish you all success!
