

How to install Zoom on a Mac

To install Zoom or Zoom Rooms on a Mac computer, you may need to change some privacy and security settings to allow apps to be downloaded from some confirmed sources.

In the article below, TipsMake will guide you on how to install the Zoom application on macOS.

How to download Zoom on Mac

Permissions allow installation

Step 1. Click the **Apple logo** in the left corner of the screen. Select **System Preferences** .

Step 2. Select **Security & Privacy** .

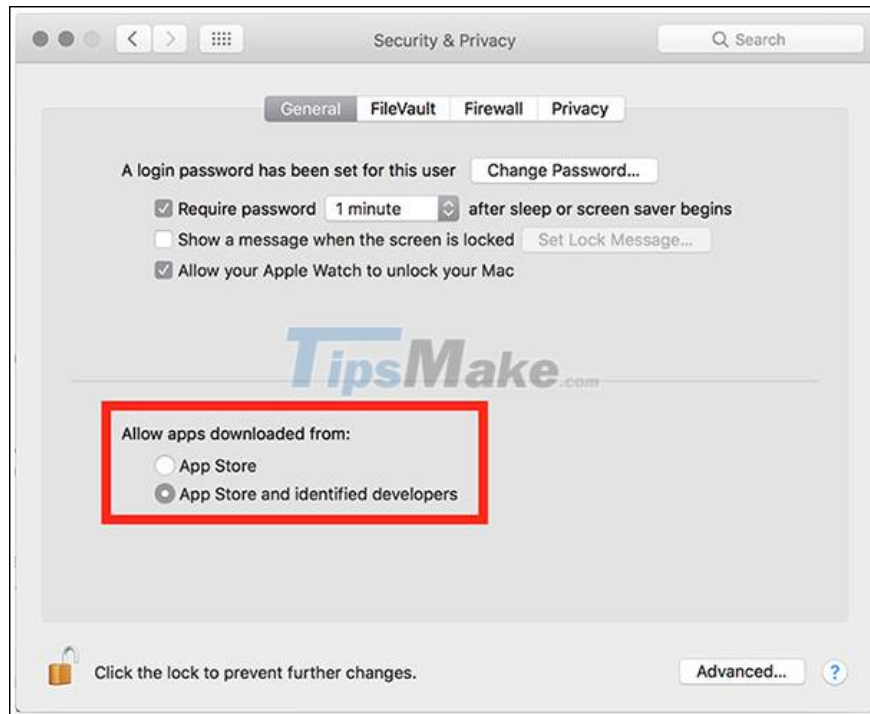

Step 3. Click **the lock icon** in the lower left corner to access the changes.

Step 4. Enter the admin username and password.

Step 5. Choose **App Store and identified developers** under **Allow apps downloaded from** .

Note : For Mac High Sierra (10.13.x), you will have to click Allow again.

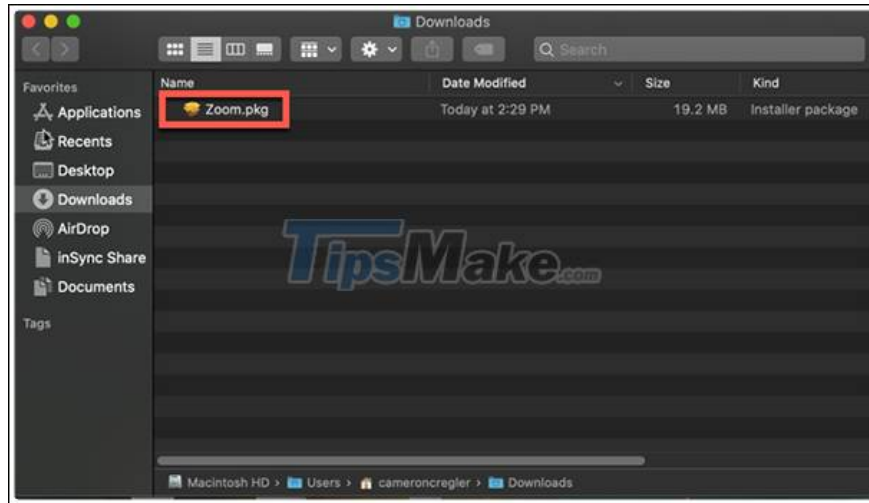

Step 6. Click **the lock icon** again to complete the process.

Install the Zoom app

Step 1. Go to the zoom **Download Center** website [here](#).

Step 2. In the **Zoom Client for Meetings section** , click **Download** .

Step 3. Double-click the downloaded file. This will save the file to **the Downloads folder** on your device.

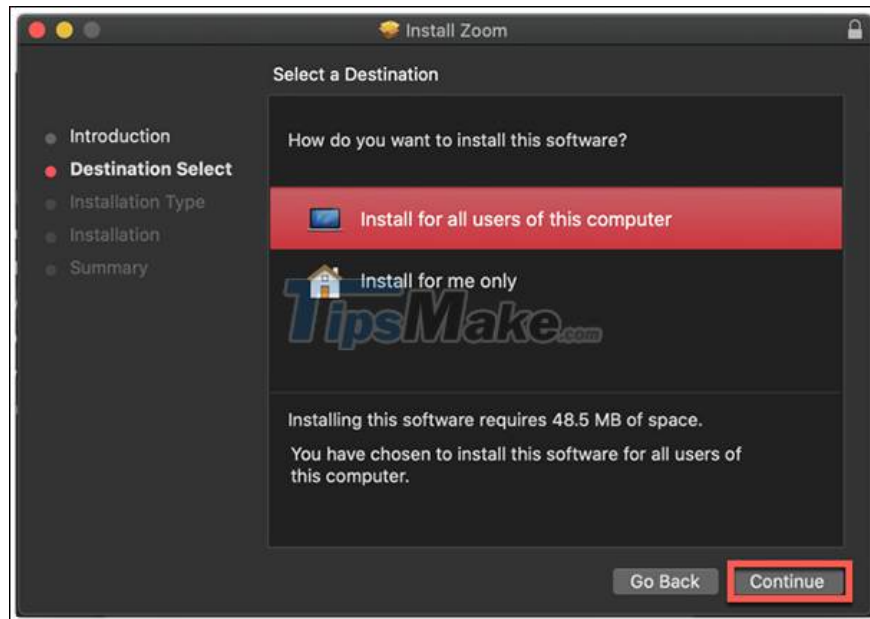

Step 4. When the installer opens, click **Continue** .

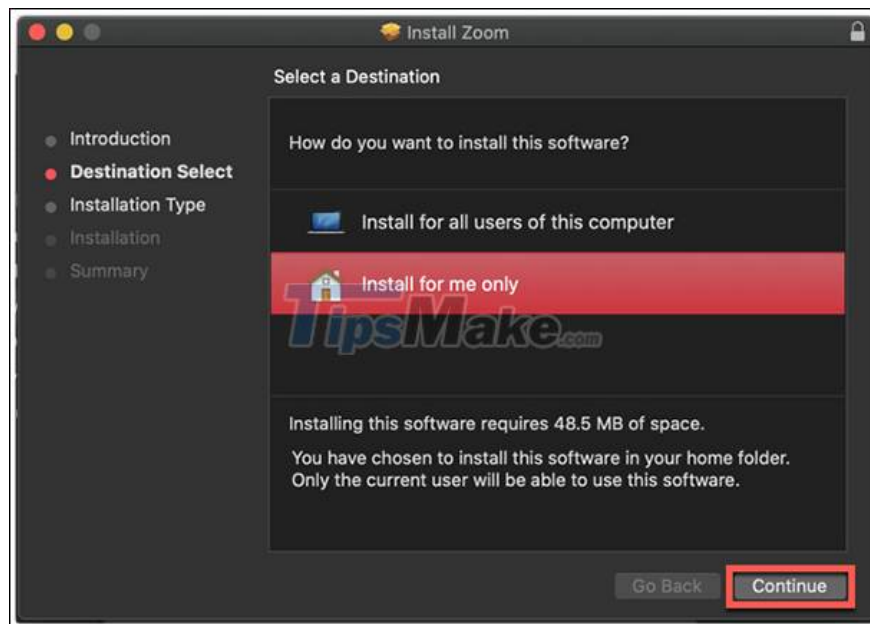

Step 5. Select where to save the downloaded app:

1. How to set for all users of this computer

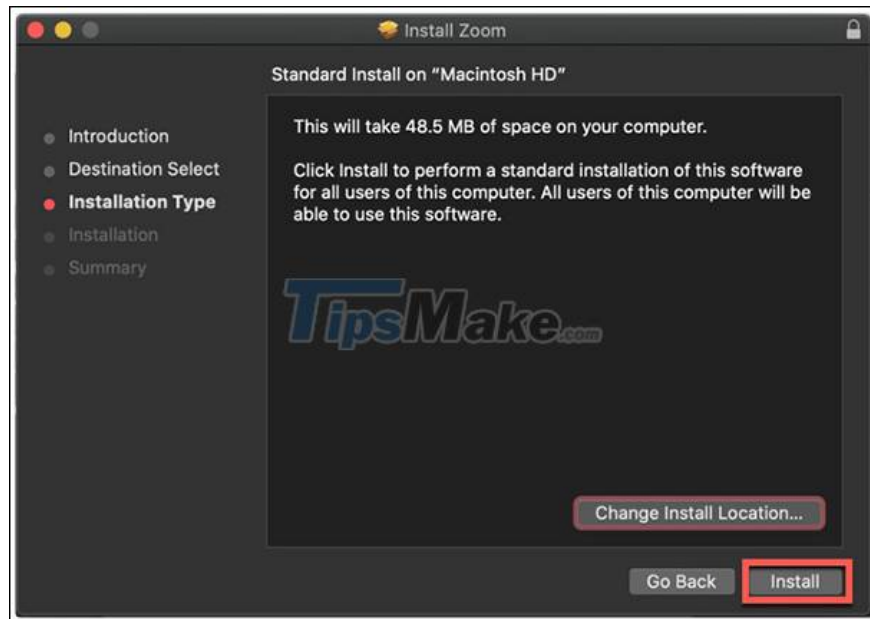

Note : This requires admin permissions to install for all users on the device.

1. Personalize it

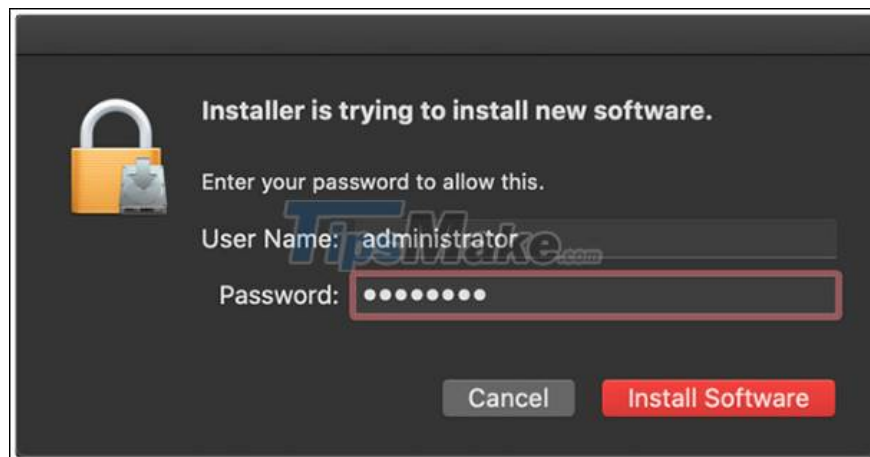

Step 6. Click **Continue** .

Step 7. If you want to change where the downloaded app is saved, select **Change Install Location** (this is not required).

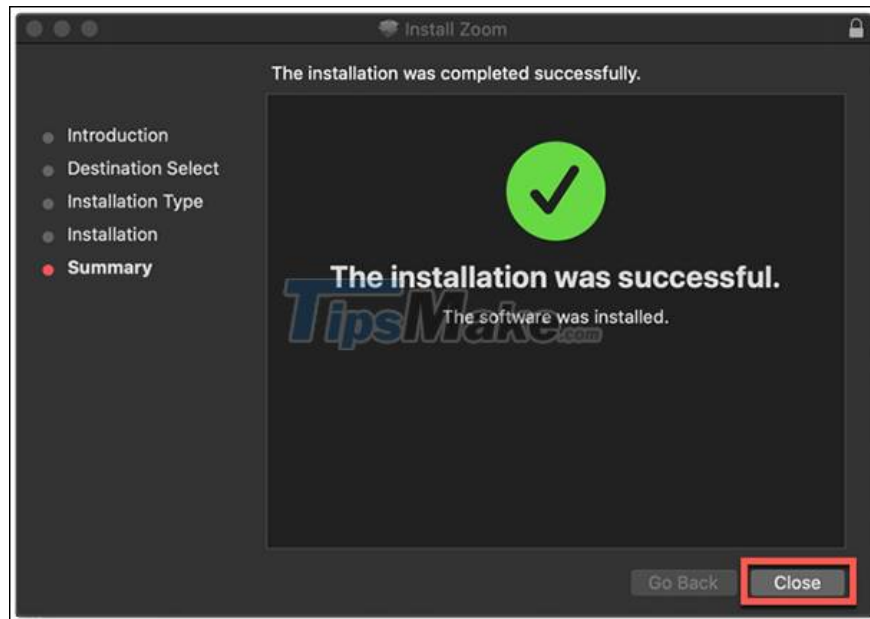

Step 8. Click **Install** .

Step 9. If you have selected settings for all users on the device, enter admin information for the device (this is not required).

Step 10. Click on **Install Software** .

Step 11. When the installation is completed, click **Close** .

Zoom app access permissions

Since the macOS 10.14 Mojave and 10.15 Catalina's access and security issues are so strong, you might be required to allow the Zoom Desktop Client app to use the microphone, camera, and screen recording. Permissions are set in the device's System Preferences.
