

How to Kill Tyrant of the Skies Blox Fruits

The Tyrant of the Skies in Blox Fruit rules the skies of the ultimate island and is ready to send any trespasser to the drawing board.

Who is the Tyrant of the Sky in Blox Fruits?

In the world of Blox Fruits, the Tyrant of the Sky is not only a cool name but also the title of a truly formidable raid boss. He rules the skies of the highest-level island and is ready to "send" any intruder to the scoreboard. With superior strength, "buffalo" health, and flexible flight ability, this is definitely one of the toughest challenges you'll ever face in Blox Fruits.

Highlights of this boss

1. **Toughest Raid Boss:** Appears on the highest level island, requiring players to be well prepared.
2. **Flight:** Always hovering in the air, making close range attacks difficult.
3. **Devil Fruit Power:** Uses Eagle Fruit and Flail Melee Weapon.
4. **The rewards are great:** Drops many valuable items, including rare Devil Fruits and unique materials.
5. **Time limit:** Only 7 minutes and 30 seconds to defeat this boss before he "disappears".

How to meet the boss Tyrant of the Skies in Blox Fruits

To have a chance to "fight" with the Sky Tyrant, you need to meet a few of the following conditions:

Go to Tiki Outpost : This is the highest level island in Blox Fruits, where the Sky Tyrant resides. You will find a small arena with large pillars (currently empty).

How to summon: The Sky Tyrant doesn't just appear. You need to kill 300 NPCs on Tiki Outpost Island. For every 75 NPCs killed, one eye of the statue in the arena will glow red. When all four eyes are glowing, the Sky Tyrant will officially appear.

He only appears for 7 minutes and 30 seconds after the raid starts. If you don't defeat him within this time, you will lose all chance of getting rewards. After the boss disappears (either by defeat or timeout), you will have to wait 15 to 30 minutes before you can start the summoning process again.

How to send this boss to "heaven"

Defeating the Tyrant of the Skies is no easy task, but with the right tactics and teamwork, you can do it. Here are some helpful tips when you have to face this boss:

1. **Build a strong team:** With such a large amount of health and damage, you cannot take on the Tyrant of the Skies alone. Gather a team of 3 to 5 players to ensure enough damage.
2. **"Awaken" the power of TAQ:** Awakened Buddha Fruit is considered the top choice to confront Tyrant of the Skies. The ability to transform into Buddha and the stable damage will help you stand firm and deal a significant amount of damage.
3. **Dragon Fruit:** Another powerful alternative with AoE damage and elemental power.
4. **Make use of Observation Haki:** Since the Sky Tyrant flies around constantly, using Observation Haki will help you not lose sight of him and easily launch precise attacks.
5. **Focus on dealing damage:** Due to the limited time in the battle, the whole team needs to focus on dealing damage to the Sky Tyrant and not waste any time. Coordinate your skills and Devil Fruits in the most effective way.
6. **Dodge:** Be careful of his attacks from Eagle TAQ and Spiked Mace. Move flexibly and use dodge skills to minimize the amount of damage you take.
