### Step 9:

In addition to listening and downloading music features, Sound Tube also possesses **music playback** features **even when the screen is off** . You just need to turn on the song you want to hear and turn off the screen. But be aware of the user, this feature only supports listening to music when the screen is turned off. If you are playing YouTube videos, then turning off the screen will automatically switch to playing music only mode.

So, with Sound Tube application on iPhone, we can listen to and download music from popular sources now from Youtube, iTunes or log into storage services to listen to music from there. Besides, you can listen to music even when the device screen is turned off.

I wish you all success!
