

How to Live Stream Minecraft on Facebook Using OBS

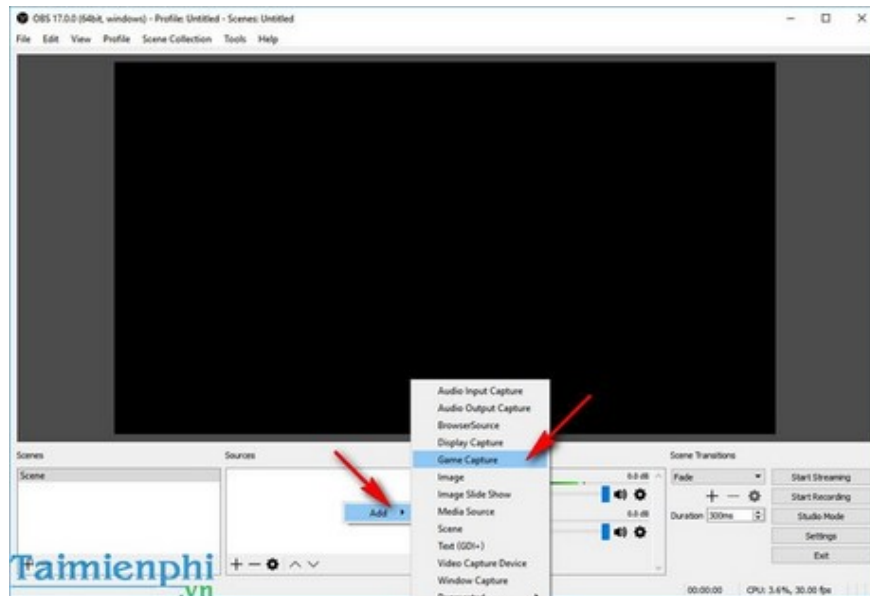

Do you love Minecraft and want to share your gaming experience with your friends on Facebook? Live streaming is a great way to connect with your community, attract viewers, and interact with other gamers. In this article, let's learn how to live stream Minecraft on Facebook using OBS Studio - free, easy-to-use software optimized for live streaming games.

Learn how to live stream Minecraft on Facebook using OBS Studio. Step-by-step instructions from installing the software to setting up your live streaming configuration.

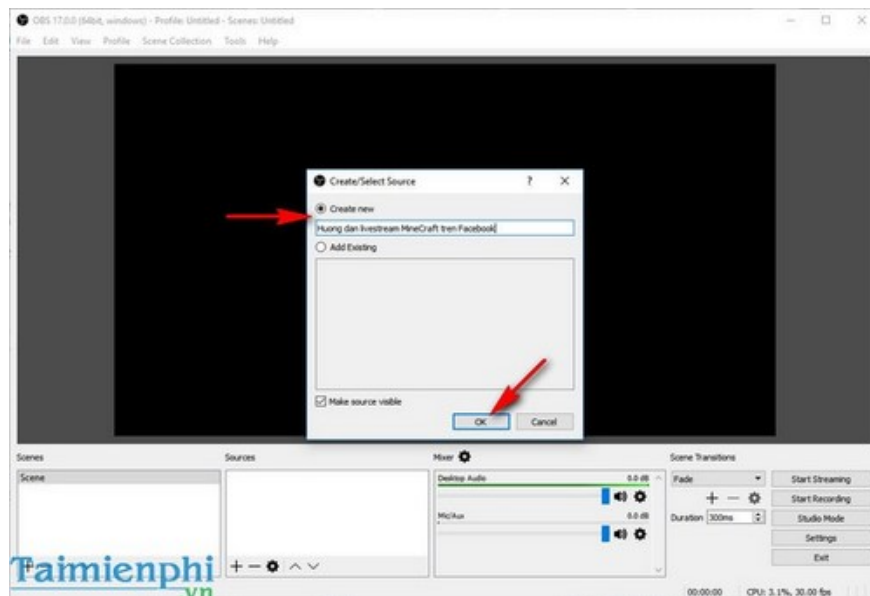

Step 1: At the main interface of OBS. Right-click on the blank space in the **Sources** box.

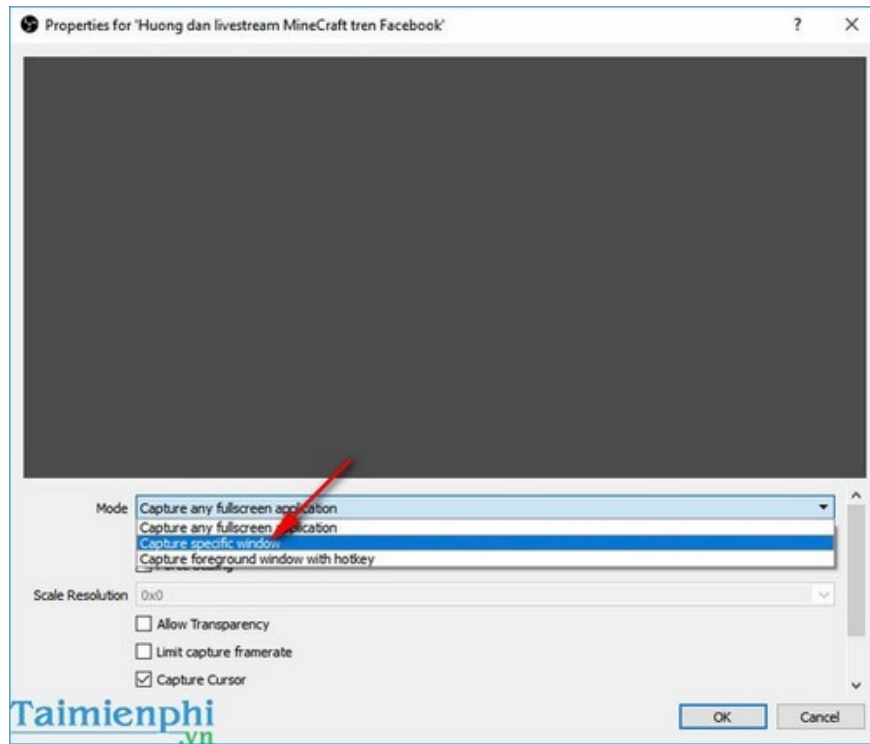

Step 2: The **Add** tab (add appears) hover over the Add tab and select **Game Capture** .

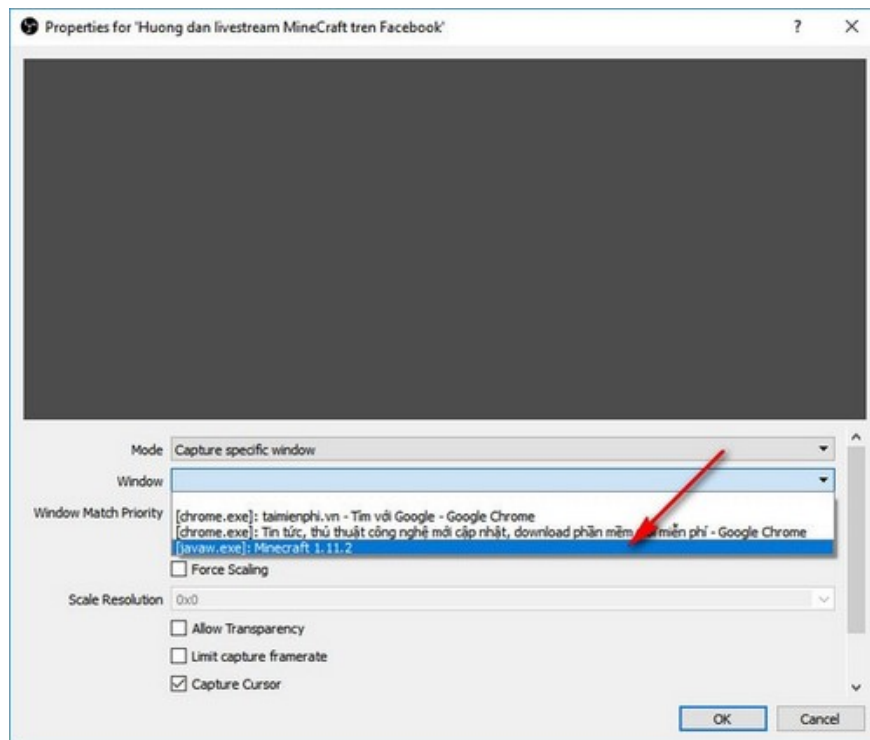

Step 3: On the **Creat/Select Source** dialog box , select **Creat New** and name the new source, then click **OK**.

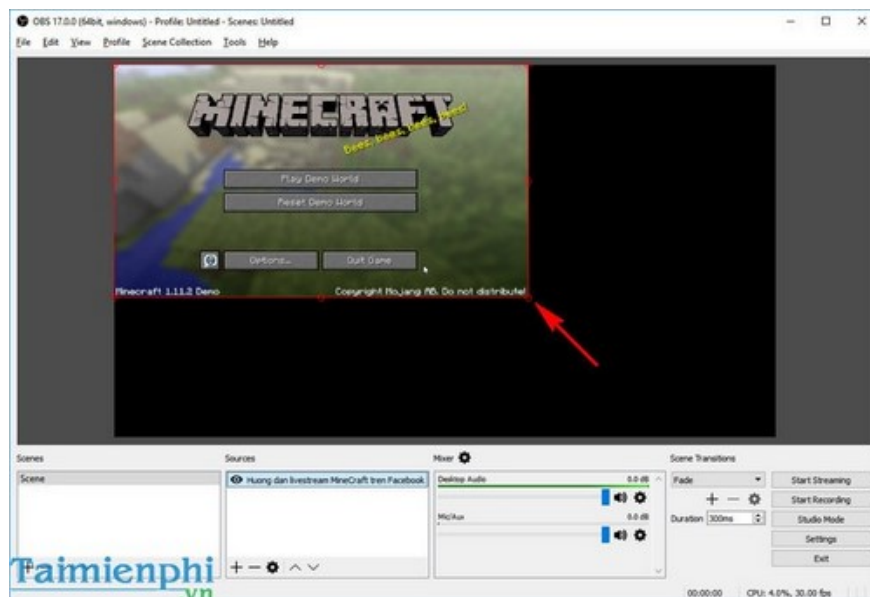

Step 4: After creating a new card, the **Properties window** of the source you just created will appear. In the **Mode** option, select **Capture specific window**, the tool will filter out for you the windows that are currently active on the computer.

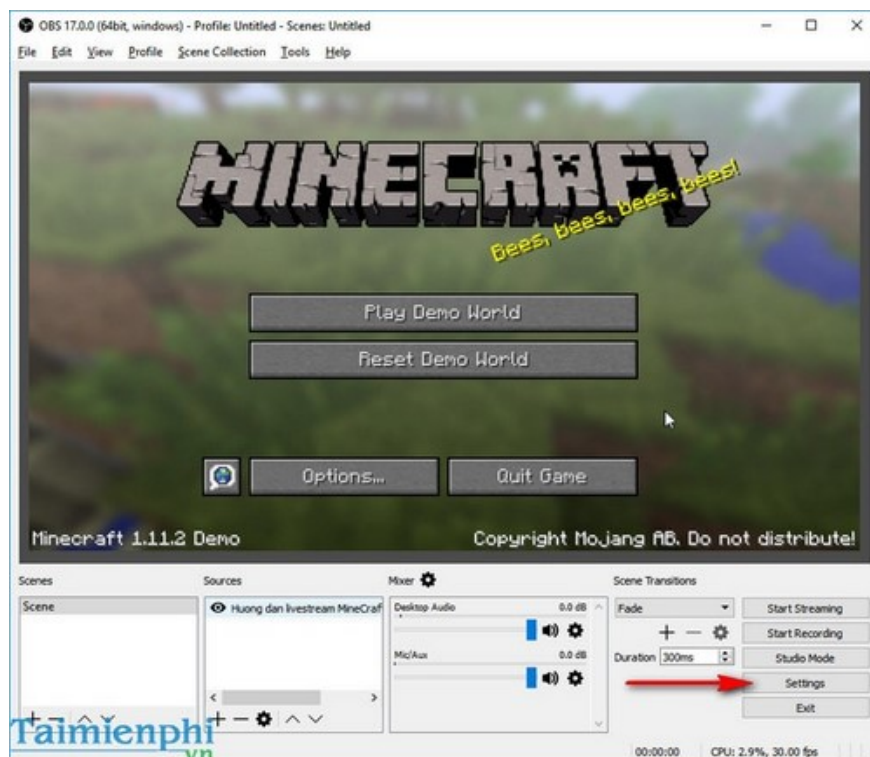

Step 5: Continue in the **Window** option , select the window of **[javaw.exe]: MineCraft 1.11.2** to get the live stream window, then press **OK**.

Step 6: Use the mouse to drag the screen to fill the screen.

Step 7: Select **Settings** .

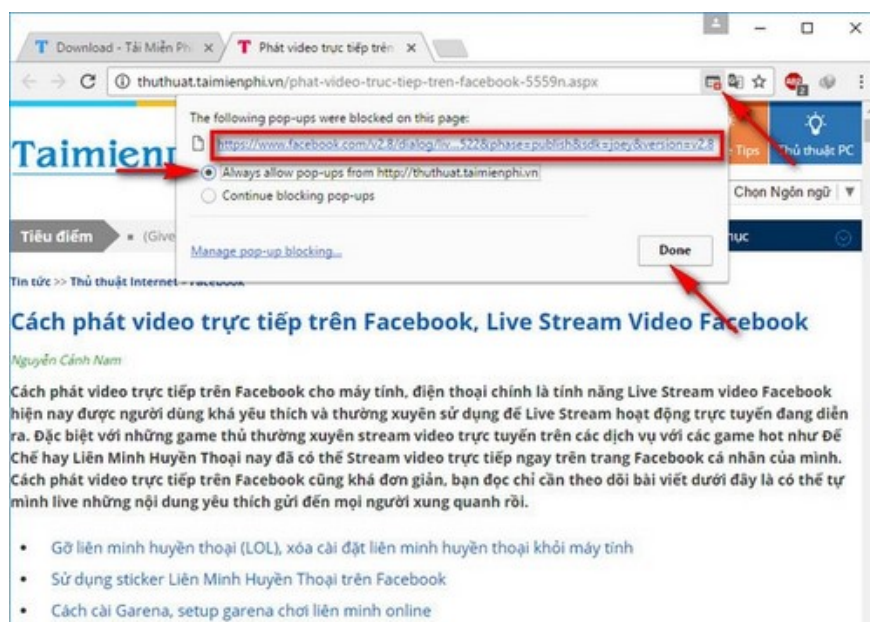

Step 8: Temporarily leave the OBS Settings window there, click **CREATE LIVE VIDEO ON FACEBOOK** below to start live on Facebook.

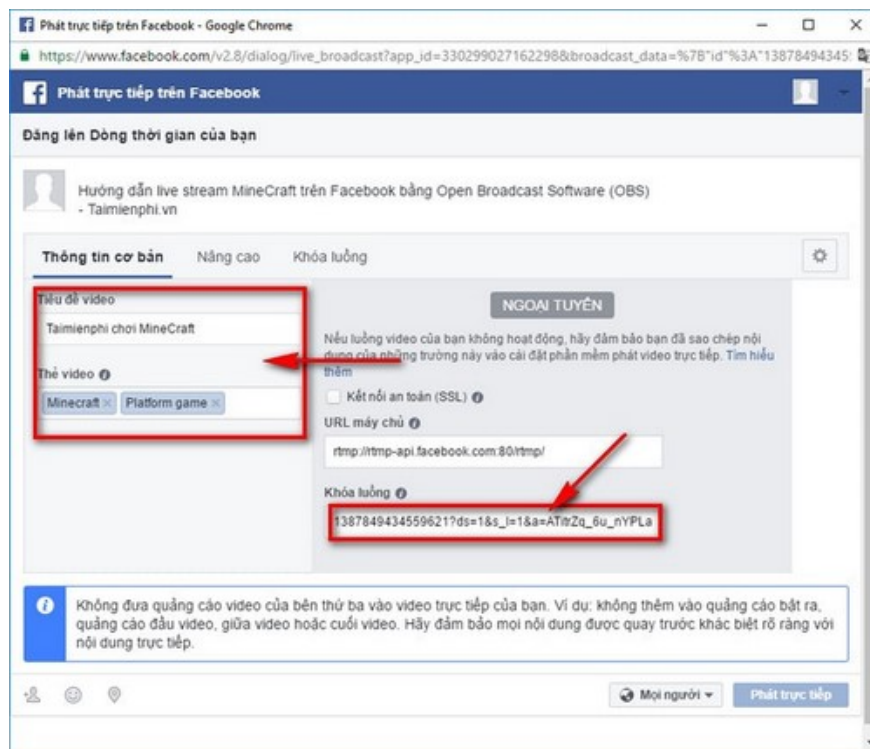

Step 9: Then a small Facebook notification board will appear. You can choose to broadcast the video to friends, to a group, or to a page you are managing,. After selecting, click **Next**.

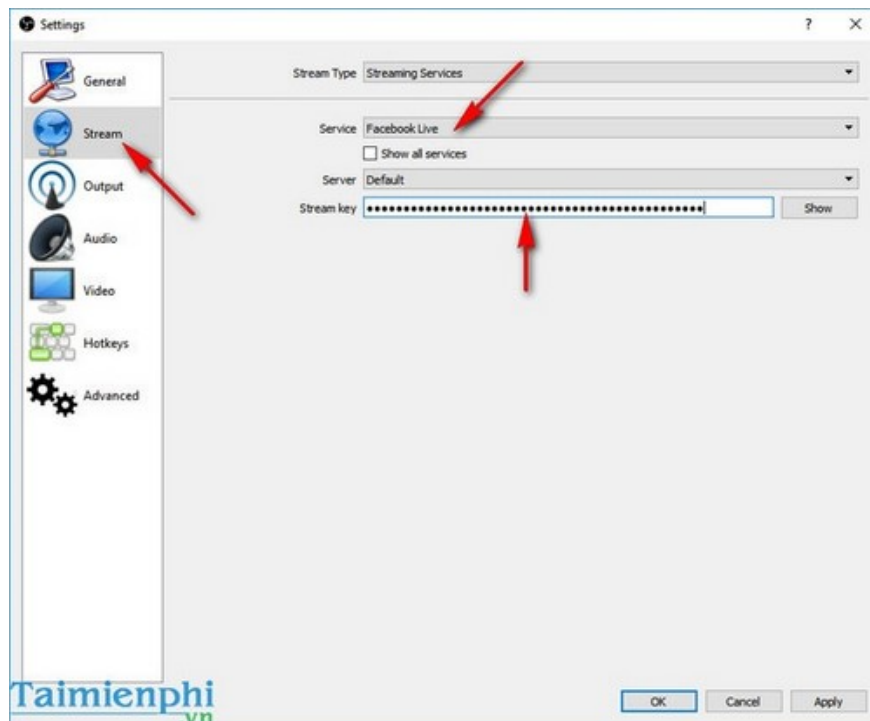

Step 10: In case no notification panel appears, check the icon on the browser's address bar because the notification may be blocked. Click on the icon on the right corner of the browser bar, select **Always allow pop-ups**, and click on the link in that notification and **Done**.

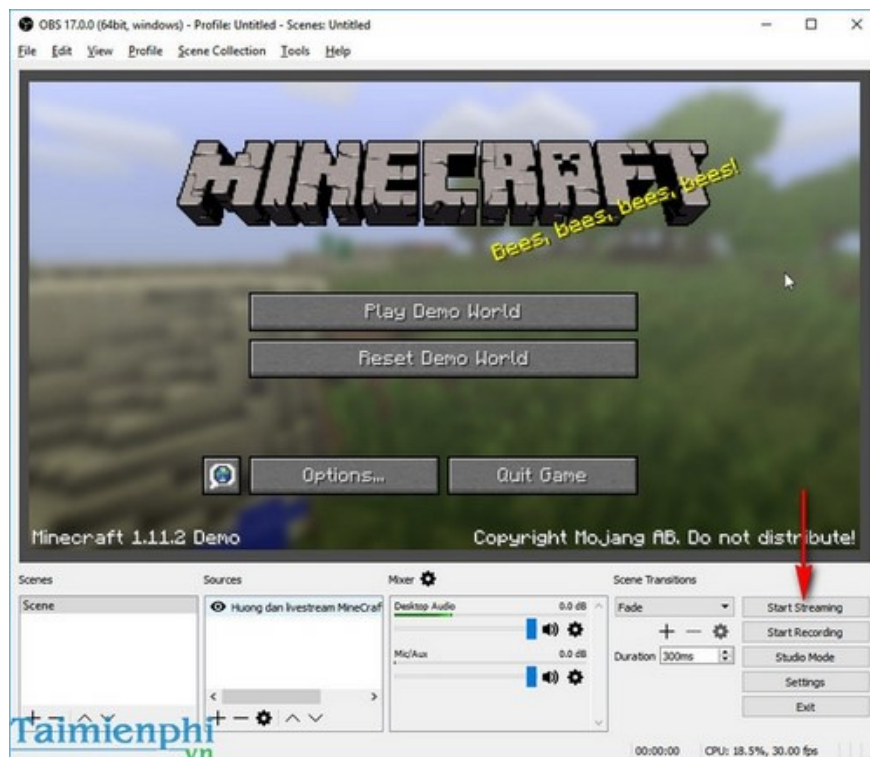

Step 11: In this step, you need to fill in the live video content (like status), Live video title, tags and you are given 2 addresses: **Server URL** and **Stream Key** which gives you the link from OBS to your Facebook to live stream MineCraft to Facebook. Copy the entire address in the Stream Key box.

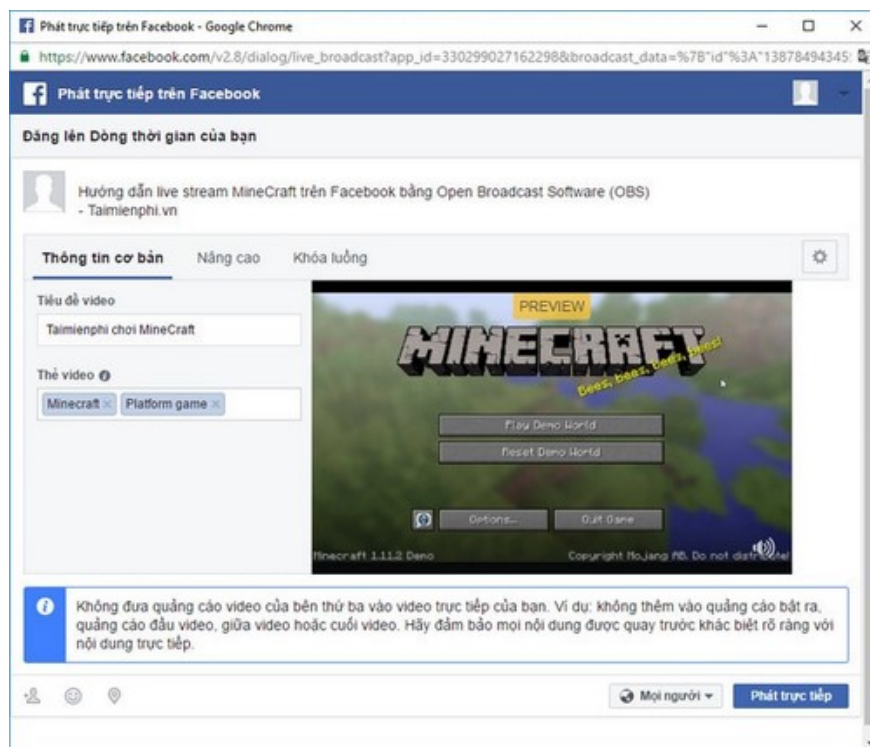

Step 12: Don't close the Facebook window yet, go back to OBS, switch to the **Stream** tab , change the **Services** section to Facebook and paste all the content you just copied in the stream key tab into the **Stream key** box . Then click **OK**.

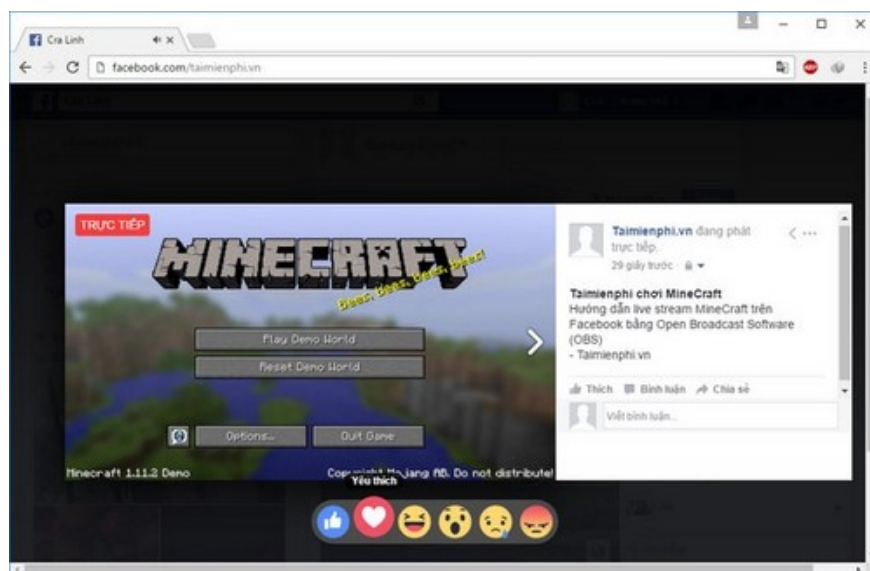

Step 13: Return to the OBS main screen, click Start Streaming.

Step 14: Click **Go Live** to live stream MineCraft on Facebook publicly so everyone can watch your live video.

Step 15: You will see a live video stream appear on your Facebook, people can comment and express their feelings about your live video.

You already know how to live stream Minecraft on Facebook using OBS Studio, making it easy to share your gaming experience with the community. If you want to improve the quality of your Facebook live stream, you can optimize OBS settings for smoother images.
