

# How to livestream Youtube from web browser

Youtube has allowed livestream from the web browser when the computer has a webcam, which allows you to play live without the 3rd software.

Along with the livestream feature on Facebook and livestream on Youtube, the support of professional software such as OBS or Xsplit Broadcaster is required, quite complicated. However, Youtube now allows livestream right on the web browser, with support for webcam support.

For those who use Chrome browser, you will be able to livestream Youtube on the web browser first compared to Firefox, Opera. So for a computer or laptop with a webcam and access to Google Chrome, users can livestream and play right on their personal YouTube channel without the need for third-party software like before.

The following article The network administrator will guide you how to play directly on Youtube web browser.

1. How to live stream Facebook using the software XSplit Broadcaster
2. Instructions to play Live stream on Zalo chat group

## How to livestream Youtube on the browser

**Note to readers** , personal Youtube accounts will need verification and can be continued through 24 hours. How to verify the account we will guide below. As for YouTube channel admin accounts, it can be done.

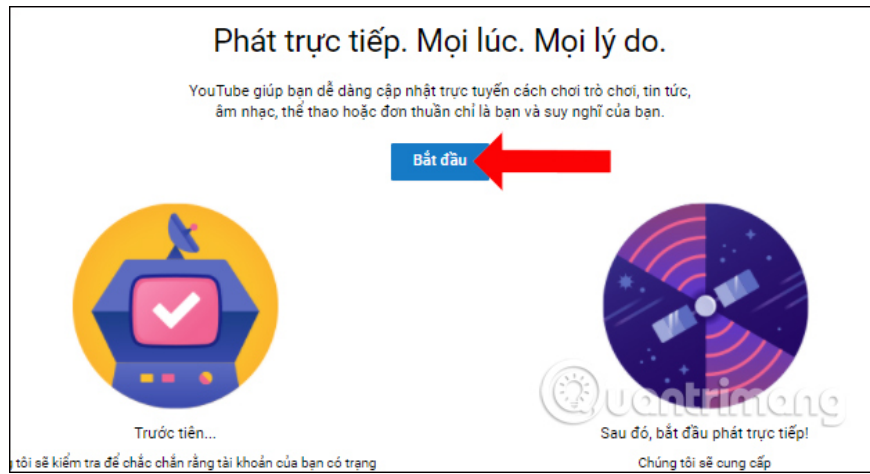

### Step 1:

First, follow the link below to proceed live on Youtube.

1. <https://www.youtube.com/webcam>

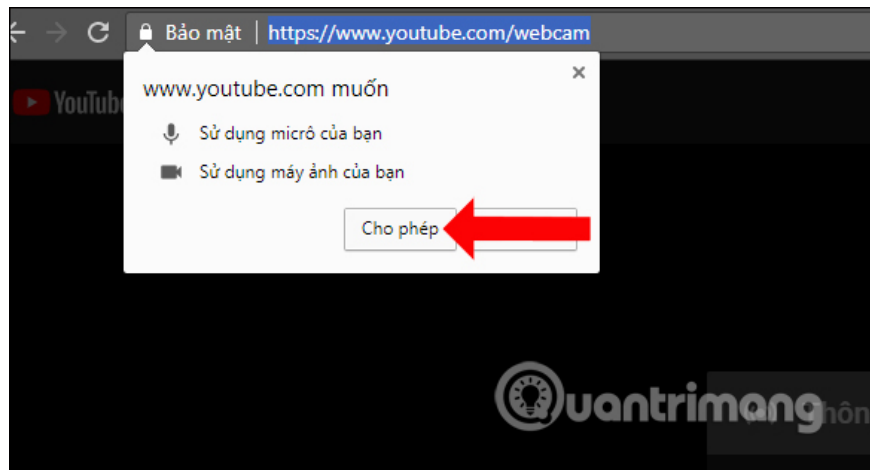

### Step 2:

In the first interface, press **Start** to proceed with live streaming on Youtube.

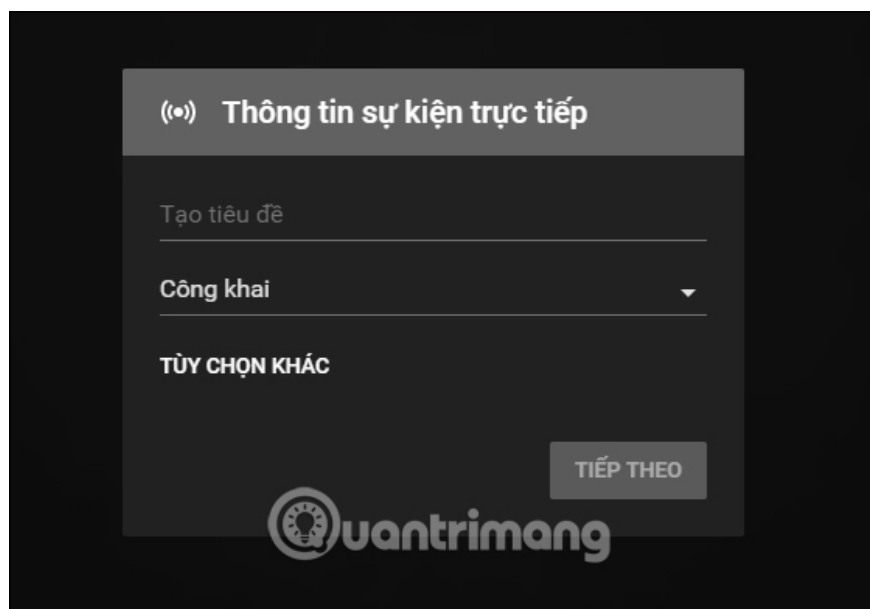

### Step 3:

To proceed with the video recording, users need to agree to allow Youtube **to use the microphone and webcam** on the computer, click **Allow** .

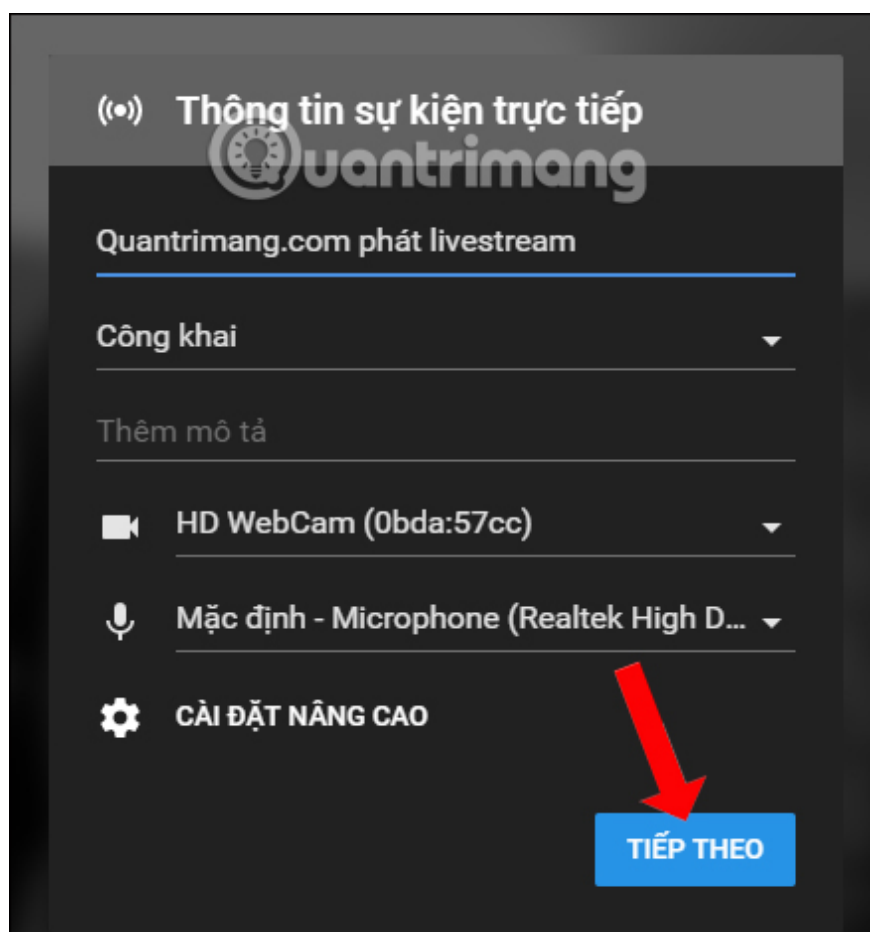

### Step 4:

Switch to the event information interface, enter **the title for livestream video** into the Create title bar, select the mode for live video playback. If you press **Other options** , there will be some other parameter settings.

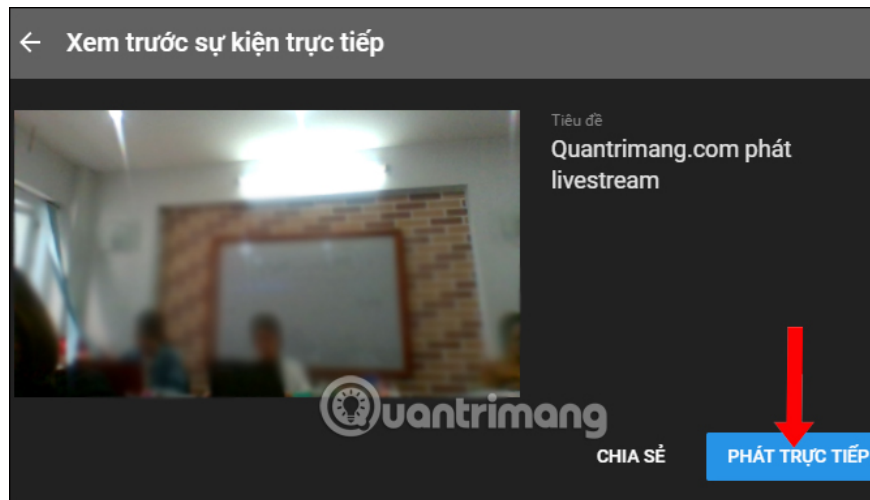

You can adjust the webcam or microphone if you want. Then click **the Next button** below.

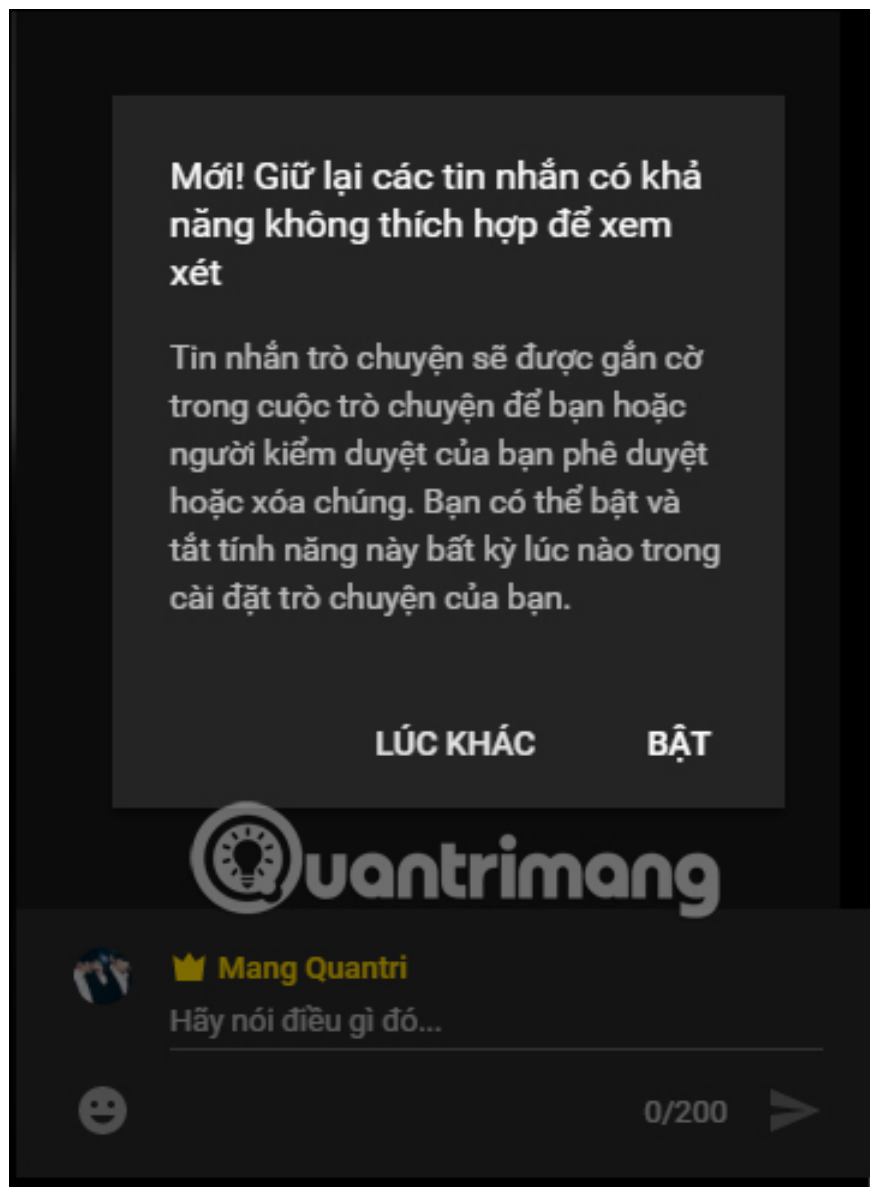

Step 5:

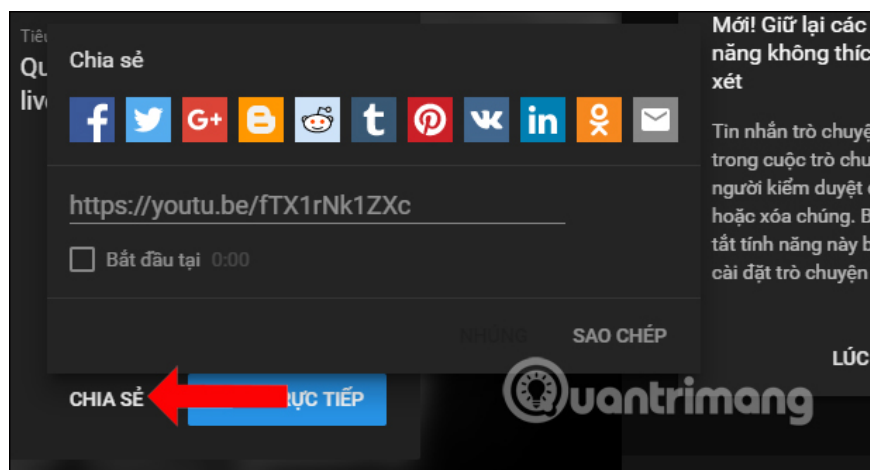

We will have 3 seconds to prepare and then Youtube will capture the image so the viewer can adjust it first. Appearance of **live event preview** . If it's okay, **press Live Play** .

In addition, YouTube adds a comment review feature when playing live video. On the right side of the screen you will see a message. If there is a need, press the On button.

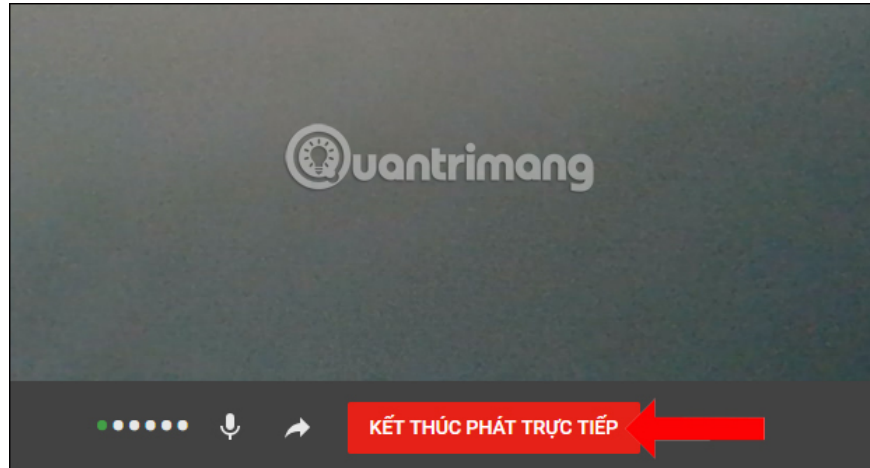

In case you want to share YouTube directly to other websites or send it to anyone, press the Share button, then select the sharing application.

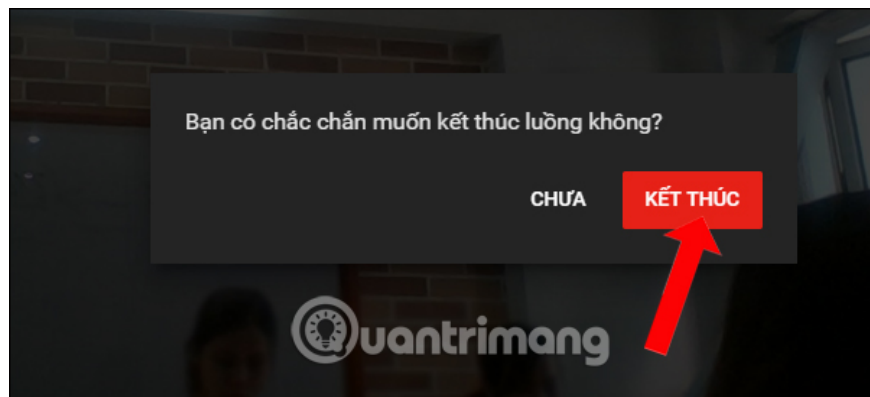

### Step 6:

Soon we will conduct livestream on Youtube. When stopping livestream press **Finish live streaming** .

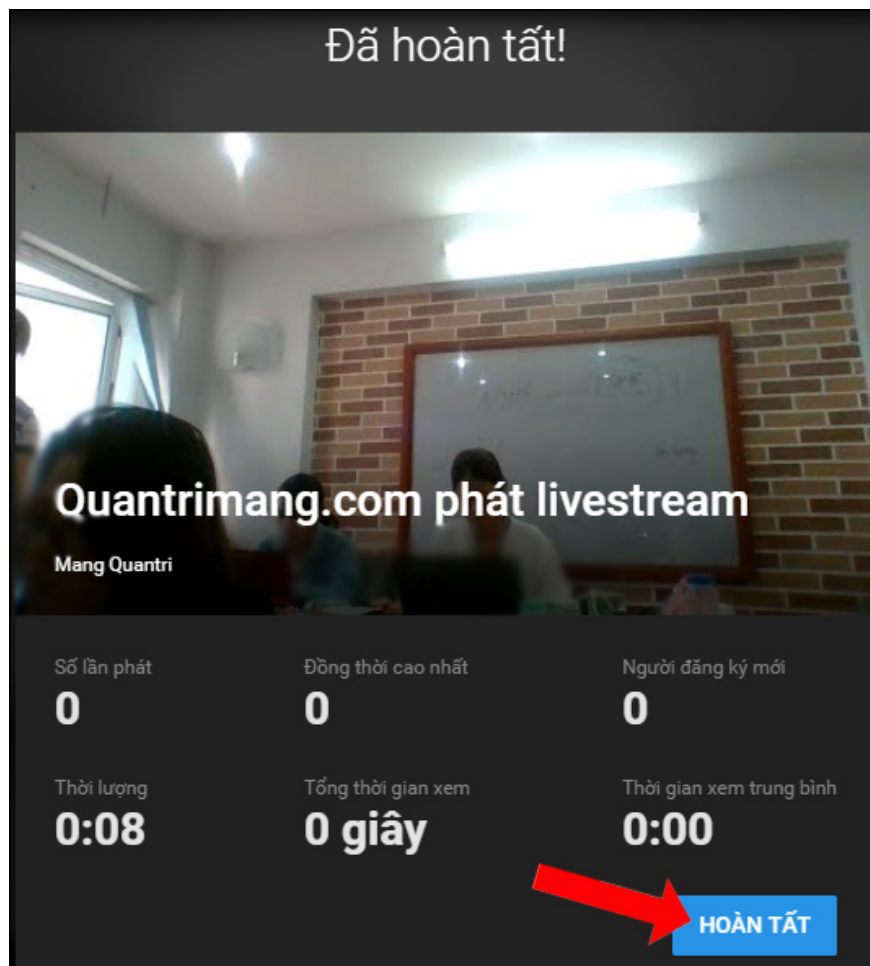

Youtube will ask if you want to be sure to finish playing live, press **Finish** .

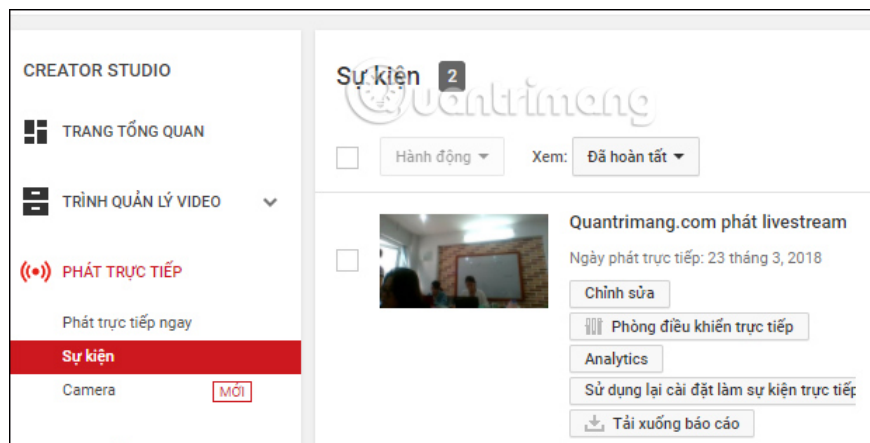

### Step 7:

At the Notification interface, users will see the playing time, total viewing time, average viewing time. Click **the Finish button** below to finish.

The video after the livestream is completed will be in **the Event section** for easy management.

## Verify account to livestream on Youtube

As told to YouTube personal accounts when you want to stream directly from the browser, you need to verify the account. After you access the above link, click Start, you will receive a verification request as shown. Click to select the verification method, choose to send the message.
