How to lock the iPhone when lost fastest. iPhone is a highly rated phone because of its strong security. Another interesting and unique feature on iOS is the remote activation key via iCloud account. With this feature, the iPhone thief

iPhone is a highly rated phone because of its strong security. Another interesting and unique feature on iOS is the remote activation key via iCloud account. With this feature, your iPhone thief has no way to unlock your phone without your password.

For this feature to work, your iPhone must turn on Find My iPhone mode before the remote iPhone lock feature will take effect.

1. Activate Find My iPhone mode on the phone.

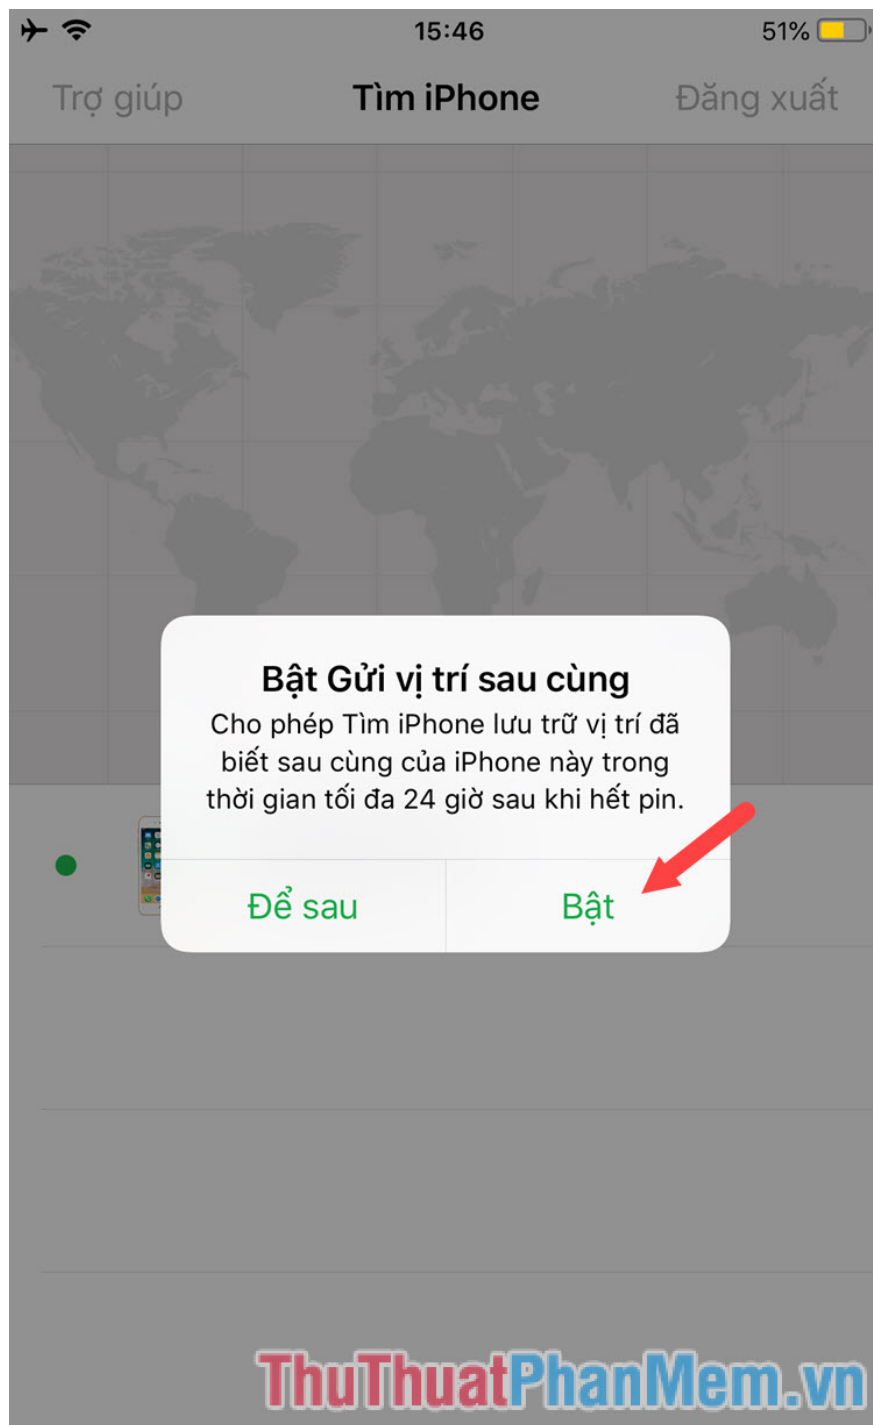

Step 1: Go to **Settings** => **Account & Password** => **iCloud** (Sign in to your iCloud account if you are not already logged in). Then touch **Find My iPhone** and turn the Find iPhone switch to **On**.

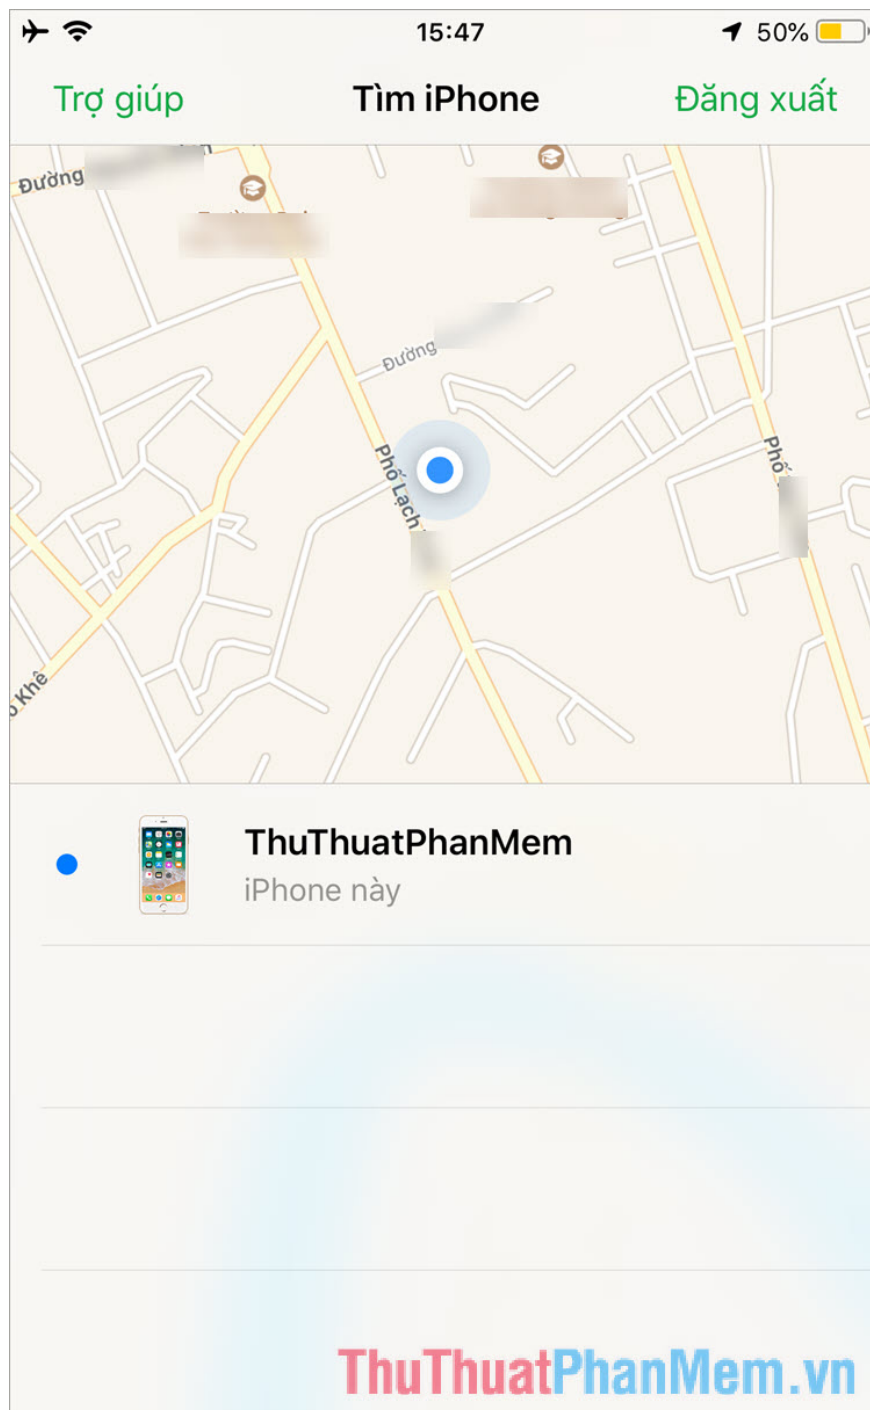

Step 2: Go back to the main menu, find and open the **Find My iPhone** app and then log in to your iCloud account.

Step 3: The compass interface pops up, you shake the phone a round to guide the phone back. Click **Enable** to turn on the last feature to send location.

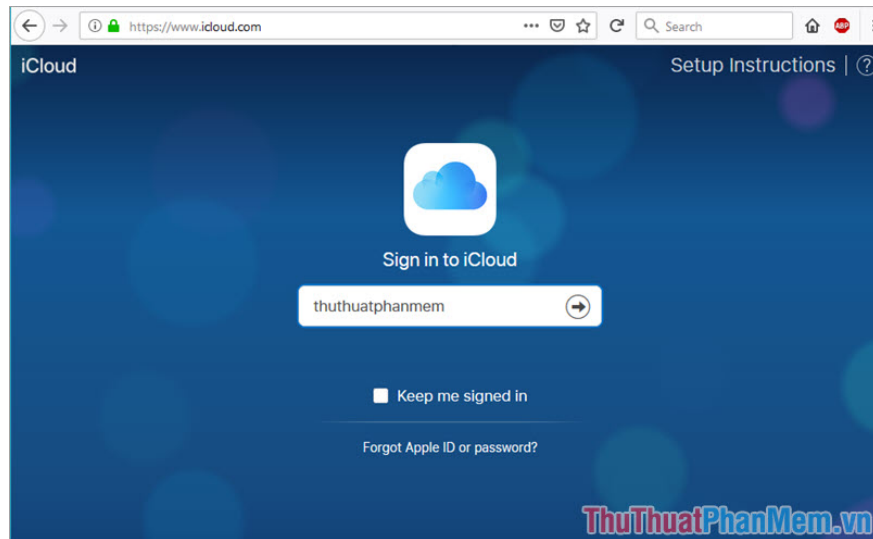

Step 4: Here, the iPhone will display the location on the map as shown below.

2. Lock iPhone remotely when lost.

Step 1: You access the iCloud website and log in your account on the computer at the following address:

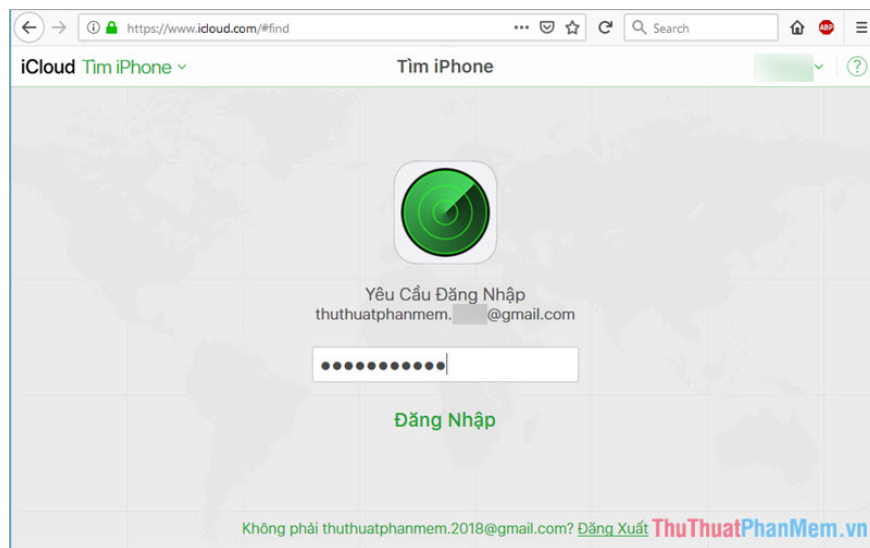

<https://www.icloud.com/#>

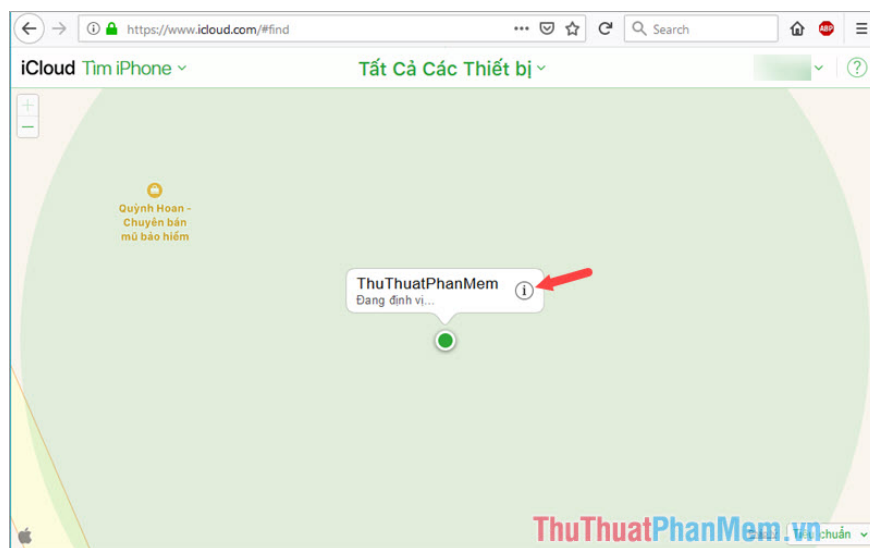

Step 2: Click on the **Find iPhone** icon as shown below.

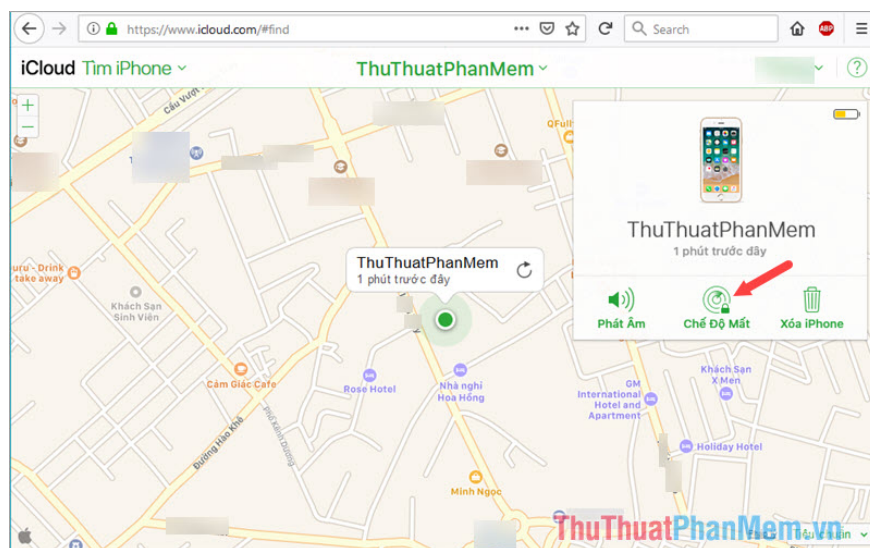

Step 3: You log back into your **iCloud** account again.

Step 4: Here, the map interface and the location of your phone appear. Click on the word icon (i) to open the detailed interface.

Step 5: There are 3 options of **Pronunciation** , **Lost Mode** , **Delete iPhone** . To enable remote lock, you click on **Lost mode** to lock the phone. If you are looking for a device, you can click on **Pronunciation** to automatically make a sound for you to recognize, but if you do not want the data in the machine to fall into the wrong hands, you can click on **Delete iPhone** to wipe out all data.

With a few simple security steps on the iPhone, you can protect your beloved device from the wrong hands. Good luck!
