

How to login to Zalo via your Facebook account on PC, no password required

Network administrators will guide you how to log in to Zalo on your computer without a password but use your Facebook account to access Zalo on your PC.

Zalo is now one of the most popular video chat, messaging and video calling applications. With the Zalo version on the computer, we can quickly receive messages from friends, without having to access the Zalo application on the phone.

And to increase the experience for users, as well as to meet the needs of convenient use, quickly, the Zalo version on the computer has added the login feature via Facebook account. If you want to quickly log in to the Zalo PC version, without entering information in the usual way or scanning a QR code, you can link to your Facebook account, via the phone number registered with Zalo. The following article of Network Administrator will guide you how to login to Zalo on your computer without a password, but use your Facebook account to access Zalo on PC.

Step 1:

We start the Zalo software on the computer. At the login log, click the **Login** button **with Facebook** .

Step 4:

Check the correct phone number and click **Confirm** below to continue.

Step 5:

Zalo will send a notification to the phone number used to register Zalo account. You will receive an activation code sent to the Zalo application on your phone as a message, not via SMS.

The user enters the activation code sent and **press Submit** to confirm. And finally you can login to Zalo account already.

One more method of logging into Zalo account on the computer version for users, besides scanning QR codes or entering necessary account information. Zalo will link to your personal Facebook account, via the phone number registered Zalo account on the phone. Confirmation code will be sent by message to Zalo application.
