Proper use and maintenance of wooden furniture will help the wooden items always be shiny as new and not damaged.

Wood is a material used to make a lot of furniture and furniture. Due to the nature of wood, the proper use and maintenance of wooden furniture will help the items made of wood always be shiny as new and not damaged.

How to maintain beautiful wooden furniture like new

Here's how to preserve and clean wooden items and utensils

first

Cleaning wall paneling

The wall of your house is painted with colorful paint, yellow and stained for a long time, use Chinese tea soaked in a towel, wipe it hard on the wall, it will be clean immediately.

2

Brighten the varnish on wood

The varnish layer on wood is less dusty, but if little care is taken, they are also overshadowed, less glossy. Want them to shine like new, you can use a little milk to wipe the varnish and let it dry. Then, use a brush dipped in

clean water. With this method, the varnish will be hard and glossy

3

Remove long-standing stains on wooden furniture

On wooden furniture, there are often stains caused by unintentionally. If left for a long time, these stains are very difficult to clean. If you want to remove these traces, put a few drops of cooking oil in a little white beeswax, and water it for the beeswax to flow out. Apply the wax to the dirty area and rub it with a cloth.

4

Cleaning wooden furniture that is dirty like flies

Want to remove the stains caused by flies on wooden furniture, you take flour (sticky, rice, or noodles .) mixed with a little cooking oil and beat until it's really thick, apply the powder evenly on the dirty place and then wipe it with a rag for clean. Finally, rinse thoroughly with clear water and polish.

5

Remove long-standing stains on smooth wood

If you want to clean stains on smooth, unvarnished wooden items, first, mix a water to clean according to the formula: 10g salt + 90g bleach (soude de caustique) + 1 liters

Then, you take a broom made of coconut sheath soaked in this water and sweep over those smooth wooden utensils. For a long time, rinse with cold water and dry with a soft and clean towel.

6

How to renew small wooden items

To make your small wooden items shiny like new, use a cotton ball soaked in pine oil (essence de terébenthine) to wipe it evenly. Then you wait for it to dry and polish it again with a clean felt.

7

Removes white stains on varnished wooden tables

If the table or sofa has been whitewashed by hot water on the varnished wood, use a cloth dipped in paraffine oil to gently rub the stain. Leave it for a long time, then use pine oil to polish it and use a regular cloth to polish it.

8

Filling the cracks in the wooden floor

Fill cracks in wood with glue mixed with sawdust

To fill the cracks or crevices in the wooden floor, take liquid glue mixed with finely sifted sawdust. You remember to mix well, very finely, then you bring it up to heat, then put it on the openings and rub it with your face.

If the wood floor has been varnished, you must apply varnish over the already sealed areas to match the color.
