

How to make a video rewind, make the clip reverse on the phone

Reverse video, reverse video will help you get very interesting moments to share with friends and relatives

Reverse the video on the phone is currently hot trends on some social networks like Facebook and Instagram, or most recently Tik Tok. Going through a social networking site you will find videos with interesting reverse movements with a variety of genres such as magic tricks, or somersaulting or jumping from rooftops .

There are many applications that support users to reverse the video on their phones, the most common example is ReverseVid, which supports reverse video for each specific speed on the application. Then share with your friends on social networking apps like Facebook, Zalo, Instagram . Below will guide you how to reverse the video on your phone.

1. How to turn Tik Tok back in time
2. How to turn back time on Kwai
3. Enable uploading HD videos to Facebook on iPhone
4. How to use video as a personal Facebook cover photo

Guide to rewind videos on the phone

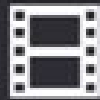

Download Reverse Vid for iOS

Step 1: Download the ReverseVid application for the phone above, then boot up. At the main screen, there will be two video grab icons for you to choose, namely Library and New.

With **Library** , you will be able to select the recorded video on the phone, and click **New**, then ReverseVid will request access to your camera and microphone too.

Step 2: Select New when you want to go back to the video to rewind, after you finish shooting, press Use Video to use that video.

Then drag the rewind speed bar below, the fastest speed is twice as fast, and slowly, it may be slow to 1/10 video. You can notice the snail icon is a slow reverse video, the rabbit is fast rewinding the video.

Step 3: After pulling the video rewind speed button, you can click the **Preview** button to preview the **rewinded** video, the rewind time will depend on the level of time you choose. If you do not see it yet, press **Done** to reselect the video speed.
