

# How to make Facebook avatars of black and yellow letters strange

If you were too bored with the avatar type Facebook image, you could change it to Facebook avatar in a cool black-and-gold font.

In order to create a unique and strange Facebook avatar style, it certainly won't be too difficult, as Facebook has supported creating Facebook avatar images with videos, or services that create Facebook online avatar. And if you want to create a unique Facebook profile image, you can follow the article below.

Accordingly, users can create Facebook avatars with prominent black, exclusive and strange black letters. This is the code found by members of the J2Team team on the Codpen page. We can insert any content into the codestream to get the fastest results. Follow the Network Administrator in the article below.

1. Manually create a Facebook Avatar image with 5 online applications
2. Do you know how to create avatar frames and effects on Facebook yet?
3. How to create an avatar image and Facebook cover photo match

## How to create a new Facebook avatar

### Step 1:

First, go to the link below to create the text.

1. <https://codepen.io/ArtZ91/pen/NggJBM>

### Step 2:

In the interface in HTML section there will be 2 **lines of code 2 and 3** for us to edit. Here enter your name at Code and pen to apply.

```
HTML
1 * <div class="hub">
2 *   <span contenteditable="true">Code</span>
3 *   <span contenteditable="true">pen</span>
4 * </div>

CSS
31 }
```

The result will look like the image below. However, the text is quite large and long, so when applying it is not nice. So users should note writing short letters, 2 words are beautiful.

### Step 3:

In case you want to adjust the font smaller then you look at **CSC** , **line 18** edit the **font size** for the text. At that time the text will automatically change.

```

CSS
10 height: 100%;
11 position: relative;
12 }
13
14 .hub {
15 display: block;
16 font-family: sans-serif;
17 font-weight: bold;
18 font-size: 5vw;
19 position: absolute;
20 top: 50%;
21 left: 50%;
22 transform: translate(-50%, -50%);
23 }
24

```

In addition, you can also adjust the font style and font color in the CSS section. From lines 14 to 30 we can adjust the handwriting or background color according to options.

```

13
14 .hub {
15 display: block;
16 font-family: Arial Bold;
17 font-weight: bold;
18 font-size: 3vw;
19 position: absolute;
20 top: 50%;
21 left: 50%;
22 transform: translate(-50%, -50%);
23 }
24
25 .hub span:nth-child(2) {
26 background: #FF9900;
27 color: #000000;
28 border-radius: 1vw;
29 padding: 0 1vw 1vw 1vw;
30 display: inline-block;
31 }

```

For example, I will change the font type to Arial Narrow and will be rendered as shown below. To change the user will have to manually enter the font, color type.

#### Step 4:

Currently, it is not possible to download images, or text, so users are required to take screenshots and cut them into photo editing tools. As a result, we will get a Facebook profile picture as shown below.

With a simple way, just change the text in the pre-designed code, you have renewed your Facebook avatar to not too sophisticated but prominent typeface. Not only do users use Facebook as an avatar, users can use it as avatars on many different forums.
