

How to make iPhone video wallpaper?

You don't need to use still images as your iPhone wallpaper. In today's article, TipsMake.com will show you how to create videos on iPhone lock screen.

You don't need to use still images as your iPhone wallpaper. In today's article, **TipsMake.com** will show you how to create videos on iPhone lock screen. You can use any video as your main wallpaper and lock screen.

How to make video wallpaper for iPhone with intoLive application

It is worth mentioning that the iPhone does not have a built-in converter to help you turn ordinary videos into Live Photos. However, that does not mean that you absolutely cannot perform video conversion into Live Photos on your device.

There is really a good app on the App Store for iOS that helps you convert regular videos into Live Photos.

You can download the application and use it to convert any video into Live Photos. Once done, you can set the resulting video as your iPhone's wallpaper.

The following steps will help you to do that on iPhone:

Step 1 . Download the intoLive app.

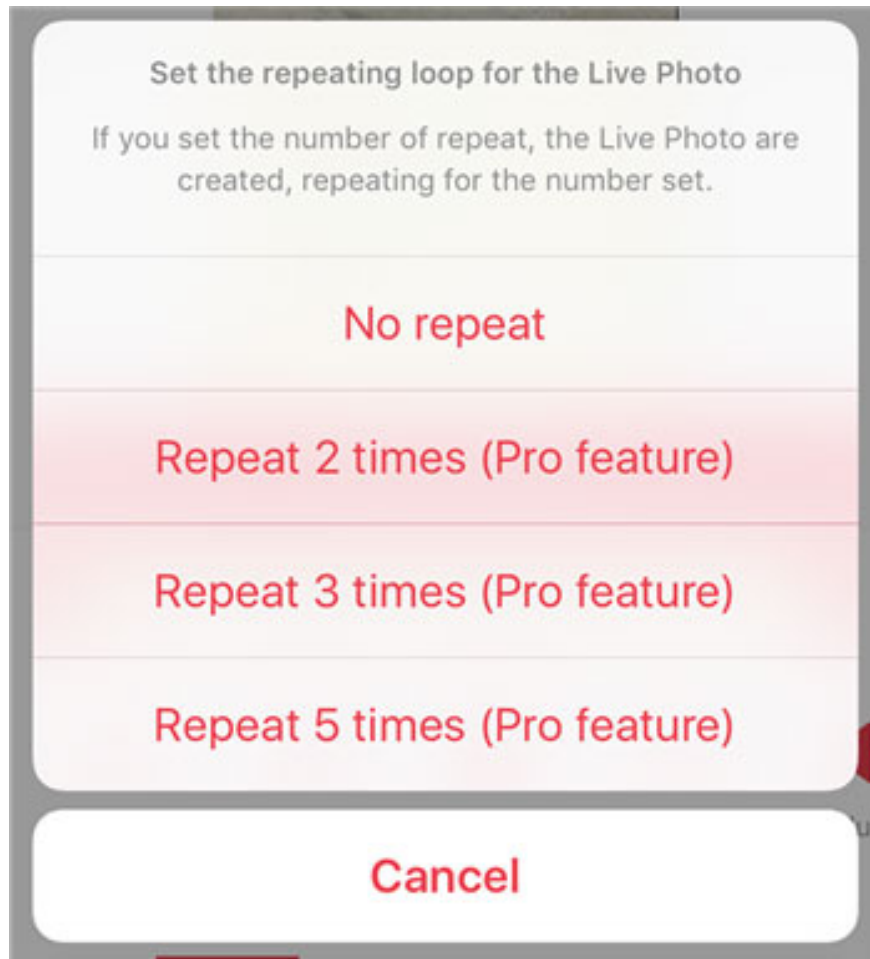

<https://apps.apple.com/app/id1061859052>

Step 2 . Open the application when it is installed. You will be asked to allow it access to the image. Allows the app to do so, so that it can fetch your videos.

Step 3 . When your videos are fetched, they will be displayed on the main interface of the application. Select the video you want to use as an iPhone live wallpaper by tapping on the video.

Step 4 . On the following screen, the application will allow you to edit your video. You can apply filters, change the speed of the video, mute the video, rotate the video, etc. When you have made the changes, click **Make** in the upper right corner of the screen.

Step 5 . You can apply loops to your videos on the following screen. However, only the first **No repeat option** is available to users for free. Click on it and it will allow you to continue.

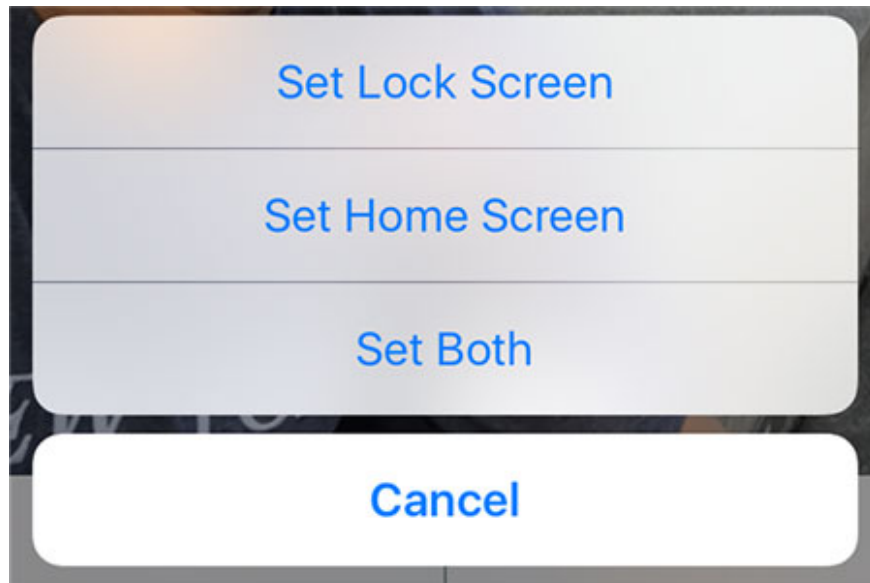

No repeat is available for free users

Step 6 . The video is now converted to Live Photo and you can save it to your device. Click the **Save Live Photo** button to do so. Live Photo will be saved in **Photos** app on the device.

Step 7 . Now the Live Photo video is ready. Use that video as an iPhone wallpaper as follows:

Launch the **Settings** app on iPhone and tap **Wallpaper**> **Choose a New Wallpaper** .

Step 8 . Click **Live**> **Live Photos** and select the newly created wallpaper. Then, click **Set**> **Set Both** to set it as wallpaper for both the home screen and lock screen.

Click Set> Set Both to set it as the wallpaper for both the home screen and the lock screen

As you can see, it's quite easy to use any video available on iPhone as a live wallpaper. All you need to do is convert the video into a Live Photo and you're ready to use it as your iPhone wallpaper.

How to set video as iPhone wallpaper with PicPlayPost

If for some reason, the above app doesn't work on your device or you don't want to use it, you have another great app available, which helps to use any video as an iPhone wallpaper.

This app is called PicPlayPost and like intoLive application, it allows you to convert your videos into Live Photos to use them as live wallpapers.

Step 1 . Download the PicPlayPost app and launch it.

<https://apps.apple.com/app/id498127541>

Step 2 . On the first screen, click the New Project option to create a new project for the live wallpaper.

Step 3 . You will need to give the app access to photos and videos. Then, click on the option that says **Create a Movie or Slideshow** .

Select Project Type:

Create a Movie or Slideshow

Stitch photos and videos and add multi-collage transitions

Add animated text

Create a Collage

Combine photos, videos, and GIFs

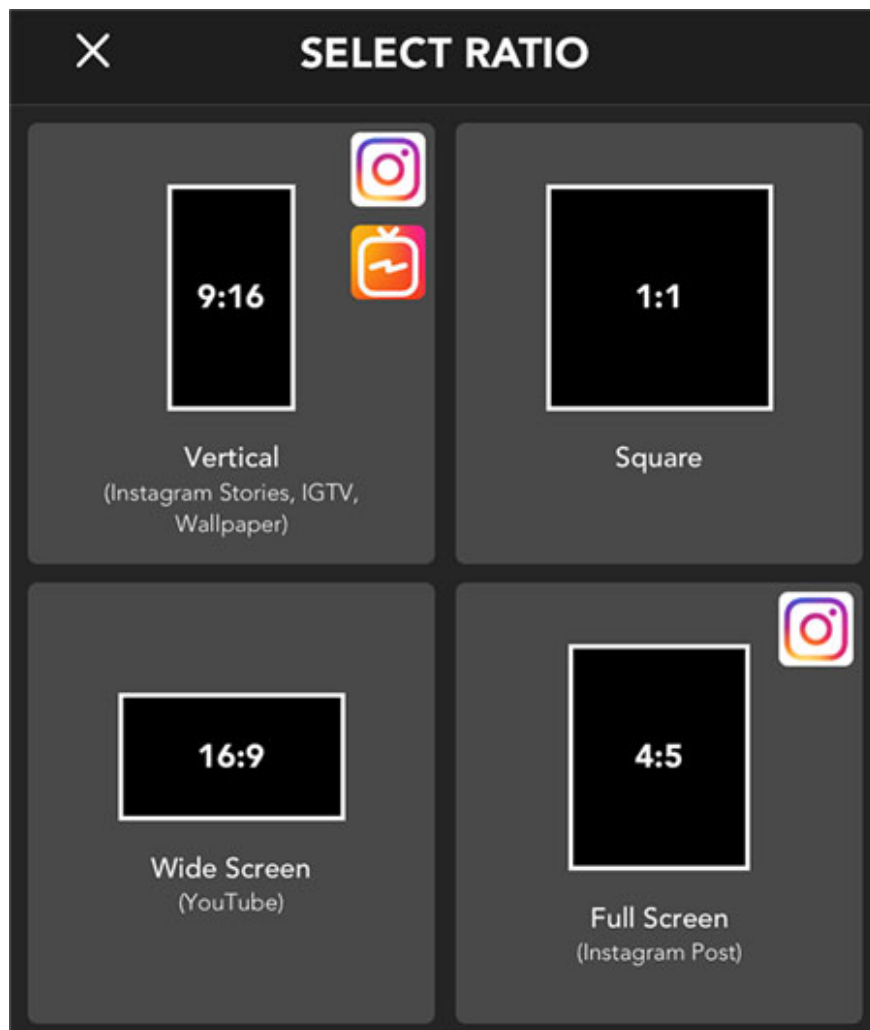

Automated Templates

Select a style like scrolling video and create videos in seconds

Click Create a Movie or Slideshow

Step 4 . The following screen allows you to choose the scale for your project. You should choose **9:16** because it fits perfectly to the iPhone wallpaper.

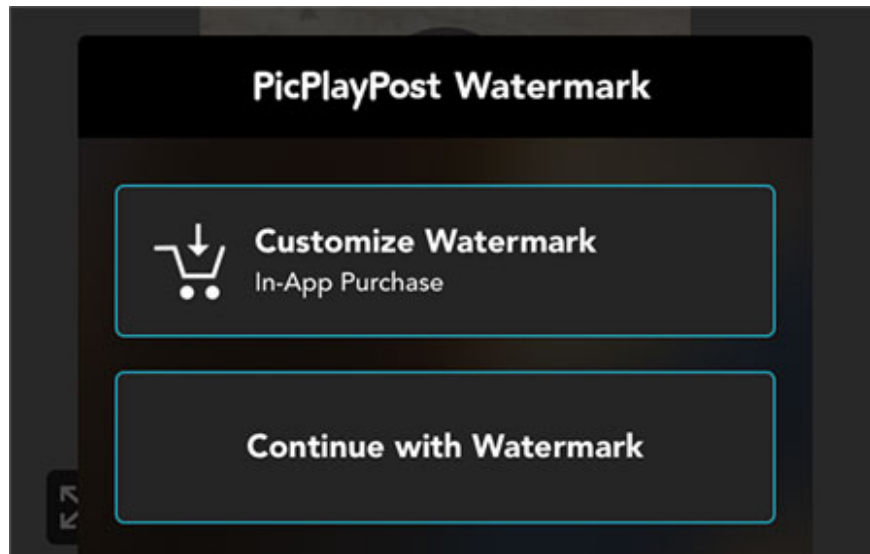

You should choose 9:16 because it fits perfectly to the iPhone wallpaper

Step 5 . You will now add your video to the application. Click the + button in the lower left corner.

Step 6 . Select **Fullscreen** and then select videos to add to the application. Make any changes you want to the video and then click **Save & Share** at the top.

Step 7 . If you are a free user of the application, click **Continue with Watermark** . Select **Live Photo / Wallpaper** on the screen after that.

Select Continue with Watermark

Step 8 . Go to **Settings> Wallpaper> Choose a New Wallpaper> Live> Live Photos** on iPhone and select the newly created Live Photo. Then it will be set as your iPhone wallpaper.

That's all it takes to set videos as your iPhone's wallpaper. If you've never tried animated wallpapers before, follow this guide and try turning your iPhone videos into wallpapers
