

How to Make Semi Transparent Flowers in Paint Shop Pro

Creativity is essential to create unique and appealing business cards, logos, and other communication methods that would be used for business matters or usage. By using Paint Shop's preset tools and a semi-transparent technique, it can add...

Method 1 of 1:

Enhance this flower into a design

1. Picture 1 of How to Make Semi Transparent Flowers in Paint Shop Pro

Continue with the image and click on the "Raster Deform Tool". Modify your image to become smaller if you made it too large.

2. **Click on "Layers" > "Duplicate".** Move the duplicate image to anywhere you wish and resize the image with your "Raster Deform Tool". Give it another color by going into the "Adjust" > "Hue and Saturation" > "Colorize". The example used 131 Hue and 255 Saturation.

3. Picture 3 of How to Make Semi Transparent Flowers in Paint Shop Pro

Add a drop shadow to the duplicate image. Use these settings for it: Vertical & Horizontal = 15; Opacity = 30; Blur = 20. Click on "Layers" > "Merge" > "Merge Down". Repeat the drop shadow for the first flower you made so both of them have the effects.

4. Picture 4 of How to Make Semi Transparent Flowers in Paint Shop Pro

Duplicate the current layer and it will appear as "Copy of Merged". Click on the "Merged" layer in the Layer palette. Twirl it by going into the "Effects" > "Distortion Effects" > "Twirl" > "Degrees: 475" > Ok.

5. Picture 5 of How to Make Semi Transparent Flowers in Paint Shop Pro

Give it color by going into "Adjust" > "Hue and Saturation" > "Colorize". The example used 66 Hue and 255 Saturation. Click on your "Move" tool to move around both the twist and the flower set to anywhere you wish.
