

How to make videos of Tiktok transforming mirror is extremely easy

This is a very easy way to record Tiktok mirror-changing videos on your phone, the time to finish the video is only 5-10 minutes and very easy to do.

Cleaning Tiktok shape mirror is currently a trend that many young people make and share to many users. With just a wave of hands, many young people have "transformed themselves" from another person. So how to make tiktok mirror cleaning videos, you can see the instructions below this article.

Pair video Tiktok wipe mirror

Step 1: First you need to shoot 2 videos, 1 video when you have not transformed and 1 video when you have transformed. Call it **videos 1 and 2** .

Both videos must be used to wipe the mirror, remember to stick your hand in the camera. With unmodified video, the mirror wipe will be at the end, and with the video you have already transformed, it will be the action at the beginning of the video. Next, download the InShot video editing application to your phone. .

1. [Download InShot for Android](#)
2. [Download InShot for iOS](#)

Click **Video** , select a video first without transformation and click the green check box to enter the editor.

Step 3: Go out, click on the red plus sign as shown in the image and select video 2. Then do the same as video 1, except you cut how to swipe down at the beginning of this video 2 to match the waving gestures at the end of video 1 only.

In this video, the ad only changes with the headset, if you want to slow down the moment of transformation after shaking your hand, select video 2 and select the **Speed** tool and adjust it to 0.5x range.

Cut out the part you want to play by pressing and holding the cut button to maximize the time it takes. Then click the checkmark to complete the music cutting.

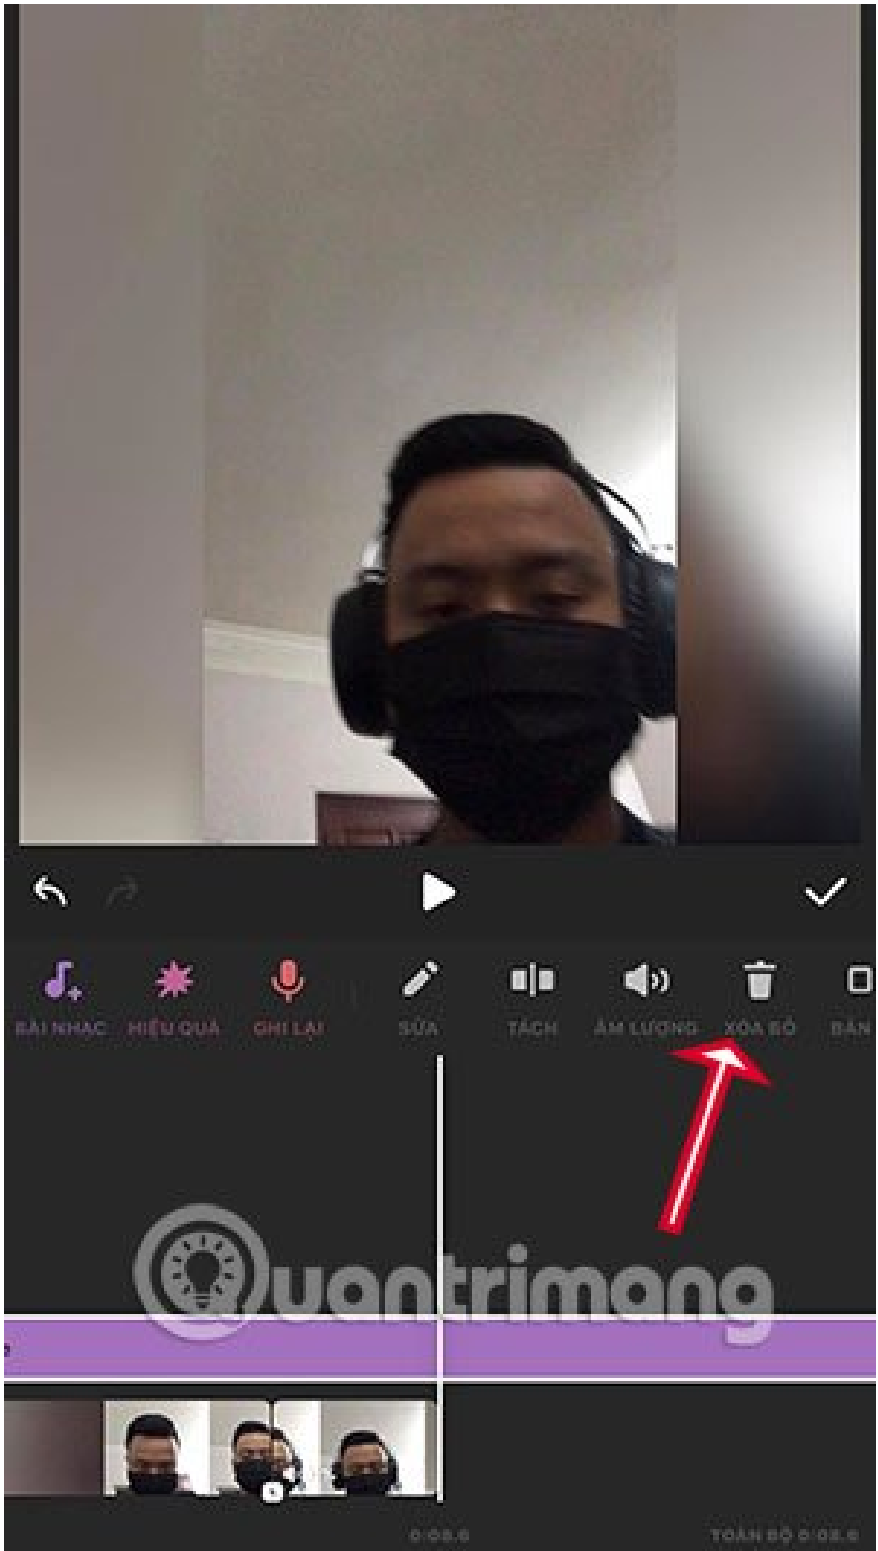

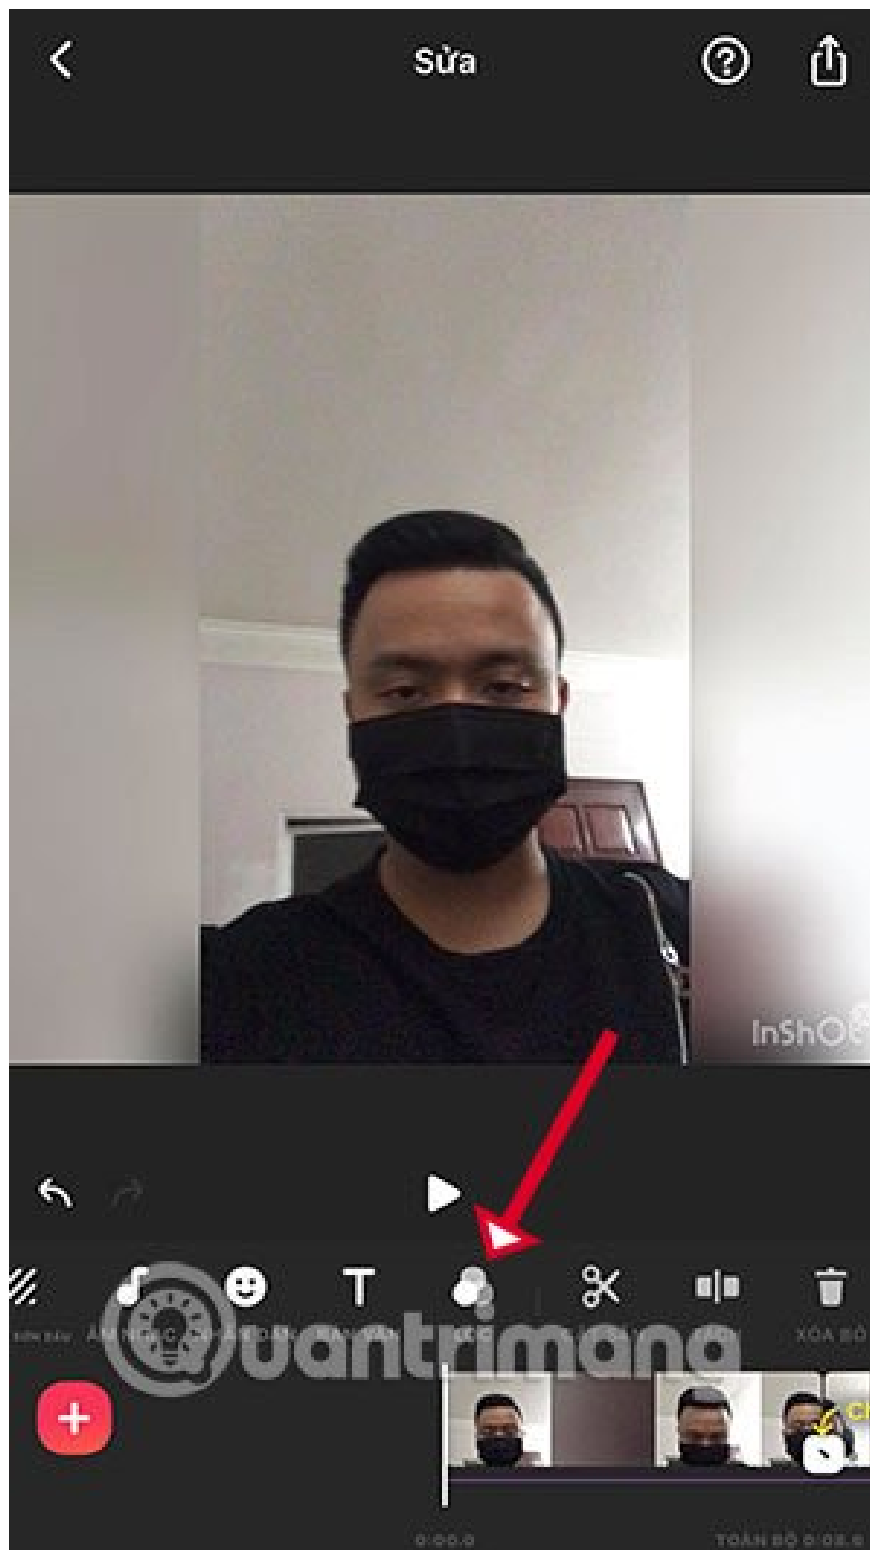

To align effectively, please notice in the middle of the two videos there is a transition button, align the music at the right transition moment.

Regarding the remaining piece of music, drag the white line to the piece you want to cut and click Split, and then click Delete.

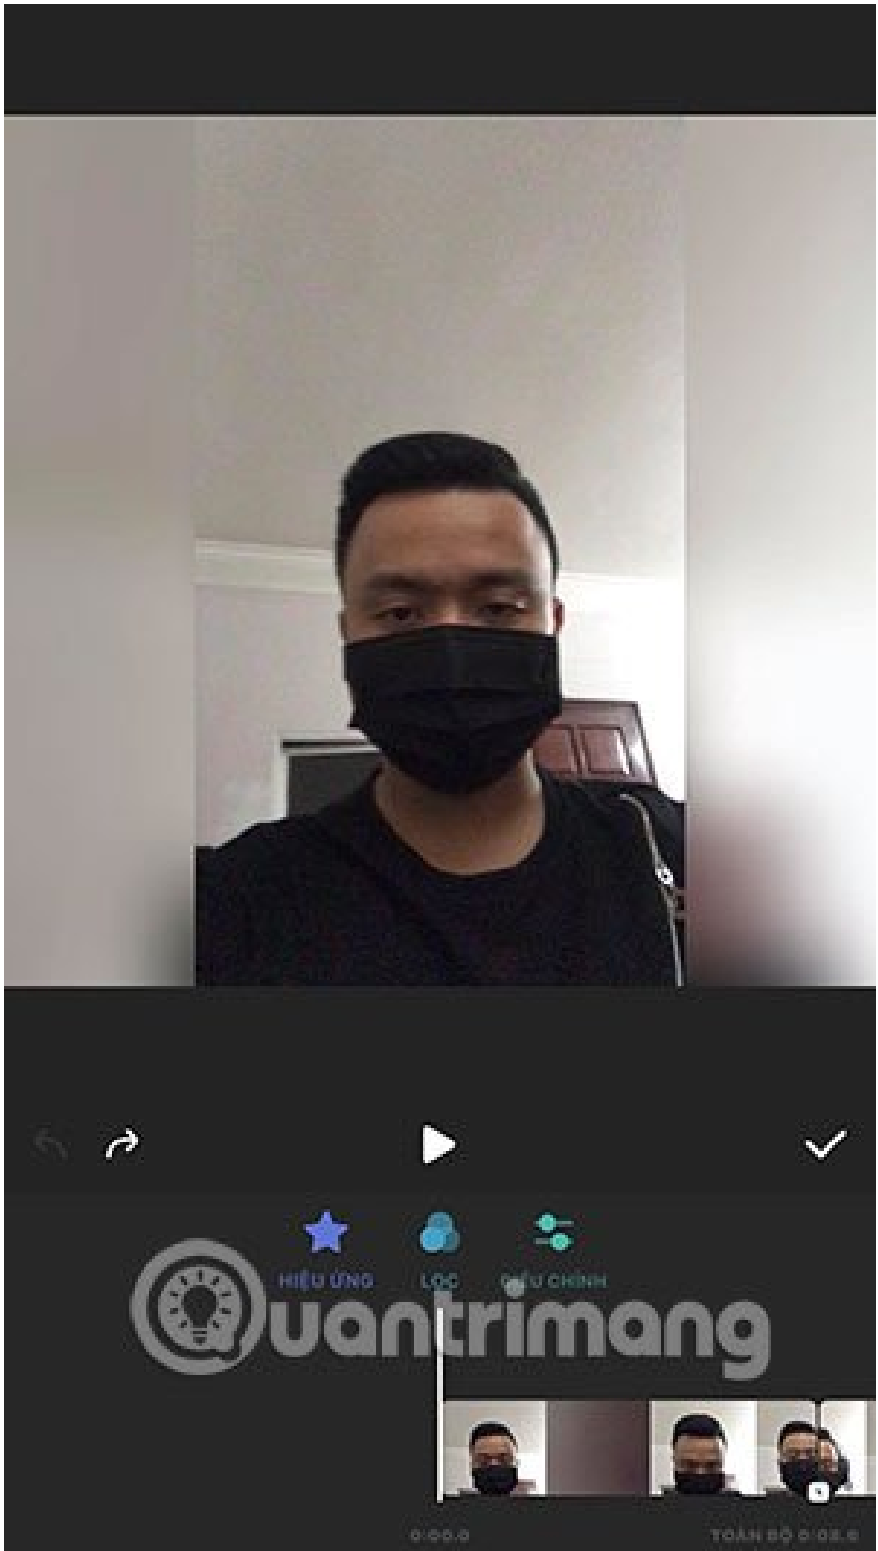

Next choose Filter for your video.

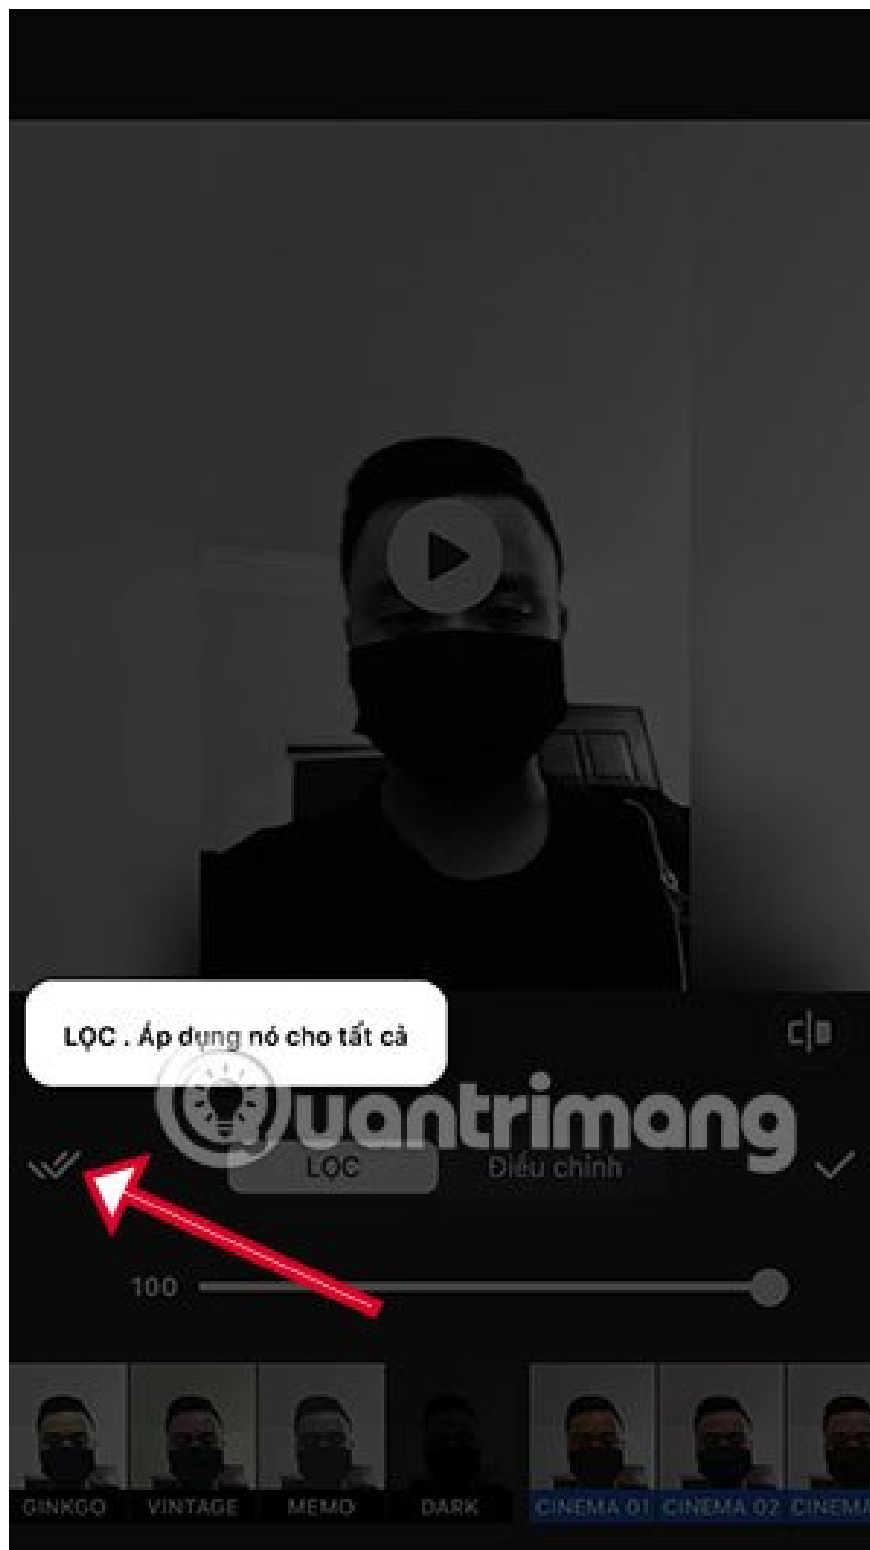

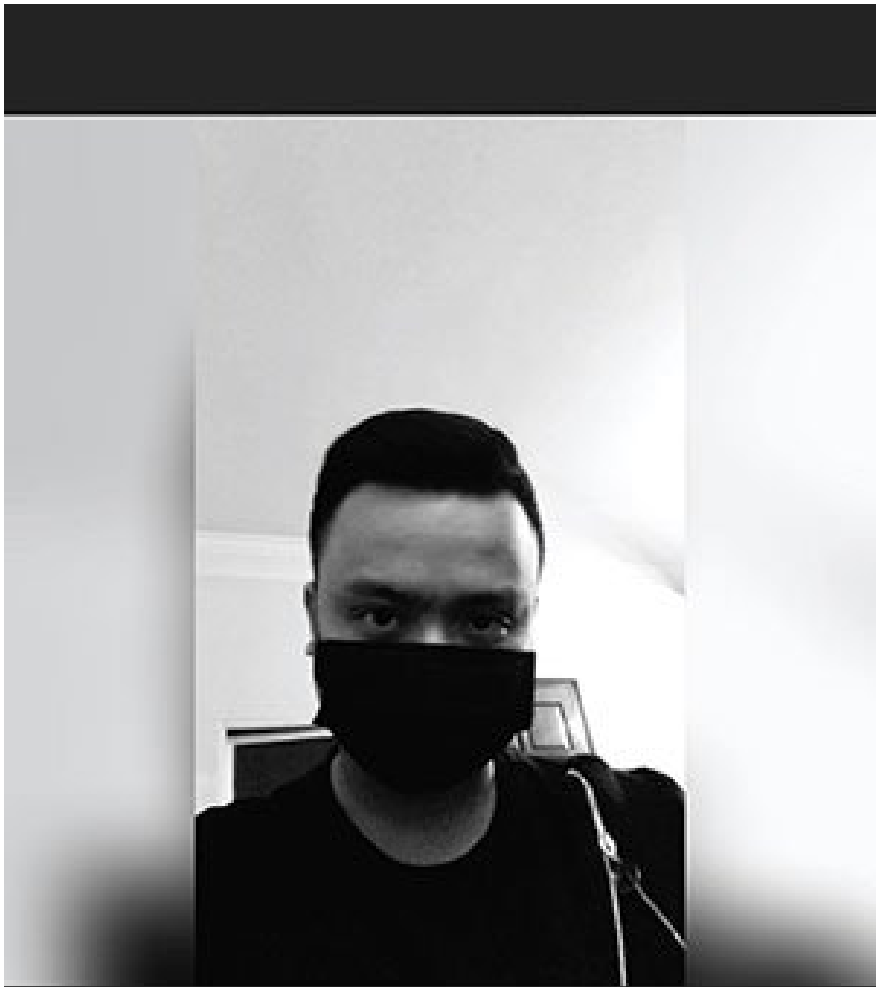

Add filter for TikTok transformation video

Next select the color filter you want to add to the video, you can add for both or just one video.

Click on each video you want to add a filter and click Filter to change the filter for the video. Finally, you can add a few funny icons and based on the video time.
