

# How to manage files in tab format on Windows 10

My Computer application on Windows 10 will manage folders, files in the same form as the Sets feature.

Some current versions of Windows 10 have used the Sets feature, merging applications into the same window with different tabs. If you want to experience that feature, you can use the My Computer application.

My Computer is an application on Windows 10 that can manage files on a computer in a tab style. We can also combine tabs into one window for easier and faster management. The following article will show you how to use the My Computer application on Windows 10.

1. How to merge Windows application windows into one?
2. How to split the screen on Google Chrome
3. How to use Virtual Desktop on Windows 10?

## How to manage files by tab on Windows 10

### Step 1:

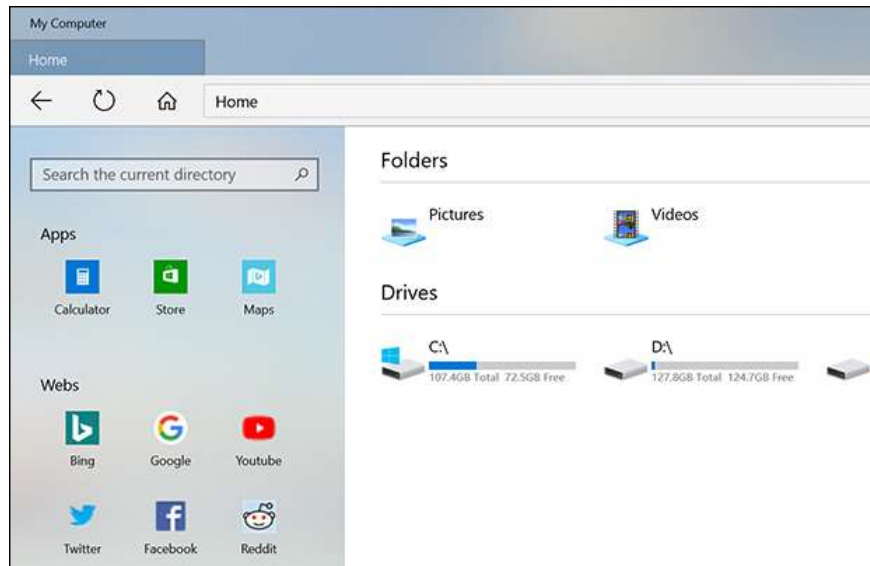

You download the application according to the link below and then proceed with the installation.

1. Download the My Computer Windows application

### Step 2:

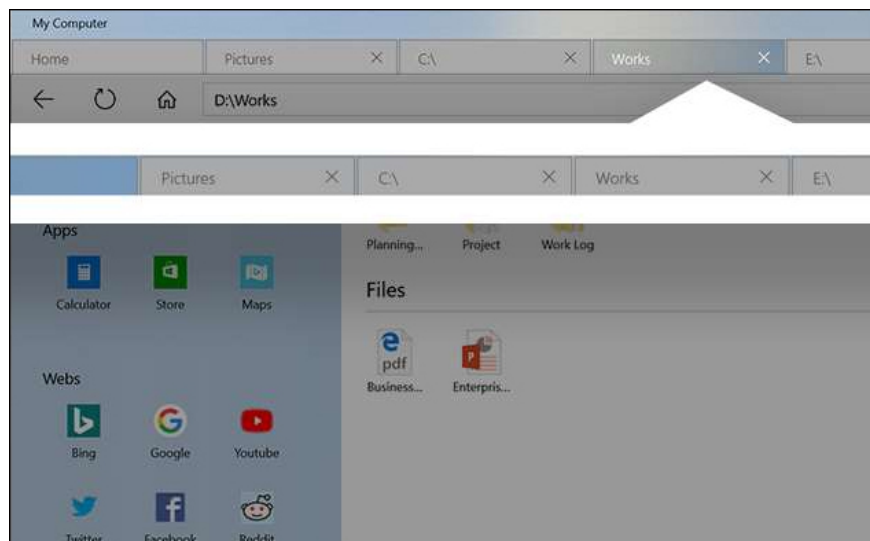

When you open the application, you will see familiar disk and directory systems such as on File Explorer.

In the address bar there will be navigation buttons, access back, reload interface. On the left interface will be the search box, along with the application as well as websites for quick access. These websites will be opened by the default browser of the established system.

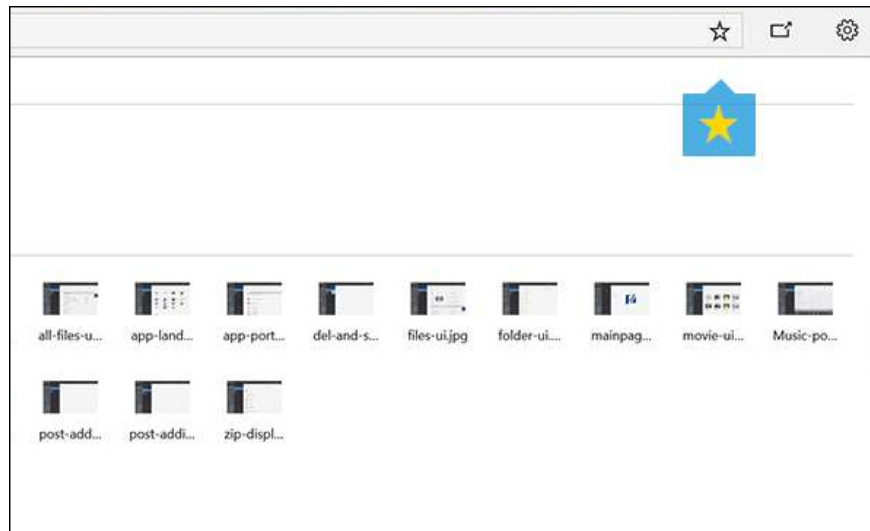

### Step 3:

To open a new tab, click on the folder, the system partition on the interface to open each tab.

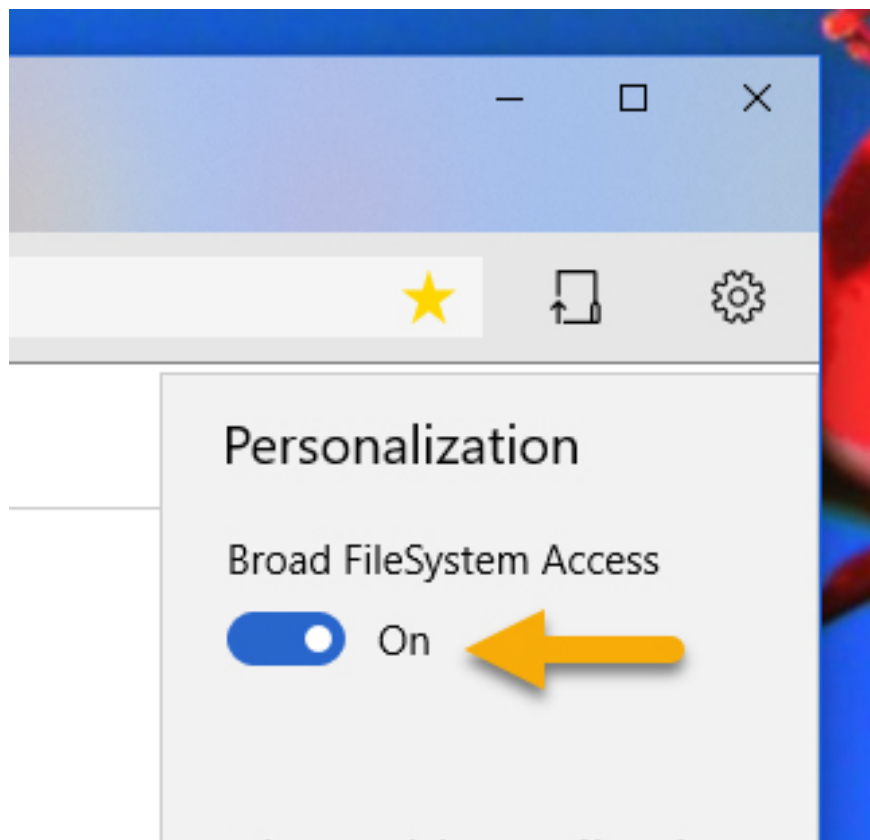

In addition, the application also has a pin location feature. Open the folder you want to bookmark and click **the star icon** in the address bar. Now the folder will appear on the My Computer interface. Press the star icon again to unpin the folder.

#### Step 4:

In case the user wants to increase the space on My Computer, hide the hard drive partitions, then click on the gear icon and **turn off the Broad File System Access option**.
