

How to manage passwords on Chrome, Coc Coc, Edge, Firefox browsers

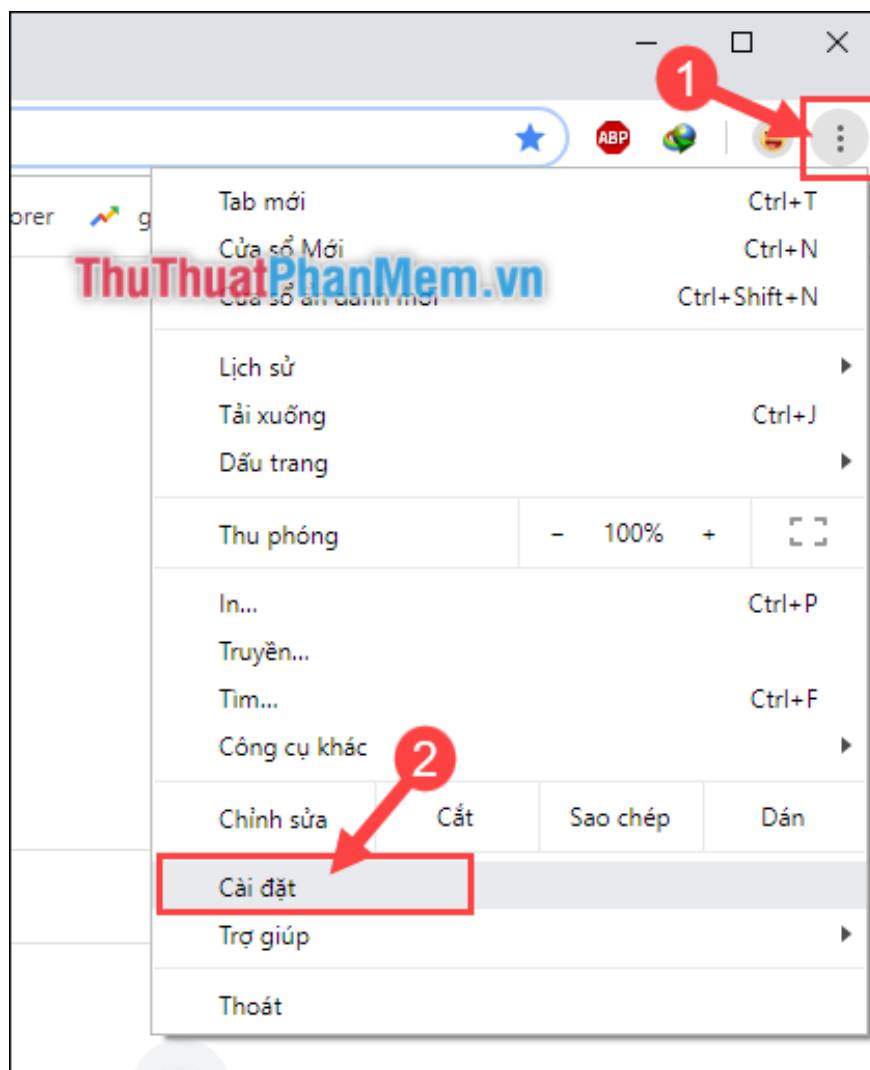

Currently, web browsers have integrated the feature of remembering accounts and passwords of user accounts in community forums. It helps users now no need to remember the account as well as the password. However, that's why we sometimes forget the password we set

Currently, web browsers have integrated the feature of remembering accounts and passwords of user accounts in community forums. It helps users now no need to remember the account as well as the password. However, that's why we sometimes forget what password we set for that account. So how do you quickly review passwords or in other words, how to manage passwords on browsers? Please follow the article below *TipsMake.com* will guide you.

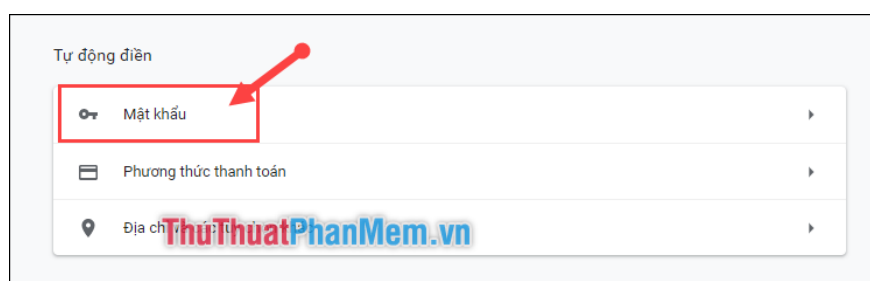

Password manager on Chrome browser

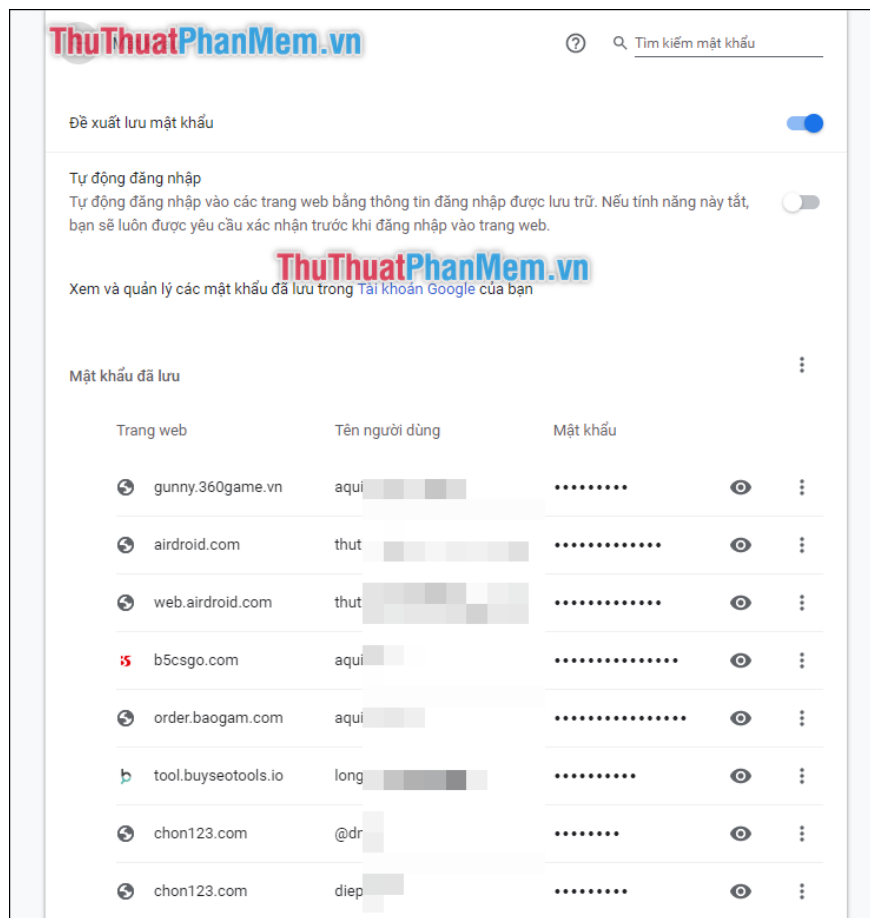

Step 1 : At the interface of Chrome browser, click on *the 3-dot icon* in the right corner of the browser -> then select *Settings* .

Step 2 : In the *AutoFill* section , select *Password*.

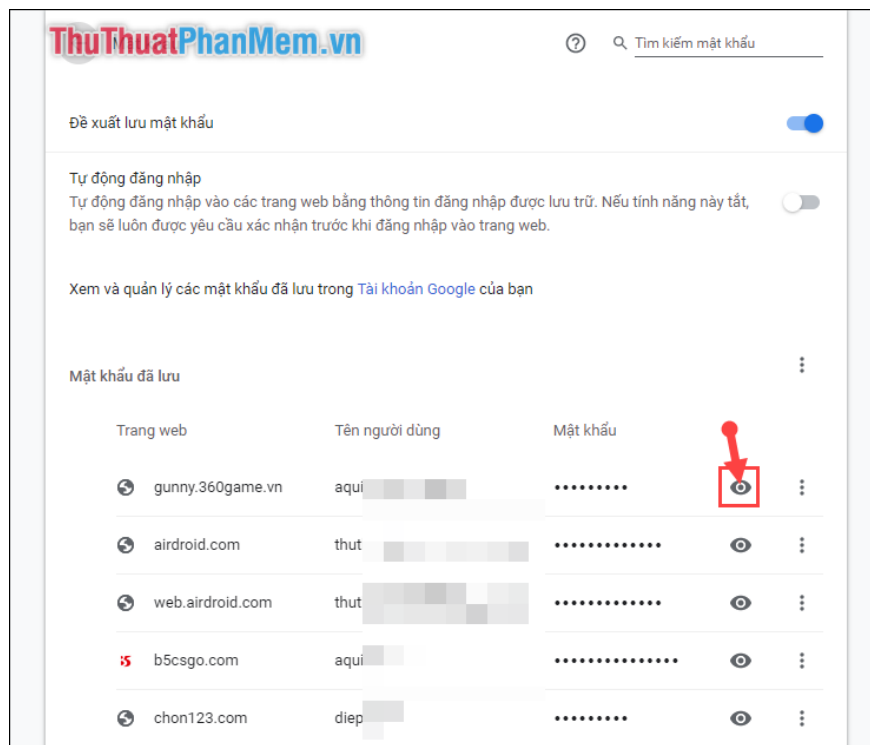

Step 3 : Here will display all websites that you have saved your account and password.

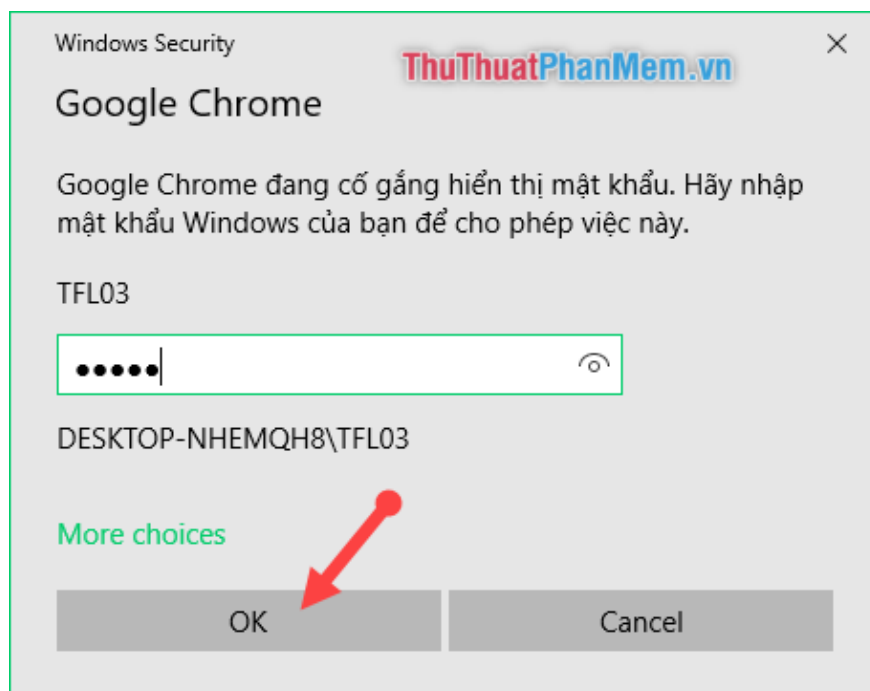

Step 4 : To review the password of an account, click on the eye icon corresponding to that account.

As an example below, I want to review the account password on gunny.360game.vn:

Step 5 : Next, enter your computer login password (*in case your computer set a password*).

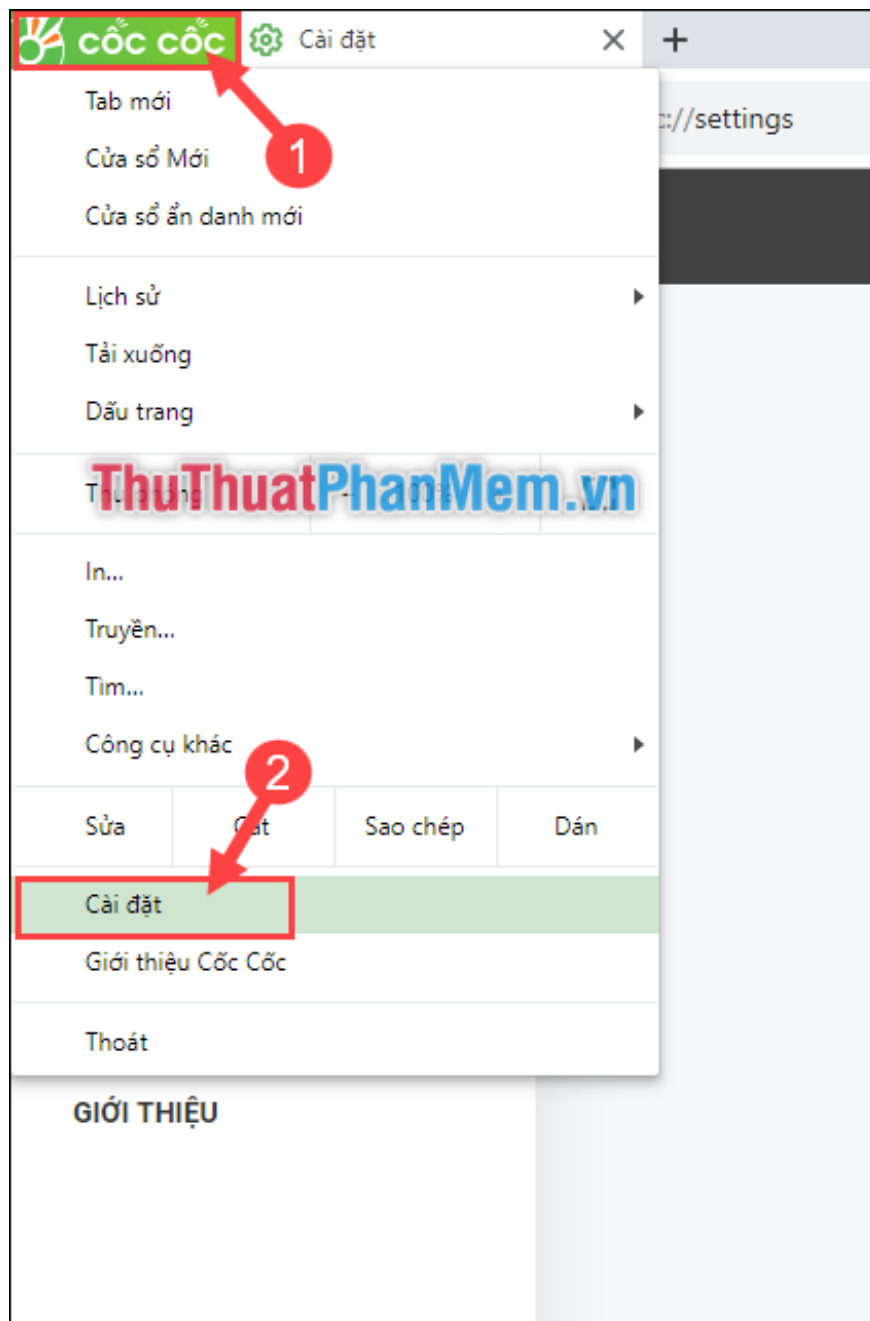

Your account password will then display:

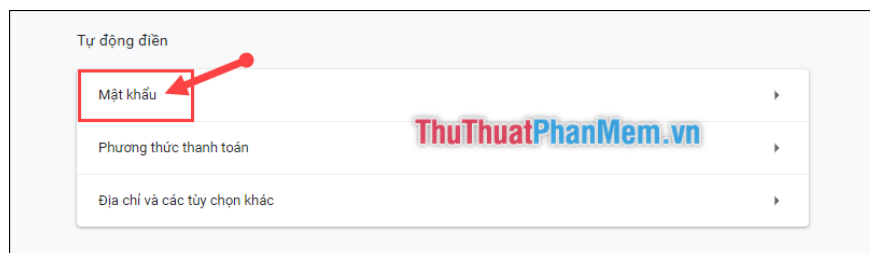

Password management on Coc Coc browser

For Coc Coc browser, the operation is almost the same. You perform the following steps:

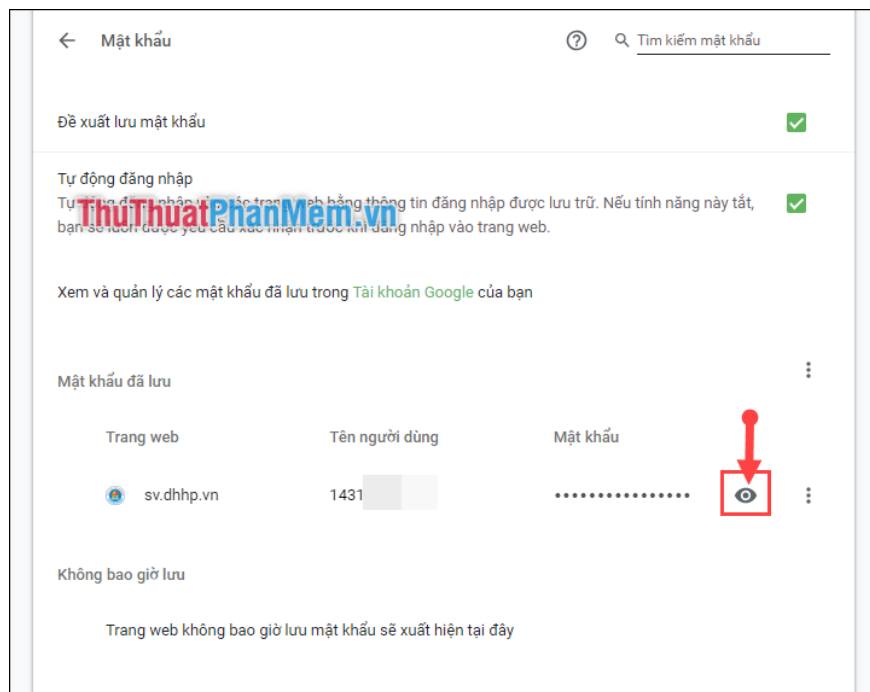

Step 1 : Click the Coc Coc icon in the left corner of the browser, select *Settings* .

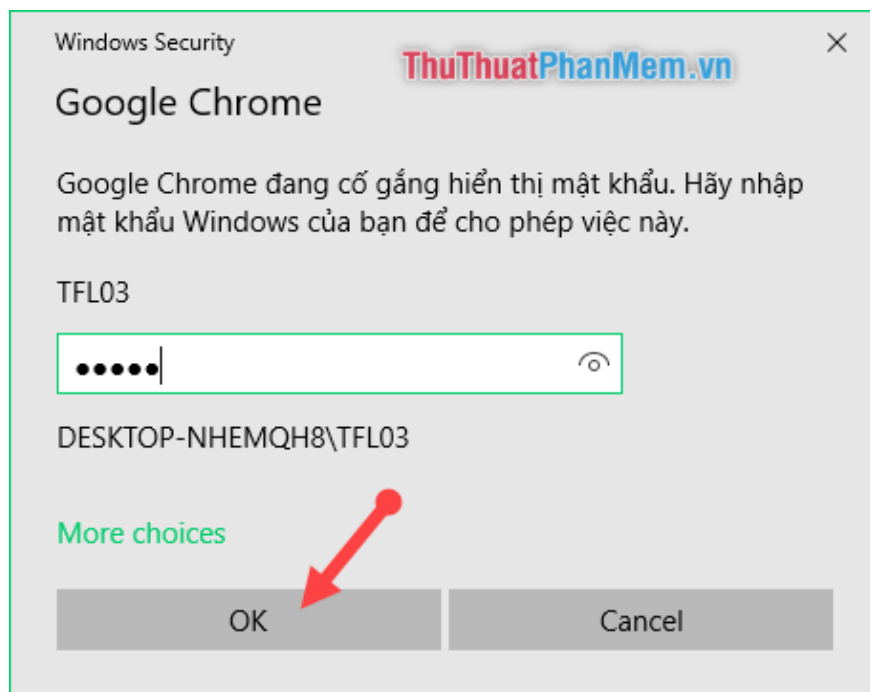

Step 2 : Go to the **AutoFill** section, select **Password** .

Step 3 : Click the eye icon to view saved passwords.

Step 4 : Enter your computer login password (*in case your computer set the password*) and then click **OK** .

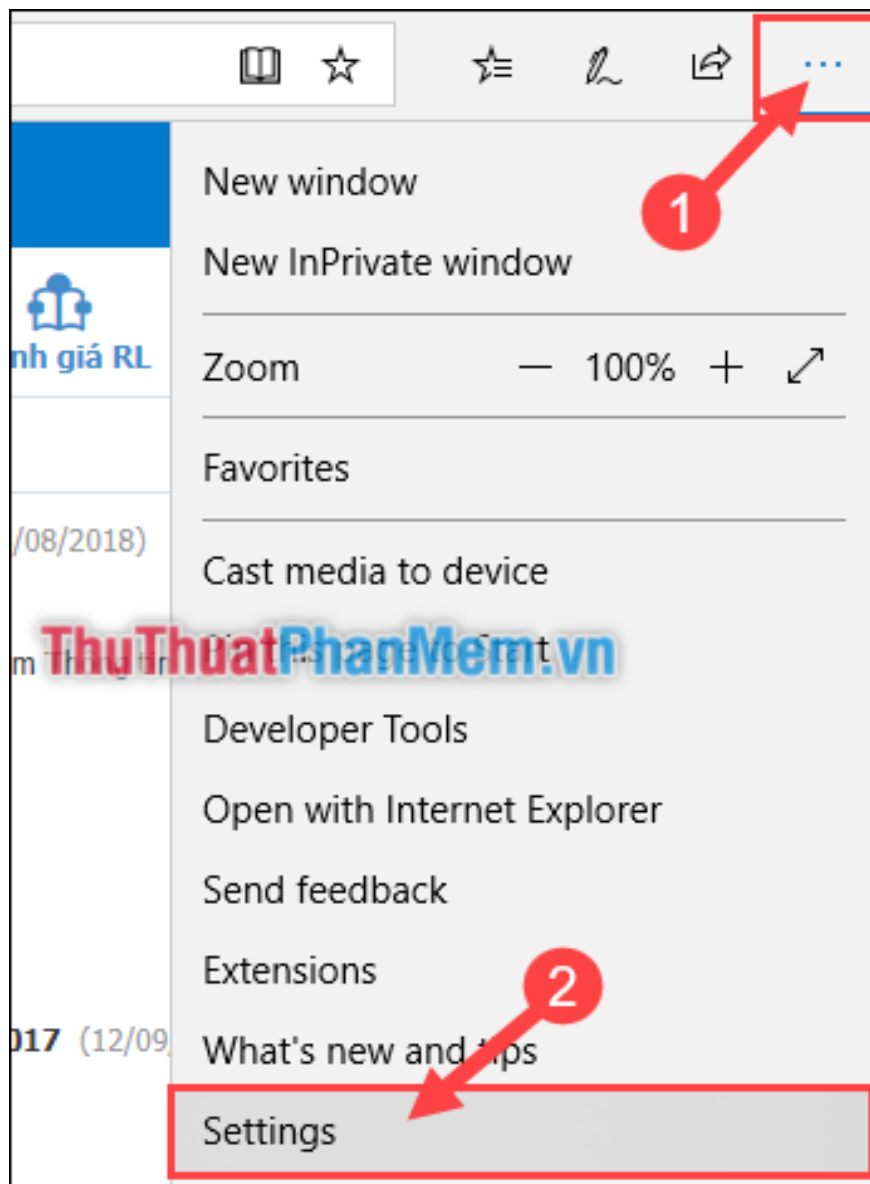

Your password will be displayed immediately:

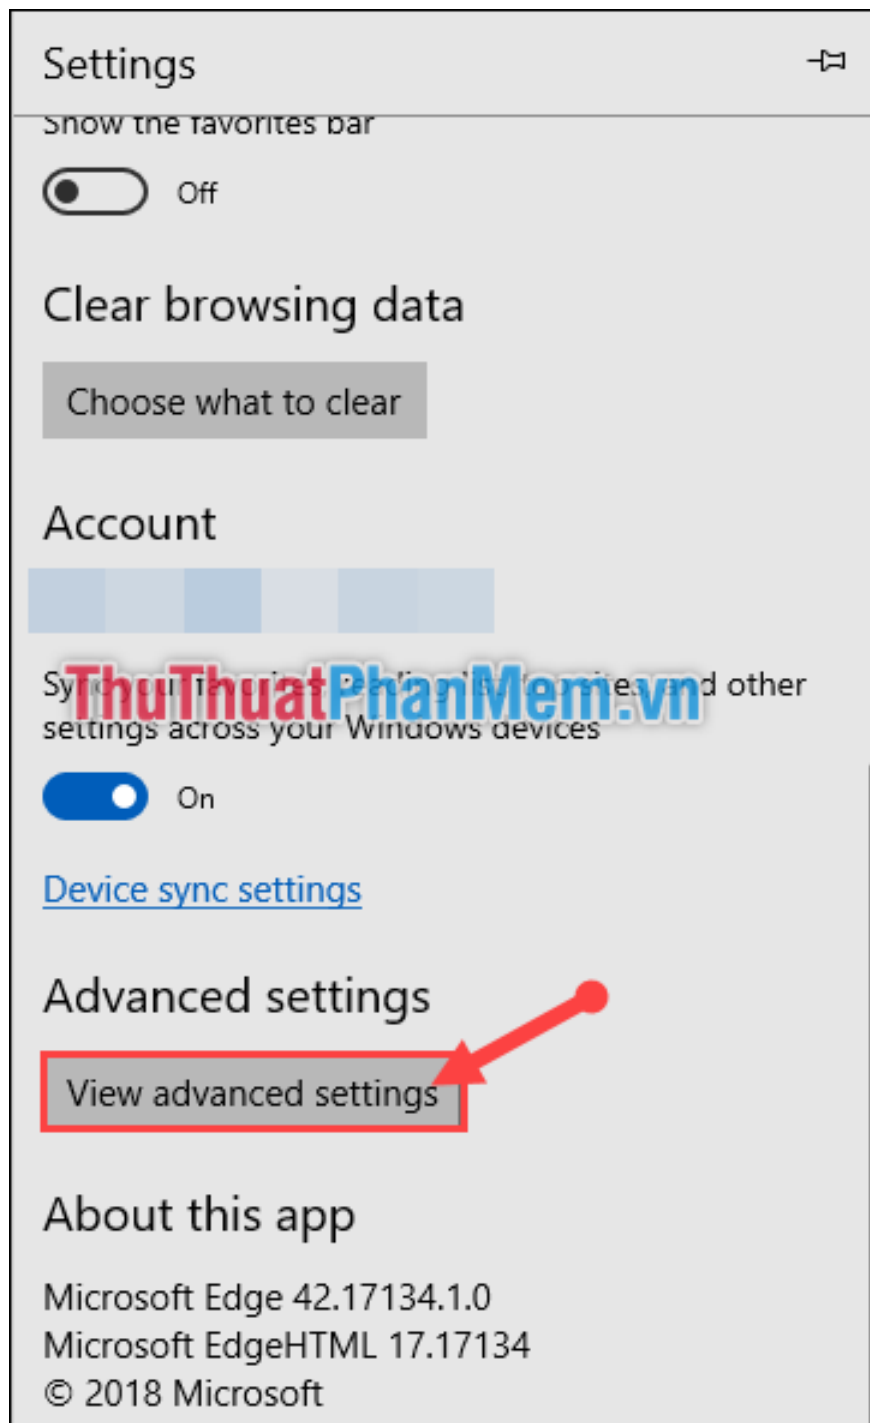

Password manager on Edge browser

For the Microsoft Edge browser, you can only view websites that have saved their passwords or accounts, but not saved passwords.

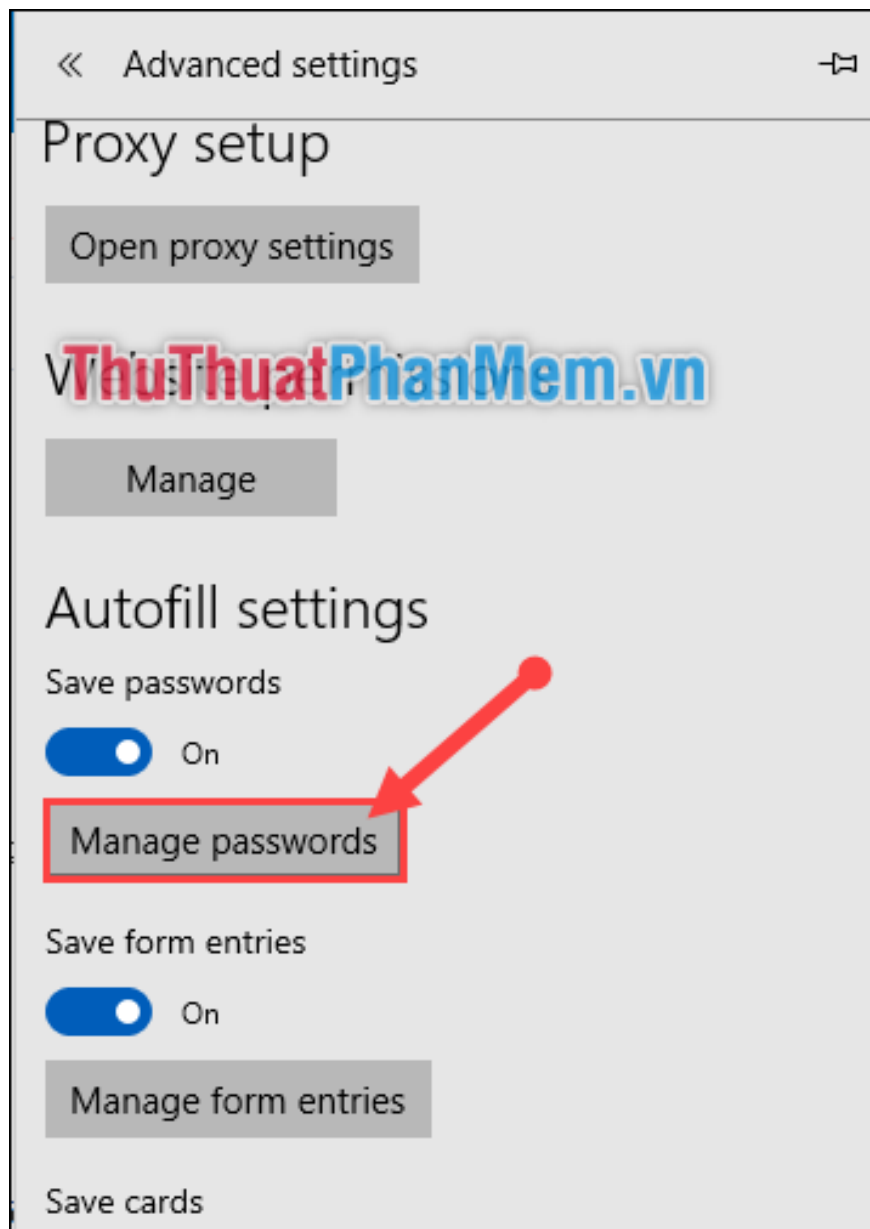

Step 1 : Click on the 3-dot icon in the right corner of the browser, select **Settings** .

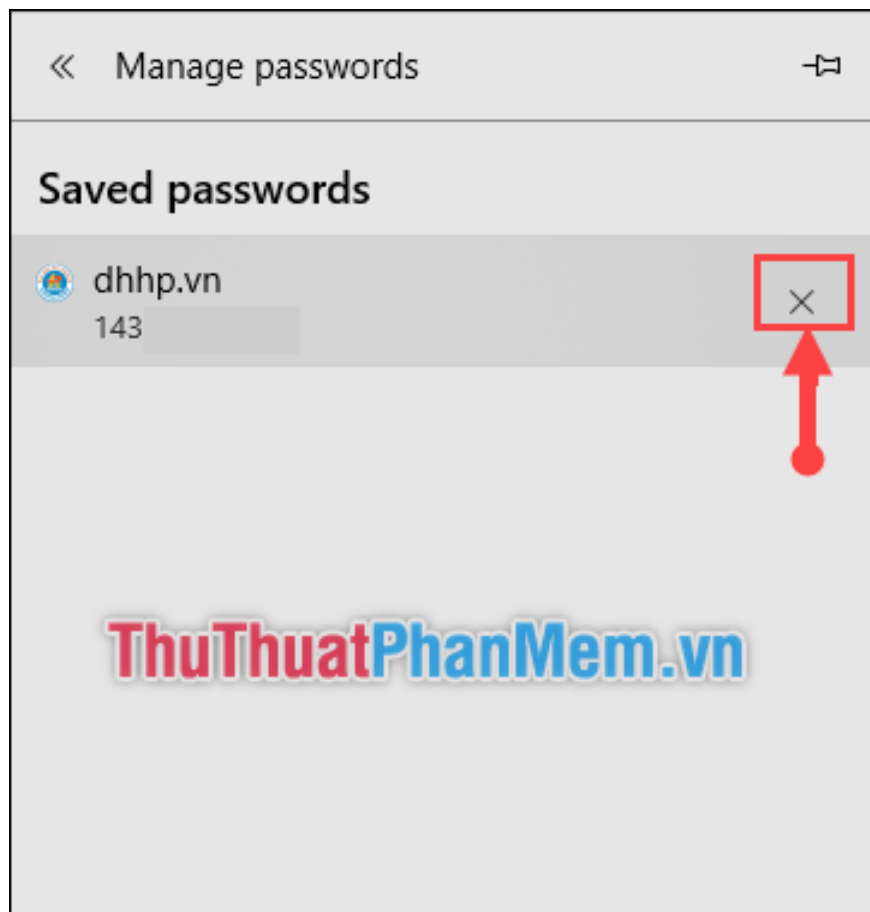

Step 2 : Next, scroll down to find **Advanced settings** , select *View advanced settings* .

Step 3 : Continue to select the *Passwords Manager* section.

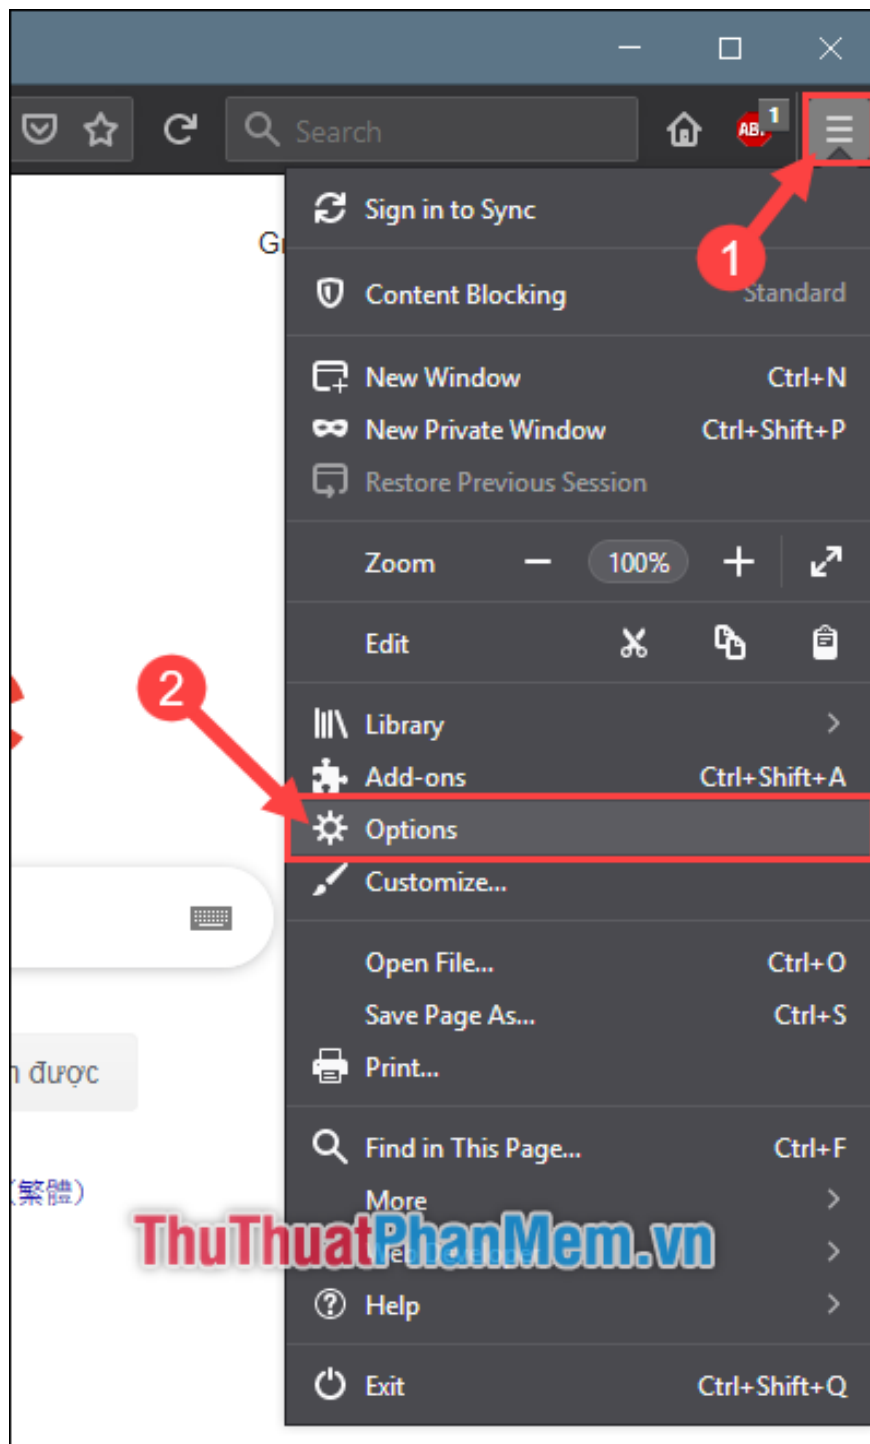

Here the page you saved the password will appear here. If you want to delete your account from that site, you can click the X at the bottom of that account.

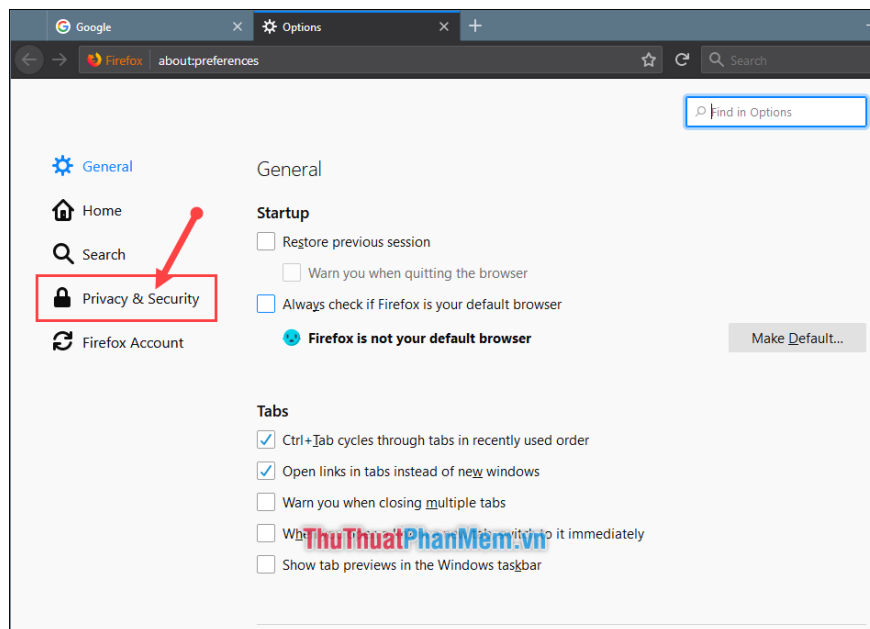

Password manager on FireFox browser

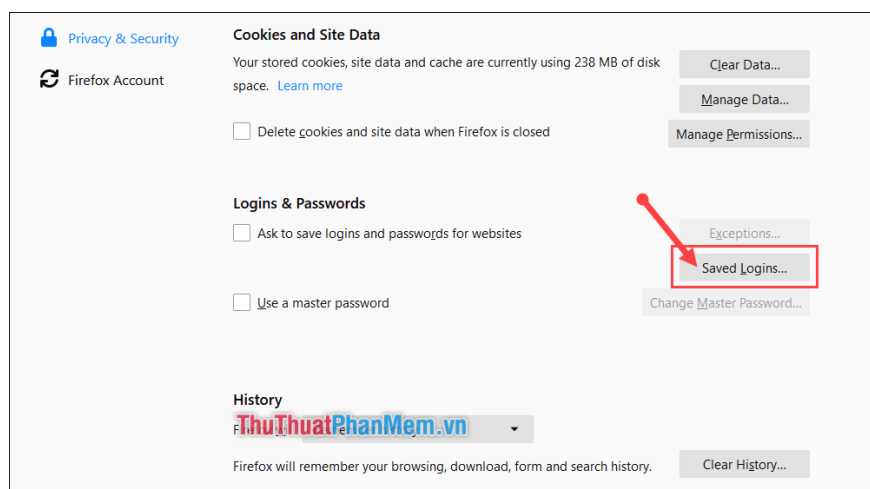

Step 1 : On FireFox browser interface, select the 3-dash symbol in the right corner -> Select *Options* .

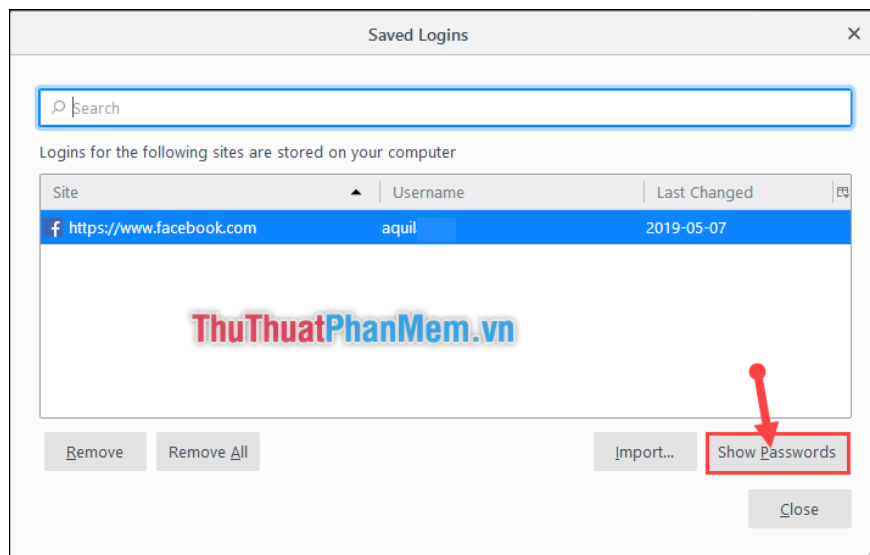

Step 2: Select the *Privacy & Security section* .

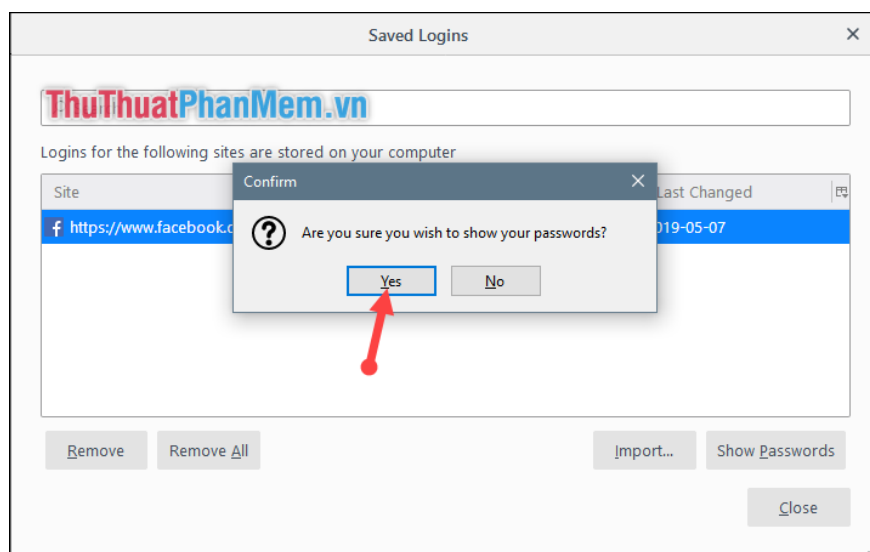

Step 3 : *Navigate to Login & Passwords section, select Saved Logins .*

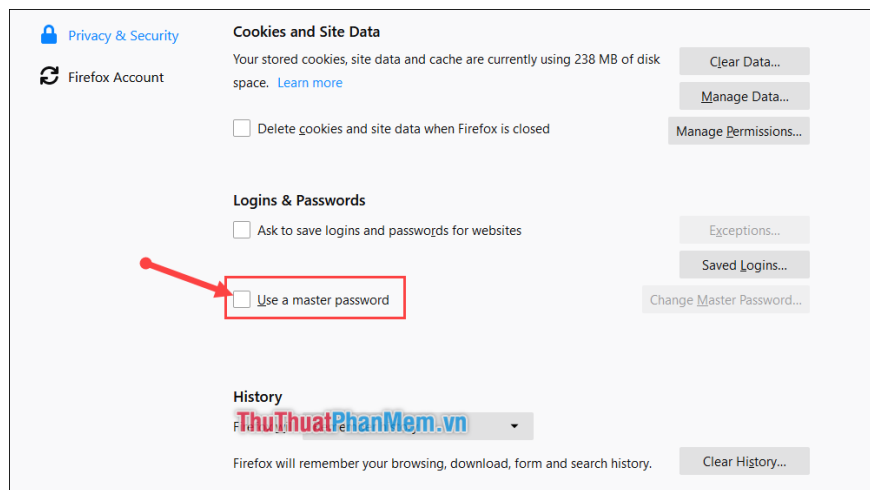

Step 4 : *Your saved passwords will appear here. To view the password, select the account you want to view and select Show Passwords .*

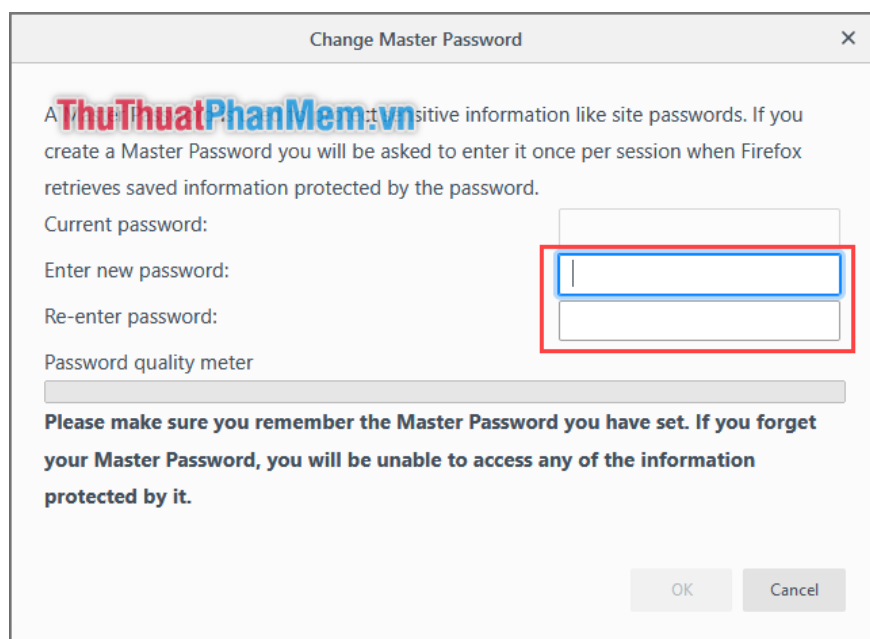

Step 5 : Continue to select **Yes** .

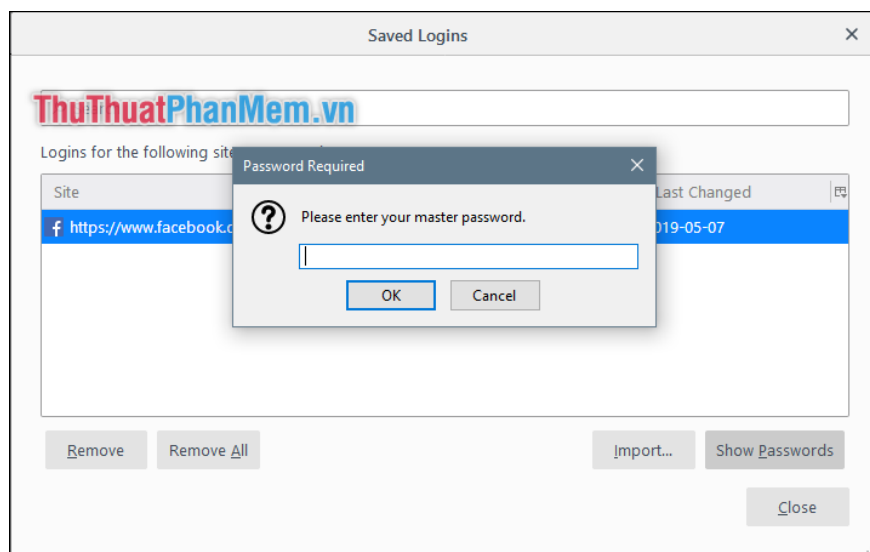

Step 6 : However, if so, your account information will be very likely to be stolen by others. So FireFox adds a solution for users that is using **Use a master password** .

Step 7 : Continue to fill and re-enter your security password.

Then to see the password saved in FireFox, users must enter a security password.
