**Step 3:** Select delete to finish.

In addition, to make search results more accurate, you can also use additional filter features to help delete status and remove a series of old posts, this is a very useful feature that Facebook has just updated. Japanese Here, users can refine the posts, photos, videos posted by day / month / year at a glance instead of having to surf the News Feed tired hand as before.

It's simple and easy, isn't it? I wish you a successful operation and don't forget to share it with your friends if you find it useful.
