

How to merge multiple PDF files into one PDF file in Mac OS X

To be able to merge PDF files into a single file, we will use other specialized software. However, if on Mac OS X, everything is much simpler.

Usually to handle PDF files such as converting PDF files to Word or converting from Word to PDF, setting passwords for PDF files, etc. on Windows operating systems, we will often have to use good tools. Online support service. However, if you want to merge PDF files into a single PDF file on Mac OS X, the operation will be simpler.

You won't need to use any other software or support, but we just need to do a few simple tasks right on the machine to create a complete PDF file from multiple PDF files. Join the Network Administrator to learn how to include PDF files on the Mac in the tutorial below.

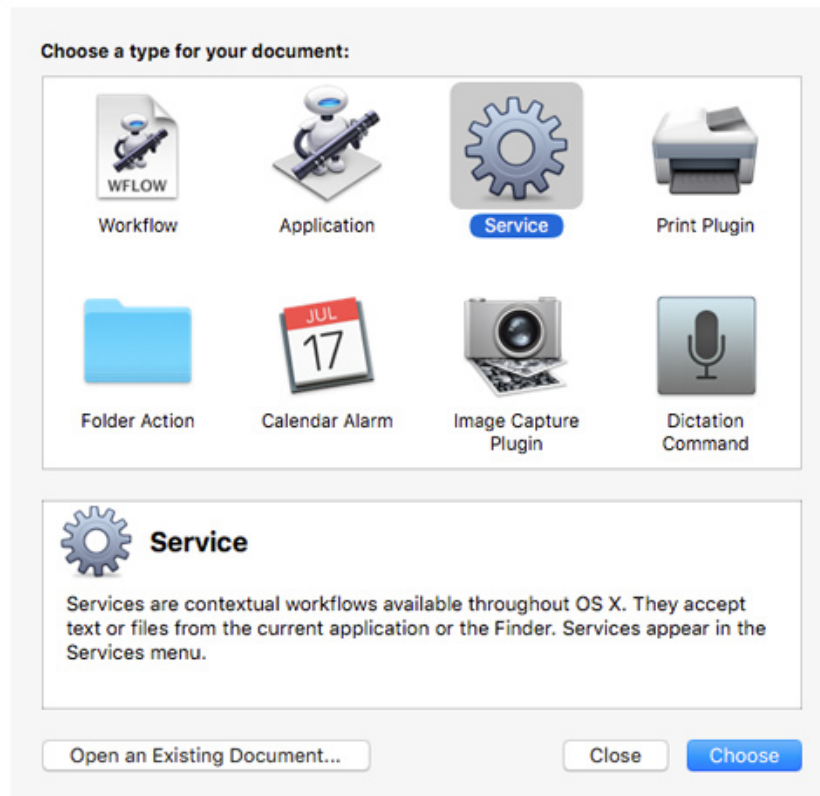

Step 1:

First, open **Terminal** and type the following command for OSX to install the Python module:

```
sudo easy_install PyPDF2
```

Step 2:

Next, open **Automator** (Applications> Utilities) and select **Service** .

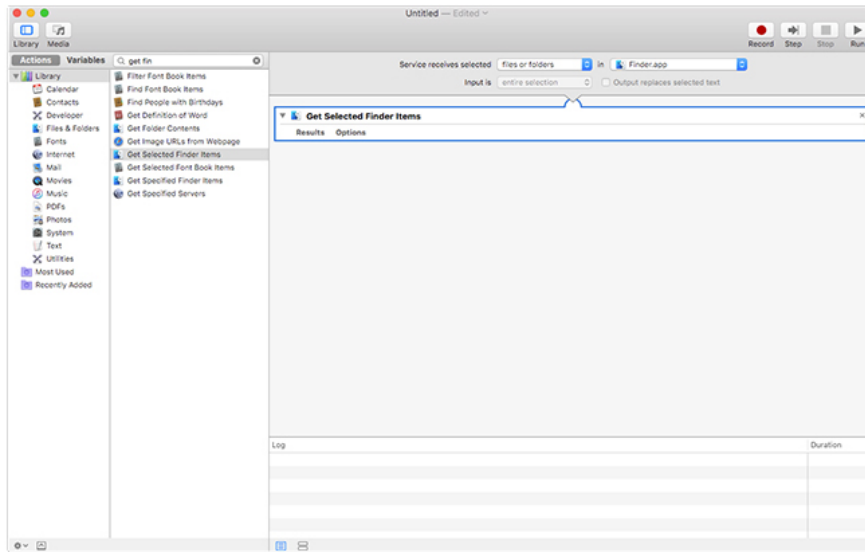

Step 3:

In the new interface, we will select the **Files or folders** and **Finder.app items** in the drop down menu at the top of the window.

Step 4:

Then, find the **Get finder** keyword and drag the **Get selected Finder** item from the left pane to the right.

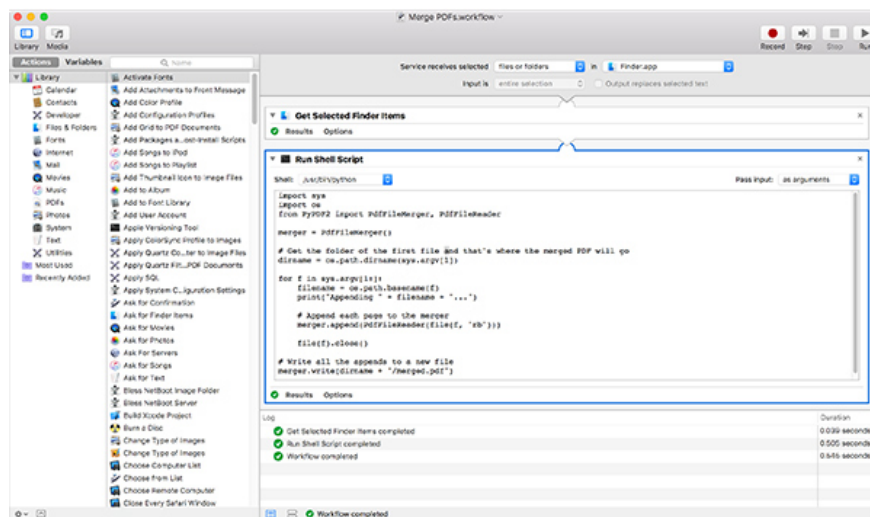

Step 5:

We will search with the **Script** keyword, drag and drop the **Run Shell Script** item. Then, drag down the menu and select **/usr/bin/python** in **Shell:** and select **as arguments** at the **Pass input:** section .

Step 6:

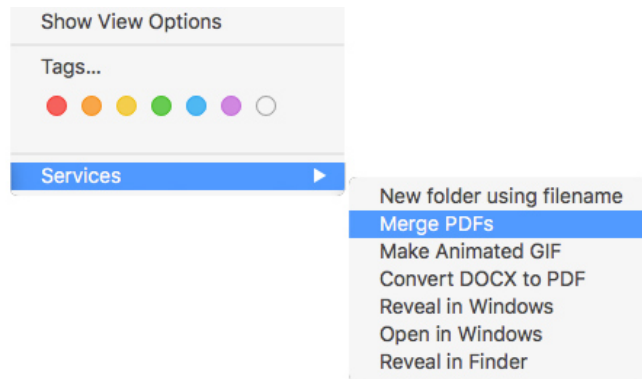

Copy the script in [this link](#) and paste in the **Run Shell Script** box as shown below.

As a final step, **save the Merge PDFs name** and it will appear in the menu when the user right-clicks in the Finder.

Step 7:

The reader will select two or more PDF files to merge, right-click and select **Merge PDFs** to automatically merge into a single PDF file.

Thus, we have completed the process of merging PDF files into a PDF file on a Mac. Once installed once, users can fully merge multiple PDF files into one PDF file on Mac OS X, just by opening the right-click menu.
