Collecting multiple photos into one frame helps us create artistic images with a combination of different photos. To do that, we use Adobe Photoshop to create those collages and if you do not know how to do it, let's refer to the article below!

To stitch multiple photos into a Photoshop frame, we use the Crop Tools. Proceed as follows.

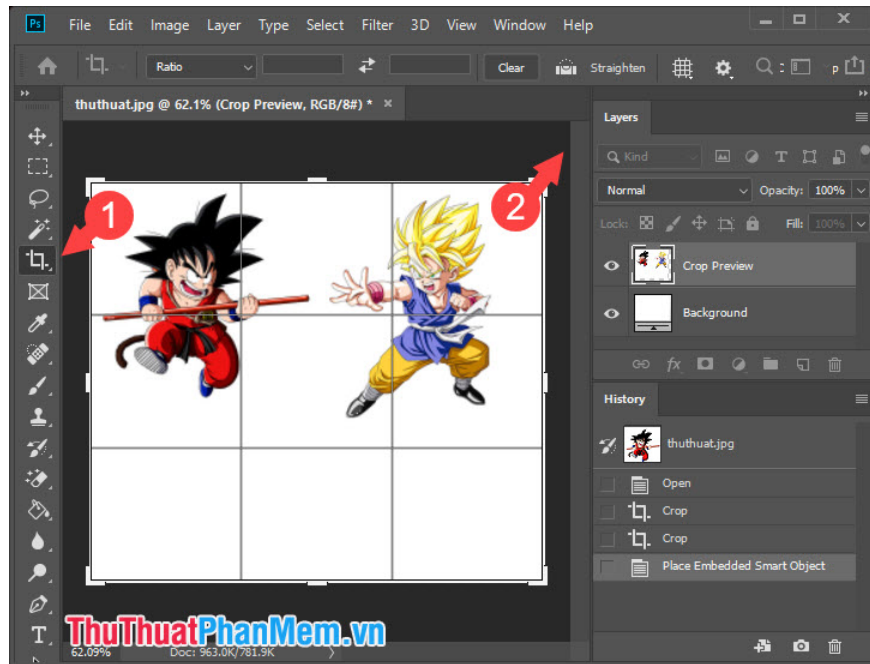

**Step 1:** Open the image you need to stitch in Photoshop and press the shortcut C or click on the **Crop Tools** (1). Next, you extend the image area (2) to create more space to insert new photos.

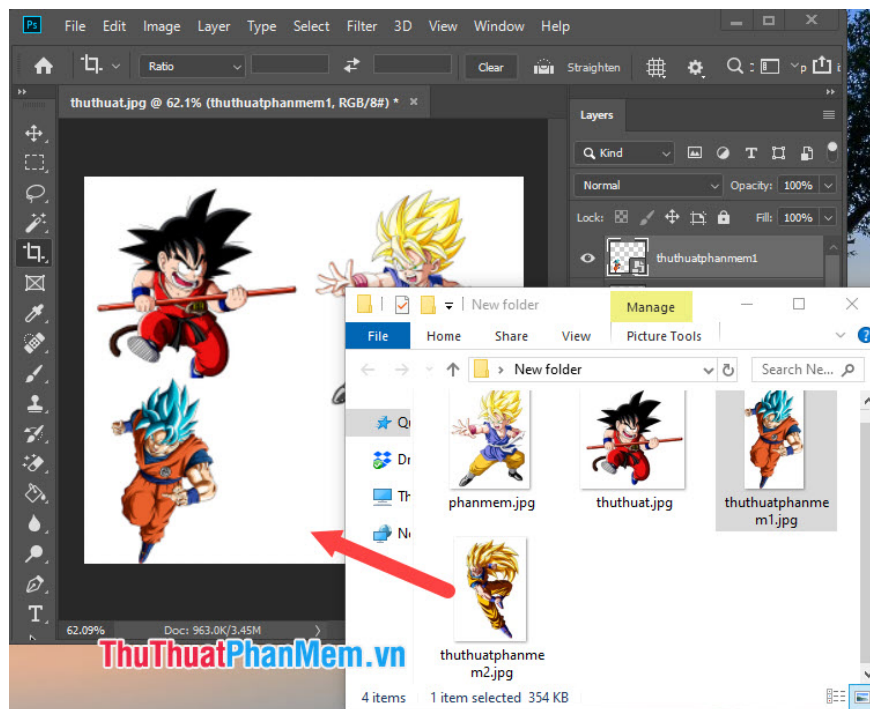

**Step 2:** You drag and drop the image to be inserted in the image folder into the working screen of Photoshop. If the image is not in the desired position, press **Ctrl + T** and move the image area to the desired location.

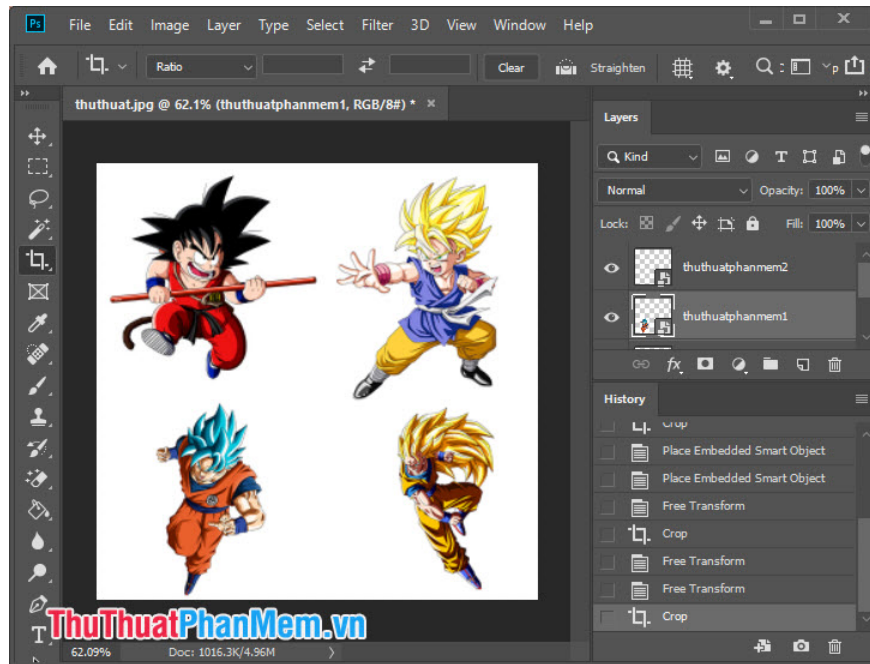

**Step 3 :** After inserting the image, if there is still space to insert more photos, we just need to drag and drop the image and align. If there is not enough space, use the **Crop Tool** and expand the area as **Step 1** .

**Step 4:** We continue dragging and dropping to add photos into Photoshop.

And after finishing, we will have a complete picture frame with collages inside. If images are messy, go to each image layer and press **Ctrl + T** to edit the layout.

By combining multiple photos into one photo frame in Photoshop, we can easily create photos to your liking. Good luck!
