

# How to move the Taskbar to different locations on the Desktop

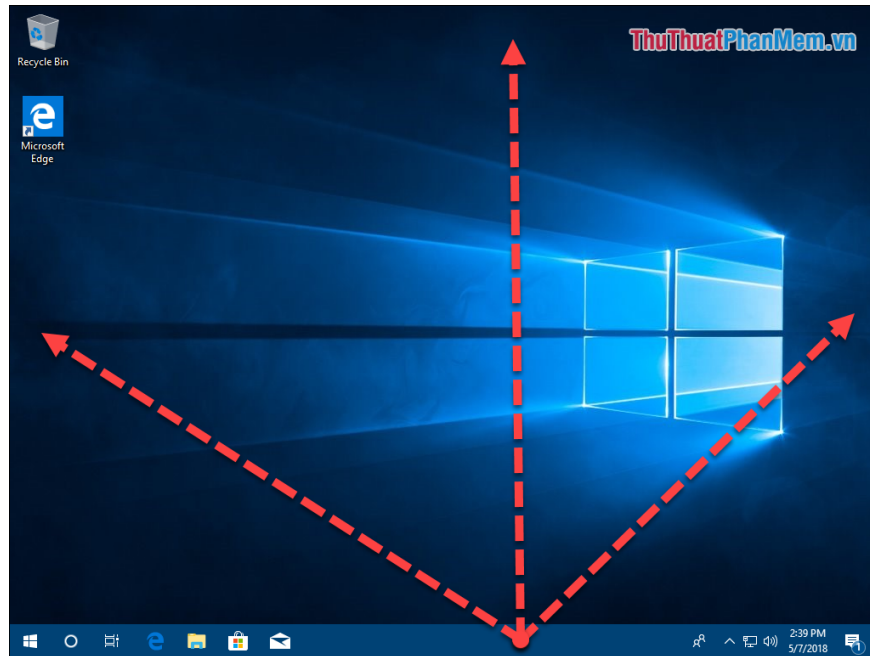

By default, this Taskbar will be horizontal at the bottom of the screen, but it is possible to move this Taskbar to other locations on the screen such as the left, right or top edge if desired. If you do not know how to move the Taskbar t

The Taskbar, or taskbar, is where you can tell which applications are running and where you can switch between applications in use. By default, this Taskbar will be horizontal at the bottom of the screen, but it is possible to move this Taskbar to other locations on the screen such as the left, right or top edge if desired. If you do not know how to move the Taskbar on Windows, please follow the following tutorial of Thuthuatphanmem.vn.

**Step 1 :** Right-click on the Taskbar and **uncheck** the **Lock the taskbar** line

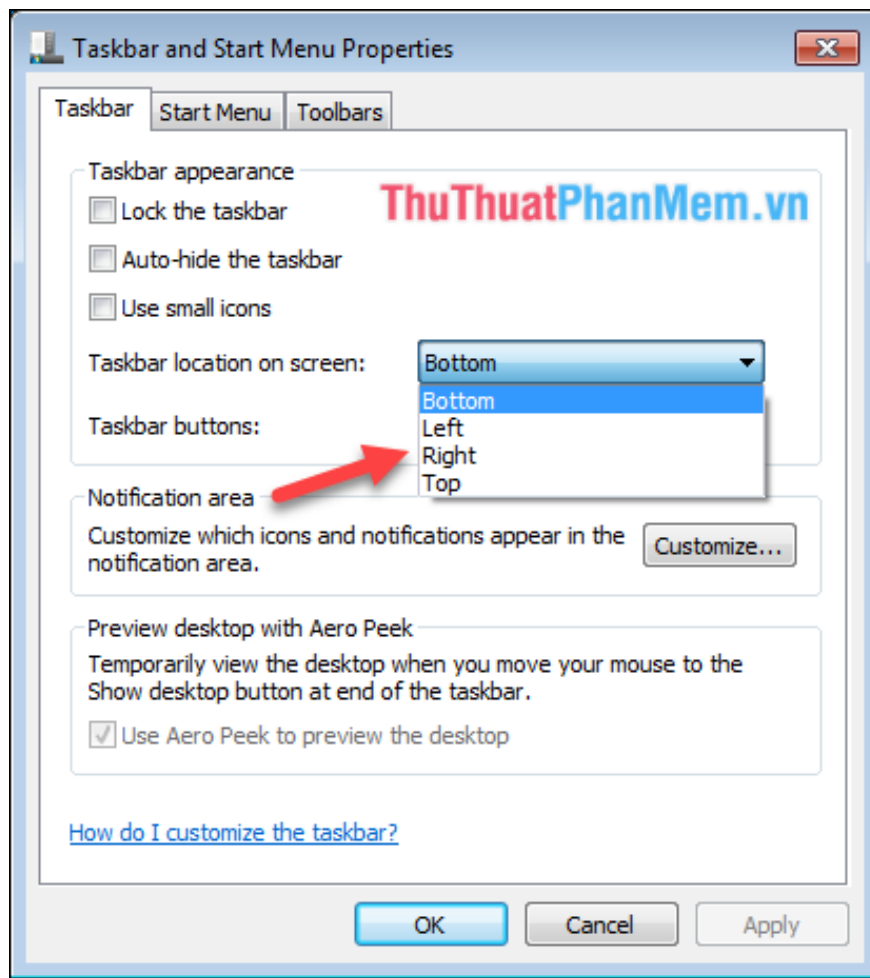

**Step 2 :** Now you can freely move the Taskbar by holding down the left mouse button on an empty area of the taskbar and drag the taskbar to the left, right or top edge of the screen.

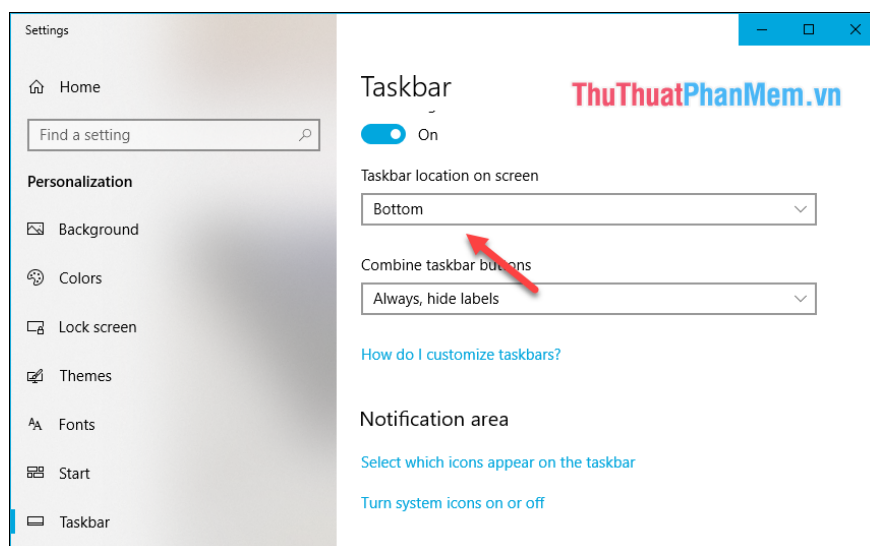

In addition to the above, we have another way to move the taskbar as follows:

Right-click on the Taskbar and select **Properties** (For Windows 7) or select **Taskbar settings** (for Windows 10). Then a new window will appear, find Taskbar location on screen and select one of four positions: Bottom (bottom), Left (left), Right (right), Top (Top).

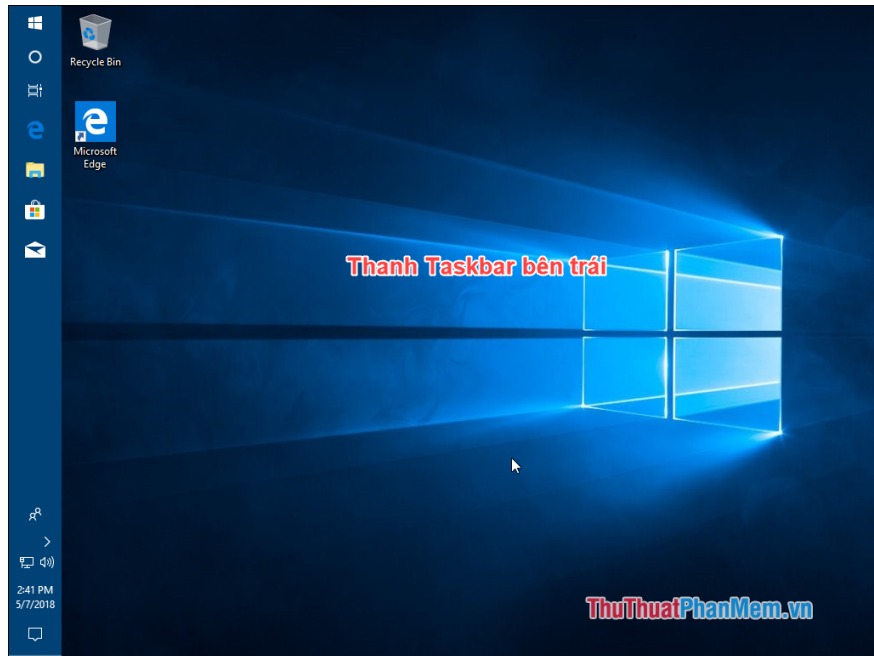

On windows 7:

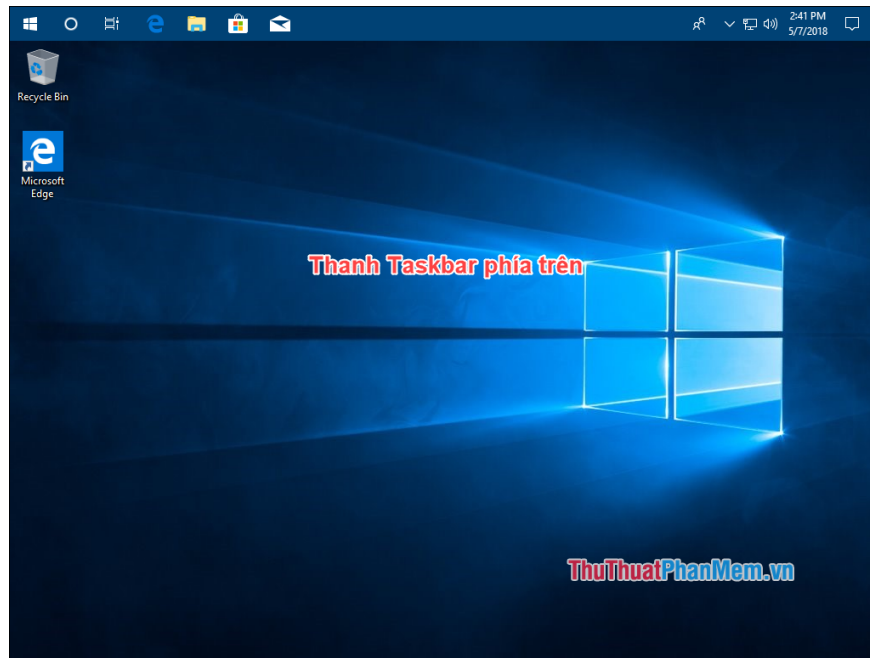

On Windows 10:

And we will get the following result:

So with just a few simple steps, we have moved the Taskbar to any position we want. Hope the article will be helpful to you. Good luck!
