

How to open a website on Google Chrome

To automatically open a website on Chrome, we can use the Open Me Later! Utility. Users can set the time to automatically open the web page in the browser.

You are used to automatically posting on Facebook Fanpage, or automatically posting on personal Facebook page. So have you ever tried setting up the website automatically on Google Chrome browser or not?

Open Me Later gadget! will become a tool to help you do that. The utility will schedule the exact daily and weekly time to automatically open any website that has been set up before. So we can be more proactive in daily work, when we need to open a website to work without fear of forgetting, instead of using browser bookmarks like before. You can optionally schedule automatic openings for multiple websites at the same time.

The following article of Network Administrator will guide you how to install the Open Me Later utility! to automatically open the website on Chrome.

1. How to install the Chrome utility for Firefox
2. How to create custom shortcuts for extensions on the Chrome browser
3. Completely disable the extension for maximum browser security

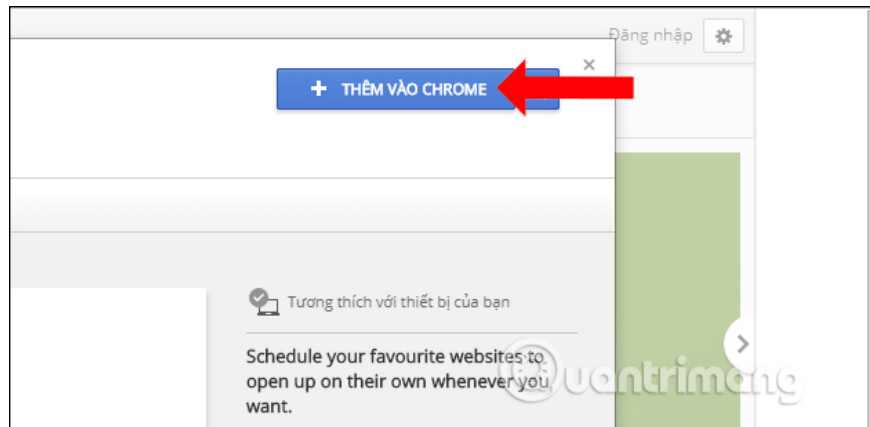

How to use the Open Me Later utility! on Chrome

Step 1:

First click on the link below to access the Open Me Later utility settings page! on Chrome browser. Then click **Add to Chrome** to proceed with the installation.

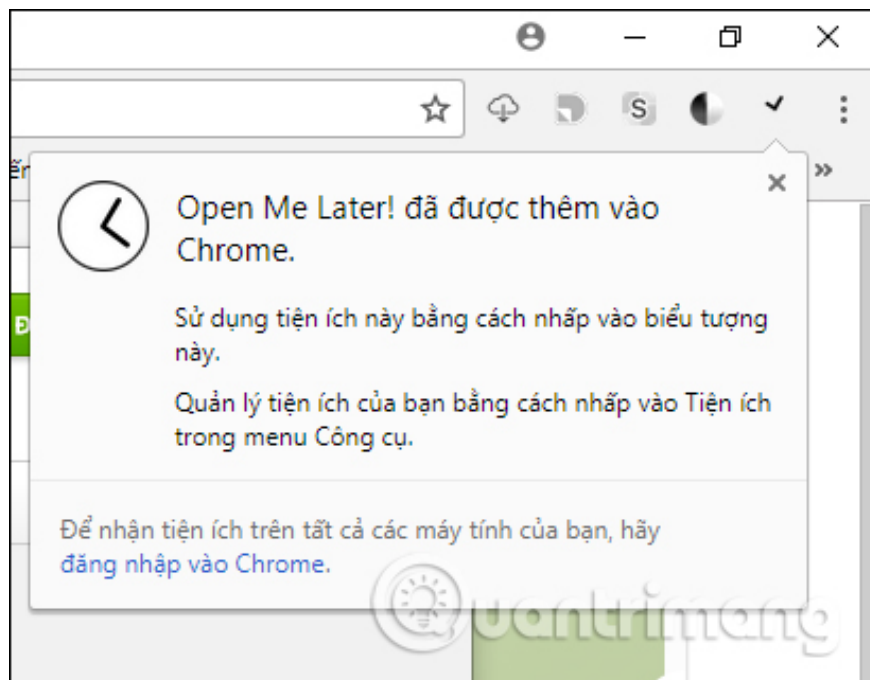

1. Install the Open Me Later utility!

Installation of the Open Me Later utility! same with many other utilities on the browser.

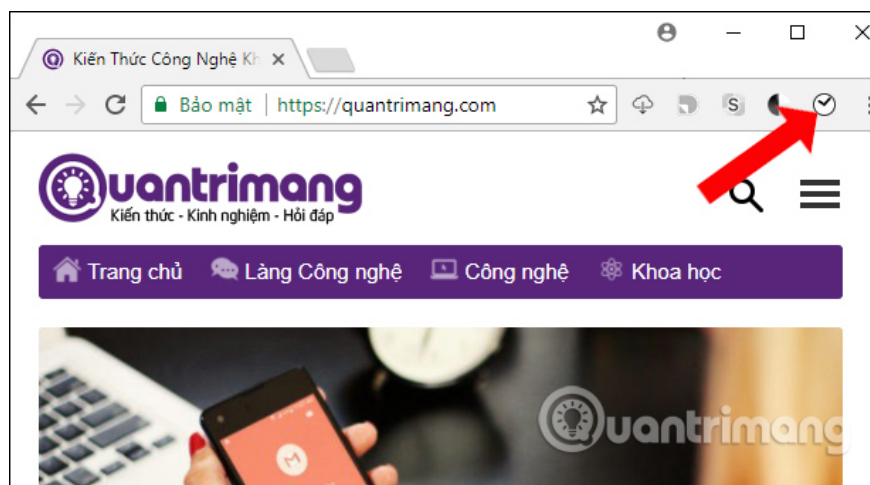

Step 2:

Then we will see the utility icon at the end of the address bar with the message shown below.

Step 3:

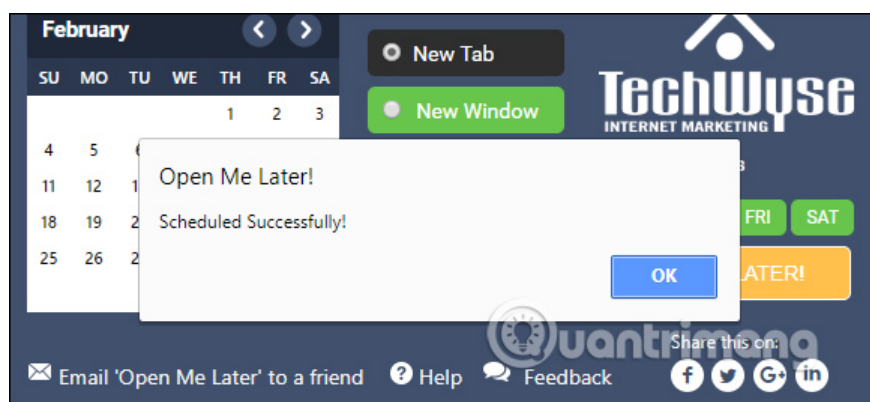

Next, go to the website where you want to schedule an automatic opening, then click on **the utility icon** at the end of the address bar.

Appears a specific time and date table to open the website automatically. We can **set the time** to enter **this time** frame every day of the week the website will automatically be opened in Chrome browser. After finishing editing click **Open Me Later!** . **Note** , the utility only works effectively with New Tab.

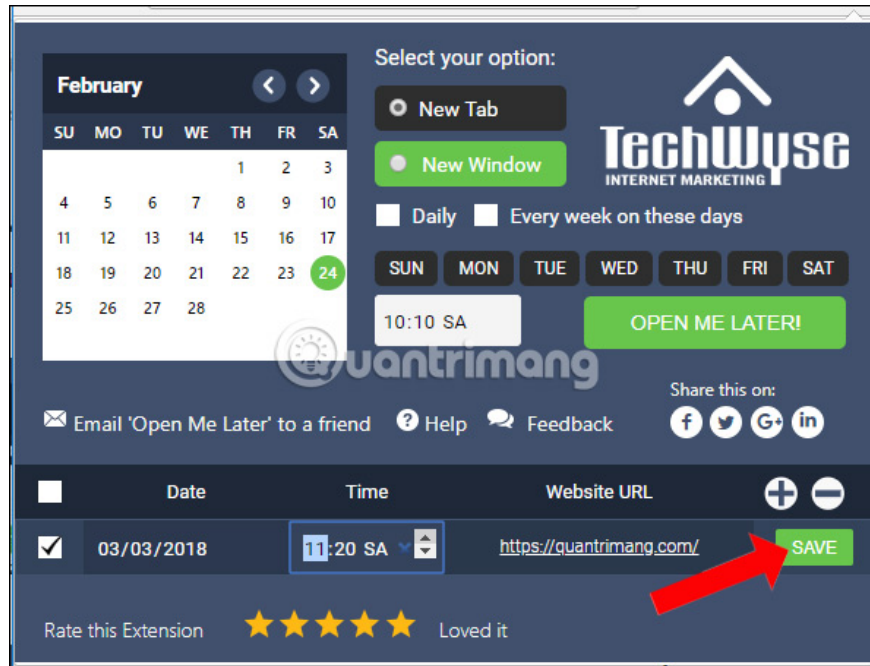

You will see a message to schedule a successful website opening.

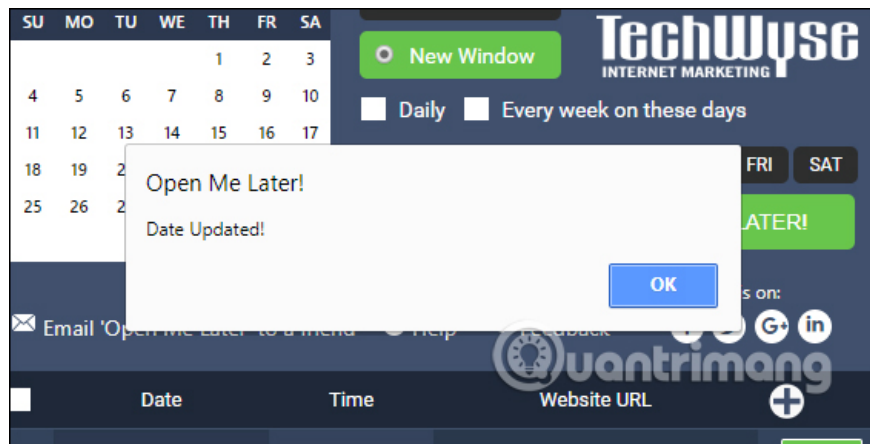

Step 4:

In the Open Me Later! Interface, you will see the calendar up. To **edit the calendar up** if you want to check the box and adjust the time or other website URL. Click **the Save button** to save the changes.

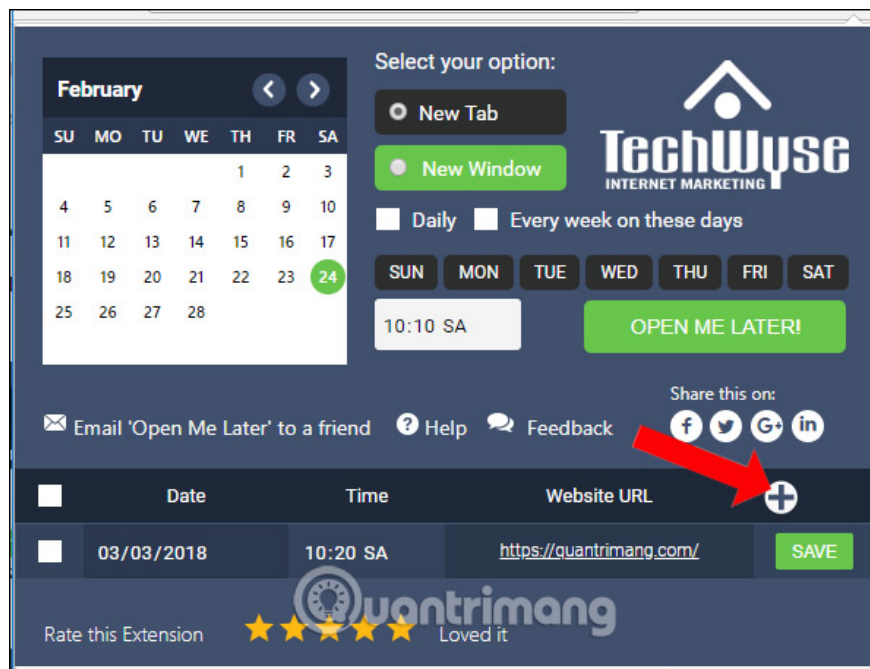

Notice of successful information updates appears.

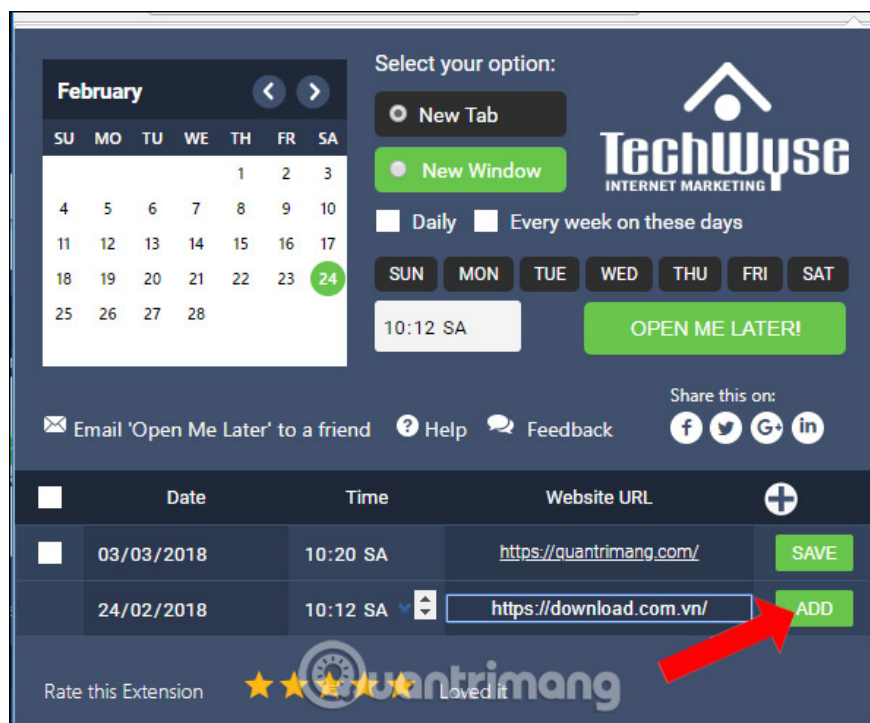

Step 5:

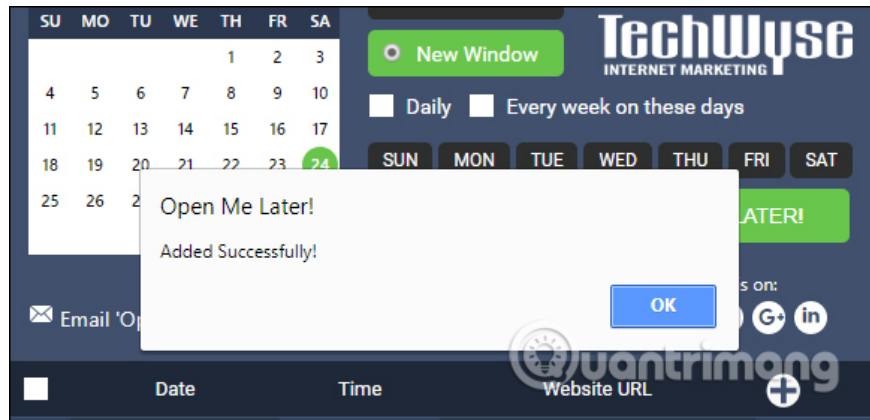

To add another calendar, click **the plus icon** on the Open Me Later interface! to add.

Then you also enter the full page URL, date and time fixed to open the next website. Click **Add** to save the new calendar.

A notice to add a new calendar is successful.

By default the list will display a schedule of the nearest web opening. After the setting website only opens automatically once on Chrome appears, will disappear in the widget's scheduled list.

A fairly simple utility but will help people not to forget the work to be done on certain websites on Chrome. Open Me Later gadget! will automatically open the website according to the schedule that users have previously uploaded. The utility will perform the sequence according to the schedule listed.
