2. Using Keyword Redirect opens the website via keywords
3. How to quickly open web pages from new tabs on Chrome

Instructions for enabling AMP on Chrome

Step 1:

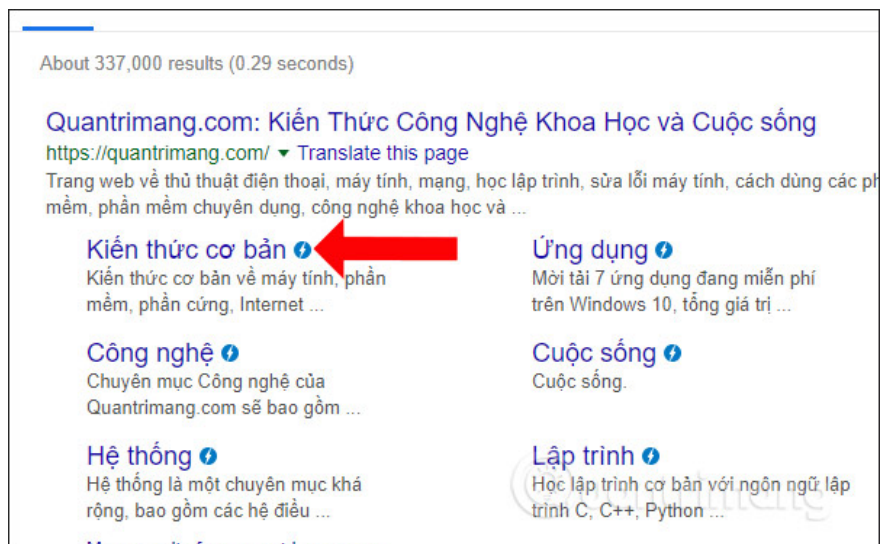

Users download AMP Browser Extension utility for Chrome browser according to the link below.

1. Download the AMP Browser Extension Chrome utility

Step 2:

After installing, open Google and search for information as usual. For sites that support AMP there will be a **blue lightning icon** as shown below.

Step 3:

When we access the site it will display the AMP interface instead of the default interface on the Chrome computer browser.

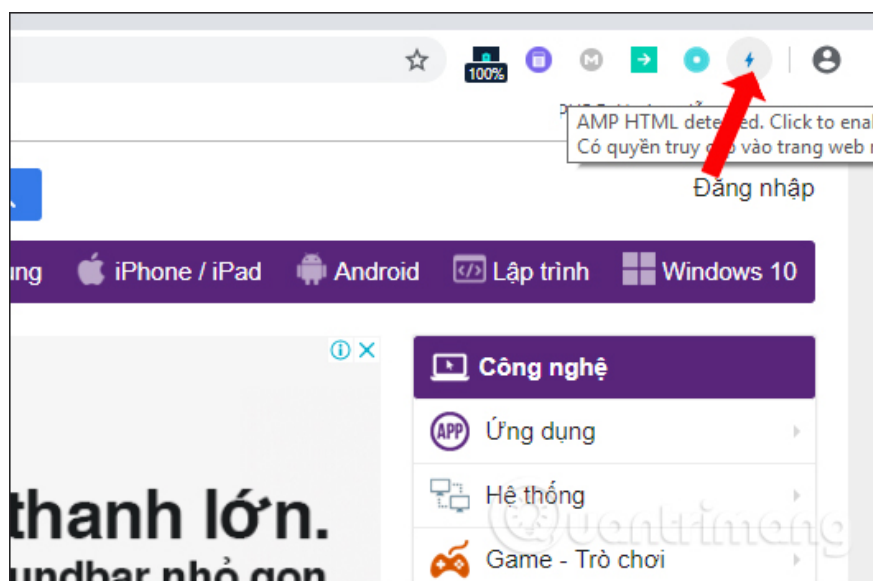

The content of the page is preloaded, then images and other ads if available. Thus users will only focus more on the main content of the site.

Step 4:

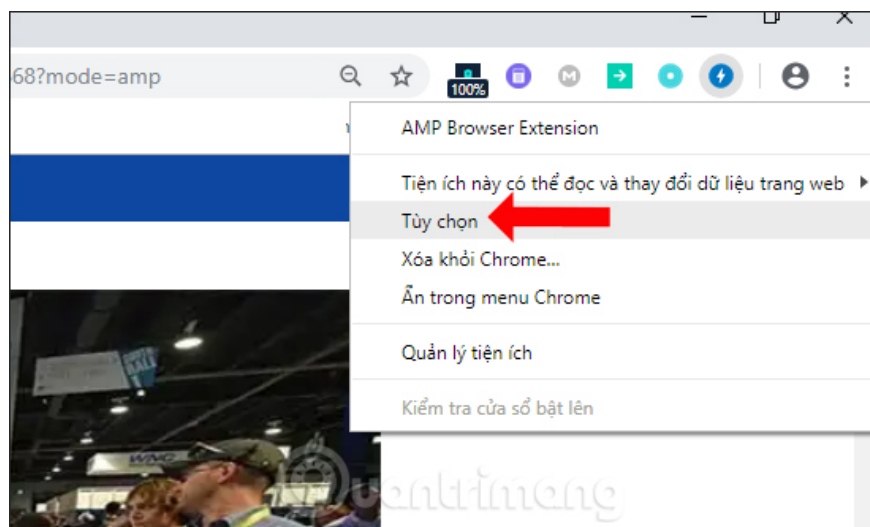

To turn off the AMP interface and **return to the normal interface**, simply click **the AMP Browser Extension icon** at the end of the address bar on the browser.

The AMP Browser Extension icon will turn gray as shown below.

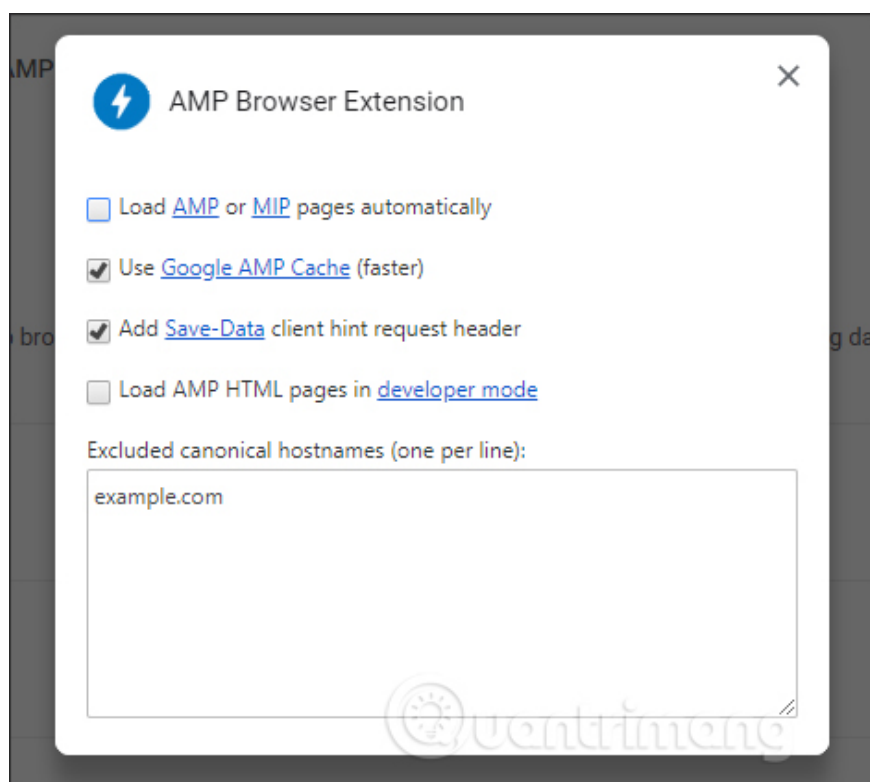

Step 5:

Also when right-clicking on the utility icon and selecting **Options**, we will open the setup interface for the utility.

At this interface uncheck the Load AMP or MIP pages automatically, the website will also return to the normal interface, or enter the website without AMP interface, .

Thus, the AMP Browser Extension utility will quickly activate the AMP interface on Chrome browser websites, via a click. If you do not want to install the utility, you can add / amp / behind the website URL to switch to the AMP interface also.
