

How to open the pin application on the Taskbar Administrator with Windows 10

Pinning applications, software onto the Taskbar will help users get quick access when needed. However, under Administrator on Windows 10, you will open pinning software on Taskbar.

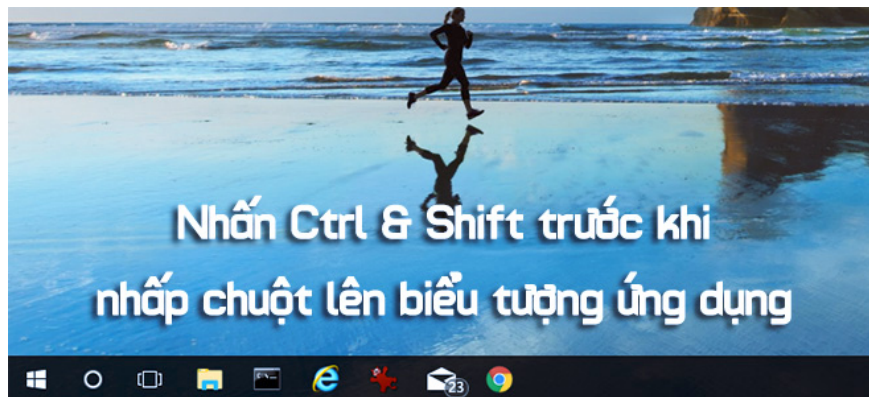

Normally, to quickly open a software, application or web browser on a Windows computer, we'll pin them to the Taskbar. Thus users can quickly open the programs you need, or open the folder right on the Windows Taskbar easily. However, what if you want to open programs that have been pinned under the Taskbar with Administrator on Windows 10? Follow the tutorial below of Network Administrator to run the program from the Taskbar under Admin.

Method 1: Run the program at the Taskbar with a key combination

In case the user wants to open the pinned program in the Taskbar under Admin, the fastest way is to use the Ctrl and Shift keys.

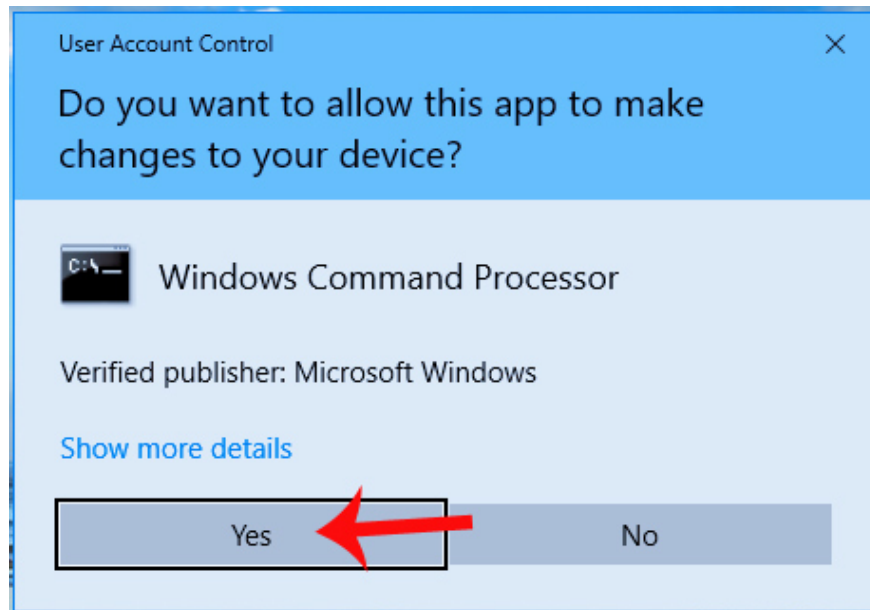

Step 1:

Press and hold both **Ctrl and Shift** simultaneously, then click on **the program icon in the Taskbar** .

Step 2:

The **User Account Control** dialog box appears immediately. We will click **Yes** to open the application. **Note to users** , we cannot launch File Explorer and Control Panel pinned under Taskbar with Admin rights.

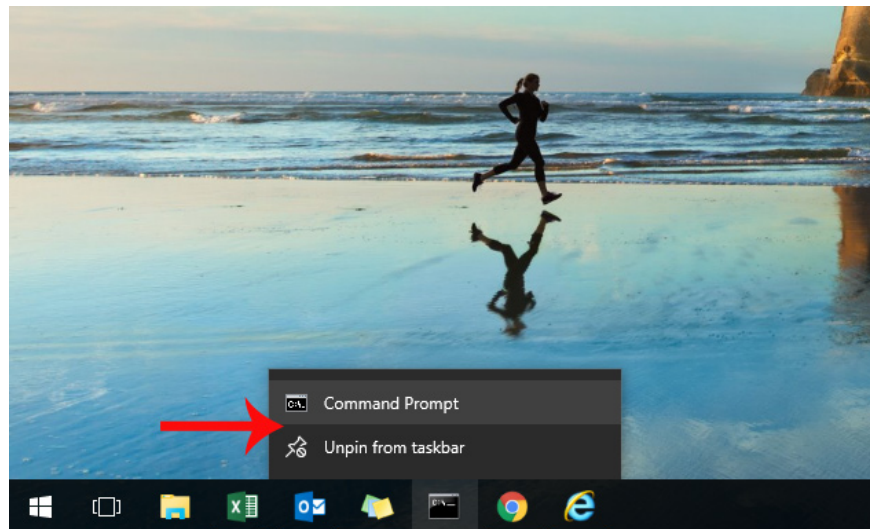

Method 2: Quick list list Jump list

In addition to using keystrokes, users can also use the Jump list for quick access to open programs under Admin.

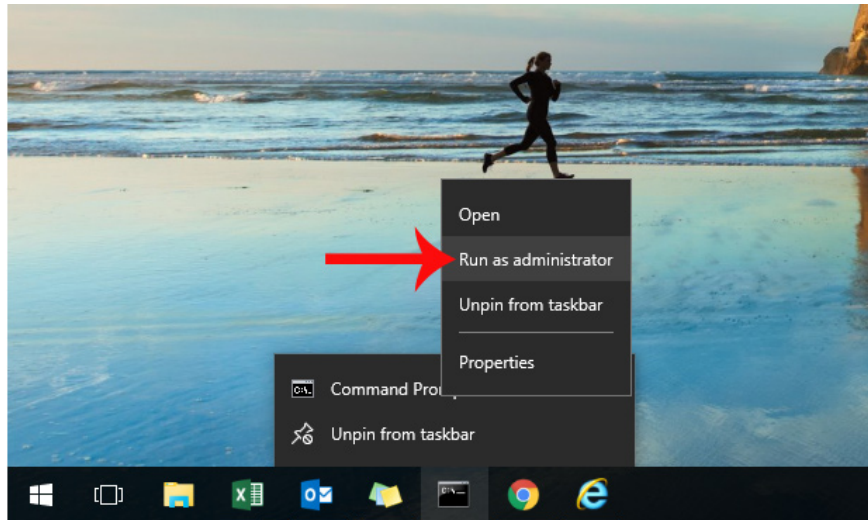

Step 1:

At the computer screen interface, we **right-click the application icon** in the Taskbar to open the Jump list.

Step 2:

At the quick access list, we right-click continue to program and click **Run as administrator** .

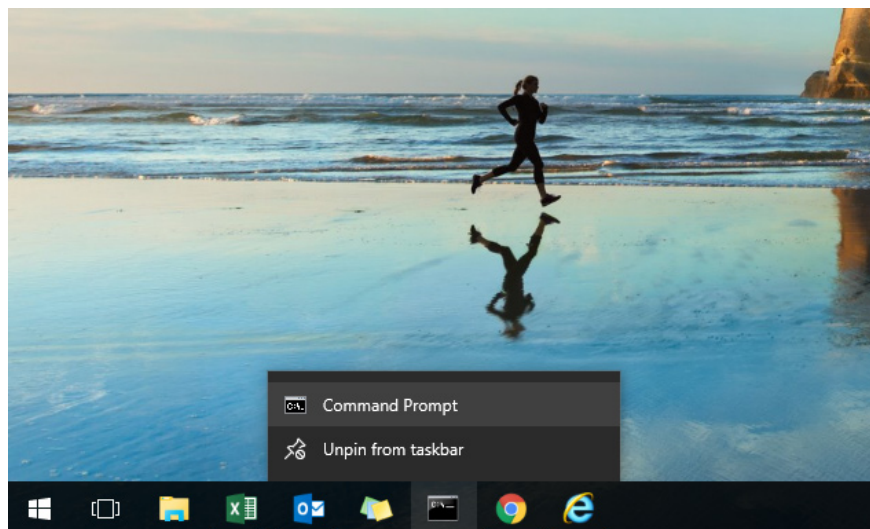

Method 3: Always run the application under Admin

In case the user wants the programs, software or applications pinned in the Taskbar to always run under Admin, then the Run as administrator option will be required.

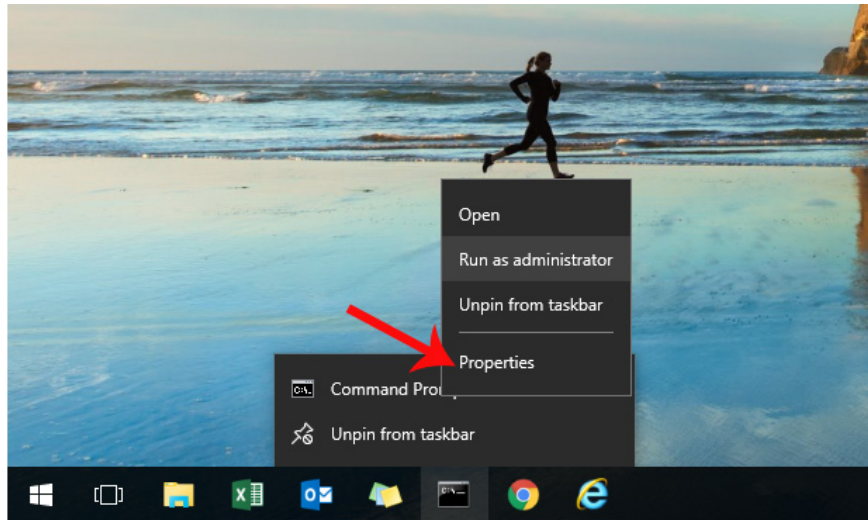

Step 1:

First, **right-click on the program icon** in the Taskbar to open the Jump list.

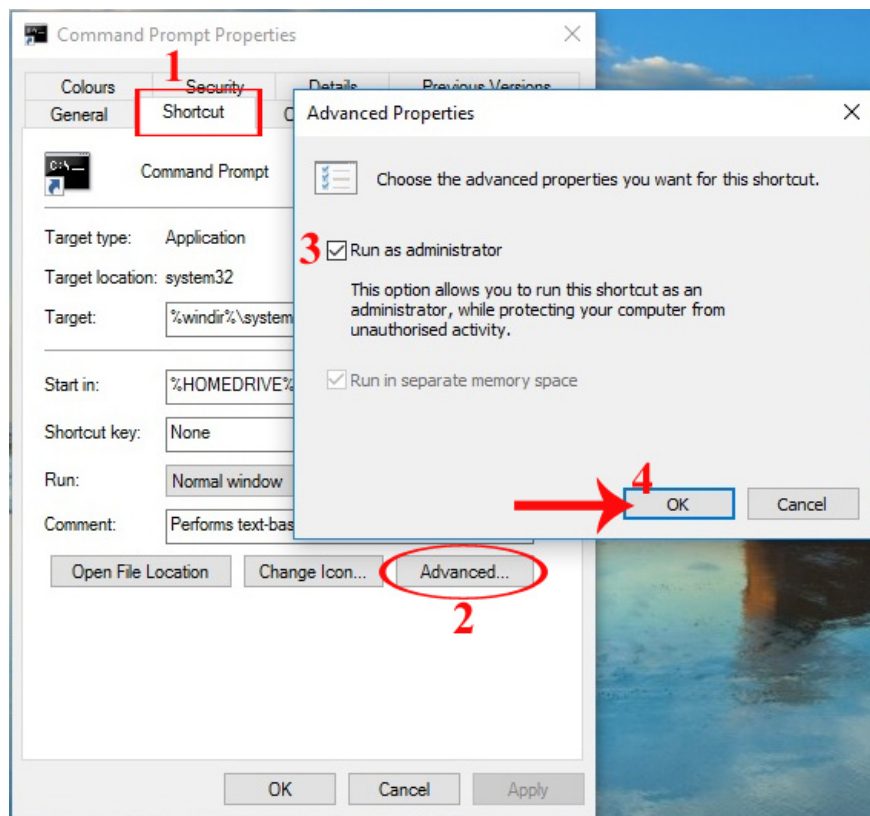

Step 2:

Next, right- **click the program** and select the **Properties** option.

Step 3:

The Properties dialog box appears, where you click on the **Shortcut** tab and then click on **Advanced**. Soon the Advanced Properties dialog box appears. Here, please click on **Run as administrator**, click **OK** and **Apply** to save the changes.

The above are 3 ways to open the program, the application is pinned under the Taskbar with Admin rights on Windows 10. We can use the Ctrl and Shift keys, through the Jump List list or to program always automatically run under Admin.
