

How to open websites automatically on Microsoft Edge

To set up the mode to automatically open websites on Microsoft Edge like opening websites automatically on Chrome, we can use the Auto Page Opener utility.

To set up the mode to automatically open websites on Microsoft Edge like opening websites automatically on Chrome, we can use the Auto Page Opener utility. This utility will help you set up automatic web page opening in your browser at specific times of the days you want. Users can freely choose the time they want to open the website automatically. The following article will guide you to open websites automatically on Microsoft Edge.

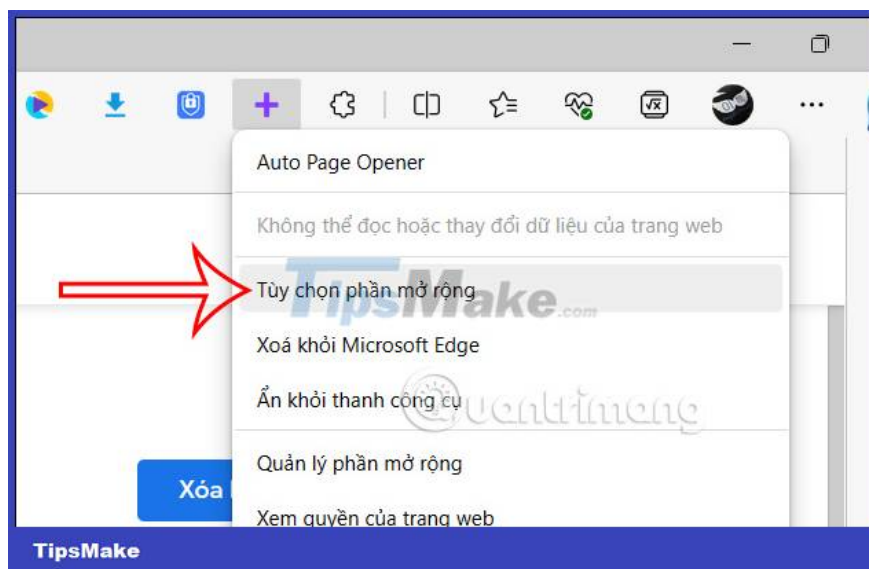

How to use Auto Page Opener to automatically open web pages on Edge

Step 1:

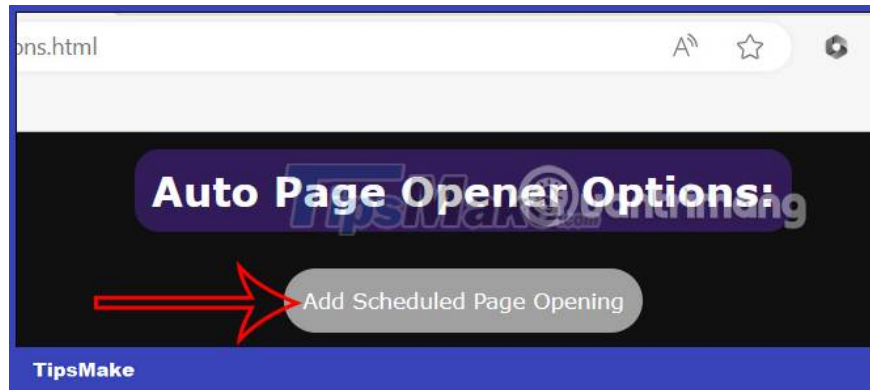

First of all, we download the Auto Page Opener utility for Edge according to the link below.

Step 2:

Then **right-click the extension and select Extension Options.**

Now you are transferred to the new interface, the user clicks on **the Add Scheduled Page Opening item** to proceed to schedule the automatic opening of the website.

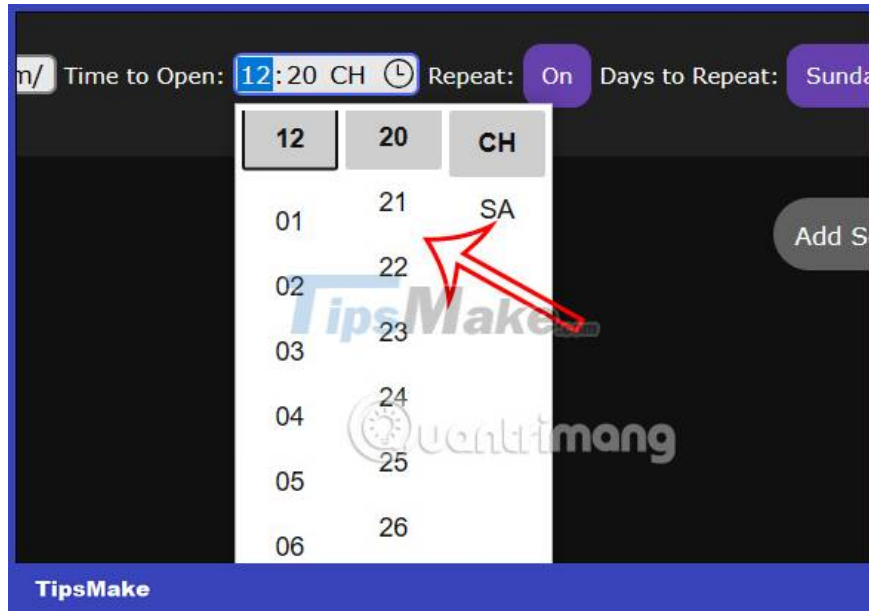

Step 3:

Now display the website so we **enter the website URL** that we want to schedule to open automatically.

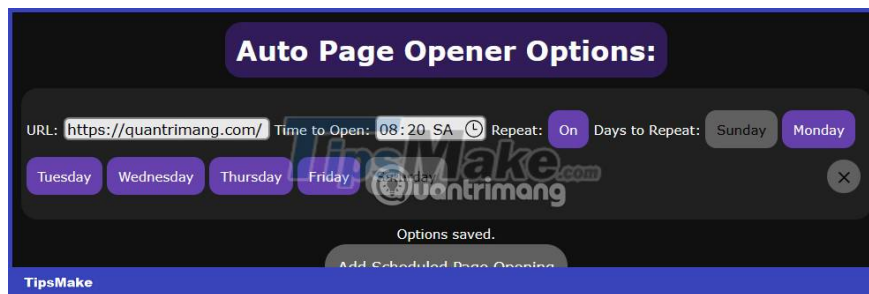

Step 4:

Next, **click on the clock icon** to choose the time you want to open the website automatically on the Edge browser.

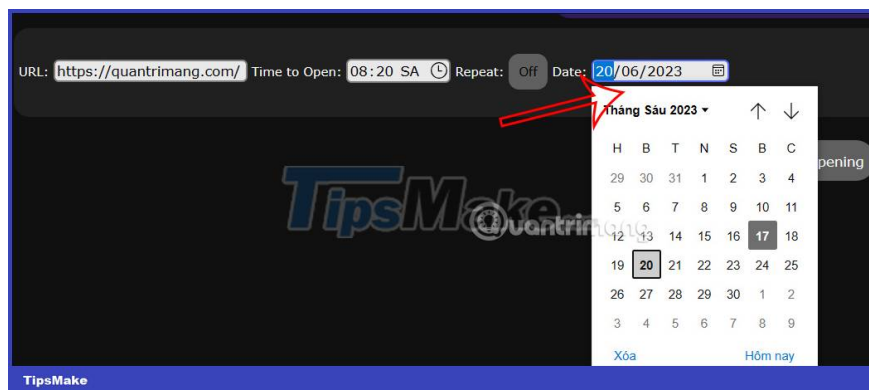

Then you **choose the date to open the website automatically** , if you don't want to open the website on any date, click on that date to turn gray.

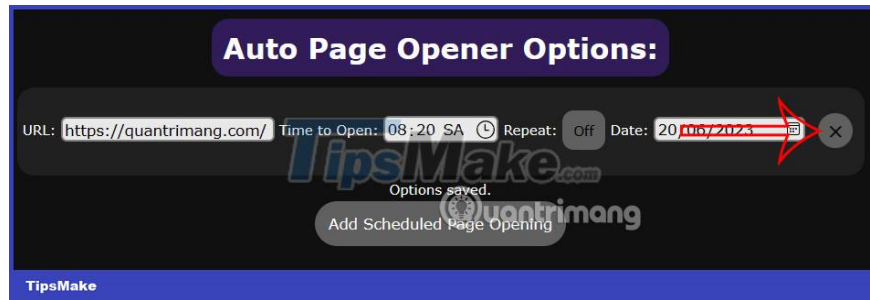

Step 5:

In case you want to **select a specific date** , click **Repeat** to switch to **Off** mode and then select a specific date to turn on automatic websites on Edge.

Any auto-opening settings are saved and there is no limit to the number of auto-open web pages. If you want to **delete a website that opens automatically** , just click on the x icon.
