

# How to overcome the formation of the Truth League League of Assassins

A few analyzes of the Truth Arena Assassin squad and how to overcome this formation

The Assassin squad in the current Truth Arena is probably the formation that many people are bored with. Because this is the squad that owns the most Damaged Damage and has the ability to overcome many other lineups in the Truth Arena.

Not to mention that the Assassin squad can easily build and have many other strengths such as being hard to overcome, not dependent on equipment . So how to overcome the Assassin lineup in the Truth Arena You can refer to a few tips below.

1. Notes for new players Truth Arena League of Legends
2. League of Legends: Ranking 5 strongest generals in the Arena of Truth
3. BXH the high damage generals in Truth School League League

## Ways to overcome Assassin formation in the Truth Arena effectively

First learn about how to play and the pieces of the assassin team.

### How to play

As a squad taking strength as its highlight now in the Truth Arena. The gameplay of this squad does not need much to use intellectually. Just hit straight into the following row, the position of the pieces that cause main damage in all the basic formation in the Truth Arena.

Another advantage that the Truth Squad formation team "developed" was easier than the other roster, this team did not require too high personnel. No need to recruit 3-star chess pieces but only 2 stars can make other competitors "pee pants" already.

Even in the early stages of the battle, the Assassins are still not easy to be bullied when the amount of damage is great and go "back door" to smash the opponent's main damage. The two assassins Pyke and Zed are extremely useful pieces of skill, and the amount of damage taken is also very high.

As for late game, it is not necessary to say, Assassin lineup with post-traumatic shocking skills can completely overcome the two teams that are considered to be very strong at the present time as Magicians and Ice Nations. In addition, the Assassin squad can disperse the formation to avoid the skills to control or deal with wide area damage.

Another advantage is that the flexibility of the Assassin lineup is also better than the other 6 generals. Due to the number of assassins in the Truth Arena up to 7 assassins (and from Youmuu Ghostblade too).

The most common tactic in the Truth Arena Assassin team is to give all the generals an extra star (2 stars). Then try to reach level 8 or level 7 early if you have Natural Power.

You do not need to make too much effort to find 3-Star Assassins, but if it is, it is still very good. But usually gamers will find enough 6 Assassins in the squad because of the proportional comparison, it is easier to find 6 assassins than to find the Knight or 6 Nobles.

For chess pieces, you can find generals that have a wide range of abilities and good tanking abilities like Gnar or Cho'Gath or leave Kennen temporarily. This will create space for the killers to kill the opponent's back row.

## **Advantages of Assassin lineup**

1. No need to recruit outstanding personnel for your team (3 star generals, 5th generals)
2. Very difficult to overcome
3. Do not depend too much on equipment
4. From the beginning of the battle was very strong, and continued strong until the end of the game
5. Extremely powerful damage, it is possible to send the opponent's back row to the island with just a snap of a finger

## **Disadvantages of Assassin lineup**

1. Need enough personnel to promote the full power (minimum 8 slots for 2 generals to resist + 6 assassins)
2. Somewhat difficult in the early stages of the game
3. Depends on dignity in combat
4. There are few directions to rotate the formation

## **Personnel in the Assassin lineup**

### **Pyke (Pirate - Assassin)**

Pyke is one of the second-class chess pieces capable of stunning a wide range of Magical Water Lines. Pyke's value will be no different from a 4 gold champion when making good use of this skill.

### **Kha'Zix (Unreal - Assassin)**

Kha'Zix is ??the basic chess piece of the Assassins lineup and is also the only card that costs only 1 VND. But up to 2 stars will be very strong at the beginning of the game, and can help you roll the snowball easily.

However, if you go to 3 stars then it will not create too many differences, so upgrading this general to the maximum is not too important.

### **Zed (Fake Ring - Assassin)**

Zed is quite strong at the beginning of the game, but it is not easy to use when you have to follow a 4 Ninja play style (judged to be quite reckless) in order to make the most of Zed, because Akali will be a more perfect plan. a lot later.

### **Katarina (Royal Warrior - Assassin)**

If you use Katarina's ultimate attack correctly, you can change the face of the whole match. However, the damage of her hand is quite low, the attack speed is also very slow so sometimes it is useless. The player will have to pump a lot of tears for Katarina because the speed of the Evil Sword's energy is very slow.

### **Rengar (Wild - Assassin)**

This is the most likely character for you to put all damage in, because the skill of Rengars is to deal damage according to physical damage. When 3 stars, Rengar will destroy the opponent's pieces with a single strike. Especially at the end of the match with Gnar.

### **Evelynn (Devil - Assassin)**

Evelynn has a 3 gold price with her wide-ranging skill of Exploding Darkness. If Evelynn is compared to Katarina, her performance level is not really effective. Evelynn's Devil is also much harder to exploit than Katarina.

### **Akali (Ninja - Assassin)**

Another fake Four-Ring Ring after Zed, compared to Zed, Akali has a better team capacity. But before that, she needed to equip her magic damage and recover her mana to be able to fight the Five-Pointed Knife and make the opponent's pieces no longer have a way to survive.

## **How to fix Assassin squad**

Although there is no way to overcome the Assassin squad thoroughly, there are still a number of teams that can resist the Assassin squad like the Noblesse who can still withstand damage from Assassins because of the high amount of armor.

However, the Void still allows the assassins to ignore a large amount of armor and then shock the damage to destroy the rear row of the Nobility squad.

Kayle and Kindred with their immortal skills can overcome some of the damage that assassins cause. However, the rate of these units that have to deal with the shock and not yet use the skill is very high.

Obviously, there is no way to completely overcome the Truth Arena killer team. But with the tips above you can arrange your formation and fight back somewhat when faced with this Assassin squad.
