Fill and Stroke in Adobe Illustrator

To get started with colors in Adobe Illustrator, you first need to learn about **Fill** and **Stroke** . Open the exercise in Adobe Illustrator and choose the **Selection Tool** in the toolbar.

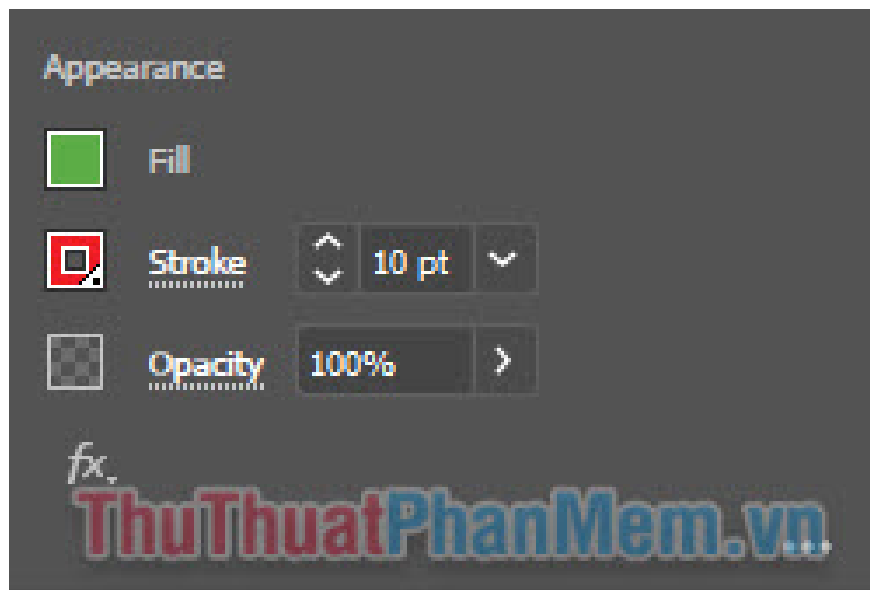

Next, click on the left picture.

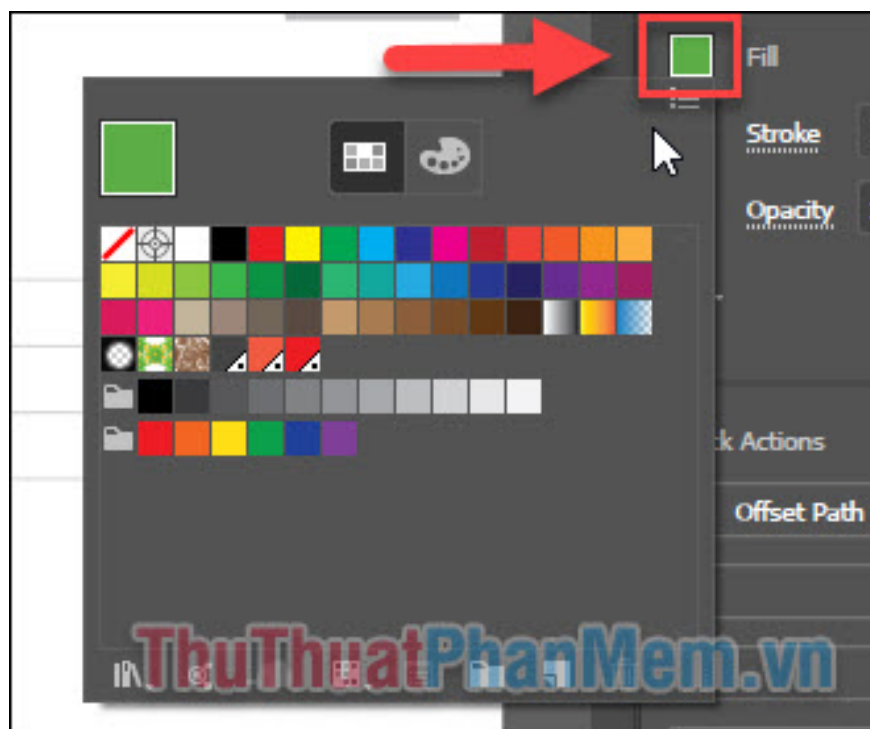

Looking to the **Appearance** window , you will see there are 2 color boxes: **Fill** and **Stroke** , in which:

1. The green part of the object is **Fill - the main color** of the object.
2. The red part is the **Stroke - the border color** of the object.

To change the main color, click and **Fill** , you will see a palette appear available colors called **Swatches** .

You can select the colors provided here to change the color of the object.

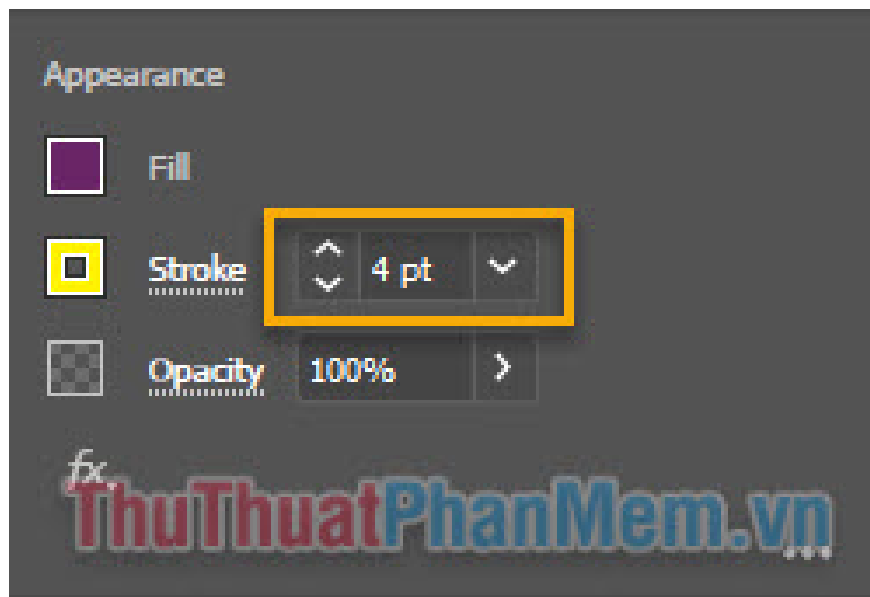

The second panel is called **Color Mixer** , you adjust the CMYK color indexes to choose the most suitable color.

For **Stroke** you also choose the color according to the same operation.

You can adjust the thickness of the border by changing its pt measurement, the smaller the bezel, the thinner and vice versa.

Color Picker

Thus, manipulating and changing object colors only include 2 steps:

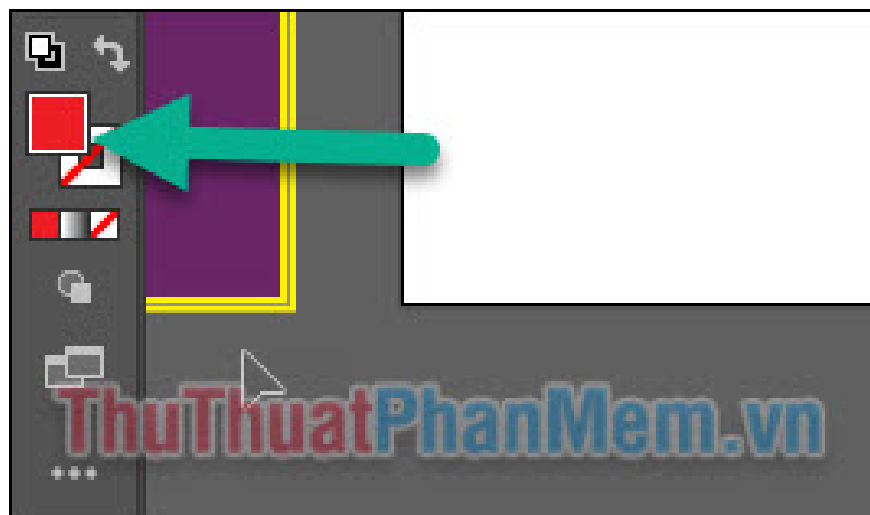

1. Select the object with the **Selection Tool** .
2. Change the **Fill** and **Stroke** colors as you like.

Try changing colors with other objects, using **Color Picker** :

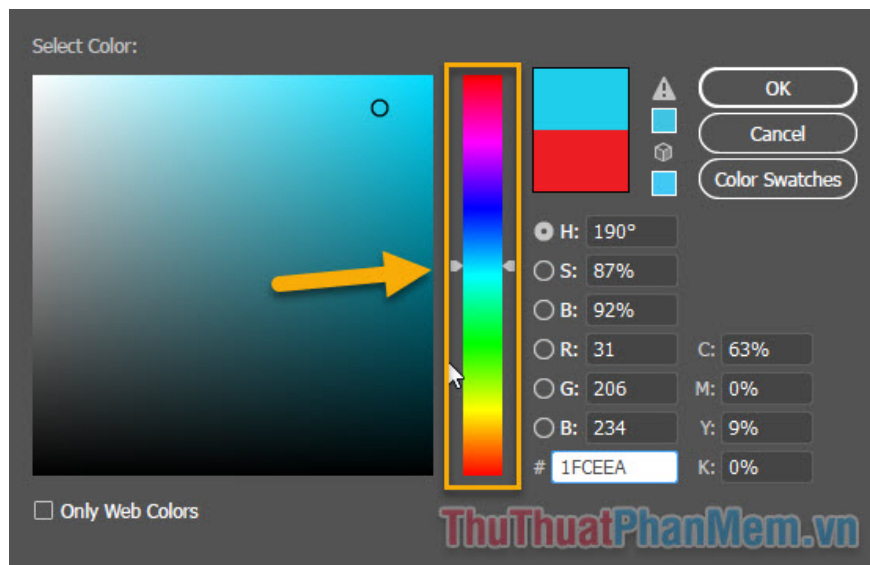

Select the object with the **Selection Tool** .

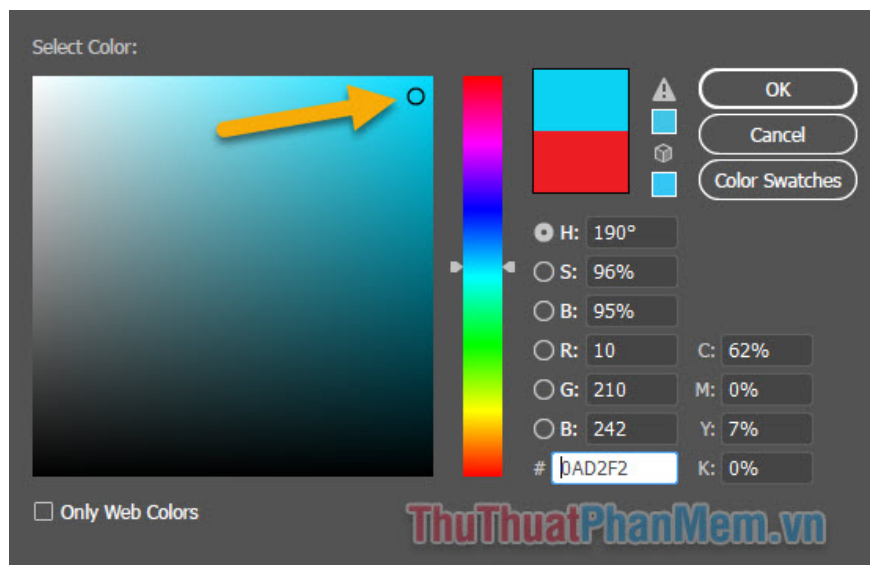

Select **Color Picker** on the toolbar.

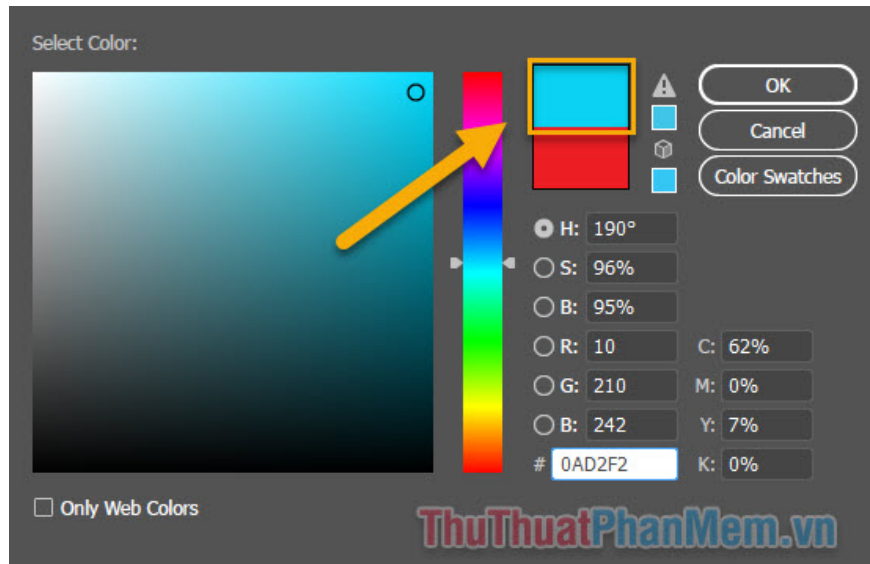

First drag to select the color in the **Color Spectrum** bar .

Then, choose the exact shade you want by dotting the left color area.

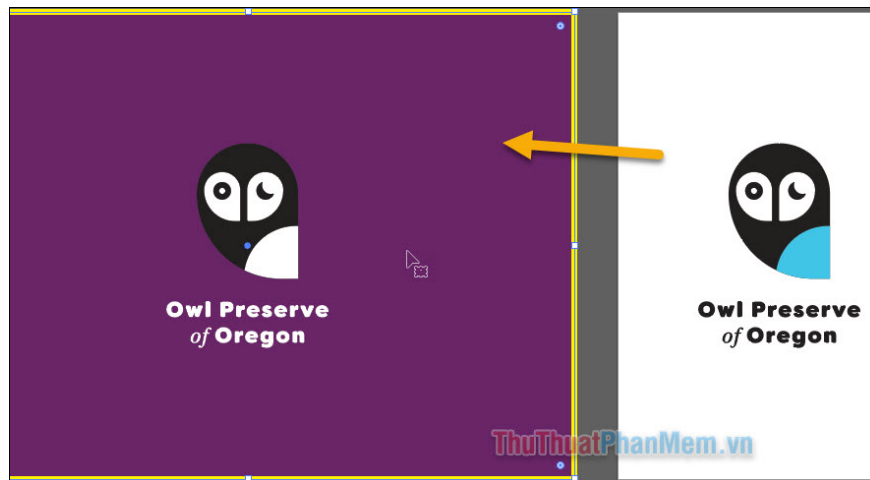

The new color you choose will appear here, below is the old color for you to compare. Once you've found the color you want, click **OK** to apply.

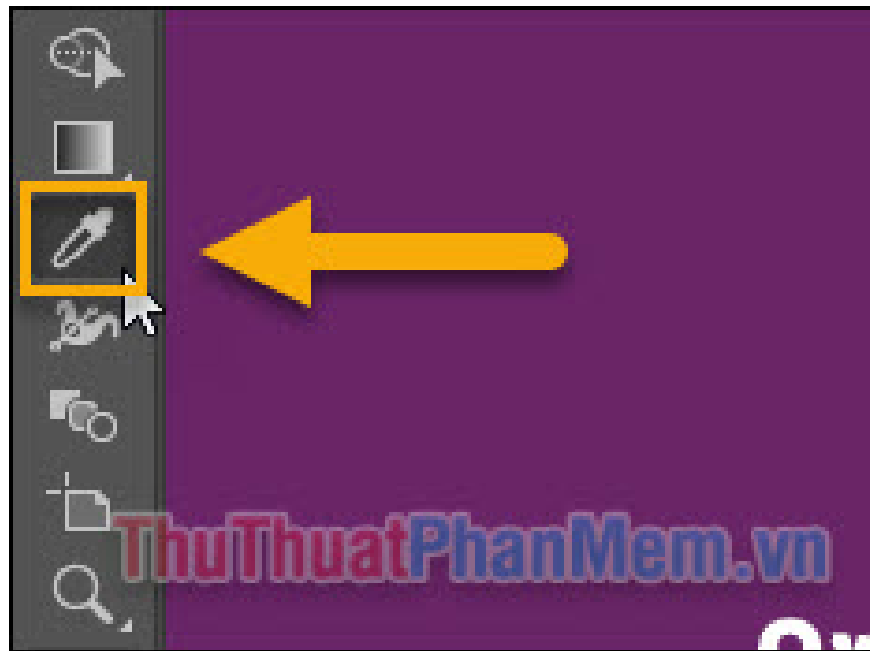

Copy colors in Adobe Illustrator

For quick color copying, use the **Eyedropper Tool** in the toolbar.

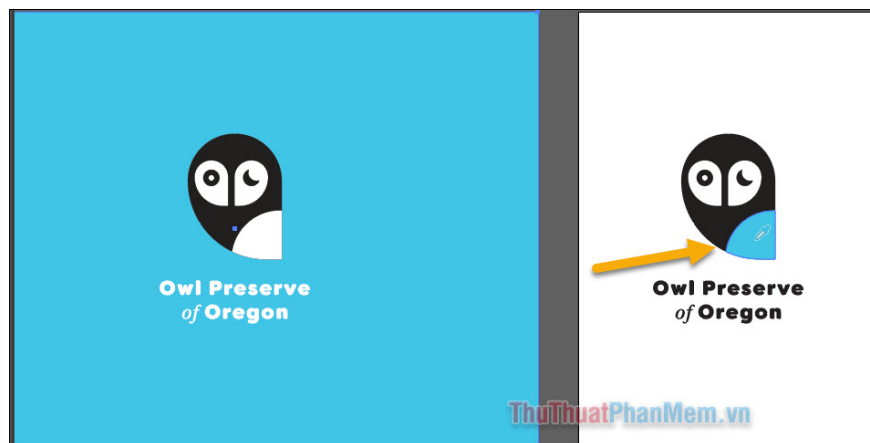

First, select the object you want to change color with the **Selection Tool**.

Then select the **Eyedropper Tool**.

Click on the color area you want to copy, and the object will be changed to the same color.

At this point, the tutorial on how to color and replace in Adobe Illustrator has ended. Wishing you a successful practice!
