

How to pin the app to the Siri iPhone Suggest utility

To pin your favorite applications to the Siri Proposal widget on iPhone, users can install AppsSiriPin tweaks.

On the iPhone / iPad there is the Siri Application Suggestions section with the most recently opened applications. However, many people want to pin frequently used applications at Siri Suggestions (Siri Suggestions) utility to access, reduce search time from the main screen, if the device installs many applications. If so, we can install AppsSiriPin tweaks with jailbroken iOS 11 devices. The following article will guide you how to install AppsSiriPin tweak on iOS device.

1. How to turn off Siri on iPhone, iPad
2. How to use Siri Shortcuts to manipulate quickly and smartly on iPhone
3. How to block Siri from showing app suggestions on iPhone

Instructions for pinning applications to Siri Suggestions

Step 1:

We look for AppsSiriPin tweaks from the Julio Verne archive in Cydia. Direct access to the link below to install tweaks.

Step 2:

After installing, adjust the user to access **the Settings section** and then click to adjust to proceed with the reset. In the setup interface, there are only two options, Enabled, to enable or disable operation tweaks on the device. **Pined Apps** to choose the applications you want to include in the Siri Suggestion utility. Push the circle button to the right to activate the application.

The Reset Settings section will return the interface of the utility. Propose Siri to the initial state, but need to respring the device again.
