## How to install the AMIDuOS emulator on the computer

### Step 1:

You download the simulator according to the link below and then proceed to install on the computer.

1. Download the AMIDuOS emulator

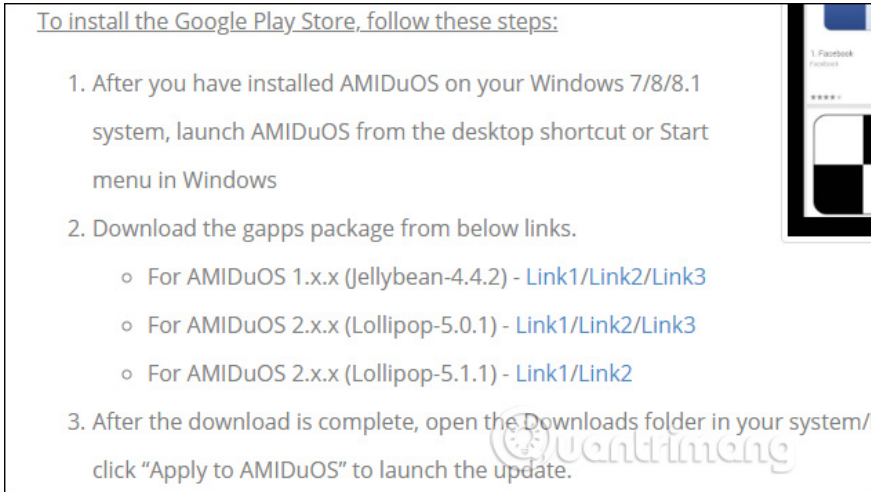

After installation, the user accesses to the link below to download the application package for each AMIDuOS version.

1. <http://amiduos.com/nextsteps?status=installed>

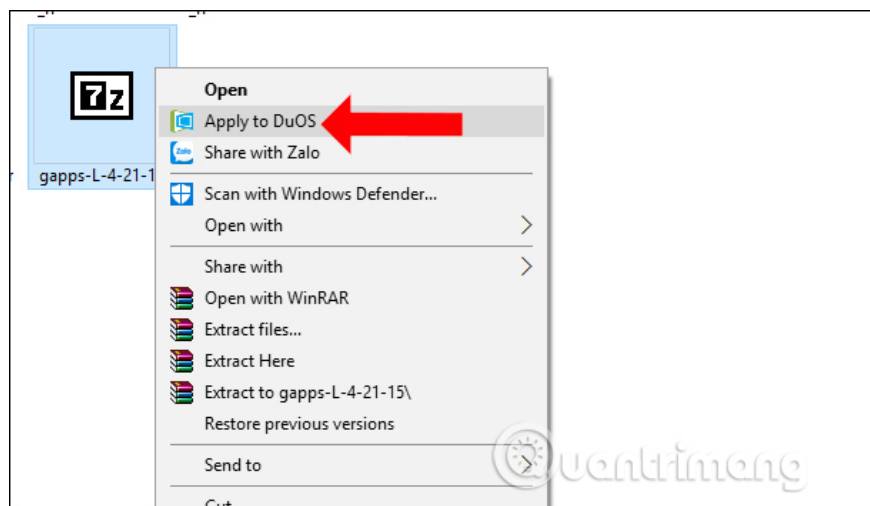

Note, AMIDuOS will only be able to emulate maximum Android 5.1.1 operating system on the computer. The download link will be in zip extension format.

To install the Google Play Store, follow these steps:

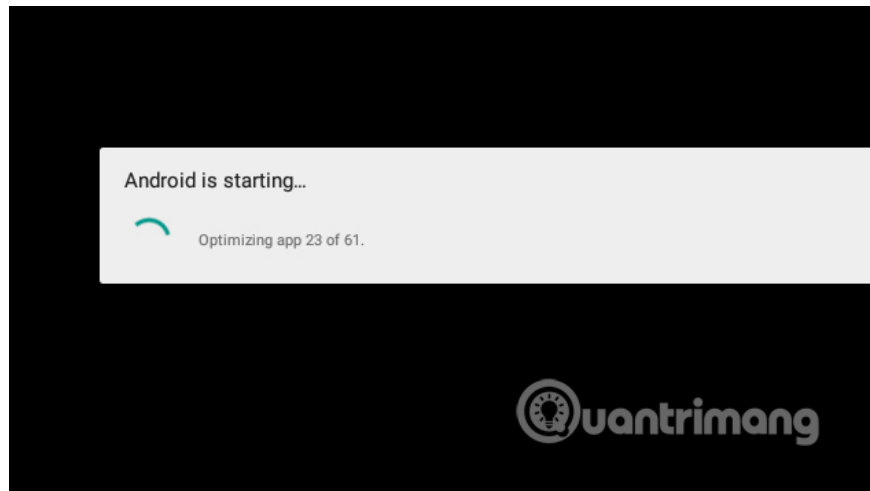

1. After you have installed AMIDuOS on your Windows 7/8/8.1 system, launch AMIDuOS from the desktop shortcut or Start menu in Windows
2. Download the gapps package from below links.
  - o For AMIDuOS 1.x.x (Jellybean-4.4.2) - [Link1/Link2/Link3](#)
  - o For AMIDuOS 2.x.x (Lollipop-5.0.1) - [Link1/Link2/Link3](#)
  - o For AMIDuOS 2.x.x (Lollipop-5.1.1) - [Link1/Link2](#)
3. After the download is complete, open the Downloads folder in your system// click "Apply to AMIDuOS" to launch the update.

Next, right-click on the new zip file downloaded above and select **Apply to AMIDuOS** .

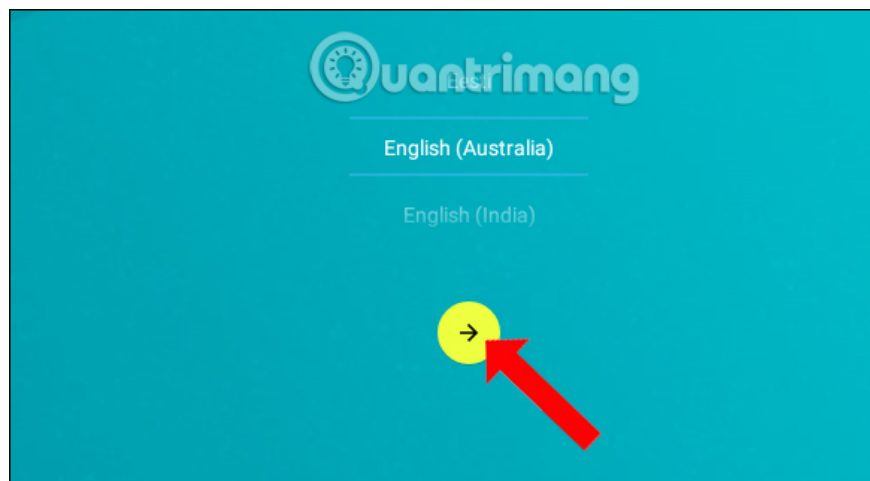

You are waiting for the process of updating data on AMIDuOS software.

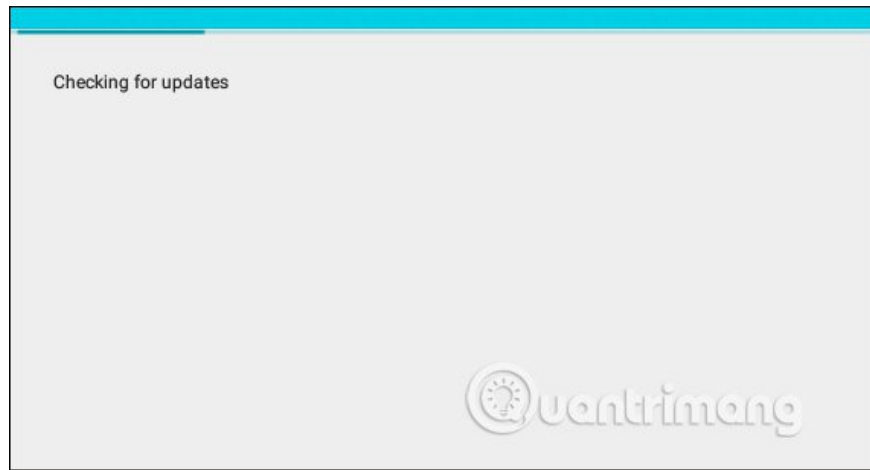

### Step 2:

Wait for the Android operating system to be set up on the AMIDuOS emulator. Next, select **the language to use**, then click **the arrow icon** below.

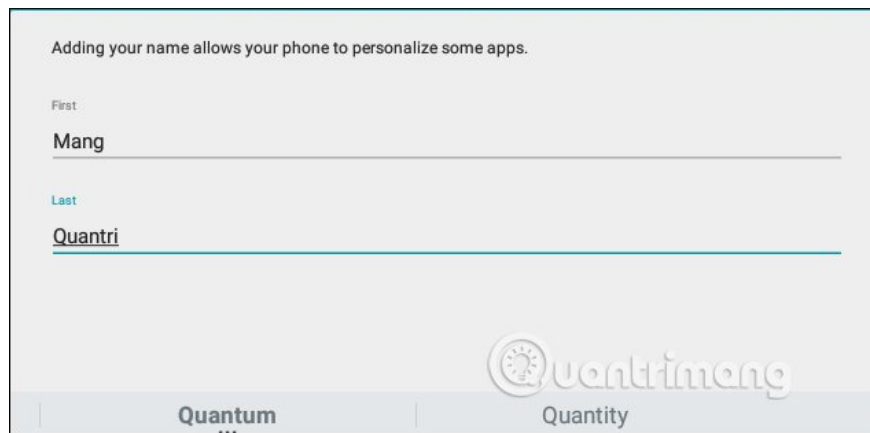

### Step 3:

Then the software update process.

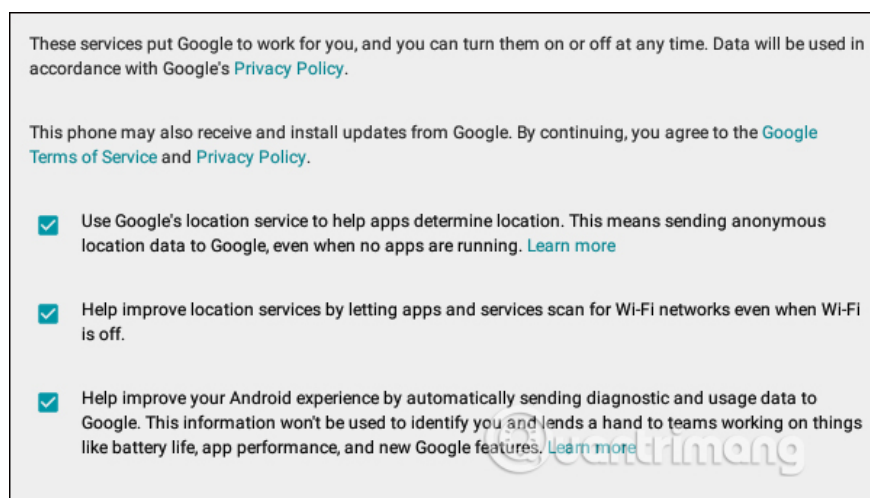

AMIDuOS will require users to **enter a name to download the application** on Google Play Store. After entering, press **the blue check mark** and then press the Next button in the right corner of the screen.

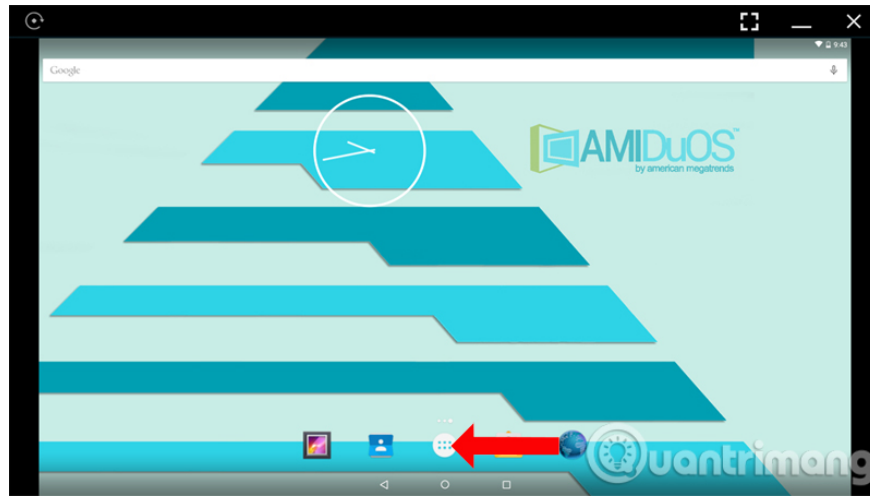

#### Step 4:

Agree to the **terms of use of AMIDuOS** and click the Next button to complete the registration using the emulator.

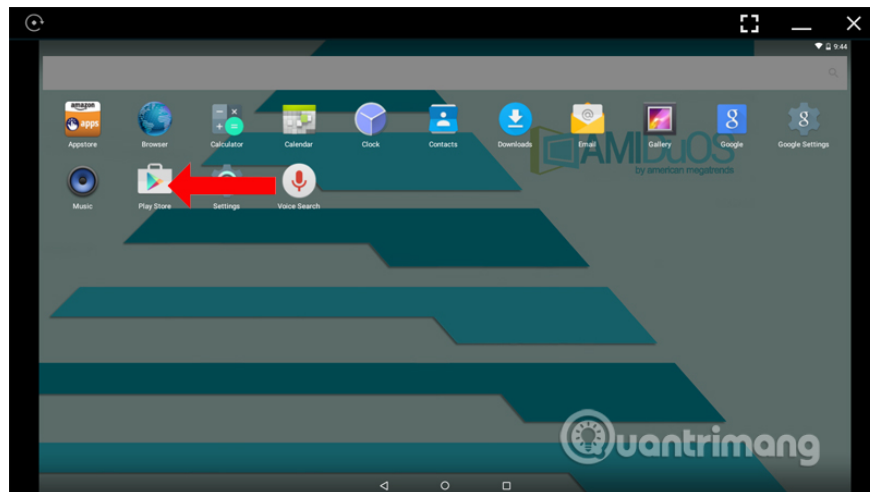

Here is the interface of the AMIDuOS emulator, very simple and without many icons. The top will be the search bar on Google. On the right is the WiFi icon as well as the percentage of computer battery.

To access the menu press **the circle icon in the middle**.

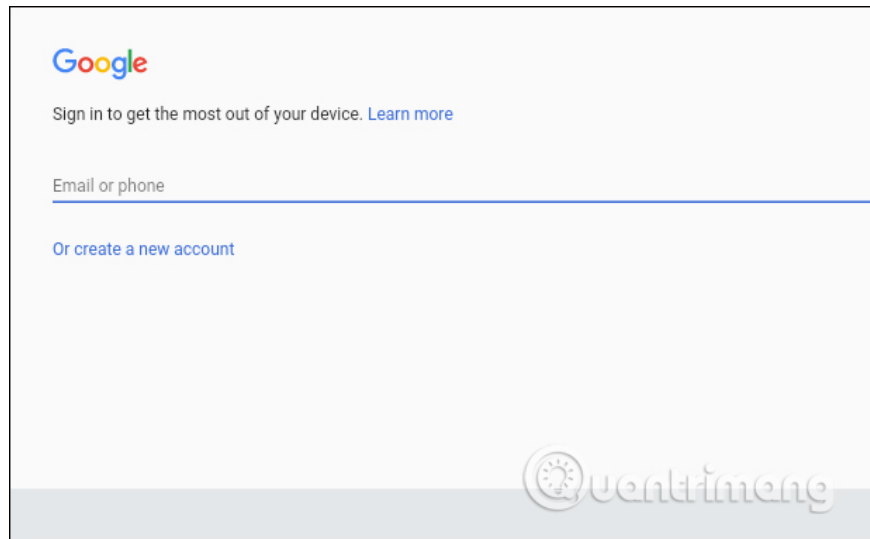

### Step 5:

Show applications, default installers on the system, click **Play Store** to download apps or games.

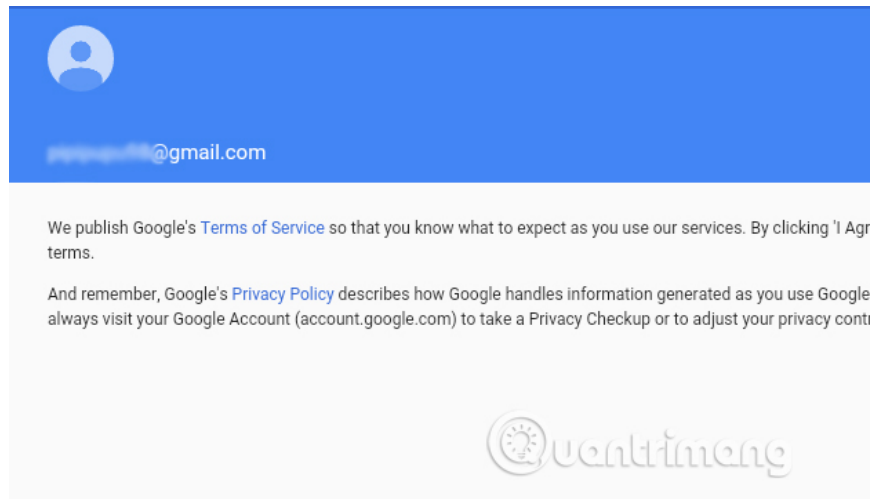

The system will ask the user to **enter an email address** to download the game. Click Next to continue.

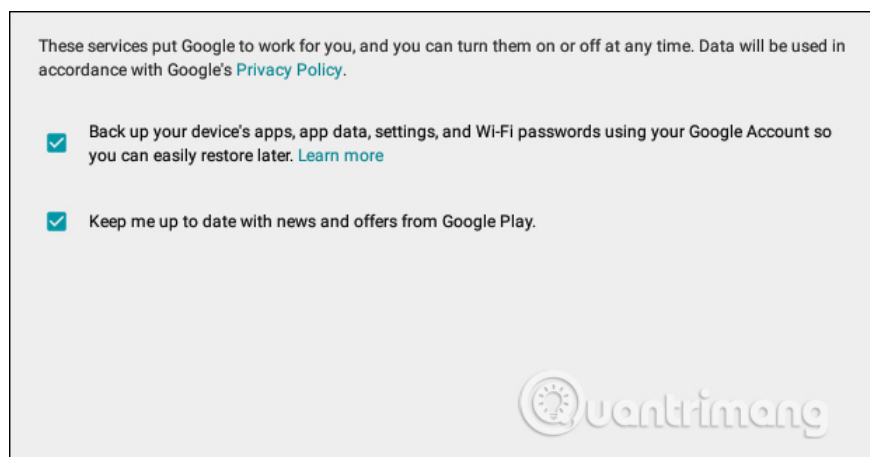

**Step 6:**

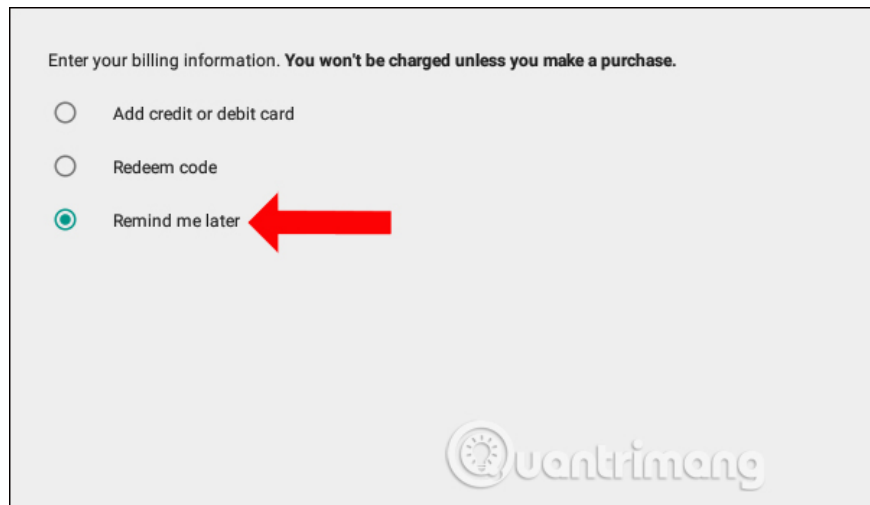

Switch to the new interface and **click Accept** to agree to the terms of use from Google.

Then click **the Next button** at the interface below.

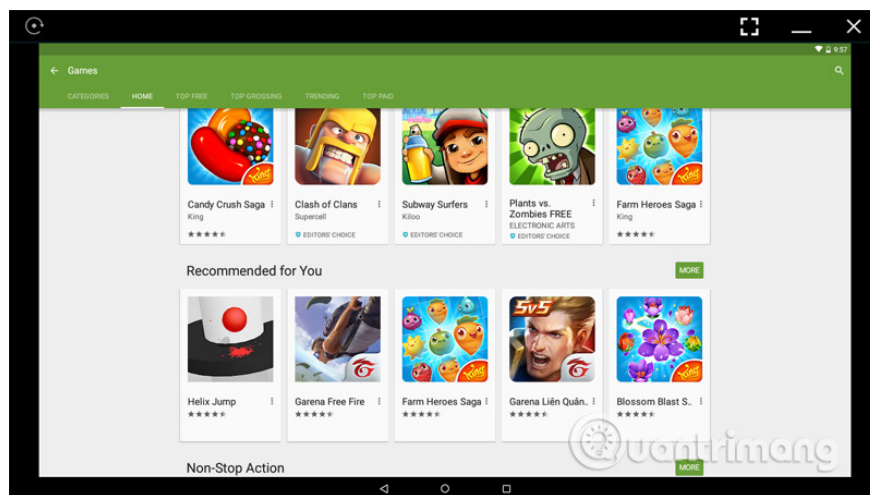

In the last view, select **Remind me later** and then click Next below to complete.

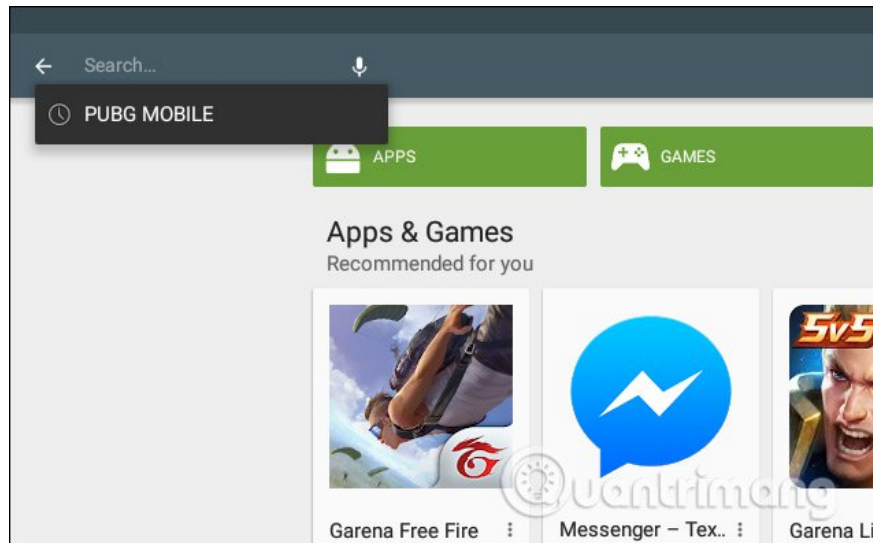

### Step 7:

The Google Play interface will appear shortly thereafter. Here users can search for games and applications that they want to install on the computer.

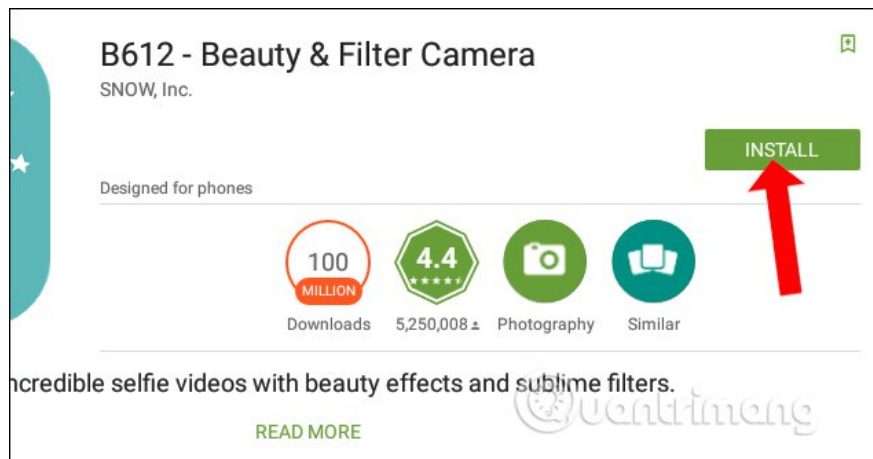

Or click the **magnifying glass icon** and enter the application name to find it faster.

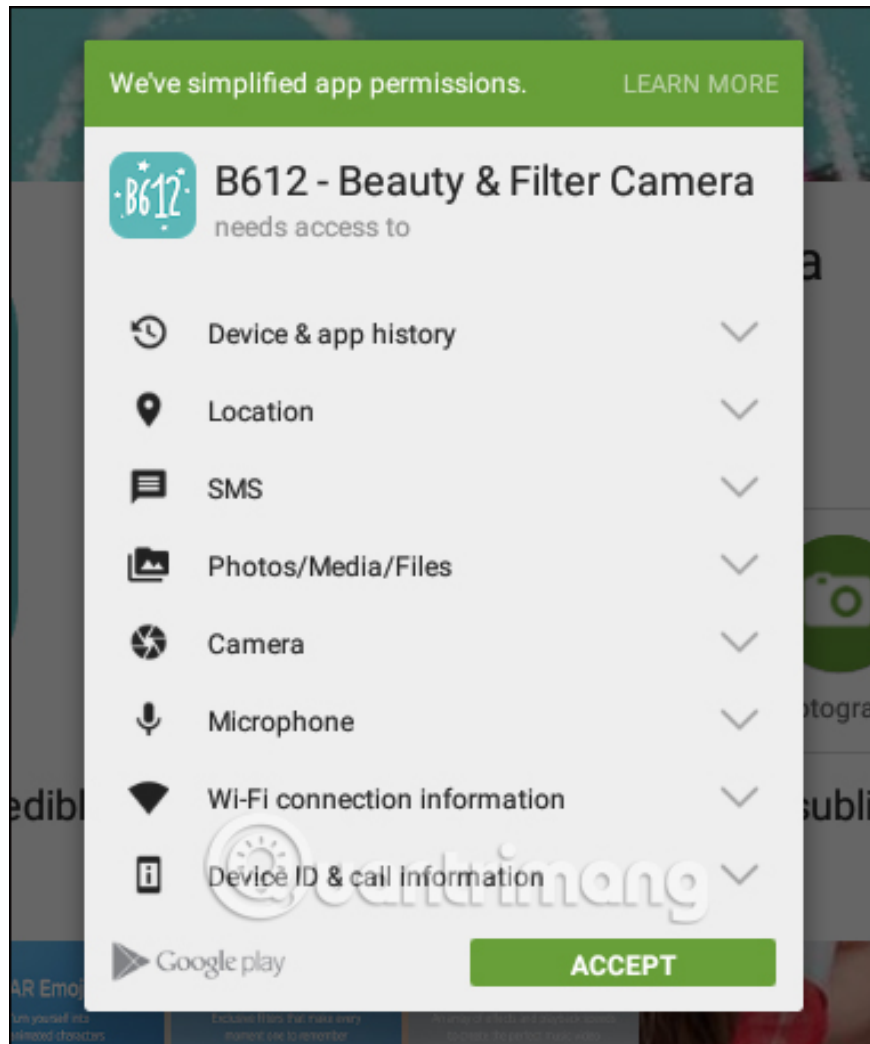

**Step 8:**

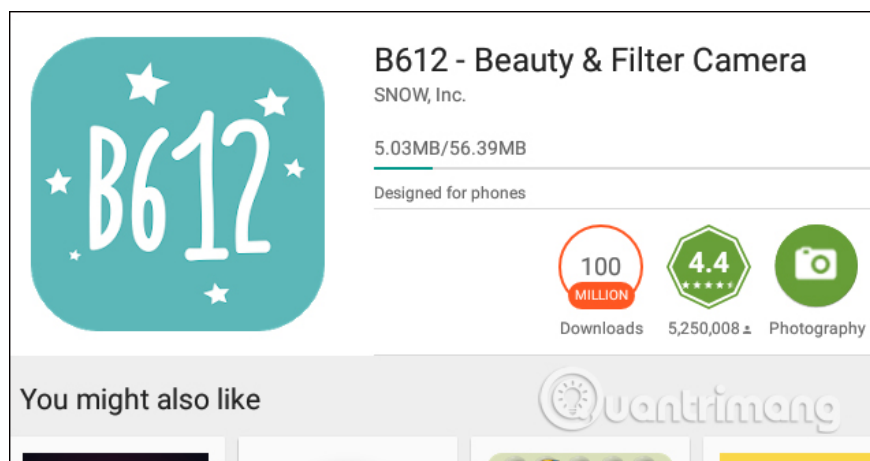

Click on the application you want to use and then click **the Install button** to install.

Agree to the terms of use of the application, click **Accept** .

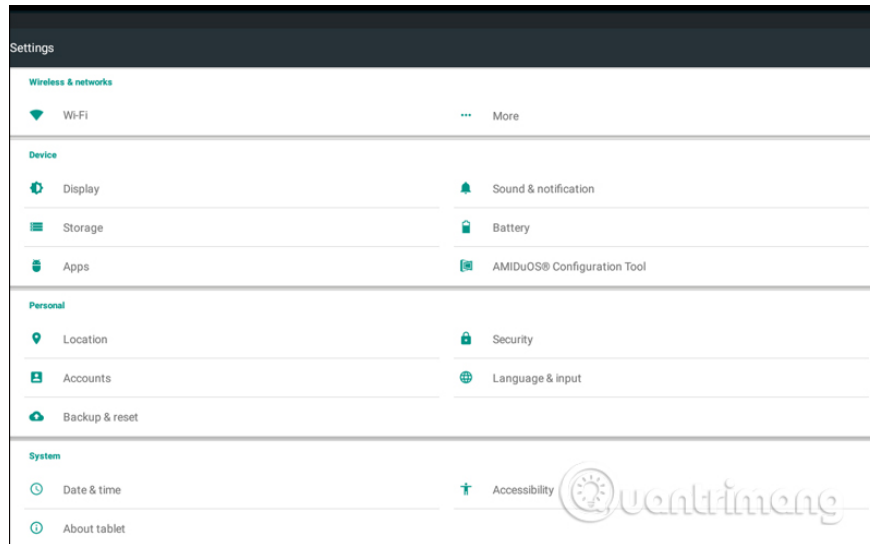

The application installation process will proceed immediately. The installation of games and Android apps on AMIDuOS is similar to other emulators.

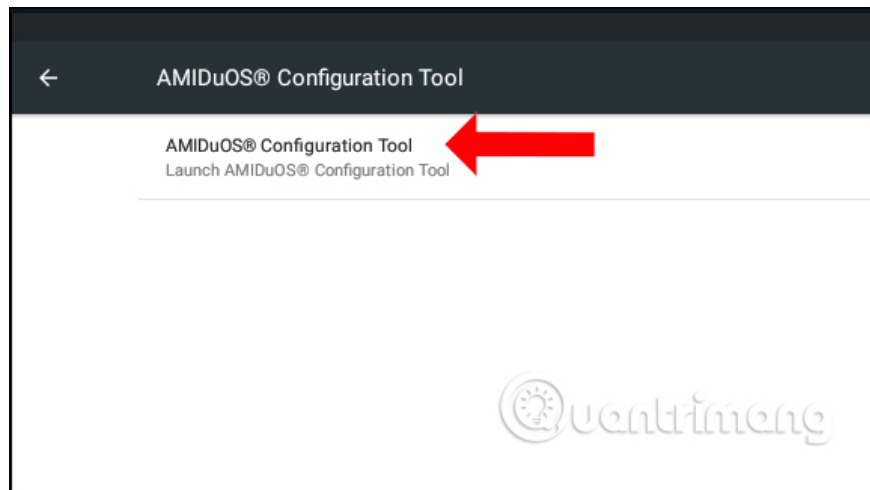

**Step 9:**

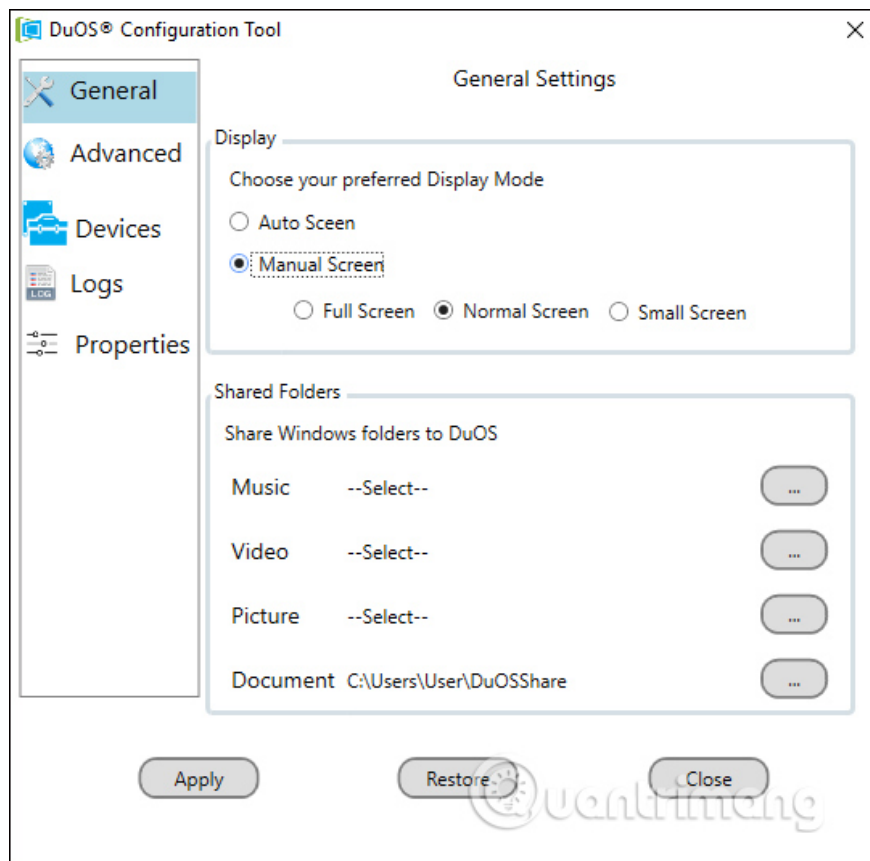

Go back to the main interface and click on **the Settings icon**, you will see the installation interface on AMIDuOS. The settings will be divided into different categories.

When clicking on the **AMIDuOS Configuration Tool**, you will have the option of activating AMIDuOS's tools.

Appears to add an editing interface for additional user customization for AMIDuOS. If editing, click Apply to save the changes.

Above is how to install and use the AMIDuOS emulator. Currently AMIDuOS supports 5.1.1 operating system, so the number of applications and games installed on the computer is relatively limited compared to other Android emulator software.
