

How to play classic games for free on EmuOS

How to play classic games for free on EmuOS, EmuOS (Emupedia) will emulate the interface of Windows 95/98/ME to play free old console games like Doom, Tetris, Pac-man,...

Usually, classic games can only be played on emulators. Without them, it would be difficult to replay them in the original system. So a website has been developed with the aim of preserving many classic titles by emulating Windows directly on the web to run many games and applications. That is EmuOS (Emupedia).

What is EmuOS?

EmuOS is basically a website where you can play old console games for free. This is a free, open source and Ubuntu Linux based emulator. EmuOS supports 8 consoles/platforms and provides you with a collection of emulators through an easy-to-use interface.

According to its creators, Emupedia aims to serve as a super non-profit resource, becoming a hub and community for those interested in preserving video games. The objective of this website is to collect, store and preserve games and software, simulating various classic operating systems for educational purposes.

How does EmuOS work?

Emupedia will emulate the look and feel of Windows 95, Windows 98, or Windows ME in a browser. These emulator skins will include dozens of games and programs and applications that can be turned on and run directly in the browser such as Minecraft, Flappy Bird, Doom, Tetris, Pac-man, Paint, Discord, Notepad, etc. Everything is emulated in JavaScript, runs very smoothly on all browsers.

Immediately after selecting the operating system, you will see a desktop full of icons. All these icons are very recognizable. To run any application or program, simply double-click on them. The performance of each application will depend on the power of your computer. It is important to have a good processor to run the virtual environment.

How to play games on EmuOS

You do not need to download EmuOS to your device because it works in the browser. Just visit the Emupedia website using the [link here](#) to start enjoying the old games now!
