

How to play CS 1.6 on the web

With the guide to playing CS 1.6 on this web, you will save time when playing CS 1.6 on PC because you have to go find the server and download games.

Counter Strike 1.6, the game must be no stranger to many FPS game lovers. Perhaps from the day of its launch until now, CS 1.6 is still a game that many people choose to entertain as a tool after many hours of work or intense study.

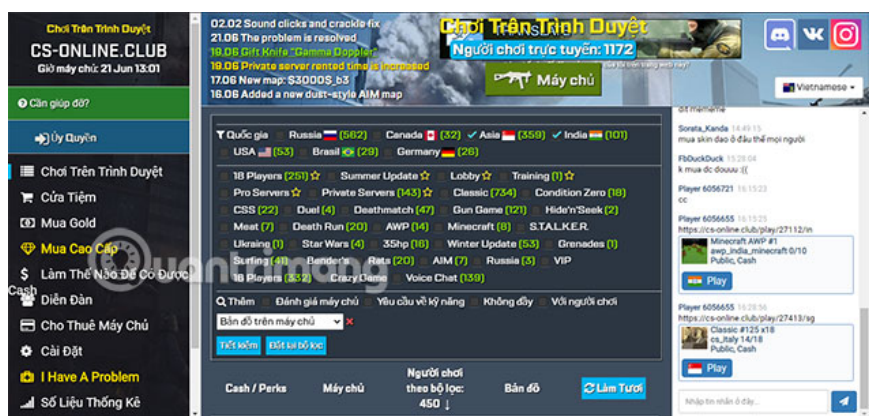

Due to its long appearance, the current CS 1.6 download also has many websites that support users to download, but sometimes die links. The player must search for the download link again.

But for now you can play CS 1.6 on the web. Just recently, a group called CS-ONLINE.CLUB has introduced CS 1.6 game on the web and gamers can fully experience this game on the web for free. Here is how to play CS 1.6 on the web.

Instructions for playing Counter Strike 1.6 on the web

Step 1: Visit the link below, then you will see the selected area table Asia and India (Asia and India).

<https://cs-online.club/en/servers>

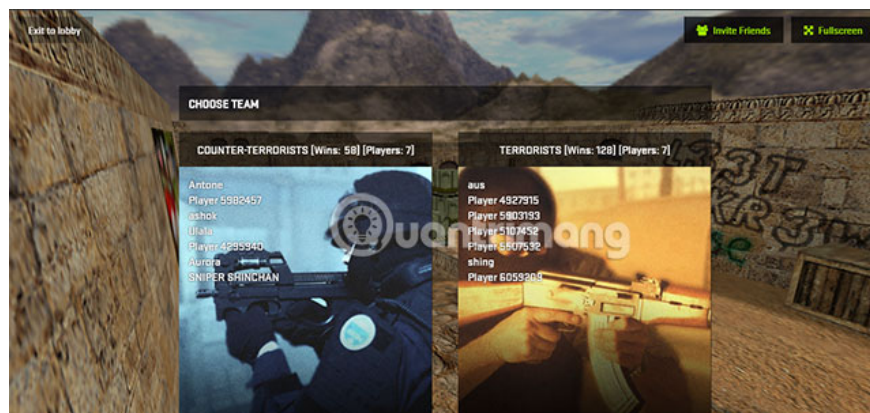

CS web currently has several servers located in Asia, Russia, USA, India, Canada, Germany and Brazil. Select the country you want to play and a server will appear below, along with a mode and map. Includes familiar maps that are de_dust, de_dust2, cs_assault, cs_italy.

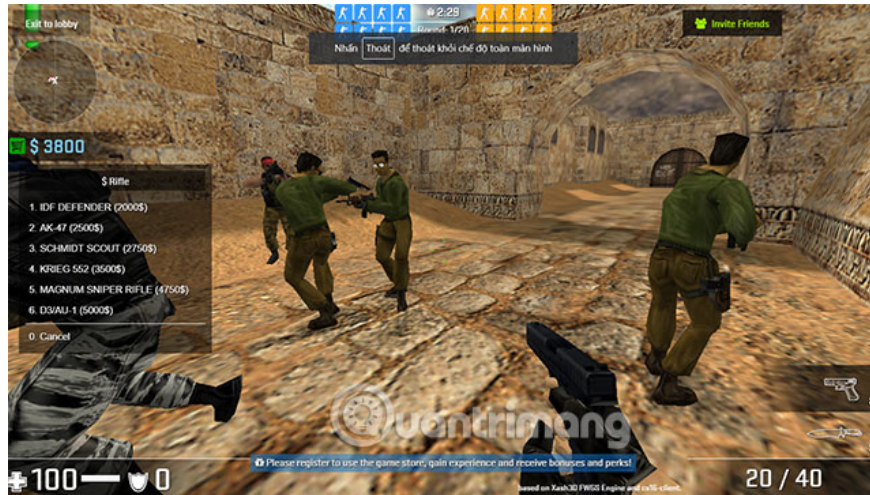

Step 2: Click **Connect** and soon you will be in the game room. Click **Full Screen** to open all the screens to play. The control of CS 1.6 web is the same as the default control of CS 1.6 on PC. Wait about 5-10 minutes for the game to finish loading.

Step 3: Choose your team, here you will also see the number of players and games won on each side.

Step 4: Press the ESC key to show the mouse and exit the game for the game.

Now you can play CS 1.6 on the web without downloading the game to your computer, maybe for those who are familiar with the right Del key to buy, it will take a bit of time to buy with the B key.
