Similar to Slither.io - snake hunting game is storming the Casual game market. With simple gameplay, attractive, high combat, Diep.io has quickly attracted a huge number of players. But first, let's join TipsMake.com to learn about the game Diep.io - shoot this classic tank already.

See more tutorials on how to play Slither.io - hunting snakes.

1. What is Diep.io?

To play Diep, go to the game's homepage on the browser. Note that this game does not have a mobile app version, if you want to play on mobile, tablet, try using the mobile browser.

1. <http://diep.io/>

As mentioned above, this is a Casual, Multiplayer and online game. There are 4 main game modes in Diep:

1. **FFA - Free For All** : as the name suggests, this is probably the most popular game mode - FREEDOM. Completely free, at level 1 you will appear at any place on the map. The main task is to try to survive as long as possible, destroy other opponents on the map.
2. **DM - Death Match** : This mode will split into 2 main teams: blue and red. Basic gameplay is similar to FFA, but you will not be able to destroy players of the same color.
3. **Domination** : is similar to DM, however you and the player with the team will have a certain area to revive and appear. Split into 2 teams that will fight to win 4 Turret (or Dominator) placed on the map.
4. **Mothership** : similar to DM and Domination, but both teams will have a so-called Mothership - called mother ship, very big and strong. The mission of each party is to try to destroy the other party's Mothership.

To switch between these game modes, press the Tab key on the start screen, when naming the player. And to move in this tank shooting game, you use 4 keys **W - A - S - D** similar to when playing Counter Strike, left click to shoot:

If you are too tired, press the E key to switch to auto-firing mode - Auto Fire

2. How to play Diep.io get a high score:

What is the secret to survival in Diep.io?

1. **Try to level up quickly** : how? In the early levels, try to find some place on the map where no one competes, many triangular, square, 5-sided blocks . to farm XP - real-world experience fast.
2. **How to add points how reasonable?** In my personal experience, first add points to Bullet Penetration and Bullet Damage. Then Bullet Speed, Reload and finally Movement Speed. Later on, you have extra points, so consider the first three: Health Regen, Max Health and Body Damage. To add points quickly, you can use the number keys corresponding to the order from 1 to 8:
3. Number 1: increase **Health Regen** - healing ability.
4. Number 2: **Max Health** boost - maximum health.
5. Number 3: Increases **Body Damage** - increases when dealing with other players or objects.
6. Key number 4: Increase **Bullet Speed** - bullet speed.
7. Key number 5: **Bullet Bullet Penetration** - bullet flying without blocking, penetration ability of bullets.
8. Key number 6: Increase **Bullet Damage** - **damage** of bullets.
9. Key 7: increase **Reload** - speed of reloading.
10. Key 8: increase **Movement Speed** - **movement** speed.

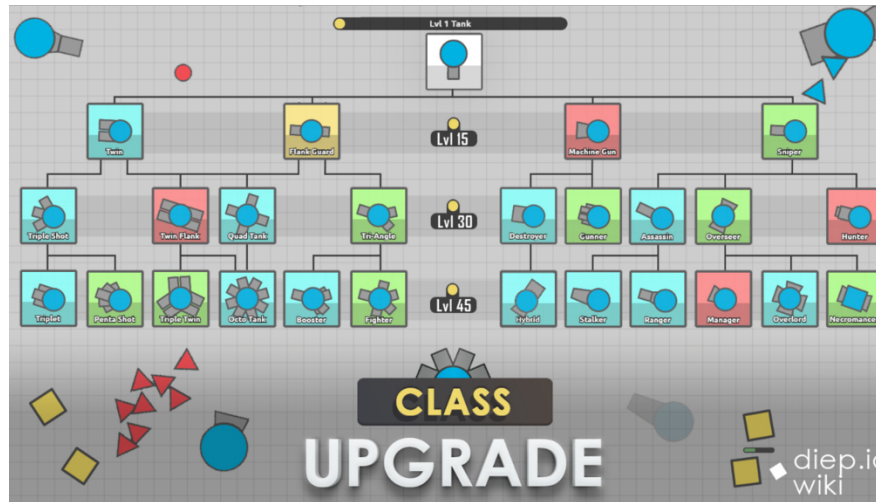

1. When you reach Tier 2 - equivalent to level 15, choose **Machine Gun** .
2. When you reach level 45, take it easy to destroy other players, get more XP points than break the boxes on the map.

Some other tips when playing Diep.io:

1. From level 1 to 15, you should avoid other tanks that should only shoot triangles, squares and quadrilateral to quickly level up.Ok, this is standard, easy to understand.Low birth weight, it is best to find a place to live without farming.
2. Should focus on improving skills in 2 battle times **Health** and **speed**.
3. **Health strategy** : You should increase **Body Damage** to level 5 then you focus on increasing **Max health** , **Health regen**, **Body Damage** (increase blood and regenerate blood) when your tank body is enough. It is ok to hit enemy obstacles or tanks without serious blood. Continue to raise your **Movement Speed** ??and then continue to increase the score for **bullet speed** and **bullet damage** (increase the rate of fire) to lure the tanks closer to your tank.The rest of you hit a tank of small and medium-sized opponents, and larger tanks are a bit difficult.
4. **Speed ??Strategy** : If you follow this strategy, you can say: 'Even if your tank is running fast, it's not as fast as my bullet'. This is also the second strategy that many people choose, preferred after the health strategy. To gain points for this strategy you need to focus on maxing up the point **Bullet speed** . After reaching level 15, you choose the tank **Machine Gun** is the leader of the battlefield (but Machine Gun can only be upgraded once, up to level 35 will not be able to upload).
5. It is 2 strategies that TipsMake.com found effective, of course there will be many more or better strategies are waiting for you to explore in this tank shooting game Diep.io this

3. Class information table - Class of tanks:

When looking at this chart, we can easily see:

1. Classes - Class multi-gun tanks, quick-firing include: Twin, Plank Guard and Machine Gun (but Machine Gun only ups up to level 30 is drama).
2. The tank has less fire, accuracy, high damage including Machine Gun, Sniper.

To survive, survive and achieve a high score in Diep.io, you should play firmly:

1. When the level is low, try to find points on the map with multiple blocks - Block to farm - XP plow, experience to level up. Don't poke PK, destroy other players at this time.
2. When you reach a certain level (I think should be level 30), you should start PK, and remember not to find a way to destroy higher level players, unless they are too low.
3. If you feel that you can't "eat" during a team fight, it's best to find a way back, so don't try because you can lose your life at any time.
