

How to Play Gacha Club on Windows PC or Laptop

With more than 50 million gamers playing Gacha Club game worldwide, we guess, there's hardly any need to introduce this game.

But still, if you're new to it, let us explain what you could expect while playing the game.

If you love anime characters and styling them up, that's what you can expect in the entire game. Also, if you love battling out with the opponents, this can be your go-to anime battle arena!

That said, playing the game on any Android smartphone or the tablet is fun. But it gets even more crazy when you play it on your Windows PC or laptop. Wondering how you can it? Here's the quick guide for Gacha Club pc download followed by the gameplay!

1. Download the Bluestacks Android emulator from its official website
2. Install it on your Windows PC or laptop by following the on-screen instructions
3. Now, launch Bluestacks emulator using the desktop shortcut or search with Windows key on your PC or laptop.
4. Sign-in using your Google account and launch the Google Play Store app within the Bluestacks emulator.
5. Search for Gacha Club and click on install. Once done, you can now play the game with PC or laptop.

That's how simple it is to install and play Gacha Club on your PC. Let's now see the gameplay to understand how you can play it.

Create your favorite characters!

Once you start the game, the first thing to do is, creating your own anime characters as per your preferences. In Gacha Club, there are ten main characters and the other 90 characters to choose from. Moreover, there are more than 600 types of poses along with the option to change the color of your character at any given time.

You can also change the eyes, hairstyle, and a lot more customizations based on your requirements. Groom it until you're satisfied with your anime character. What's more interesting is, if you loved someone's character, you can ask them to export for you and you can import the same in your game. Amazing, isn't it?!

The Studio mode!

This is the most talked part of the game where you can use multiple characters, pets, and more in a single frame. You can make these characters and pets talk with each other with a scenic background customized by you. Moreover, you can even narrate the stories in order to create some compelling scenes.

Battle arena!

Be it a story mode, training mode, tower mode, or the shadows of corruption, you're in for a treat when you start battling as that's where the heart of the game lies! While battling, you can collect some rarest of the rare DJ characters. Also, you can enhance your skills by using the materials available in the battle mode.

Overall, it's a fun game but just make sure that your device isn't a 4K screen or it may lag at times. It's a common issue with most games out there and during such times, you can only restart the game and hope it does well on the next launch.
