

# How to play Genshin Impact, necessary configuration, story details, tips for beginners

Genshin Impact was born as an open-world action-adventure game. Context of the game is inspired by the legendary The Legend of Zelda: Breath of the Wild released by Nintendo. However, it has lovely and anime graphics.

Genshin Impact - a popular game in recent times and will have a lot of people wanting to care about how to play this game. In this article, I will tell you everything you need to know to play Genshin Impact, let's get started.

## Overview of Genshin Impact

This game belongs to the JRPG open world adventure role-playing game genre and can be played on many platforms from Android, iOS, PC and PlayStation 4. Currently the manufacturer is still limping on the official release. Nintendo Switch, so it is still unclear when the game will appear on this platform, well, that is more than enough for players.

The game is considered by many players to be inspired by Zelda BoTW, from art style to gameplay, I personally feel the same way. There have been many debates going on on social networks about this, but I think it simply doesn't matter whether it is the same or not, the important thing is that it brings a good experience to the player, the developer himself.

Game developers have also confirmed that they refer heavily to BoTW and GTA's open world development when creating Genshin Impact.

The game has currently reached more than 10 million downloads, although it was officially opened on September 28, proving its attraction is not small.

## Configuration required

In general, this game is quite a waste of machine resources. Its total installed capacity is somewhere 5GB (iOS) and the graphics in the game will not reach the best level if your device is not a flagship. Here are the minimum configurations for gaming:

The minimum PC needs:

1. Operating System: Windows 7 SP1 64 bit, Windows 8.1 64 bit or Windows 10 64 bit
2. CPU: Intel Core i5 or equivalent
3. Memory: 8 GB RAM
4. Graphics Card: NVIDIA®??? GeForce®??? GT 1030 or equivalent
5. DirectX version 11
6. Free memory required: 30GB

Minimum Android needs:

1. Processor: Qualcomm Snapdragon 665 and above
2. RAM: 4GB
3. Android OS: Minimum 8.1

Playable iOS devices:

1. iPhone 8 Plus, iPhone X, iPhone XS, iPhone XS Max, iPhone XR, iPhone 11, iPhone 11 Pro, iPhone 11 Pro Max, iPhone SE (2nd generation), iPad Air (3rd generation), iPad mini ( 5th generation), iPad Pro (2nd generation) 12.9 inch, iPad Pro (2nd generation) 10.5 inch, iPad Pro (3rd generation) 11 inch, iPad Pro (3rd generation) 12.9 inch, iPad Pro (4th Generation) 11 inch, iPad Pro (4th generation) 12.9 inch
2. Supported systems: iOS 9.0 and above
3. Memory: 8 GB

## Story and gameplay

In terms of plot, the game takes us into a world of Teyvat, where humans used to have the ability to control and manipulate natural elements. However, after the events, this civilization collapsed 500 years ago will be the time for us to play the main character to explore this world.

The world in Genshin Impact is full of mysteries so we can slowly learn through quests. To better know what happened in the game, the only way you can do is stick to the game's plot to play. The instruction system in the game is very simple, so it will help you quickly get acquainted.

There will be a lot of things and features locked until you complete the quests, so with the task system built in depth, you won't feel too discouraged when you have to do quests. service continuity.

In general, the plot and gameplay of the game are quite interesting, elaborated and meticulously, so that people who have never played this game before will want to download and try it and those who have already played will continue to plow game But don't get discouraged, download and play a little bit and then delete.

## Tips for starting to play Genshin Impact

### Explore the world but don't forget to stick to the plot

With the building of the open world in the game, Genshin Impact will make players lost in a mythical world with many minigames, sentences and hidden interactions with surrounding objects or more interesting than hitting bosses.

Players can also climb, cross the river, . but do not forget that the game has a pretty deep storyline and needs players to stick to to perform them.

Performing quests from the storyline, as I said, will help our characters open up more exciting new features, for example, brothers can unlock a paraglider when finished a certain mission number.

My advice is to stay balanced by playing in this game, following the storyline while also going adventurous to widen your eyes on the world here. All the activities that you do in the game are given experience points and it will help you get a high ranking on the Adventure Rank discovery rankings.

The pace of the game at the beginning of the game is quite slow, the first tasks will help you shape everything in the game easier, easier to get used to. Quests also often pull us out of the main city and this is the right time for us to gather resources and find bosses to fight.

Another advice is that you should limit the teleport feature to quickly move to a certain place unless you intend to go there for something.

Every location in the game map is installed with quests, upgrades and secrets that only when you discover it, you will know. Therefore, if you decide to play this game, slowly go and explore.

## **You will not open many great features if you do not reach rank 20 on Adventure Rank (AR).**

As I said, the early game tempo is quite slow and lacks everything until you reach AR20. To earn AR points, you just need to "travel" to search and collect resources, do whatever in the game allows because all activities count towards AR points.

## **Some features will be unlocked gradually such as:**

1. AR 8: Ley Line Blossoms - Hoa Lua Dua (in-game boss)
2. AR 12: Add Ley Line Blossoms and unlock more quest features every day
3. AR 14: Lets us send unused characters out for resources
4. AR 16: Unlock multiplayer play
5. AR 20: Unlock the Spiral Abyss - La Hoan Tham Canh, a large building with many floors to explore and fight for more resources and open the Sacraments in the game
6. AR 22 to 27: Will open more large works similar to the above.

## **Ways to "dignity" better**

Actually it is not a way, but this is a principle in the game. Every time you use the Pray feature to find characters or weapons, Pray every 10 times as a 4-star or higher character will appear at this time.

For those of you who don't know, Prayer - Wishes is a core feature for us to incorporate new characters into the adventure as Prayer will give us items and weapons. However, this feature depends a lot on dignity to get a good item, which is so familiar for all gamers who play the game.

## **Save resources to buy Prayer**

Prayer can be purchased with real money, however you do not have to deposit money into the game to play. Prismogem can still be purchased with a virtual currency in the game called Nguyen Thach - Prismogem.

And we can easily earn Gemstones from any activity such as fishing, fighting bosses, doing quests. At the same time another virtual currency is Stardust - Tinh Huy, we can receive Tinh Huy after each Prayer.

The shop will have many interesting items to make players want to buy them, but please save them and save them to play with dignity as there will be many good items that are available in the Prayer system, this is a very system. strong in game and not to be missed by joining Genshin Impact and because it's fun too.

### **Please change characters continuously when fighting**

In the game, the characters have different attributes and elements and therefore have different interactions when combined. The continuous character change helps to make combos more powerful.

The interaction of these elements also depends on the environment and the enemy, in my opinion, the elemental system in the game does a great job in making the gameplay deeper and more interesting.

### **The NPCs are not useless**

Non-player Characters are the machine characters in the game. They are not merely leading the player, creating a lively in the game, but the NPCs in Genshin Impact will bring a lot of tasks for us to do.

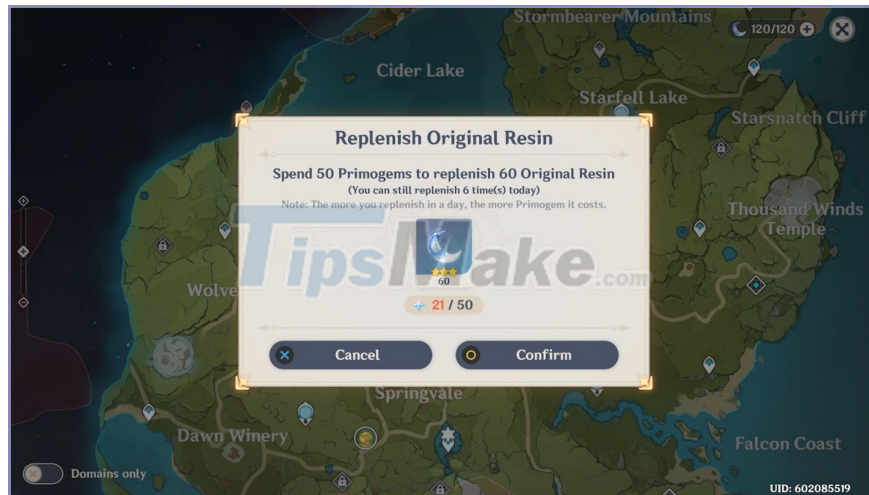

Doing this also makes it possible to get rare items, so don't forget to interact with them.

## Please use up the amount of resin tree resin each day

Resin - Resin is a system that allows us to receive gifts in limited quantities per day. Using Resin will make wilted flowers fresh after each boss hit and they will give us gifts.

The sap is limited every day and will re-fill the next day. So find lots of flowers (they will appear on the minimap) and use up all the Resin each day to maximize the amount of items collected.

Here's everything you need to know for the newcomer Genshin Impact. Obviously, the gameplay system in this game is very large and deep, so it is difficult to present it all to you. If you feel like it, then download, read my article and try adventure in this world, it will be quite fascinating.
