

How to play music, videos on Windows 10 Cool Player

Cool Player application on Windows 10 supports you to play music, videos with many different audio and video formats.

In addition to the familiar music players, currently users have many more music player applications to choose from such as Cool Player on Windows 10 for example. This application supports you to play music and videos in a variety of formats, from .mp4, .wmv, .aac, .m4a, .mp3 popular formats to formats used only for some types of music such as .rm, .rmvb, 3g2, .3gp . Cool Player interface is very simple to use. Especially, users can also play YouTube videos directly on Cool Player via video URL. The following article will guide you how to use the Cool Player application on Windows 10.

Instructions for using Cool Player to play music and videos

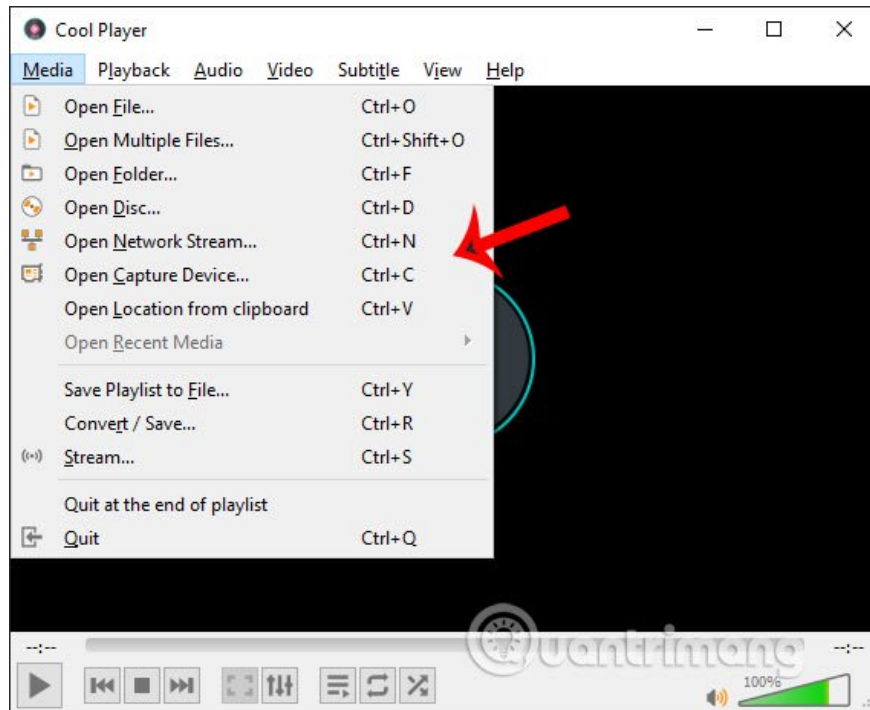

Step 1:

First of all, click the link below to install Cool Player on Windows 10.

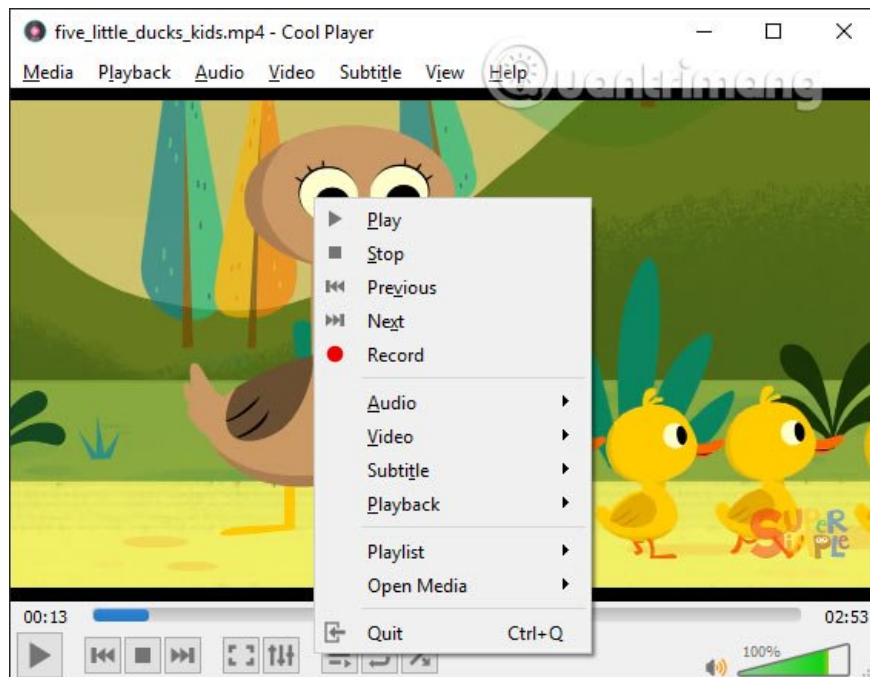

[Download the Cool Player Windows 10 application](#)

Step 2:

The interface of Cool Player looks quite similar to VLC and the usage is similar. Press **Media** to open the music or video available on the computer.

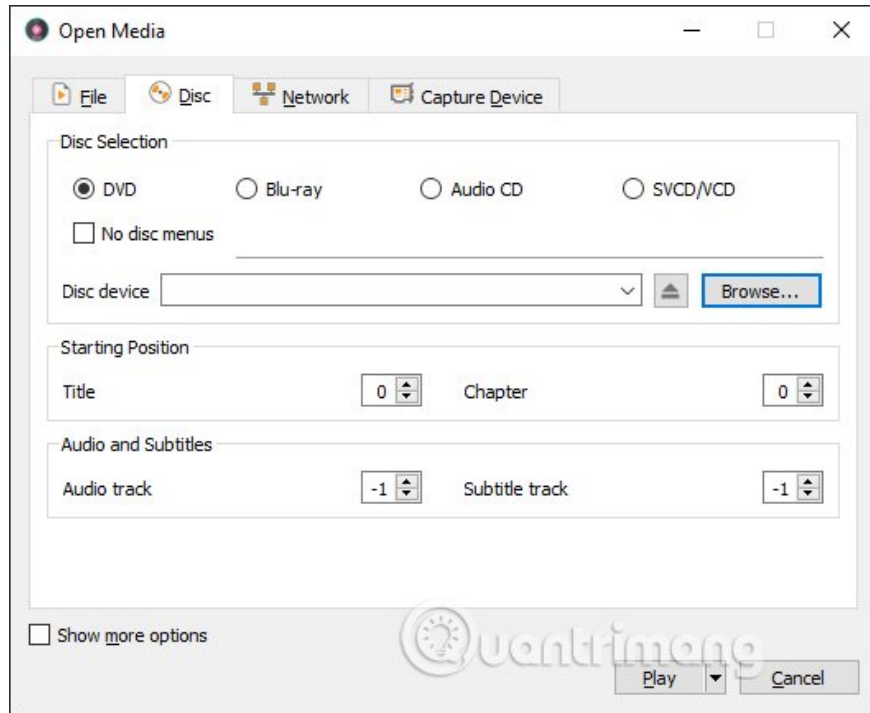

When opening a video on Cool Player and right-clicking on the video, we will have the options shown in the menu as below. The application supports opening nearly 40 video formats such as .nuv, .ogm, .ogv, .rm, .rmvb, .thp, .tp, .ts, .vob, .webm, .wmv, .wtv, .xesc . With audio support about 20 audio formats such as 3ga, .3gpa, .aac, .ac3, .aif, .aifc, .flac, .m4a .

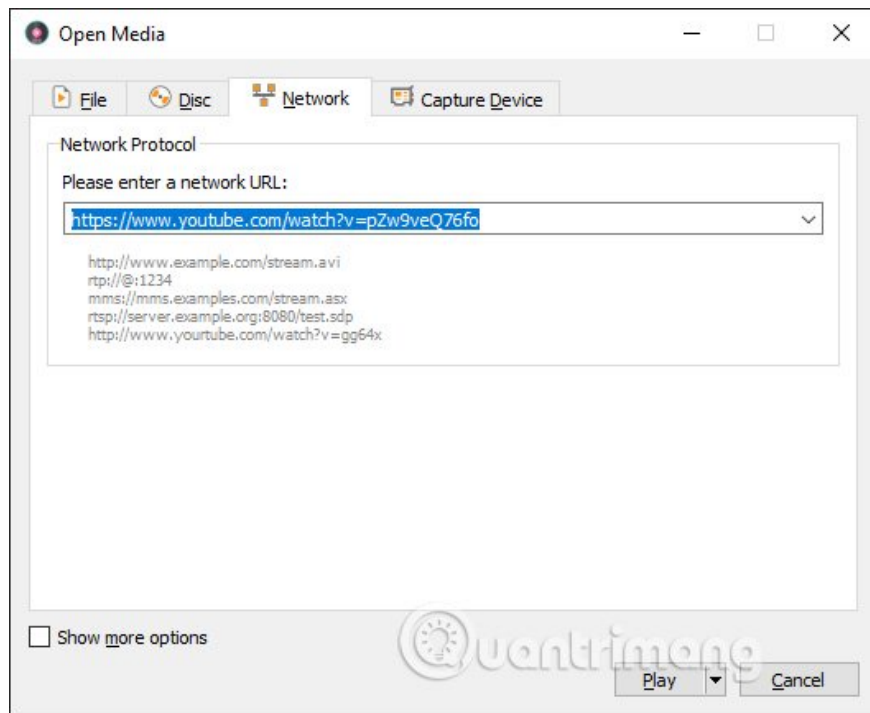

Step 3:

To **open the DVD** , click **Open**, then select **Open Disc** . Display a new interface, select the DVD and click **the Browse button** in the Disc device to select the path to open the DVD folder on the computer and then press Play to play.

Step 4:

To open YouTube videos directly on Cool Player, click on **Media** and select **Open Network Stream**. Then display the frame for users to paste the **YouTube video URL** you want to see. Click Play to play.
